Society of Plastics Engineers

7th Thermoplastic Elastomers Topical Conference
2005

TPE TOPCON

“Expanding Materials Applications & Markets”

September 12 – 14, 2005
Akron, Ohio, USA

Printed from e-media with permission by:
Curran Associates, Inc.
57 Morehouse Lane
Red Hook, NY 12571

ISBN: 978-1-60423-589-0

Some format issues inherent in the e-media version may also appear in this print version.
STATEMENT OF POLICY ON RELEASE FOR PUBLICATION OF SPE CONFERENCE PAPERS

Selected conference papers and discussions are added to SPE literature through publication by the Society in its established periodicals.

All papers submitted to and accepted by the Society for presentation at one of its conferences are copyrighted by and are the property of the Society of Plastics Engineers. Publication rights are reserved by the Society.

1. All papers submitted to and accepted by the Society for presentation at one of its conferences are copyrighted by and are the property of the Society of Plastics Engineers. Publication rights are reserved by the Society.

2. As soon as practicable after a conference, the Society will contact all authors whose papers are being considered for publication in an SPE journal or Plastics Engineering.

3. The Society shall not be responsible for statements or opinions expressed in publications, reports, papers, or discussions at its meetings unless specifically approved by the Council.

4. An abstract, not to exceed one hundred words, may be published without further permission from the Society provided appropriate source credit is given to the Society of Plastics Engineers and the conference at which the paper was presented.
# Table of Contents

11. **Thermoplastic Elastomers: Changes in the Value Chain - A Strategic Playground**, Howard Blum, *Kline*

23. **The Versatility of (Meth)acrylates in Peroxide Cured Thermoplastic Elastomer Vulcanizates**, Michael Bailey, Richard Costin & John E. Lohr, *Sartomer Company*

32. **Novel Ethylene/Alpha-Olefin Copolymer – Polypropylene Blends for Automotive Thermoformed Sheet Applications**, Laura B. Weaver, Mike Laughner & Doug Waszeciak, *DuPont Dow Elastomers*

42. **Novel Impact Modification in a TPO System**, Anna P. Andrews, Anthony Dean & Paul DeFranco, *Ferro Corporation*

56. **Optimization of Twin Screw Extruders with Respect to Torque, Volume and Speed for Thermoplastic Elastomers**, Steven Jackson, Eberhard Dieterich Corperion US, & Werner Widemann, Corperion Werner & Pfleiderer, Stuttgart

76. **Dupont® ETPV for Extrusion Applications**, Mark S. Jacobson, Shailish Doshi, H. Chul Lee & Orvar Otterstedt, *DuPont*

81. **Zeotherm® TPVs for Automotive Boots, Bellows, and Air Duct Applications**, Brian J. Cail, Samuel C. Harber & Mark A. Nevitt, *Zeon Chemicals L.P.*

109 Basic Performance Characteristics of SIBS/TPU Blends, David Marshall, Hideki Ishikawa, Hideki Kawai & Shigemi Matsumoto, Kaneka Texas

113 Polybutadiene-Based Thermoplastic Urethanes: Chemistry and Applications, Herbert Chao, Nan Tian, Michael Bailey & Jindrich Pytela, Sartomer Co.

120 New Generation of Ultrasoft, Nonblocking TPUs with Superior Mechanical Properties for Biomedical Applications, Kenneth L. Kull, Timofey G. Gerasinov & Julie P. Harmon, University of South Florida, Consolidated Polymer Tech.

129 Plasticizer-Free TPU: Time & Temperature Effects, Rabeh Elleithy, Armando Sardanopoli, Elastollan® TPU BASF Corp

135 New Faster Processing Soft TPUs, Gerald DiBattista, Eva Gestermann & Wolfgang Kaufhold, Bayer MaterialScience

143 Impact Modification of Poly(2,6-Dimethyl-1,4-Phenylene Oxide) (PPO) with Polyisobutylene-based Thermoplastic Rubbers, Yong Moon Kwon, Judit Puskas, Volker Altstädt & Marianna Kontopoulou, University of Akron

149 Rheokinetics and the Effect of Shear Rate on the Kinetics of Linear Polyurethane Formation, A. H. Navarchian, F. Picchioni & L.P.B.M. Janssen, Dept of Chemical Engineering, Univ. of Isfahan, Iran, Univ. of Groningen, The Netherlands

158 Creating Biomedical Thermoplastic Elastomers by Blending Hydrophilic Polymers with Thermoplastic Polyurethanes and Polyether Block Amide Copolymers, Lawrence A. Acquarulo Jr., Lawrence Johnson, Amar S. Nilajkar & Charles O'Neil, Foster Corp.
164 Increasing the End-Use Temperature of TPU Products, Mahmoud Ghanem, Oliver Henze & Armando Sardonopoli, BASF

170 New TPV for Improved Injection Molding Productivity, Gary Lawrence, Santoprene Specialty Products

175 Innovative Solutions for Foamed Thermoplastic Vulcanize Automotive Weatherseals, Sunny Jacob, Marvin Hill, Eric Jourdain, Felix Zacarias, Lisa Dimitrijevs, Dave Evanko & Jere Anderson, Santoprene Specialty Products

188 Low Friction Coating Materials for Automotive Sealing System Applications, Y. D. Wang, Hua Cai, Ryszard Brzoskowski & Ken Moore, DSM TPE

195 Thermoset EPDM Bondable TPV for Weatherseal Corner Molding, Kevin Cai, Hamid Tavakoli, Hoan Tran & Satchit Srinivasan, Solvay

201 The Use of Sarlink® TPV in a New Glazing Module (The Skoda Octavia Case), Ger Vroomen Chris LaTulippe & Klaus-Peter Maass, DSM

208 Recent Developments in Styrenic Block Copolymer Technology, Bing Yang, KRATON Polymers U.S. LLC

212 Septon® V9000 Crosslinkable Styrenic Block Copolymers, Brian Chapman, SEPTON Company of America

218 A Novel Polyamide Overmold TPE, Jiren Gu, Krishna Venkataswamy & Joe Gerkhardt, GLS Corp.
