STATEMENT OF POLICY ON RELEASE FOR PUBLICATION OF SPE CONFERENCE PAPERS

Selected conference papers and discussions are added to SPE literature through publication by the Society in its established periodicals

1. All papers submitted to and accepted by the Society for presentation at one of its conferences (including ANTEC) are copyrighted by and are the property of Society of Plastics Engineers. Publication rights are reserved by the Society.

2. As soon as is practicable after a conference, the Society will contact all authors whose papers are being considered for publication in a SPE journal of Plastics Engineering.

3. The Society shall not be responsible for statements or opinions expressed in publications, reports, papers or discussions at its meetings unless specifically approved by the Council.

4. An abstract, not to exceed seventy-five words may be published without further permission from the Society provided appropriate source credit is given to Society of Plastics Engineers and the conference (including dates and location) at which the paper was presented.

This CD-ROM of the Annual Global Plastics Environmental Conference was produced for the Society of Plastics Engineers - Environmental Division by Omnipress. This product contains Adobe Acrobat® software with OmniPRO structuring, formatting and design features. Duplication of this CD-ROM and its content in print or digital form for the purpose of sharing with others is prohibited without permission from Society of Plastics Engineers - Environmental Division and Omnipress. Also, copying this product’s instructions and/or designs for use on future CD-ROMs or digital products is prohibited without written permission from Omnipress and Adobe® Systems Inc.

In no event will Omnipress or its suppliers be liable for any consequential or incidental damages to your hardware or other software resulting from the installation and/or use of this CD-ROM. Adobe®, Acrobat® and the Acrobat logo are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions.

High Density Composites Replace Lead ...................................................................................... 186
   R. Durkee

Formulation, Processing and Properties of Compression Molded Soy Protein Based Plastics: A Review .............................................................................................................. 193
   B. Ralston, T. Osswald

Meeting Sustainability Goals and Environmental Mandates Using Thermoformed Packaging ........................................................................................................................................ 202
   M. Brown

Biotechnology Derived Raw Materials for Polymers .............................................................................................. 214
   L. Drumm

Impact of Biotechnology and Next Generation Materials ......................................................................................... 248
   M. Stowers

NatureWorks® PLA – Commercial Development of Biopolymers on a World Scale .............................. 272
   B. Glasbrenner

Mechanical and Rheological Behavior of Recycled Spray Painted Parts ...................................................... 277
   R. Petitt, J. Boldt, M. Koh

The Effect of Paint Removal on Oxidative Induction Time of Thermoplastic Olefins ................................. 286
   E. Lebert, S. Kozora

Utilization of Waste Plastics in Construction of Flexible Pavements ........................................................ 296
   R. Vasudevan, S. Rajasekaran, S. Samanta

VOLUME II

An Investigation into the Reuse of Painted TPO Regrind .................................................................................. 363
   A. Nadeau, H. Valia, J. Perras

Plastics from Renewable Resources ..................................................................................................................... 370
   R. Narayan

PCR Use in Mobile Refuse Containers Closing the Loop ...................................................................................... 377
   N. Lee

An Economical & Environmental Solution for Increasing the Recycler's Profits for Reclaiming R-PET from Dirty Post-Consumer PET Bottles ............................................................... 404
   A. Georges

Effects of Elasticity on the Spraying of a Non-Newtonian Fluid ........................................................................ 429
   G. Park, G. Harrison

Mechanical and Thermo-mechanical Studies of Poly (lactic acid)
PLA/talc/recycled Newspaper Fiber Hybrid Composites ........................................................................... 445
   M. Huda, A. Mohanty, L. Drzal, M. Misra, K. Williams, D. Mielewski

Wetlay Manufacture of Cellulose Pulp Fiber Reinforced Poly(trimethylene terephthalate) .................................................. 458
   T. Bullions

Corrosion-Free Solution for Sustainable Water and Wastewater Systems ..................................................... 469
   B. Walker

Emission Modeling of Styrene from Vinyl Ester Resin .................................................................................... 477
   C. Ulven, R. Jain, U. Vaidya, J. Sands, J. La Scala, J. Orlicki
Plastic Film Recovery: A Strategy for Success ................................................................. 483
  N. Bellucci

New Composites based on Polylactide, Nanoclay, and Rubber ................................. 512
  T. Li, S. Gong, L. Turng

The Process of Recycling of Polyesters with Polymeric Chain Extenders .................... 525
  M. Villalobos, A. Awojulu, G. Turco

The Effect of Time on Crosslinked Polyethylene Reprocessability ................................ 531
  P. Koch, T. Novitsky, N. Manuel

Potential Impact of the Use of Environmental Technologies on the “Greening” of the Lawn and Garden Care Industry ................................................................. 536
  R. Martinez, M. Abbaoui, A. Haynes

Investigation of the Use of Reclaimed Rubber as Modifier Additives in Polyethylene in Injection Molding Products ................................................................. 571
  M. Tabrizi

Soy Protein Based Plastics – A Safer Environment ......................................................... 575
  M. Vlad, J. Jane

Plastics as a Sustainable Building Element for Today’s Construction Industry ............... 581
  M. Levy

Post Consumer Resin Quality Assurance and Testing Protocol Project ......................... 595
  E. Rojas

Biodegradable PLA Elastomers based on bis-Oxazilnine Coupling ............................... 617
  P. Bonsignore

Biocomposites from Waste Plastics ............................................................................... 632
  M. Kozlowski, A. Kozlowska

Meeting the Plastics Challenges for Toxic Materials ...................................................... 639
  K. Russell, D. Sackett

An Environmentally Friendly Alternative to FRP ......................................................... 645
  P. Zuber, J. Cai, R. Myers, B. Thompson, F. Knight, A. Ibay

Radio Frequency IDentification and Plastics Recycling ................................................ 655
  J. R. Stigall

SUSTAINABLE PACKAGING: Infusing Recyclability and Compostability Properties as Common Properties in Transfer and Commercial Packaging ......................... 676
  S. Seydel

STUDENT PAPERS

Structure and Properties of Natural Fiber Composites with Fully Biodegradable Compositions ................................................................. 681
  M. Kamath, G. Bhat, D. Parikh, D. Mueller

Microwave Processing of Natural Fiber Composites and Their Characterization ............ 682
  N. Sgriccia, M. Hawley, M. Misra

Effect of Temperature, Styrene Content, Resin Depth, and Molecular Weight of Resin on the Emission Behavior of Styrene from Vinyl Ester Resins ......................... 683
  C. Ulven, R. Jain, U. Vaidya, J. Sands, J. La Scala, J. Orlicki
Injection Molded Novel Biodegradable Plastics from the Blends of Byproduct from Corn Based Ethanol Industry and Poly (?-caprol) ................................................................. 684
   D. Aithani, A. Mohanty

Recovery of Carolactam from Nylon 6 by Catalytic Depolymerization in the Melt .............. 685
   L. Bryson

Long Glass Fiber Reinforced Post-Consumer Carpet: Processing, Properties and Products ................................................................................................................. 686
   X. Xu

Natural Fiber Reinforced Post-Consumer Carpet ........................................................................ 687
   S. Samanta, R. Casey

Adding Value to Recycled High-Density Polyethylene through the Addition of Multi-Scale Reinforcements ...................................................................................... 688
   M. Hill, L. Goettler
