RELEASE FOR PUBLICATION OF CONFERENCE PAPERS

An SPE conference is a forum for discussion of contributions to the scientific and engineering knowledge of plastics. Conference preprints aid communications between engineering speakers and audience, encouraging meaningful discussion. They are not a substitute for publication. Selected conference papers and discussions are added to the literature through publication by the Society, as in Plastics Engineering or Polymer Engineering and Science. Others are released for publication elsewhere in accordance with the following policy:

1. All papers submitted to and accepted by the Society for presentation at one of its Conferences become the property of the Society of Plastics Engineers, Inc., and all publication rights are reserved by the Society.

2. By two weeks after the close of the Conference at which the papers are presented, the Society shall make known to the authors those papers selected to be considered for publication. All other papers are released to their authors with the stipulation that if they are published elsewhere, accompanying credit shall be given the Society and the Conference at which they are presented.

3. The Society shall not grant previous or simultaneous publishing rights to any of the papers it intends to publish.

4. The Society shall not be responsible for statements or opinions advanced in publications, reports, papers, or in discussion at its meetings unless specifically approved by Council.

5. An abstract not to exceed one-third the original of any paper presented at a Conference may be published without further permission from the Society provided accompanying credit is given to the Society of Plastics Engineers and the specific Conference.

# TABLE OF CONTENTS

## VOLUME 1

### SESSION 1: PLENARY: “KEEPING PACE WITH CHANGE”

<table>
<thead>
<tr>
<th>Topic</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Petrochemicals, Tomorrow's Markets with a Focus on Polyolefins</td>
<td>1</td>
</tr>
<tr>
<td>Gary Adams</td>
<td></td>
</tr>
<tr>
<td>Resin: Global &amp; Economic Supply Chain Factors Affecting the Polyolefins Industry</td>
<td>48</td>
</tr>
<tr>
<td>Steve DeHoff</td>
<td></td>
</tr>
<tr>
<td>Walmart's Journey Towards Sustainable Packaging</td>
<td>50</td>
</tr>
<tr>
<td>Matt Kistler</td>
<td></td>
</tr>
<tr>
<td>Opportunities for Advanced Technology Polyolefins in an Imploding Auto Supply Chain</td>
<td>62</td>
</tr>
<tr>
<td>Robert Eller</td>
<td></td>
</tr>
</tbody>
</table>

### SESSION 2: RECENT DEVELOPMENTS IN POLYMERS & CATALYSTS

<table>
<thead>
<tr>
<th>Topic</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Running Leaner and Cleaner with Metocene Melt Blown Polypropylene</td>
<td>97</td>
</tr>
<tr>
<td>Daniele C. Bugada</td>
<td></td>
</tr>
<tr>
<td>Novel Ethylene/Alpha-Olefin Copolymers- Polypropylene Blends for Thermoforming, Blow Molding and Extruded Profiles</td>
<td>127</td>
</tr>
<tr>
<td>Laura B Weaver, Kim L. Walton, Larry Effler</td>
<td></td>
</tr>
<tr>
<td>The Effects of Catalyst and Reactor Variables on Short Chain Branching Profiles in Resins Derived from Chromium Oxide Catalysts</td>
<td>140</td>
</tr>
<tr>
<td>Paul J. DesLauriers, Max P. McDaniel</td>
<td></td>
</tr>
<tr>
<td>Spherilene: Advanced Gas Phase Platform for the Full Range LLDPE/HDPE</td>
<td>162</td>
</tr>
<tr>
<td>Wolfgang Mueller, Ramabhadrjan Balaji</td>
<td></td>
</tr>
<tr>
<td>A Versatile Bimodal HDPE for Film Applications</td>
<td>182</td>
</tr>
<tr>
<td>Cid Miro Neto, Alessandro Bernardi, Fabiano Zanatta</td>
<td></td>
</tr>
<tr>
<td>Enhancing Polyolefins Product Development Through Small Scale Processing and Testing</td>
<td>225</td>
</tr>
<tr>
<td>Jean-Louis Costa, Aurelien Carin, Olivier Halleux, Jean-Pierre Michel</td>
<td></td>
</tr>
<tr>
<td>A Review of the Development and Validation of Reactor Produced Ethylene-Propylene Plastomer for Passenger Side Air Bag Covers</td>
<td>230</td>
</tr>
<tr>
<td>Todd Glogovsky, Nadeem Bokhari</td>
<td></td>
</tr>
</tbody>
</table>
SESSION 3: DEVELOPMENTS IN RIGID PACKAGING – RESINS AND APPLICATIONS

New Polypropylene Packaging Applications ................................................................. 235
  Dustin McWilliams, Steve Robinson
The Next Generation Propylene Based Polymers Provide an Optimum Property Balance of Stiffness, Toughness and Clarity ................................................................. 283
  Staci DeKunder, Malcolm Finlayson, Alan Whetten
Understanding Appropriate ESCR Test Methods for Rotomolding Resins .................. 309
  Henry Hay, Matthew Botros
Toughening Clear Polypropylene Random Copolymers with Styrenic Block Copolymers ....................................................................................................................... 321
  David R. Hansen, Huan Yang, Henk de Groot, Norio Masuko, Jeff Southwick
Barrier Options in Extrusion Blow Molding ................................................................. 337
  Mihaela Penescu

SESSION 4: DURABLE APPLICATIONS FOR POLYOlefins

Views on PE Pipe Durability ......................................................................................... 372
  William Adams
Bimodal Polyethylene Advantages in Pressure Pipe Applications ............................... 385
  Sebastian Joseph
Quantifying the Effects of Polymer Microstructure on Slow Crack Growth Resistance in Polyethylene Resins ................................................................. 406
  Paul J. DesLauriers
Effect of Profile Wall Design on In-Ground Performance ............................................ 429
  James Goddard
The Impact of Soil Embedment and Trench Widths on Corrugated Polyethylene Pipe ......................................................................................................................... 430
  John Kurdziel
Predicting LLDPE Antiblock Blown Film Properties with Statistical Design of Experiments ...................................................................................................................... 438
  John Gardiner

SESSION 5: STABILIZATION OF POLYOlefins: FROM PROCESSING TO END USE APPLICATIONS

Polyolefin Additives Amidst Rapid Change, Suppliers Seek to Sell Value .................... 444
  Fred Gastrock, Ron Babinsky
Extending the Useful Lifetime of Pigmented PP and TPO ........................................ 469
  Leonard Davis, John Zenner, Joe Stretanski
Stabilization Strategies for Filled PP in Automotive Applications ............................ 470
  Brian Johnson, Michael Kearns, Klaus Keck-Antoine, Els Lievens, Cindy Doumen
Update on Latest Developments in Light Stabilization of Polyolefins ......................... 482
  Alban Glaser, Simon Schambony, Steve Goldstein, John Mara
VOLUME 2

Phosphite Process Stabilizers and the New EU Food Regulations .................................................. 488
Michael P. Davies, Don Stevenson, Michael Jakupca

New Perspectives of Polyolefin Processing Stabilization .......................................................... 503
Christoph Krohnke, Peter Staniek

Discoloration Resistant LLDPE; an Overview of Stabilization Issues & Opportunities .......................................................... 511
Rick King III

SESSION 6: “POST REACTOR FUNCTIONALIZATION OF POLYOLEFINS:
FILLERS, MODIFIERS, PROCESS AND APPLICATIONS (PART 1)”

An Integrated Approach to Study Scratch Behavior of TPO's .................................................. 527
R. L. Browning, H. Jiang, G. T. Lim, A. Moyse, H J Sue, E. Moghbelli

New Developments in Multifunctional AntiOxidants for Polyolefins ........................................ 532
Ashok Cholli, Vijayendra Kumar, Rajesh Kumar, Ashish Dhawan, Sui-Zhou Yang, Taizoon Canteenwala

Making Nanotechnology Work in Thermoplastic and Elastomer Compounds with Titanates and Zirconates .......................................................... 538
Salvatore Monte

Oxo-Biodegradation - A Tool to Manage Polyolefin Waste ........................................ 558
Steven Blazey, Michael Stephens

Peroxide-Free Vis-Breaking Additive for Improved Qualities in Meltblown Fabrics .................. 573
Matt Gande, Paul Shields, Michael Roth, Joerg Leukel, Daniel Muller, Jean-Roch Pauquet

Post-Reactor Functionalization of Polyolefins Through Non-Free Radical Processes .................. 583
Costas Tzoganakis, Mercy Bulsari, Qing Li, Alex Penlidis

Performance Enhancing Additives for Polyolefin Films and Automotive Injection Molding .......................................................... 598
Donald Beuke

SESSION 7: PRODUCTIVITY IMPROVEMENTS & SIX SIGMA

Bottom-Line Business Results From Creating a More Innovative & Effective Research Culture in Dow Chemical's "Polyolefins & Elastomers Business", with Latest Implementation in "Dow Automotive .......................................................... 658
Greg Stevens, Steve Swartzmiller

The Practical Use of Six Sigma in the World of Big Business: Six Sigma from a Project Team's Perspective .................................................. 763
Henk Pool

Reducing the Creation of Aged Inventory; A Six Sigma Approach Toward Improving the Supply Chain .......................................................... 769
Lawrence Maynard

How to Reduce Cost in Product and Process Using TRIZ .......................................................... 817
Ellen Domb, Thomas J. Kling
Can We Re-Invent Inventing? .......................................................... 836
Al Johnson

SESSION 8: “POST REACTOR FUNCTIONALIZATION OF POLYOLEFINS:
FILLERS, MODIFIERS, PROCESS AND APPLICATIONS (PART 2)”

New Aluminum Hydroxide and Magnesium Hydroxide Grades with Enhanced
Flame Retardancy .................................................................................. 842
David A. Lee, Rene Herbiet

Recent Developments in Low-Smoke Zero-Halogen Flame Retardancy for Wire &
Cable Applications ............................................................................. 879
Scott Wasserman, Jeffrey Cogen, Geoffrey Brown, Shana Bunker, Robert Gowell, Thomas
Lin, Paul Whaley

Design of Clarified Polypropylene Utilizing a Novel Clarifier ......................... 894
Naoshi Kawamoto, Mitsuru Fukushima, Etsuo Tobita, Tomoyuki Funamizu, Peter Goman

Nucleation of PP - Its Challenges and Solutions ................................................ 901
Philipp Walter, Wiebke Wunderlich, David Hild, Florian Stricker

Long Glass Fiber Polyolefin Systems for Automotive Applications Requiring UV
and Thermal Stability ........................................................................... 909
R. Flores, D. Fuller, S. Green, T. Ho, T. Kajdan, R. Lee, M. McKelvy, T. Sutton, T. Traugott

Innovative Polymer Processing Aid-Environmentally Friendly .......................... 921
Stephane Appere, M. Yonekura, T. Oonishi, K. Umetomo

Hydrolytic Stability and Water Adsorption of Additive Blends ......................... 925
Sam D'Uva, Zach Charlton

SESSION 9: ADVANCEMENTS IN PRIMARY AND SECONDARY PROCESSING
EQUIPMENT

Predicting Blown Film Bubble Instability ...................................................... 936
Thomas Butler

Surface Treatment for Feed Screws: A Laboratory Quick Fix or a Long Term
Production Solution ............................................................................. 949
Greg Quinn, Thomas Kvinge, Curtis Kadau

Polyethylene for Stretch Film Applications .................................................... 953
Gerry Mcnally, C.M. Small, A.H. Clarke

Scaling from Lab to Production - Melt Delivery Network Between Extruder(s) and
Extrusion Die Systems ........................................................................... 959
Jeffrey Steltz, Sam Iuliano

Developments in Filterability Testing ............................................................ 972
Simon Dominey

Measurement of Multi-Layer Structures Using Non-Contact Reflective Light
Technology ........................................................................................ 976
Steve Haveron-Smith
