# ECS Transactions, Volume 1, Issue 12

## Electrodeposition of Nanoengineered Materials

### Table of Contents

*Modeling Nanocrystalline Grain Growth during the Pulsed Electrodeposition of Gold-Copper*

A. Jankowski  

Diameter Dependent Optical Constants of Gold Meso-particles Electrodeposited on Aluminum Films Containing Copper

D. A. Brevnov and C. Bungay  

Substrate Preparation for Nanowire Fabrication by Selective Metalization of Patterned Silane Monolayers

Electrodeposition in Nano Structured Templates Using Novel Cathode Preparation

J. Lee, K. L. Bartley, and O. Palasinski  

Epitaxial Growth of Ag on Au(111) by Monolayer Restricted Galvanic Displacement

N. Dimitrov and R. Vasilic  

Influence of Anodic Polarizations on the Electrodeposition of Metals on BDD Films

M. C. Ribeiro, P. de Oliveira, and P. Sumodjo  

Deposition and STM Study of Nanocrystal Platinum on Highly Oriented Pyrolytic Graphite

X. Zhou, F. Zhang, and R. Srivastava  

An Examination of Co and Fe Core Nanoparticles with a Protecting Shell

E. J. Podlaha, L. Henry, and Z. Guo  

GMR in Multilayered CoNi(Fe)Cu/Cu Nanotubes and Nanowires

E. J. Podlaha, M. Moldovan, D. Young, and D. Davis  

Electrodeposition of CoNiMo Magnetic Thin Films from a Chloride Bath in the Presence of Citrate or Glycine

M. C. Esteves and P. Sumodjo  

Electrodeposition of Magnetic CoPd Thin Films. Influence of Plating Condition

F. M. Takata, P. Sumodjo, and M. C. Esteves  

Coordination Chemistry in the Electrodeposition of IG-V, W, and Mo Alloys from Aqueous Carboxylate Solutions

M. Schwartz and K. Nobe
