TABLE OF CONTENTS

KEYNOTE PRESENTATIONS

KN1 MEMS TECHNOLOGIES AND DEVICES FOR SINGLE-CHIP RF FRONT ENDS ................................................................. 1
Clark T.-C. Nguyen

KN2 NEW APPLICATIONS IN IMPLANTABLE MEDICAL DEVICES .......................................................................................... 10
Joyce Yamamoto

KN3 A SPECIALIST MANUFACTURER’S OUTLOOK ON THE FUTURE OF CERAMICS AND CERAMIC MICROSYSTEMS .......................................................................................................................... 16
Franz Bechtold

SESSION TA1
MATERIALS AND PROCESSES FOR MICROSYSTEMS
Chair: Howard Morgenstern, Los Alamos National Laboratory

TA11 COMPUTER-AIDED DESIGN AND PROCESSING OF 3D MICROCERAMIC STRUCTURES ........ 32
Yoshinari Miyamoto, Soshu Kiriahra, Hideki Kanaoka

TA12 A NOVEL APPROACH TO SYNTHESIZE HOLLOW ZnO PARTICLES USING BUBBLES AS TEMPLATES .......................................................... 43
Yong Sheng Han, Li Wei Lin, Hiroaki Takegami, Masayoshi Fuji, Minoru Takahashi

TA13 SYNTHESIS OF 10-μM-THICK LEAD ZIRCONATE TITANATE FILMS ON 2 INCH SI SUBSTRATES FOR PIEZOELECTRIC FILM DEVICES ................................................................. 49
Takashi Iijima, Satoko Osone, Yoshiro Shimojo, Hideki Nagai

TA14 MEMS ULTRASONIC SENSOR ARRAY WITH THICK FILM PZT TRANSDUCERS ................... 55
Soeren Hirsch, Stefan Schimpf, Bertarm Schmidt

TA15 AN INVESTIGATION OF THE PIEZOELECTRIC PROPERTIES OF THICK-FILM PZT ACTUATORS ON CERAMIC SUBSTRATES ................................................................. 60
Darko Belavic, Marina Santo Zarnik, Janez Holc, Marko Hrovat, Marija Kosec, Slivo Dmovsek, Jena Cilensek, Srecko Macek

SESSION TA2
CO-FIRING PROCESSES AND DIMENSIONAL CONTROL IN LTCC
Chair: Michael O’Neill, Heraeus Inc. – TFD

TA21 HOT EMBOSING - AN ALTERNATIVE METHOD TO PRODUCE CAVITIES IN CERAMIC MULTILAYER ................................................................................................................................. 67
Torsten Rabe, Petra Kuchenbecker, Baerbel Schulz, Martin Schmidt

TA22 DEVELOPMENT OF SELF-CONSTRAINED LTCC STRUCTURES ......................................... 75
David Malanga, Jim Wood, Weiming Zhang, Tom Hochheimer, Frans Lautzenhiser

TA23 FACTORS INFLUENCING THE SHRINKAGE TOLERANCE OF LTCC GREEN TAPES ............... 82
Georg Besendörfer, Andreas Roosen, University of Erlangen- Nuremberg; Christina Modes, W.C. Heraeus, Thomas Betz
SESSION TP1
MICROSYSTEMS APPLICATIONS I
Chairs: W. Kinzy Jones, Florida International University; S. (Krish) Krishnamoorthy, CFD Research Corporation

TP11 DEVELOPMENT OF AN LTCC BASED SMALL COMBUSTOR
Jorge J. Santiago-Avilés, Rogerio Furtan, Miguel Perez-Tolentino, Patricio Espinoza-Vallejos

TP12 DEVELOPMENT OF A MULTI-CHANNEL ELECTRON MULTIPLIER USING LTCC / THICK SILVER COFIRED STRUCTURE
Feng Zheng, Hubert George, W. Kinzy Jones

TP13 LOW TEMPERATURE COFIRED CERAMIC MICROFLUIDIC MICROSYSTEMS FOR HIGH TEMPERATURE AND HIGH PRESSURE APPLICATIONS
Kamlesh D. Patel, Kenneth A. Peterson, Kyle W. Hukari, Dennis De Smet, Timothy A. Turner

TP14 FABRICATION OF A MONOPROPELLANT MICRO-NOZZLE USING LOW TEMPERATURE CO-FIRED CERAMICS
M. H. McCrink, D. G. Plumlee, A. J. Moll, Boise State University; J. Steciak, R. Budwig

TP15 LTCC BASED PACKAGE FOR HIGH POWER LED APPLICATIONS
Byeung Gyu Chang, Ki Pyo Hong, Sung Yeol Park, Seung Gyo Jeong, Jung Kyu Park

SESSION TP2
PROCESSING AND DESIGN OF INTEGRATED PASSIVES IN LTCC I
Chair: Tim Mobley, DuPont Electronic Technologies

TP21 INCREASED USAGE OF INTEGRATED PASSIVE COMPONENTS IN LOW TEMPERATURE CO-FIRED CERAMIC (LTCC) FOR THE MICROWAVE & RF INDUSTRY
Steve Annas

TP22 AEROSOL DEPOSITION PROCESS AS ROOM TEMPERATURE FABRICATION TECHNOLOGY FOR INTEGRATED RF MODULES
Takaaki Tsurumi, Song-Min Nam, Naoko Mori, Mihoko Momotani, Hirofumi Kakemoto, Satoshi Wada, Jun Akedo

TP23 PHYSICAL MODEL BASED DESIGN OPTIMIZATION FOR LTCC RF INDUCTORS
Jens Mueller, Rubén Perrone

TP24 CERAMIC SUBSTRATE WITH HIDDEN HEAT SOURCES FOR SOLDERING OF ELECTRICAL COMPONENTS
E. Meroz, J. David, D. Har-Even, M. Roznik, M. Sirota, E. Galun

SESSION TP3
NOVEL SYNTHESIS TECHNOLOGY FOR MULTILAYER ELECTRONICS I
Chairs: David Cann, Oregon State University; Jun Akedo, National Institute of Advanced Industrial Science and Technology

TP31 MICRO-PATTERNING OF PZT THIN FILMS WITH OXIDE ELECTRODE BY USING SELF-ASSEMBLED MONOLAYER
Hisao Suzuki, Hitoshi Issiki, Tatsuo Fujinami, Hidetoshi Miyazaki
TP32 LOW TEMPERATURE GROWTH OF EPITAXIAL Pb(ZiTi)O$_3$ FILM ON VARIOUS SUBSTRATES BY EXCIMER LASER ASSISTED METAL ORGANIC DEPOSITION (ELAMOD) ............... 150
T. Tsuchiya, K. Daoudi, S. Mizuta, T. Kumagai

TP33 ORIGIN OF ULTRAHIGH DIELECTRIC CONSTANTS FOR BARIUM TITANATE NANOPARTICLES ........................................................................................................ 157
Satoshi Wada, Takuya Hoshina, Kayo Takizawa, Aki Yazawa, Masanori Ohishi, Hiroaki Yasuno, Hirofumi Kakemoto, Takaaki Tsurumi

TP34 LEAD LANTHANUM ZIRCONATE TITANATE THIN FILMS DIRECTLY ON LOW COST COPPER FOIL SUBSTRATES FOR DIELECTRIC AND FERROELECTRIC APPLICATIONS ...... 163
Taeyun Kim, Angus I. Kingon

TP35 ATOMIC LAYER DEPOSITION-BASED CERAMIC COATING FOR WAFER-LEVEL MEMS PACKAGING .......................................................................................... 169
Y. C. Lee, Simone Lee, Markus Groner

TP36 CENTRIFUGAL SINTERING OF THICK FILM ON SUBSTRATE .................................................................................. 176
Koji Watari, Yoshiaki Kinemuchi, Hirohide Ishiguro

SESSION TP4
PROCESSING AND DESIGN OF INTEGRATED PASSIVES IN LTCC II
Chairs: Torsten Rabe, Federal Institute for Materials Research and Testing; Klaus-Dieter Lang, Fraunhofer IZM

TP41 SELF-CONSTRAINED SINTERING OF LOW-TEMPERATURE COFIRED CERAMICS ............... 181
Jau-Ho Jean, Jui-Chuan Chang

TP42 SOFT FERRITE MATERIALS FOR MULTILAYER INDUCTORS .......................................................... 187
J. Töpfer, J. Mürbe, A. Angermann, S. Barth, E. Müller, F. Bechtold

TP43 A FRONT END MODULE AND A FILTER USING LTCC TECHNOLOGY WITH HETEROGENEOUS DIELECTRICS ........................................................................ 194
Jun Chul Kim, Dongsu Kim, Hyun Min Cho, Jong Chul Park, Nam Kee Kang

TP44 COFIRING BEHAVIOR OF LOW-TEMPERATURE SINTERING COMPOSITE MULTILAYER CERAMIC DEVICES ...................................................................... 199
Zhilun Gui, Hong Cai, Zhenxing Yue, Ruzhong Zuo, Chengxiang Ji, Longtu Li

TP45 STUDY ON DENSIFICATION BEHAVIOR OF LOW-TEMPERATURE COFIRED CERAMICS ...... 203
Longtu Li, Zhenxing Yue, Ruzhong Zuo, Zhilun Gui

TP46 FACTORS INFLUENCING THE CONDUCTIVITY OF INKJET PRINTED SILVER LINES ............... 208
Ulrike Currle, Klaus Krueger

SESSION WA1
INTERNATIONAL SESSION ON MICROSYSYTEM I
Chair: Dean Anderson, Penn State University

WA11 NOVEL LTCC SYSTEM OF CO-FIRED LOW $\varepsilon_r$/ HIGH $\varepsilon_r$ MATERIALS FOR WIRELESS COMMUNICATIONS .......................................................................................... 215
Yukio Sakabe, Jun Harada, Yasutaka Sugimoto, Yukio Higuchi

WA12 IS LTCC THE RIGHT CHOICE FOR RF MODULES? ...................................................................... 220
Neal Mellen

WA13 NEW LTCC TECHNOLOGY WITH INTEGRATED COMPONENTS – ‘DEVELOPMENTS AND FUTURE TRENDS’ - MODULE MINIATURIZATION FOR WIRELESS NETWORK APPLICATIONS .... 222
Tsutomu Oda, Minoru Tomita
SESSION WA2
MICROSYSTEM APPLICATIONS II
Chairs: Amy Moll, Boise State University; Jens Mueller, Technical University of Ilmenau, ZIK MacroNano

WA21 THREE-DIMENSIONAL FLUIDIC MICROSYSTEM FABRICATED IN LOW TEMPERATURE COFIRE CERAMIC TECHNOLOGY
Leszek J. Golonka, Tomasz Zawada, Henryk Roguszczak, Karol Malecha, Michal Chudy, Dorota Stadnik, Artur Dybko

WA22 LTCC PACKAGING FOR BIO-APPLICATION'S DEMANDS
L. Rebenklau, G. Schlottig, J. Uhlmann, G. Vollmer, K.-J. Wolter

WA23 DEVELOPMENT OF LTCC SMART CHANNELS FOR INTEGRATED CHEMICAL, TEMPERATURE, AND FLOW SENSING
Clifford K. Ho, Kenneth A. Peterson, Lucas K. McGrath, Timothy S. Turner

WA24 MINIATURE MULTI-ELECTRODE ELECTROCHEMICAL CELL IN LTCC
John Youngsman, Brian Marx, Amy Moll, Scott Wolter, Jeff Glass

WA25 LTCC MICROSYSTEMS AND MICROSYSTEM PACKAGING AND INTEGRATION APPLICATIONS

SESSION WA3
DIRECT WRITE TECHNOLOGY
Chair: Paul Clem, Sandia National Laboratories

WA31 FABRICATION OF CONDUCTORS AND INDUCTORS BY NANO-PARTICLE DEPOSITION THROUGH DIRECT WRITE TECHNOLOGY
James Sears, Michael Carter, Jacob Colvin

WA32 DIRECT THICK FILM WRITING FOR ADVANCED MICROSYSTEMS APPLICATIONS
William J. Grande, Gary A. Fino

WA33 DIRECT WRITING OF MULTIMATERIAL THREE DIMENSIONAL STRUCTURES
James E. Smay, Sarosh S. Nadkarni, Jian Xu

WA34 DIRECT-WRITE APPROACHES TO FABRICATION AND PRECISION PRINTING AT SANDIA NATIONAL LABORATORIES
J. Cesarano III

WA35 IMPACT OF CONDUCTOR CROSS-SECTIONAL SHAPE ON COMPONENT LOSSES AND SYSTEM PERFORMANCE
M. H. F. Lim, J. D. van Wyk, Z. Liang

SESSION WP1
MICROSYSTEM MATERIALS AND PROCESSES
Chair: Ken Peterson, Sandia National Laboratories

WP11 DIELECTRIC CHARACTERIZATION OF DIELECTRIC CERAMIC MATERIALS USING TERAHERTZ TIME-DOMAIN SPECTROSCOPY
Michael Lanagan, Khalid Z. Rajab, Steve Perini, Joe Dougherty, Masato Iwasaki

WP12 DESIGN OF DISSOLVED OXYGEN MICROSENSOR USING LOW TEMPERATURE CO-FIRED CERAMICS (LTCC)
Marcos Aparecido Chaves Ferreira, Zaira Mendes da Rocha, Antonio C. Seabra, Mário R. Gongora-Rubio
WP13 BLOOD FLOW SYSTEM FABRICATED USING LOW TEMPERATURE CO-FIRED CERAMICS (LTCC) ................................................................. 307
Eliphas Wagner Simões, Roberto Eduardo Bruzetti Leminski, Mário Ricardo Gongora-Rubio, Marcelo Bariatto Andrade Fontes, Rogerio Furlan, Francisco Garcia Soriano, Lúcio Angnes

WP14 LTCC POST LOAD CELL ................................................................................................................... 314
Mário R. Gongora-Rubio, Z. M. da Rocha, M. Roberti, L. Fraigi

WP15 FABRICATION OF REFERENCE ELECTRODES FOR LTCC MINIATURIZED CHEMICAL SENSORS .......................................................... 320

SESSION WP2
HIGH FREQUENCY CHARACTERIZATION
Chair: Michael Janezic, NIST – Boulder

WP21 DEVELOPMENT OF HIGH DENSITY CERAMIC SUBSTRATE TESTER .......................................................... 326
Bruce C. Kim

WP22 3D INTERCONNECTION TECHNOLOGY FOR LTCC RF MODULES UP TO 60 GHZ ........................................ 335
R. Perrone, J. Müeller, H. Thust, J. Trabert

WP23 TEMPERATURE-DEPENDENT COMPLEX PERMITTIVITY MEASUREMENTS OF LOW-LOSS DIELECTRIC SUBSTRATES WITH A SPLIT-CYLINDER RESONATOR ...................................................... 341
Michael D. Janezic, Timothy Mobley, Daniel Amey

WP24 FULL-WAVE ANALYSIS AND CHARACTERIZATION OF VIA GROUNDING TECHNIQUES USED TO ISOLATE STRIPESLINES FOR EMBEDDED PASSIVE INTERCONNECTS ................................................................. 347
Jerry Aguirre, Paul Garland, Tim Mobley, Marcos Vargas, Paula Lucchini, Nathan Roberts, Mikaya Lumori, Ernie Kim

WP25 20 TO 90GHZ BROADBAND CHARACTERIZATION OF LTCC MATERIALS FOR TRANSCEIVER MODULES AND INTEGRATED ANTENNAS .................................................................................. 351
Timothy Mobley, Michael Smith, David Zimmerman, Michael Miller, Deepakumar Nair, Matthew Walsh

SESSION WP3
INTERACTIVE FORUM (POSTER SESSION)
Chairs: Martin Oppermann, EADS Deutschland GmbH; Josef Weber, Robert Bosch GmbH

WP31 PROTOTYPE CONTINUOUS FLOW POLYMERASE CHAIN REACTION LTCC DEVICE: DESIGN, FABRICATION AND BIOCOMPATIBILITY ISSUES ........................................................................ 358

WP32 MAGNETIC PROPERTIES OF BI SUBSTITUTED GARNET THIN FILM ON GGG (100) AND (110) SUBSTRATE FOR MO INDICATOR .......................................................................................... 362
Daisuke Uematsu, Nobuyasu Adachi, Toshitaka Ota, Takashi Okuda, Takahito Machi, Naoki Koshizuka, Masanori Takahashi, Hiroyasu Ota, Ken Ich Arai

WP33 ELECTROSPUN HYDROXYAPATITE FIBERS VIA SOL-GEL ROUTINE USING PVA AS PRECURSOR ................................................................. 367
Xiaoshu Dai

WP34 A NEW APPROACH TO ZERO SHRINKAGE LTCC .................................................................................. 372
Yong Jun Seo, Yong Soo Cho

WP35 LTCC TECHNOLOGY - AN INTEGRATION SOLUTION FOR POWER ELECTRONICS ........................................ 376
M. H. F. Lim, J. D. van Wyk, Z. Liang
WP36 MECHANICAL PROPERTIES AND MORPHOLOGY OF POLYIMIDE-BaTiO$_3$ NANOCOMPOSITES
Jin-Hyun Hwang, Hiroki Maie, Burtrand I. Lee

WP37 STUDY OF LASER MILLING OF SINTERED LTCC, QUARTZ, AND PYREX SUBSTRATES FOR MESO AND MICRO FLUIDIC APPLICATIONS
Rogerio Furlan, Jose Manuel Castillo Colon, Idalia Ramos, Jorge J. Santiago-Aviles

WP38 ENERGY SCAVENGING DEVICE IN LOW TEMPERATURE COFIRED CERAMICS
S. Scherrer, D. G. Plumlee, A. J. Moll

WP39 FABRICATION OF MICROSTRUCTURE IN TRANSPARENT MATERIALS USING FEMTOSECOND LASER IRRADIATION
Shingo Kanehira, Kiyotaka Miura, Koji Fujita, Kazuyuki Hirao, Jinhai Si

WP40 HIGH TEMPERATURE RAMAN STUDY OF CVD DIAMOND FILMS
Jui-Chen Pu, Sea-Fue Wang, James C. Sung

WP41 EFFECT OF RE-OXIDATION FIRING ON PTCR PROPERTIES OF SM-DOPED BARIUM TITANATE CERAMICS
Myoung-Pyo Chun, Jeong-Ho Cho, Byung-Ik Kim

WP42 EFFECT OF CuO ON THE SINTERING BEHAVIOR AND DIELECTRIC CHARACTERISTICS OF TITANIUM DIOXIDE
Yeong-Kyeun Paek, Chang-Keun Shin

WP43 FABRICATION OF MICRO TUBULAR SOFCs FOR MICRO SOFC STACKS
Toshio Suzuki, Toshikai Yamaguchi, Yoshinobu Fujishiro, Masanobu Awano

WP44 MICROSTRUCTURE AND ELECTRICAL PROPERTIES OF SPUTTERED Ba(Sr)TiO$_3$ FILMS: DOPANT AND CRYSTAL STRUCTURE EFFECTS
C. H. Wu, Jinn P. Chu, S. F. Wang

WP45 ADVANCED FABRICATION TECHNIQUES FOR AN ION MOBILITY SPECTROMETER IN LOW TEMPERATURE CO-FIRED CERAMICS
B. Jaques, Hope Weston, D. G. Plumlee, A. J. Moll

WP46 MAGNETIC DOMAIN STRUCTURE OF NdFeB THIN FILM ON Si SUBSTRATE
Nobuyasu Adachi, Yasunori Isa, Tsuyoshi Yoshimura, Toshitaka Ota, Isao Sakamoto, Takashi Okuda

WP47 FABRICATION OF BARIUM STRONTIUM TITANATE FILMS DIRECTLY ON COPPER ELECTRODES BY AEROSOL DEPOSITION METHOD FOR MULTILAYER DIELECTRIC DEVICES
Jae-Hyuk Park, Sewoong Oh, Masakazu Mori, Jun Akedo

WP48 FABRICATION OF A MULTILAYERED CERAMIC MICRO-PLASMA GENERATING DEVICE
Amanda Baker, Clive Randall, Randall Stewart, Richard Fantazier, Fred Wise

SESSION THA1
INTERNATIONAL SESSION ON MICROSYSTEMS II
Chairs: Dave Wilcox, Consultant; Leszek Golonka, Wroclaw University

THA11 AN OVERVIEW OF LTCC-RELATED TECHNOLOGIES IN KOREA
Yong Soo Cho, Won Bae Lim, Jun Chul Kim, Nam Kee Kang

THA12 LTCC AN ENABLING TECHNOLOGY FOR RF-, MICROWAVE, BIO- AND CHEMICAL SYSTEMS
Jens Mueller, Ruben Perrone, Sven Rentsch, Torsten Thelemann, Michael Hinz, Andreas Schober, Thomas Friedrich, Dieter Schwanke, Thomas Haas, Lars Rebenklaue
SESSION THA2
NOVEL SYNTHESIS TECHNOLOGY FOR MULTILAYER ELECTRONICS II - AEROSOL DEPOSITION
Chair: Yong Cho, Yonsei University

THA21 ROOM TEMPERATURE IMPACT CONSOLIDATION (R.T.I.C.) OF CERAMIC FINE POWDER ON AEROSOL DEPOSITION
Jun Akedo, Hisato Ogiso

THA22 TECHNOLOGY FOR EMBEDDING CAPACITORS ON PRINTED WIRING BOARD USING AEROSOL DEPOSITION
Yoshihiko Imanaka, Nobuyuki Hayashi, Masatoshi Takenouchi, Jun Akedo

THA23 AEROSOL DEPOSITION FABRICATION OF TRANSPARENT ELECTRO-OPTIC FILMS FOR OPTICAL MODULATOR
Masafumi Nakada, Keishi Ohashi, Hiroki Tsuda, Jun Akedo

THA24 PREPARATION OF THICK MAGNETIC GARNET FILMS WITH AEROSOL DEPOSITION METHOD AND THEIR MAGNETIC PROPERTIES
M. Inoue, M. Mizoguchi, H. Uchida, K. H. Shin, P. B. Lim

THA25 MULTILAYER CONSTRUCTION WITH VARIOUS CERAMIC FILMS FOR ELECTRONIC DEVICES FABRICATED BY AEROSOL DEPOSITION
Hironori Hatono, Tomokazu Ito, Jun Akedo
