INTERNATIONAL SOCIETY FOR COMPUTERS AND THEIR APPLICATIONS

18th International Conference on Computer Applications in Industry and Engineering

November 9-11, 2005
Sheraton Moana Surfrider, Honolulu, Hawaii  USA

TECHNICAL PAPER INDEX

MODELING AND SIMULATION

Constructing Comprehensive Behaviors: A Simulation Study
Thomas C. Henderson and Xinwei Xue (University of Utah, USA) .............................................................. 1

Modeling Arrival Flight Traffic Using Arena®
Charles J. Kim, Daniel A. Akinbodunse and Chibuike Nwakamma (Howard University, USA) ......................... 9

Computational Model of Temperatures in a Covered Water Body Responding to Solar Insolation
J. Rhoads, J. Faulk and N. L. Passos (Midwestern State University, USA)............................................................. 15

A Computerized Ecological Assessment of Families of Beetles from the Chihuahuan Desert of West Texas
M. Shipley, S. Middleton, and N. L. Passos (Midwestern State University, USA) .............................................. 21

Precision Localization in Monte Carlo Sensor Networks
Thomas C. Henderson (University of Utah, USA), Edward Grant, Kyle Luthy, Leonardo Mattos and Matt Craver (North Carolina State University, USA) ................................................................................ 26

Design of a Virtual Private Network for the Real-time Control of the Cameroon Power Network
Emmanuel Tanyi (National Polytechnic Institute, Cameroon), Jules Tsochounie, Marcellin Nkenlifack and Thierry Noulamo (University Institute of Technology, Cameroon)................................................................. 32

Monte Carlo Sensor Networks
Thomas C. Henderson, Brandt Erickson, and Travis Longoria (University of Utah, USA), Edward Grant, Kyle Luthy, Leonardo Mattos and Matt Craver (North Carolina State University, USA) ...................... 38

A Decision Tree Based Classification Model to Automate Trip Purpose Derivation
Terry Griffin (Midwestern State University, USA) and Yan Huang (University of North Texas, USA) ............ 44
SOFTWARE ENGINEERING

Implementing Reusable Components for Embedded Automotive Applications: An Approach Using Graphical Tools at UTC Fuel Cells
Haiying Ren and William C. Rogers (UTC Fuel Cells, USA) ................................................................. 50

Event Processing Software for Intelligent Security Monitoring and Alarm System
James H. Graham and Jason Walton (University of Louisville, USA) .................................................. 55

Application of Object Oriented Performance Model To Aspects of a Health Care Management System
Amal Abdel-raouf, Reda Ammar and Howard Sholl (University of Connecticut, USA) ......................... 61

Toward an Algorithm Understanding Approach for Legacy Systems Renovation
Jérémie Hattat, Laurent Deruelle, Henri Basson (Université du Littoral, France) Pascal Flament and Sylvain Breuzard (Norsys Company, France) ................................................................. 67

System for Testing and Validating Complex VoIP Software
Teck-Kuen Chua and David C. Pheanis (Arizona State University, USA) ........................................... 73

Object-Oriented Software Testing Using UML Models
Benzir MD Ahmed (North Dakota State University, USA) and Vijayakumar Shanmugasundaram (Concordia College, USA) ................................................................. 79

Dynamic Component Deployment and (Re) Configuration Using a Unified Framework
Abdelmadjid Ketfi and Noureddine Belkhatir (LSR-IMAG, France) ..................................................... 85

Using UML to Model Distributed System Architectures
M. Nikolaidou, N. Alexopoulou, A. Tsadimas (Harokopio University of Athens and University of Athens, Greece) A. Dais (University of Athens, Greece) and D. Anagnostopoulos (Harokopio University of Athens, Greece) ..................................................... 91

COMPUTER ARCHITECTURE

A New Generalized Cellular Automata: Architecture and VLSI Circuital Implementation
Dianxun Shuai, Li Luo, Xing Wang, Rongrong Liu and Wenlan Wang (East China University of Science and Technology, China) ................................................................. 97

Enhancing the Accuracy of O-GEHL Branch Predictor: Analysis and Approach
Ekkasit Tiamkaew (Naresuan University, Thailand) and Angkul Kongmunvattana (Columbus State University, USA) ................................................................. 103

A Matrix Processor for Math-intensive Applications
Stanislav G. Sedukhin (The University of Aizu, Japan) and Mostafa I. Soliman (South Valley University, Egypt) ................................................................. 109

Enhanced Distributed Processor Sharing Through the Use of Mini-Servers
Reid Kaiser (Harris Technical Services Corp., USA) and Mary Jane Willshire (Colorado Technical University, USA) ................................................................. 115
BIOMEDICAL SYSTEMS AND BIOINFORMATICS

A Complex Dynamic Model for Cancer Growth and Metastasis
Marc Colangelo (McMaster University, Canada), Phedias Diamandis (University of Toronto, Canada) and Jon Stone (McMaster University, Canada) ................................................................. 121

Intelligent Agent Technique in Age Related Measurements
M. Burgin (University of California, Los Angeles, USA), M. E. Cohen and D. L. Hudson (University of California, San Francisco, USA) .................................................................................. 129

Disulphide Connectivity Prediction in Proteins Based on Secondary Structures and Cysteine Separation
Raju Balakrishnan (IBM Global Services India Pvt Ltd., India) ........................................................................ 135

Use of Ontology-Based Multi-Agent Systems in the Biomedical Domain
Maja Hadzic, Elizabeth Chang (Curtin University of Technology, Australia) .................................................... 141

INFORMATION SYSTEMS AND DATABASES

Integrating Data Changes with Data from Data Service Providers
Uwe Heinkel, Carmen Constantinescu and Bernhard Mitschang (University of Stuttgart, Germany) ........................................................................................................... 146

OLAP Application Development for Multiple Versions Query in Multidimensional Database Systems
Jarernsri L. Mitrpanont and Somchart Fugkeaw (Mahidol University, Thailand) ............................................ 152

A System for Multimedia Information Management and Retrieval
Vincenzo Moscato, Antonio Picariello and Antonio M. Rinaldi (University of Naples Federico II, Italy) .... 158

RFID: The Emergence of a Billion Dollar Industry
Vijayakumar Shanmugasundaram, Cody Marshall and Nawang Bajracharya (Concordia College, USA) .... 164

CONTROL SYSTEMS

Secure SCADA Communications, Monitoring and Control over the Internet
Sandip C. Patel, James H. Graham, Patricia Ralston and Roberto Tantalean-Carrasco (University of Louisville, USA) ........................................................................................................... 169

Practical Methods for Deadline Scheduling using Process Residual Time
Sarah Tasneem (Eastern Connecticut State University, USA), Howard Sholl and Reda Ammar (University of Connecticut, USA) ................................................................. 175

Intelligent Systems for Water Level Prediction
Carl Steidley, Alex Sadoskivi, Phillipe Tissot, Ray Bachnak and Zack Bowles (Texas A&M University – Corpus Christi, USA) ................................................................. 181

A Multivariate State-Space Model of the Southern Grid of the Cameroonian Power System
Emmanuel Tanyi (National Polytechnic Institute, Cameroon) and Jules Tschemounie (Institute of Technology, Cameroon) ................................................................. 186
INTERNET AND WEB-BASED SYSTEMS

A Survey of QoS Computation for Web Service Profiling
Witold Abramowicz, Agata Godlewska, Julia Gwizdała, Tomasz Jakubowski, Monika Kaczmarek, Marek Kowalkiewicz and Dominik Zyskowski (The Poznan University of Economics, Poland) .......... 192

mGrid: A Lightweight Computational Grid based on Jini
Ping-Jer Yeh, Shang-Chien Shen, and Shyan-Ming Yuan (National Chiao Tung University, Taiwan) .......... 198

Managing the Network Usage of Applications
Chi-Huang Chiu and Shyan-Ming Yuan (National Chiao Tung University, Taiwan) .................................................. 204

A Conceptual Architecture of Distributed Web Services for Service Ecosystems
Chen Wu, Elizabeth Chang (Curtin University of Technology, Australia) .......................................................... 209

DATA MINING AND PATTERN RECOGNITION

Combining Classification Algorithms Using Demspter’s Rule of Combination
Huseyin Aygun (Turkish Naval Academy, Turkey) and Esref Adali (Istanbul Technical University, Turkey) .......................................................... 215

Feature Selection by Evolutionary Computing: Application on Diagnosis by Pattern Recognition Approach
O. Ondel, E. Bottleux (Ecole Centrale de Lyon, France) and G. Clerc (University of Lyon I, France) .......... 219

Defect Detection in Textile Fabrics Using Gabor Wavelet Networks
K.L. Mak and P. Peng (The University of Hong Kong, Hong Kong) ................................................................. 226

Mining Weighted Support Affinity Patterns
Unil Yun and John J. Leggett (Texas A&M University, USA) .......................................................... 232

APPLICATIONS

RP-Aided Design in Architectural Studio
Naai-Jung Shih (National Taiwan University of Science and Technology, Taiwan) ........................................ 238

How Soccer Playing Robots Learn to See -- The Vision System of the Vienna Cubes
H. Wahl, R. K. Pucher, A. Hofmann and A. Mense (University of Applied Sciences, Austria) ................................ 244

A Framework and a Methodology for the Design and Development of Collaborative Systems and Platforms
Waleed W. Smari (University of Dayton, USA), William K. McQuay (Air Force Research Laboratory, Wright-Patterson AFB, USA), Seung-yun Kim and Ashish Godbole (University of Dayton, USA) ............. 249

A Design and Implementation of Wireless Presentation System
Ming-Chun Cheng and Shyan-Ming Yuan (National Chiao Tung University, Taiwan) ........................................ 257

Limn Matrix: A Tool for Visualizing Large, Distributed, High-Dimension Data Sets
Jing Zhang, Di Cook and Les Miller (Iowa State University, USA) ............................................................... 263

Mutually Coupled Higher Order and Composite Network Filter Design
Aboudou S. Akambi, Aldo M. Scandurra and Bruce P. Johnson (University of Nevada, Reno, USA) ............ 269

PCI-EXPRESS Transaction Layer and Application Layer of A 3-Port Switch
Ashraf El-Nakhal and Behnam Arad (California State University, Sacramento, USA) ..................................... 274

Graph Partitioning for Circuit Testability
Hassan Farhat (University of Nebraska, USA) ............................................................................. 280
SPECIAL SESSION: SOFTWARE ENGINEERING: DEVELOPMENT AND APPLICATIONS

Lebanese Colloquial Arabic Speech Recognition
Ramzi A. Haraty and Omar el Ariss (Lebanese American University, Lebanon) ........................................ 285

A Practical Payroll System Design that Aimed at Small Business Management
El Amine Slaoui, Mike Marrone, Desislava Nikolova and Wenying Feng (Trent University, Canada) ............... 292

Modified RSA in the Domains of Gaussian Integers and Polynomials Over Finite Fields
A. N. El-Kassar (Beirut Arab University, Lebanon), Ramzi Haraty (Lebanese American University, Lebanon), Y. A. Awad (Lebanese International University, Lebanon) and N. C. Debnath (Winona State University, USA) ........................................................................................................ 298

Fuzzy Set Based Software Measurement and Estimation
M. Burgin (University of California, Los Angeles, USA) and N. Debnath (Winona State University, USA) .... 304

NEURAL NETWORKS AND FUZZY LOGIC

Hardware Realization of Fuzzy CMAC Based on Discrete Incremental Clustering
Abdul Wahab and Yu Changbin (Nanyang Technological University, Singapore) ........................................ 310

An Adaptive Fuzzy Inference Fitness Function for Evolutionary Robot Learning
Supriya Bhat (San Diego State University, USA), Edward Grant (North Carolina State University, USA) and Gordon K. Lee (San Diego State University, USA) ................................................................. 316

Intelligent System for Cutting Tool Selection and Its Tool Life
Deok Hee Nam (Wilberforce University, USA) and Harpreet Singh (Wayne State University, USA) ............ 322

Investigation of the Effects of Noise and Plant Parameter Variations for an Adaptive Neuro Fuzzy Inference Controller with Evolutionary Tuning
Jay Kothari and Gordon K. Lee (San Diego State University, USA) .............................................................. 328

PATTERN RECOGNITION

Mozart to Metallica: A Comparison of Musical Sequences and Similarities
Stuart Cunningham, Vic Grout and Harry Bergen (University of Wales, UK) ............................................. 332

Walking Tree Method for Stereo Vision
Tai Hsu (Northwestern Polytechnic University, USA) and Paul Cull (Oregon State University, USA) .......... 340

A New Algorithm for Order-Independent Clustering
Ma Li, Abdul Wahab and Chai Quek (Nanyang Technological University, Singapore) ................................ 344

Diagnosis System of a Set "Converter-Induction Machine-Load" by Pattern Recognition Approach
O. Ondel, E. Boutleux (Ecole Centrale de Lyon, France) and G. Clerc (University of Lyon I, France) ........ 350

Distributed and Scalable Vision System for Quality Control of Cherries
V. Delligeon, G. Mahe, C. Rosenberger (Université d’Orléans, France), P. Bro (University of Talca, Curicó, Chile) and W. Smari (University of Dayton, USA) ................................................................. 358
COMPUTER SECURITY

**CCFDP: Collaborative Click Fraud Detection and Prevention System**
Li Ge (Hosting.com, USA), Mehmed Kantardzic (University of Louisville, USA) and Darren King (Hosting.com, USA) ............................................................................................................................ 366

**FPGA Based Implementation of MD5 Message-Digest Algorithm for IPSEC Authentication**
Bala Krishnan D Aachi, Ajaykrishna Sreehari and Parimal Patel (University of Texas at San Antonio, USA) ............................................................................................................................ 372

**A Secure One-Time Password Authentication Using Cellular Automata**
Hee-Jung Yoon, Jun-Cheol Jeon, Kee-Won Kim and Kee-Young Yoo (Kyungpook National University, Korea) ............................................................................................................................ 376

**Improved Design and Implementation of Network Intrusion Detection System for Gigabit Network Traffic Using FPGA**
Parimal Patel, Ashok Kumar Tummala, Hari Babu Ramineni and Wei-Ming Lin (University of Texas at San Antonio, USA) ............................................................................................................................ 382

**New Authentication Scheme with No Verification Table**
Hye-Jin Yang, Jun-Cheol Jeon, Kee-Won Kim, Kee-Young Yoo (Kyungpook National University, Korea) ........................................................... 387

COMPUTERS IN EDUCATION

**Integrating Hardware and Software in Early Research in Computer Science**
Hassan Farhat (University of Nebraska, USA) ............................................................................................................................ 390

**Roadmap for Training Processes Using E-Learning Systems**
Eduardo Islas, Miguel Pérez, Guillermo Rodríguez (Instituto de Investigaciones Eléctricas, México), Israel Paredes (Comisión Federal de Electricidad, México) Ivonne Ávila, Miguel Mendoza (Instituto de Investigaciones Eléctricas, México) ............................................................................................................................ 395

**Experiences Using Defect Checklists in Software Engineering Education**
Kendra Cooper, Sheila Liddle (The University of Texas at Dallas, USA) and Sergiu Dascalu (University of Nevada, Reno, USA) ............................................................................................................................ 402

**Database Tools to Administer Programmingland**
Curt Hill (Valley City State University, USA) and Vijayakumar Shanmugasundaram (Concordia College, USA) ............................................................................................................................ 410
