INTERNATIONAL SOCIETY FOR COMPUTERS AND THEIR APPLICATIONS

14th International Conference on Intelligent and Adaptive Systems and Software Engineering

July 20-22, 2005
Novotel Toronto Centre, Toronto, Canada

TECHNICAL PAPER INDEX

INTELLIGENT AND ADAPTIVE SYSTEMS

SIGMA: A Multi-Agent System Architecture for Monitoring and Diagnosis in Supervisory Systems
Fabiano K. T. Tiba and Miriam A. M. Capretz (University of Western Ontario, Canada)................................. 1

Autonomic Computing Based on Generalized Particle Model
Dianxun Shuai, Rui Gong, Xing Wang, Wenlang Wang, Rongrong Liu (East China University of Science and Technology, China) ............................................................................................................ 7

Job Scheduling with Real-Time Optimal Control
Hsiu-Jy Ho and Wei-Ming Lin (The University of Texas at San Antonio, USA).............................................. 13

Self-Organizing Clustering Based on Generalized Particle Model
Dianxun Shuai, Rongrong Liu, Wenlan Wang, Fangliang Xue (East China University of Science and Technology, China) .................................................................................................................... 19

Improving Particle Swarm Optimizer Using the Nonlinear Simplex Method at Late Stage
Yuhui Qiu and Fang Wang (Southwest China Normal University, China) ....................................................... 25

History Abstractions of an Interactive Frequency Table
Walter Dosch (University of Lübeck, Germany) .......................................................................................... 31

Neuro Fuzzy Techniques Using MATLAB/SIMULINK Applied to Real Process
Tharwat E. Alhanafy (Al-Azhar University, Egypt), Tarek S. Sobh (Egyptian Armed Forces, Egypt) and Awad H. Khalli (The American University in Cairo, Egypt) ................................................................. 40

People Tracking System with Lighting Effect Estimation in Open Environment
Ching-Tang Hsieh, Yeh-Kuang Wu and Chia-Yi Chen (Tamkang University, Taiwan) .................................. 46

Creating Short Length Masks using Vertical Processing
George Hamer and William Perrizo (North Dakota State University, USA) ................................................ 51

A Weighted-Tree Simplicity Algorithm for Similarity Matching of Partial Product Descriptions
Lu Yang, Biplob K. Sarker, Virendrakumar C. Bhavsar (University of New Brunswick, Canada) and Harold Boley (National Research Council, Canada) .......................................................... 55

SOFTWARE ENGINEERING

Stochastic Cost Estimation and Risk Analysis in Managing Software Projects
A. M. Connor and S. G. MacDonell (Auckland University of Technology, New Zealand) .................................. 140

Automated Code Generation for Database Applications
Ehat Ercanli, Necati Ercan Ozgencil and Murat Kahraman Gungor (Syracuse University, USA) .................. 145

An Api for Transparent Distributed Vertical Data Mining
Masum Serazi, Amal Perera, Taufik Abidin (North Dakota State University, USA), George Hamer
(South Dakota State University, USA) and William Perrizo (North Dakota State University, USA) ........... 151

Automatic Checking of the Security Systems’ Topologies
Kaninda Musumbu (University of Bordeaux 1, France) ............................................................................... 157

Improving Intrusion Awareness with a Neural Network Classifier
M. Hentea (Southwestern Oklahoma State University, USA) ................................................................. 163

Secure Steganography using the Most Significant Bits
George Hamer and William Perrizo (North Dakota State University, USA) ............................................ 169

A UML Framework for Web Services-Based Clinical Decision Support
Christina Catley, Dorina C. Petriu (Carleton University, Canada) and Monique Frize
(Carleton University and University of Ottawa, Canada) ......................................................................... 174

An Expert System for Web Site Navigation using Client Side Scripting
Scott James Williamson and Chris Liu (Trent University, Canada) ........................................................ 180

A Framework for Contextual Information Retrieval from the WWW
D. K. Lumbu, A. M. Connor and S. G. MacDonell (Auckland University of Technology, New Zealand) .... 185

Java Autotester for the Triangle Function
Narayan C. Debnath (Winona State University, USA), Maria Alejandra Barrera (Universidad Nacional
de Catamarca, Argentina), Mark Burgin (University of California-Los Angeles, USA), Joshua Wilson
and Joseph Cropper (Winona State University, USA) ................................................................. 190

A Practical Approach for Requirements Elicitation
Ahmed M. Salem and Kevin Leung (California State University, Sacramento, USA) .......................... 196

Testing as Specification in Agile Methods
A. Dasso (Universidad Nacional de San Luis, Argentina), N. Debnath (Winona State University,
USA), A. Funes, D. Riesco, G. Montejano and R. Uzal (Universidad Nacional de San Luis, Argentina) .... 202

A Design Space for Context-Sensitive User Interfaces
Jean Vanderdonckt, Donatien Grolaux, Peter Van Roy, Quentin Limbourg, Benoit Macq and
Benoît Michel (Université catholique de Louvain, Belgium) ..................................................................... 207

A Empirical Comparison of Monte Carlo Methods for Simulating Random Variants
that follow Cubic Polynomial Based Mathematical Models
Craig Hourie, James W. Jury and Richard T. Hurley (Trent University, Canada) ...................................... 215

High-Level Design of a Ternary Asynchronous Multiplexer
Walter Dosch (University of Lübeck, Germany) and W. L. Yeung (Lingnan University, Hong Kong) ....... 221

Inconsistencies of CK Metrics And Proposed Methods of Removal
Sunint Saini (Guru Nanak Dev Engineering College, India) ................................................................. 229
Towards a Unified Approach for Cross-Platform Software Development
Jeffery A. Stuart, Sergiu M. Dascalu and Frederick C. Harris Jr. (University of Nevada, Reno, USA) ....... 235

Dynamic Analysis of Object-Oriented Programs Using State Machines and ECA Rules
S. M. Babamir (Kashan University, Iran) and S. Jalili (Tarbiat Modares University, Iran) ......................... 243

Hzhr: A Software Package Of Finite Difference Methods For Two-Point Boundary Value Problems
H. M. Habib and E. R. El-Zahar (El-Menoufia University, Egypt) ......................................................... 249

Sequence Algorithms for Boundary Value Analysis with Constrained Input Parameters
Wenying Feng (Trent University, Canada) and Zhenhua Zhang (Carnegie Mellon University, USA) ........... 255

A Tool for Test Case Generation and Evaluation
Ahmed M. Salem (California State University, Sacramento, USA) ......................................................... 261

Autonomous Requirements Specification Processing using Natural Language Processing
S. G. MacDonell, Kyongho Min and A.M. Connor (Auckland University of Technology, New Zealand) ...... 266

Flexibility in Satisfying Intentions in a Situational Context
Inès Bayoudh Saâdi, Yassine Jamoussi and Henda Ben Ghezala (Manouba University, Tunisia) ............... 271

Generating a Domain Model from a Use Case Model
Nayanamana Samarasinghe and Stéphane S. Somé (University of Ottowa, Canada) ............................. 278
