</table>
Successful Control of High-Pressured Gas Well Using a Crosslinked Gel During Coiled-Tubing Fishing .......................................................... 138
L. Nwoke, J. Arukhe, C. Uchendu

Use of Wavelet Transform in PDG Data Treatment .................................. 144
P.M. Ribeiro, A.P. Pires, E.A.P. Oliveira, J.G. Ferroni

Enhancing Formation Testing and Sampling Operations Through the Use of Log-Derived High-Resolution Mineral-Based Lithofacies Mapping ........................................ 152

Quantification of Carbon Dioxide Using Downhole Wireline Formation Tester Measurements ................................................................. 161
N. Muller, H. Elshahawi, C. Dong, O.C. Mullins, M. Flannery, M. Ardila, P. Weinheber, E. Chinn McDade

Combining Continuous Fluid Typing, Wireline Formation Tester, and Geochemical Measurements for an Improved Understanding of Reservoir Architecture .................................. 171
H. Elshahawi, L. Venkataramanan, D. McKinney, M. Flannery, O.C. Mullins, M. Hashem

Core Data Preprocessing To Improve Permeability Log Estimation ............... 190
M. Cozzi, L. Ruvo, P. Scaglioni, A.M. Lyne

The Drilling and Casing Running Enigma .................................................. 200
C.J. Mason, D.C-K. Chen

Experimental and Numerical Modeling of Direct Injection of CO₂ into Carbonate Formations ............................................................... 212
O. Izgec, B. Demiral, H. Bertin, S. Akin

Application of a Maximum Reservoir Contact (MRC) Well in a Thin, Carbonate Reservoir in Kuwait .......................................................... 228

Improving the Value-Risk Management on Revitalizing Mature Oil Fields in One Company’s Operating Area ............................................. 236
S.S. Aprilian, K. Kumely

Characterizing Sparsely Fractured Reservoirs Through Structural Parameters, Time-Lapse 3D Seismic, and Production Data .................................... 240
M. Zeidouni, C.P.J.W. van Krujsdijk

A Rigorous Composite-IPR Model for Multilateral Wells ............................. 251
B. Guo, K. Ling, A. Ghalambor

Case Studies—Proactive Managed Pressure Drilling and Underbalanced Drilling Application in San Joaquin Wells, Venezuela ............................ 260
J.C. Beltran, O. Gabaldon, G. Puerto, P. Alvarado, V. Varon

Well Sanding and Lost Production Due to Cyclic Water Hammer ................ 267
A. Hayatdavoudi

History Matching of The Valhall Field Using a Global Optimization Method and Uncertainty Assessment ................................................. 284
B.R. Al-Shamma, R. Teigland

Application of Intelligent Completion Technology in a Triple-Zone Gravel Packed Commingled Producer ...................................................... 295
W.R. Brock, E.O. Oleh, J.P. Linscott, S. Agara
Development and Field Use of a Novel Solvent-Water Emulsion for the Removal of Asphaltenes Deposits in Fractured Carbonate Formations

S. Lightford, E. Pitoni, F. Armesi, L. Mauri

Awakening an Old Field - A Case Study of a Re-fracturing Program in the Greater Green River Basin

M. Shaefer

History Matching for Determination of Fracture Permeability and Capillary Pressure

T. Gang, M. Kelkar

The Importance of Graphical Methods in Estimation of the Diffusion Coefficient of Gases in Bitumens and Heavy Oil

H. Sheikha, M. Pooladi-Darvish, A.K. Mehrotra

Usari BQI Redevelopment—Paradigm Shift

F.R. Alege, W.R. Brock, J. Linscott, B. Olopade, C. Etta, L.K. Chen

Design and Performance Evaluation of an Ultra-deepwater Subsea Blowout Preventor Control System Using Shape Memory Alloy Actuators

Ning Ma, Ziping Hu, Robello Samuel, Christine A. Ehlig-Economides, Gangbing Song

Fracture Face Skin Evolution During Cleanup

R. Gdanski, D. Fulton, C. Shen

Changes in Completion Strategy Unlocks Massive Jurassic Coalbed Methane Resource Base in the Surat Basin, Australia

R.L. Johnson Jr., S. Scott, M. Herrington

Data Acquisition With Advanced Acoustic Telemetry Improves Operational Efficiency in Deep-water and Land-Well Testing?Case Histories

M. Azari, A. Salguero, E. Almanza, H. Kool

A Generic Solution to Bottom-Hole-Assembly Modeling

M. Wu, D. C-K Chen

Innovative Use of Expandable Sand Screens Combined With Propped Hydraulic Fracturing Technology in Two Wells With Intelligent Completions in the Egret Field, Brunei: Challenges, Successes, and Best Practices Learned

Sakamrin Abdul-Rahman, Derek Lim, Jit Juan Lim, Kuo Chuan Ong

Study on High-Concentration Polymer Flooding to Further Enhance Oil Recovery

Experimental Study of Effective Hole Cleaning Using “Sweeps” in Horizontal Wellbores

Effective Heavy Post-Fracturing Proppant Cleanout with Coiled Tubing: Experimental Study and Field Casing History

I. Bayfield, G. Paton

New Parallel Algorithm for Multiple History-Matched Realizations

D. Zubarev, M. Kelkar

Evaluation of Acid Treatment Results for Water-Injector Wells in Saudi Arabia

M.S. Al-Harbi, A.M. Al-Dhafeeri, Y.A. Al-Rufai, S.K. Mohammed

Applications of Acoustic Liquid Level Measurements in Gas Wells

J.N. McCoy, O.L. Rowlan, D. Becker, A.L. Podio
Value-of-Information Lookbacks—Was the Information You Gathered Really Worth Getting?
E.M. Coopersmith, M.K. Burkholder, J.H. Schulze .......................................................... 491

Installation of Online Vessel Desander Manifolds .......................................................... 498
M.S. Jasmani, E.C. Geronimo, L. Chan

Simulation of Gas/Oil Displacements in Vuggy and Fractured Reservoirs ...................... 503
C.A. Kossack

From Concept to Pilot to Full-Field Implementation: A New EOR Process for the
Prudhoe Bay Field .................................................................................................................. 516

Further Investigation of Drainage Height Effect on Production Rate in VAPEX ............ 539
A.J. Yazdani, B.B. Maini

Reservoir Crude Oil Viscosity Estimation from Wireline NMR Measurements -
Rajasthan, India .................................................................................................................... 553
R.J. Zittel, D. Beliveau, T. O'Sullivan, R. Mohanty, J. Miles

Dual Porosity Equations From Effective Medium Theory .............................................. 564
C.R. Berg

Analytical Modeling of Chemical Flooding: One-Dimensional Two-Phase Flow
Accounting for Ion Exchange ............................................................................................... 574
A.P. Pires, P.M. Ribeiro, P.G. Bedrikovetsky

Results of the World's First 4D Microgravity Surveillance of a Waterflood—
Prudhoe Bay, Alaska .............................................................................................................. 583
J.L. Brady, J.L. Hare, J.F. Ferguson, J.E. Seibert, F.J. Klopping, T. Chen, T. Niebauer

3D Field-Scale Automatic History Matching Using Adjoint Sensitivities and
Generalized Travel-Time Inversion ..................................................................................... 592
A.M. Daoud, L. Vega

Investigation into Strengthening Methods for Stabilizing Wellbores in Fractured
Formations ............................................................................................................................ 610
H. Soroush, J.H.B. Sampaio

Integrated Flow Assurance Modelling of Angola Block 18 Western Area
Development ......................................................................................................................... 618
M.J. Watson, N.J. Hawkes, P.F. Pickering, J. Elliott, L.W. Studd

A Systematic Approach to Improved Success with Hydraulic Fracturing
Applications ............................................................................................................................ 627
A.R. Jennings Jr., C.W. Westerman, D.W. Tadlock, R. Westerman, M. Anderson

Extreme Multistage Fracturing Improves Vertical Coverage and Well Performance
in the Lost Hills Field .......................................................................................................... 639
Stanley

Pitfalls in Performance-Data Tracking of Sucker-Rod Pumped Wells ....................... 648
M.W. Mahoney

Case Studies—Offshore Managed Pressure Drilling ......................................................... 650
D. Hannegan

Monitoring Multilayered Reservoir Pressures and Gas/Oil Ratio Changes over
Time Using Permanently Installed Distributed Temperature Measurements ............. 657
G.A. Brown
Uniform Inflow Completion System Extends Economic Field Life: A Field Case Study and Technology Overview .................................................. 671
M. Lorenz, G. Ratterman, J. Augustine

Application of NMR T2 Relaxation to Drainage Capillary Pressure in Vuggy Carbonate Reservoirs ........................................................... 680
J. Ouzzane, M. Okuyiga, N. Gomaa, R. Ramamoorthy, D. Rose, A. Boyd, D.F. Allen

Successful Drilling of a High Step-Out Ratio Well With Water-Based Mud in Morecambe Bay ................................................................. 690
M. Hodder, N. Ross, S. Gibb, S. Redgrave

Modeling of Coupled Reservoir and Multifractured Horizontal Well Flow Dynamics ................................................................. 700
R. Vicente, T. Ertekin

A New Asymmetrical Array Induction Logging Tool .......................................................... 713

VOLUME 2

Improved and More-Rapid History Matching With a Nonlinear Proxy and Global Optimization .................................................. 728
A.S. Cullick, D. Johnson, G. Shi

Transaction Costs and Risk Preferences: Modeling Governance in Offshore Drilling ............................................................. 741
C.J. Jablonowski, A.N. Kleit

Treatment of Seawater with Cartridge Filtration—A Field Trial .................................................. 776
J.M. Lee, T. Frankiewicz, J. Walsh

New Strategy for Seismic Facies Upscaling to the Reservoir Grid Scale .................................................. 782
O. Duplantier, N. Hadj-Kacem, J. Vittori

Study on Flow Behaviors of Viscoelastic Polymer Solution in Micropore With Dead End .................................................. 786
Hongjun Yin, Demin Wang, Huiying Zhong

Field Experiences With History Matching an Offshore Turbiditic Reservoir Using Inverse Modeling .................................................. 796
D. Hohl, E.A. Jimenez, A. Datta-Gupta

A Novel Model for Viscoelastic Fluid Flow in Porous Media .................................................. 805
A.A. Garrocuh, R.B. Gharbi

Production Data Analysis—Challenges, Pitfalls, Diagnostics .................................................. 819
D.M. Anderson, G.W.J. Stotts, L. Mattar, D. Ilk, T.A. Blasingame

Modeling of Pig Operations in Natural Gas and Liquid Pipeline .................................................. 834
F. Esmaeilzadeh, D. Mowla, M. Asemani

Natural Gas: Overcoming Limitations Toward Energy Supremacy .................................................. 838
M.C. Harrison, P. Campbell, F.M. Coelho, C. Grecco, C. Ikeocha, X.T. Wang, M.J. Economides

Barnett Shale Hybrid Fracs—One Operator’s Design, Application and Results .................................................. 846
G.R. Coulter, B.C. Gross, E.G. Benton, C.L. Thomson

Forecasting Future US Energy Needs .................................................. 853
A.M. Skov
Faster, Longer, and More Reliable Bit Runs With New-Generation PDC Cutter ....................... 860
J. Clegg

Transient Fluid and Heat Flow Modeling in Coupled Wellbore/Reservoir Systems ............... 869

Cost-Effective Life-Cycle Profile Control Completion System for Horizontal and Multilaterals Wells ................................................................................................................................. 879
V. Ogoke, C. Aihevba, F. Marketz

From Straight-lines to Deconvolution: The Evolution of the State-of-the-Art in Well Test Analysis ................................................................................................................................. 886
A.C. Gringarten

Site Safety Management of A Growing Drilling Activity: Is Continuous Improvement Achievable? ........................................................................................................................................ 904
S. Saintpère, N. Touboul, R. Hidayat

A New Analytical Model for the SAGD Production Phase ....................................................... 913
M. Nukhaev, V. Pimenov, A. Shandrygin, V. Tertychnyi

Improved BHA Sag Correction and Uncertainty Evaluation Brings Value to Wellbore Placement ................................................................................................................................. 917
R. Studer, L. Macresy

Three Statistical Pitfalls of Phi-K Transforms ......................................................................... 928
P. Delfiner

Quantifying Resources for the Surmont Lease with 2-D Mapping and Multivariate Statistics ................................................................................................................................. 937
W. Ren, C.V. Deutsch, D. Garner, T.J. Wheeler, J.-F. Richy, E. Mus

Effective Software Practices to Leverage Software Development Process in Sand-Control Engineering Software—A Case Study ................................................................. 947
J. Li, P. Chok

Fault Leakage Potential Analysis in the Cantarell Field, Mexico, Using Geomechanics ................................................................................................................................. 955

Phase Behavior Study of Hydrocarbon/Water/Methanol Mixtures at Reservoir Conditions ................................................................................................................................. 965
V. Bang, G.A. Pope, M.M. Sharma

Integration of Microseismic Fracture Mapping Results with Numerical Fracture Network Production Modeling in the Barnett Shale .................................................................................. 976
M.J. Mayerhofer, E.P. Lolon, J.E. Youngblood, J.R. Heinze

Optimizing Oil and Gas Production by Intelligent Technology ........................................... 984
D. Zhu, K. Furui

Implementing an Undergraduate Minor in Energy .................................................................. 992
J.R. Fanchi

Streaming Potential Applications in Oil Fields ....................................................................... 997
M.-Y. Chen, B. Raghuraman, I. Bryant, M. Supp

New Approach to Simulating Multicomponent Fluids Flow to Hydraulic Fractured Well ................................................................................................................................. 1007
O. Dinariev, A. Shandrygin, D. Rudenko, V. Tertychnyi, N. Evseev, D. Klemin
Time Dependent Behavior of Drilling Fluids Under Cyclic Temperature and Pressure Loads ................................................................. 1017
M. Piber, M. Prohaska, G. Hublik, G. Thonhauser

An Empirical Model for Predicting Crude Sludging Potential Caused by Acidizing .......... 1028
A.A. Garrouch, A.H. Malallah, M.M. Al-Enizy

Hydrocarbon Production Forecast and Uncertainty Quantification: A Field Application ........................................................................ 1040
M. Rotondi, G. Nicotra, A. Godi, F.M. Contento, M.J. Blunt, M.A. Christie

Dependence on Temperature, Pressure, and Salinity of the IFT and Relative Permeability Displacement Characteristics of CO₂ Injected in Deep Saline Aquifers ................................................................ 1049
D.B. Bennion, S. Bachu

A New Approach for Field Surveillance: Enhanced Monitoring Associating Smart Alarms to Produce More Oil ........................................... 1058
A. Lentini, G. Fumia, H. Malonga, F. Okassa, J.P. Le Cann, J. Lessi

Successful Application of Glass Reinforced Epoxy (GRE) Casing in Hydraulically Fractured Water Injection Wells ........................................ 1071
D. Peralta, A. Maggioni, R. Garcia, D. Martin

History Matching Using Face-Recognition Technique Based on Principal Component Analysis ...................................................................... 1078
S. Yadav

Technology Implementation To Enhance Reserve Recovery in Mature Fields Requires a New Business Model Between Service Companies and Operators ........... 1088
D.A. Ross, L. Kalfayan, K. Smith

Development and Commercial Deployment of an Expandable Monobore Liner Extension .................................................................... 1093

Robust and Efficient Simulation of Formation-Tester Measurements With a Rigorous Compositional Simulation Code ........................................ 1107
M. Malik, C. Torres-Verdin, K. Sepehrnoori

History Matching with an Uncertain Geological Scenario ............................................................................................................. 1118
S. Suzuki, J. Caers

Predicting The Flow Distribution on Total E&P Canada’s Joslyn Project Horizontal SAGD Producing Wells Using Permanently Installed Fiber Optic Monitoring ....................................................................................... 1135
P. Krawchuk, M.A. Beshry, G.A. Brown, B. Brough

Onshore LNG Production Process Selection ................................................................................................................................. 1149
S. Mokhatab, M.J. Economides

The Texture of Acidized Fracture Surfaces—Implications for Acid Fracture Conductivity .............................................................................. 1160
C. Malagon, M. Pournik, A.D. Hill

Polymer Powder/Cement Composites ................................................................................................................................................... 1176
A. Chougnet, A. Audibert, E. Lecolier, M. Moan, B. Guichard, C. Mazard, A. Valenti

A New Method For Improving LWD Logging Depth ................................................................................................................................. 1184
C.R. Chia, H. Laastad, A. Kostin, F. Hjortland, G. Bordakov
Cleanup of Water-Based Kill-Pills in Laboratory-Simulated Perforation Tunnels During Flowback ................................................................. 1193
A. Suri, M.M. Sharma

Coupling of Downhole Dynamics Recorder Enhances System-Matched Approach to Drill Bit Design and Application With a Specific Rotary-Steerable System ................................................................. 1209
S. Barton, R. Lockley, D. Stroud, S. Peach

Ok, We Can't Get API Cement, What Now? ................................................................. 1223
M.J. Rogers, R.L. Dillenbeck, V.G. Boncan

The Search for Alternatives to Screen: Is Permeable Cement a Viable Option? .......... 1243
B. Vidick, S. James, B. Drochon

The Physics of Steam Injection in Fractured Carbonate Reservoirs: Engineering Development Options That Minimize Risk ................................................................. 1250
G.T. Shahin Jr., R. Moosa, B. Kharusi, G. Chilek

Correcting Common Errors in Probabilistic Evaluations: Efficacy of Debiasing ................................................................. 1262
M.B. Welsh, S.H. Begg, R.B. Bratvold

The Role of Enhanced Production Logging Measurements in Challenging Openhole Completions ................................................................. 1269
P. Mukerji, Z. Zaouali, Hugh Rees

Waterflooding Surveillance and Monitoring: Putting Principles Into Practice .............. 1275
M. Terrado, S. Yudono, G. Thakur

An Organized Approach: Challenges Faced By Today's New Engineers In The Petroleum Industry ................................................................. 1285
J.T. Edwards, G.T. Woo

Drilling-Fluid Design for Challenging Wells in the Andean Mountain Region .............. 1288
M. Ramirez, D. Clapper, P. Kenny

Means for Passive Inflow Control Upon Gas Breakthrough ......................................... 1299
S.L. Crow, M.P. Coronado, R.K. Mody

Utilizing Computational Fluid Dynamics (CFD) Analysis as a Design Tool in Frac Packing Applications to Improve Erosion Life ................................................................. 1305
N.J. Clem, M.P. Coronado, R.K. Mody

Comprehensive Drill Rate Management Process to Maximize Rate of Penetration ........ 1310
F.E. Dupriest

Impact-Fatigue Correlation: Optimization on the Selection Criteria for Sucker-Rod Materials ................................................................. 1319
A. Martinez, A. Jaimes, J.A. Serna, I. Uribe

Development of Low-Order Controllers for High-Order Reservoir Models and Smart Wells ................................................................. 1326
E. Gildin, H. Klie, A. Rodriguez, M.F. Wheeler, R.H. Bishop

Water Shut Off Treatments Using an Internally Catalyzed System in Boscan Field: Cases Histories ................................................................. 1333
F. Mata, S. Ali

Ultralightweight and Gas Migration Slurries: an Excellent Solution for Gas Wells ........ 1341
F. Mata, C. Diaz

In-Field Emulsion Treatability Test with the Electrostatic Susceptibility Tester ............. 1349
J. Lee, T. Frankiewicz, M.Z. Ismail, M.L. Anwar, M.S.A. Samad
A Multi-Disciplinary Approach to Hydraulic Fracturing in the South Texas, Wilcox Formation ................................................................. 1362
L.K. Britt, M.B. Smith, Z. Haddad, P. Lawrence

Water-Fracs: We Do Need Proppant After All ......................................................... 1370
L.K. Britt, M.B. Smith, Z. Haddad, P. Lawrence, S. Chipperfield, T. Hellman

Modeling Nonisothermal Rapid Multiphase Flow in Wells Under Nonequilibrium Conditions .................................................. 1385
G. Michel, F. Civan

Material Balance and Boundary-Dominated Flow Models for Hydrate-Capped Gas Reservoirs .................................................. 1395
S. Gerami, M. Pooladi-Darvish

Modeling Low-Salinity Waterflooding ........................................................................... 1411

New Modified Black-Oil Correlations for Gas Condensate and Volatile Oil Fluids ........ 1424
A.H. El-Banbi, K.A. Fattah, M.H. Sayyouh

Coiled-Tubing Perforation and Zonal Isolation in Harsh Wellbore Conditions ............ 1430

Bokor—A New Look at Sand Production in a Mature Field ......................................... 1438
A. Kasim, F. Wijnands, S. Subbiah

Effective Gas Shut-off Treatments in a Fractured Carbonate Field in Oman .................. 1450
E. Ali, F.E. Bergren, P. DeMestre, E. Biezen, J. van Eijden

VOLUME 3

Challenges for Everyday-NMR: An Operator’s Perspective ........................................ 1462
R. Akkurt, D.G. Kersey, K. Zainalabedin

Relative Permeability Coupled Saturation-Height Models Based on Hydraulic (Flow) Units in a Gas Field .................................................. 1474
M.O. Amabeoku, D.G. Kersey, R.H. BinNasser, A.R. Belowi

Mechanistic/Probabilistic Modeling of Slug Initiation in a Lower Elbow of a Hilly-Terrain Pipeline ........................................................................................................... 1486
E.M. Al-safran, C. Sarica, H.-Q. Zhang, J.P. Brill

Integration of Borehole Imaging, Open Hole Logs, Nuclear Magnetic Resonance/Modular Dynamic Tester, and Advanced Production Logging as a Guide for Perforation Intervals Selection in Thin-Bedded Sands and Shales .............................. 1499
A.M. Daoud, M. Eisa, R. El-Mahdy, M. Emam, A.H. Hashem, A.S. Elhawary

Practical Steps to Increase Production and Reserves in Mature Gas Fields: Hugoton and Panoma, Texas County, Oklahoma, USA ......................................................... 1511
O. Lisigurski, G.C. Rowe

Oil and Gas Fields Offshore Egypt: History and Cases Study ....................................... 1528
W.F. Ellailth, M.G.A. Raheem

Transversely Multi-Fractured Horizontal Wells: A Recipe for Success ...................... 1536
A.S. Demarchos, M.M. Porcu, M.J. Economides

Analytical and Numerical Solution of Non-Isothermal Buckley-Leverett Flow Including Tracers ........................................................................ 1545
D. Sumnu-Dindoruk, B. Dindoruk
Shear-Type Borehole Wall Shifts Induced During Lost Circulations ......................... 1558
D. Iwashita, N. Morita, M. Tominaga

Case Studies of Tight-Gas Carbonate Reservoir Stimulation: Acid Fracturing vs.
Propped Fracturing ............................................................................................... 1568
X. Li, Z. Zhao, X. Ma, X. Wang, H. Zhou

Semiautomatic Multiple Resolution Design for History Matching ......................... 1576
B. Li, F. Friedmann

Full-Field Parallel Simulation Model: A Unique Tool for Reservoir Management of
the Greater Burgan Oil Field ................................................................................ 1593
A.K. Ambastha, D. Al-Matar, E. Ma, B. Kasischke

CO₂ Sequestration in Depleted Gas/Condensate Reservoirs ................................ 1605
E. Shtepani

A Novel Approach for Drilling and Gravel Packing Horizontal Wells in the
Presence of Reactive Shales Using a Solids-Free Synthetic Fluid ....................... 1612
A.F.L. Aragao, L. Quintero, A.L. Martins, A. Calderon, A. Sa, A. McKellar, A.D. Gabrysch

An Integrated Approach to Parameterize Reservoir Models for CO₂ Injection in
Aquifers .................................................................................................................. 1620
P. Egermann, C. Chalbaud, J.-P. Duquerroix, Y. Le Gallo

First Laboratory Perforating Tests in Coal Show Lower-Than-Expected
Penetration! ............................................................................................................ 1629
P.M. Snider, I.C. Walton, T.K. Skinner, D.C. Atwood, B.M. Grove, C. Graham

Near-Well Bore Field Water-Oil Relative Permeability Inferred from Productin with
Increasing Water-Cut .............................................................................................. 1639
J. Toth, T. Bodi, P. Szucs, F. Civan

Theoretical Analysis of Bottom Water Invasion at Oil Wells Due to Transverse
Dispersion................................................................................................................ 1649
S. Duan, A.K. Wojtanowicz

New Results Improve Fracture Cleanup Characterization and Damage Mitigation .... 1659
J.A. Ayoub, R.D. Hutchins, F. Van der Bas, S. Cobianco, C.N. Emiliani, Eni; M. Glover, S.
Marino, G. Nitters, D. Norman, G. Turk

Combined Microbial Surfactant-Polymer System for Improved Oil Mobility and
Conformance Control .......................................................................................... 1666
J.F. Gabitto

Hydrate Inhibition of Subsea Jumpers During Shut-in .......................................... 1676
T. Cagney, S. Hare, S.J. Svedeman

Development of a Low-Frequency Quadrupole Shear-Wave Technology to
Improve Quality of LWD Shear Velocity Measurement ....................................... 1687
X.M. Tang, V. Dubinsky, D. Patterson

Analyzing and Troubleshooting Plunger-Lifted Wells ......................................... 1698
O.L. Rowlan, J.N. McCoy, A.L. Podio

Quantifying 3D Land Seismic Reliability and Value ........................................... 1710
J.E. Bickel, R.L. Gibson, D.A. McVay, S. Pickering, J. Waggoner

Closing the Well-Centric Production Optimization Loop: Dealing with the
Reservoir as an Externality .................................................................................... 1719
P. Vega, G. Vachon, J. Lee
Characterization of a Shallow Horizontal Fracturing Treatment in Western Missouri ................................................................. 172

Directional Permeability ................................................................................................................................. 173
J.R. Fanchi

Dispersion Corrections Are Not Just for LWD Dipole Sonic Tools ................................................................. 173
J. Market, W. Canady

New Era of History Matching and Probabilistic Forecasting – A Case Study ................................................. 175
S. Selberg, B.E. Ludvigsen, A. Diab, T. Hameshaug

Field Trials of a New Method for the Measurement of Formation-Gas Using Pulsed-Neutron Instrumentation ................................................................................................................................. 175

Real Time Production—A Virtual Dream or Reality? The Case of Remote Surveillance of ESP and Multiphase Flowmeters .............................................................................................................................................. 177
B. Theuveny, A. Kosmala, P.-D. Maizeret, R.K. Sagar

Pipelines Slugging and Mitigation, Case Study for Stability and Production Optimization ................................................................................................................................. 177
Y. Tang, T. Danielson

Modeling Multiphase Flow in Naturally Fractured Vuggy Petroleum Reservoirs ........................................... 179
Z. Kang, Y.S. Wu, J. Li, Y. Wu, J. Zhang, G. Wang

The Role of Oil Chemistry on the Cold Production of Heavy Oil .................................................................. 180
G.-Q. Tang, C. Temizel, A.R. Kovscek

Formation Testing and Sampling Using an Oval Pad in Al Hamd Field, Egypt ........................................... 181
T. EL Zefzaf, M.A. El Fattah, M.A. Proett, B. Engelman, A. Bassioumy

Modeling Dependence Among Geologic Risks in Sequential Exploration Decisions ................................................. 182

Rehabilitation of Complex, Massive, and Aged Pipeline Infrastructure in the Gulf of Suez

M.M. Zekry, A. Emam

3909

Intelligent Well Automation—Design and Practice

D. Mathieson, C. Giuliani, A. Ajayi, M. Smithson

3919

Permeability Modeling for the SAGD Process Using Mini-Models

J.A. McLennan, C.V. Deutsch, D. Garner, T.J. Wheeler, J.-F. Richy, E. Mus

3925

Intelligent Electronic Firing Heads; Advancements in Efficiency, Flexibility & Safety

K.R. Goodman, M.J. Bertoja, R.J. Staats

3939

Portable Multiphase Production Tester for High-Water-Cut Wells

K.D. Oglesby, P. Mehdizadeh, G.J. Rodger

3945

Apparatus for Measuring the Dynamic Solids Settling Rates in Drilling Fluids

R. Murphy, D. Jamison, T. Hemphill, S. Bell, C. Albrecht

3955

Systematic Approach to the Design and Application of a Well Fracturing Fluid To Ensure Deepwater Production

3964

DTS Transient Analysis: A New Tool to Assess Well-Flow Dynamics

D. Johnson, J. Sierra, D. Gualtier, J. Kaura

3979

Dynamic Depth Correction To Reduce Depth Uncertainty and Improve MWD/LWD Log Quality

3990

Successful Flow Profiling of Gas Wells Using Distributed Temperature Sensing Data

D. Johnson, J. Sierra, J. Kaura, D. Gualtieri

4003

Efficient Parallel Computing Using Multiscale Multimesh Reservoir Simulation

S. Atan, H. Kazemi, D.H. Caldwell

4019

Advancement in Completion Technologies Prove Successful in Deepwater Frac-Pack and Horizontal Gravel-Pack Completions

M. Lorenz, G. Ratterman, F. Martins, W. Triplett

4025

Stochastic History Matching and Data Integration for Complex Reservoirs Using a Wavelet-Based Algorithm

I. Sahni, R.N. Horne

4047

Determining Anisotropic Formation Resistivity at Any Relative Dip Using a Multiarray Triaxial Induction Tool

H. Wang, T. Barber, C. Morriss, R. Rosthal, R. Hayden, M. Markley

4063

Multidisciplinary Teamwork Results in Dramatically Improved Production, East Kamennoye, Western Siberia

4076
Experimental Development of Adsorption and Desorption Kinetics of a CO₂-Foaming Surfactant onto Berea Sandstone
