TABLE OF CONTENTS

1 Materials Science Education at Keio University: Adopting U.S. Instruction Practices in Japan
   Kohei M. Itoh

9 The New Materials Science and Engineering Curriculum at the Ohio State University

15 The Cymbal as an Instructional Device for Materials Education
   Mary Anne White and Peter MacMillan

21 The NSF NSDL GREEN Digital Library: Green’s Functions Research And Education Enhancement Network
   Laura M. Bartolo, Adam C. Powell, IV, Gregory M. Shreve, and Vinod K. Tewary

27 Using Interactive Multimedia Tools to Teach Materials Characterization Techniques in the Undergraduate Curriculum
   Karin Prüßner, Klaus Pingel, Jens Becker, Horst-Peter Dressel, Alexander Undynko

33 Managing Student Group Projects in an Introductory Materials Science Course
   Jacqueline A. Isaacs

39 Using Interdisciplinary Examples in Nanotechnology to Teach Concepts of Materials Science and Engineering

48 Incorporating Materials Science into an Undergraduate Applied Physics Curriculum
   Claudio Guerra-Vela, and Fredy R. Zypman

55 An Instructional Two-Dimensional Diffraction Laboratory Using Patterns Created with Electron-Beam Lithography
   Colin Inglefield, Royce Anthon

60 Web-Based Data Analysis and Feedback for General Chemistry Laboratory: Improving Analysis with Timely, Distance Feedback
   Joseph F. Lomax, Debra K. Dillner, and Melonie A. Teichert

66 The Junior Laboratory: A Place to Introduce Basics as well as New Findings
   Luz J. Martínez-Miranda, O. C. Wilson, Jr. and L. G Salamanca-Riba
