# Table of Contents

## Volume 1

**Extraction and Processing Division**  
Executive Council  
Honors and Awards  
Session Chairpersons

### Advances in Furnace Integrity  
**Session I**

- **Acoustic-Pulsation-Based Intensification of Heat Transfer in Continuous Furnaces**  
  A. Lozhko, and E. Sorokina  
  Page 5
- **CONSCAN, A Laser Measurement System for Furnaces Which Are Operating on High Temperatures**  
  O. Zach, K. Gamweger, and T. Prietl  
  Page 11
- **Recent Improvements in Evaporative Cooling Technology for Copper Tapholes and Launder**  
  P. Navarra, F. Mucciardi, and T. Van Rompaey  
  Page 17

### Characterization of Minerals, Metals and Materials  
**Advances in Minerals and Processing Applications**

- **On-Line Radio Frequency Measurement of Bulk Mineralogy**  
  D. Bennett, D. Miljak, and J. Khachan  
  Page 31
  K.S. McIntosh, J.J. Eksteen, and K. Koch  
  Page 39
- **Using Rietveld Analysis with Topas for Modal Analysis of Geological Samples**  
  H. Cordes  
  Page 49
- **Barite Mineralization in Volcanic Rocks in Southern Flank of East-Magnitogorsk Palaeoisland Arc (South Urals)**  
  N.N. Ankusheva  
  Page 57
- **Mineralogical and Chemical Characterization of the W-Pb-Bi-Ag Ore from the Rudnik Mine, Serbia**  
  S. Radosavljevic, J. Stojanovic, and A. Radosavljevic-Mihajlovic  
  Page 65
Applied Mineralogical Studies on Colombian (El Bagre, Antioquia) Black Sands ...........................................................................................................................73
C.M. Lamus Molina, M.A. Márquez Godoy, and J.C. Gaspar

Applied Mineralogical Studies of Nigerian Bulk Complex Sulphide Ore ..........83
P.A. Olubambi, S. Ndlovu, J.H. Potgieter, and J.O. Borode

Pulsed Power Breaking-Up Technology for Resistant Gold-Containing Ores and Beneficiation Products ......................................................................................93
V.A. Chanturiya, and I.J. Bunin

The Effect of the Mineralogy of the Platinum Group Metals on Their Leachability During the PLASTOL® Leach Process .........................................................103
C.J. Ferron, C.C. Hamilton, O. Valeyev, and N. McKay

Materials Characterization of Electrocoagulation Byproducts Using Al-Fe Combination Electrode System ........................................................................119

Advances in Metals and Engineered Materials

Adiabatic Shear Bands Associated with Plug Formation and Penetration in Ti-6Al-4V Targets: Formation, Structure, and Performance: A Preliminary Study..........................................................................................................................137

Comparison of Dislocation and Other Deformation Microstructures in As-Grown, Compression Tested, and Ballistically Penetrated W Single-Crystal Rods .............................................................143

Local Thermal Property Analysis by Scanning Thermal Microscopy of Ultrafine-Grained Surface Layer in Copper and in Titanium Produced by Surface Mechanical Attrition Treatment .............................................................149
F.A. Guo, Y.N. Zhang, and N. Trannoy

Temperature Measurements in Microwave Heating..........................................1118
X. Sun, J.-Y. Hwang, S. Shi, B. Li, and X. Huang

Ultrasonic Detection of Hydride Blisters in a Zr-2.5Nb Pressure Tube ............159
Y.-M. Cheong, S.-S. Kim, and Y.-S. Kim

The Characterization of the Intermetallic Fe-Al Layer of Steel-Aluminum Welds....................................................................................................................167
M. Potesser, T. Schoeberl, H. Antrekowitsch, and J. Bruckner

Microstructural Characterization of Mg Based Alloys .......................................177

Effect of Retrogression and Reaging Treatment on Stress Corrosion Cracking Resistance of 7075 Aluminum Alloy.................................................................181
M. Baydogan, H. Cimenoglu, E.S. Kayali, and J. Rasty
EDXRF Analysis of Alloys and Corrosion Products of Metallic Pre-Hispanic Pieces of the Museum of Ethnology and Archaeology of the University of Sao Paulo .................................................................189

Corrosion Processes and Mineral Formation on the Surface of Bronze Monuments in Urban Environments .................................................................................................................................199
O. Frank-Kamenetskaya, and E. Treivus

A Study of Accuracy and Reproducibility of High Temperature Differential Scanning Calorimetry ...............................................................................................................................209
S. Jacob, and M.E. Schlesinger

Iron Oxide Reduction with Conventional and Microwave Heating Under Co and H2 Atmospheres ..........................................................................................................................219
J.-Y. Hwang, X. Huang, S. Qu, Y. Wang, S. Shi, and G. Caneba

Microstructural Characterization of Brazilian Iron Ores for Quality Control in Iron Making – A Geometallurgical Approach .................................................................229
V. Seshadri, C.B. Viera, and C.A. Rosiere

Development of Ore-Coal Composite Pellets for Sponge Ironmaking ...............241
B.B. Agrawal, and G.I.S. Chauhan

Advances in Ceramics, Refractories and Composites

Characterization of a Ceramic Foam ........................................................................249
S.N. Monteiro, and C.M.F. Vieira

Fibrous Reinforcement in Clay-Bonded Silicon Carbide Refractory Using Andalusite Powder .........................................................................................................................255
B. Li, J.-Y. Hwang, and S. Shi

Characterization of Some Ceramic Materials for High Pressure Applications .................................................................................................................................263
A.M. Ramalho, G.S. Bobrovnitchii, S.N. Monteiro, and M.V. Figueiredo

Investigation on the Thermal Decomposition of Diaspore .....................................273
X. Liu, J. Wang, Y. Hu, Y. Danqing, and H. Li

Characterization of Clayey Ceramic Body Used for Roofing Tile Fabrication .................................................................................................................................281
C.M.F. Vieira, P.M. Andrade, E.V. Silva, and S.N. Monteiro

Structural and Morphological Characterization of a Natural Graphite After Application of High Pressure and High Temperature Treatment ........................................289

Phase Transformation of Andalusite and Its Impacts on Refractory Brick Reinforcement .................................................................................................................................295
B. Li, J.-Y. Hwang, A.M. Hein, and Z. Xu

Characterization of Steel Slag for Incorporation Into Red Ceramics ..................303
S.N. Monteiro, E.L. dos Santos Jr., S.C. Intorne, D.P. Dias, and C.M.F. Vieira

Phase Changes During Heating of Illite ...................................................................309
X. Liu, H. Li, Y. Hu, D. Yi, and J. Wang
Pullout Test of Coir Fiber to Evaluate the Interface Strength in Polyester Composites .......................................................... 317

Microstructural Characterization of Epoxy Matrix Composites with Dispersed Diamond Particles .............................................. 325

The Direct Test of Swell Stress for Geosynthetic Clay Liners ................................................................. 335
J. Shen, C. Li, S. He, G. Zhang, J. Tong, and B. Yan

Environmentally Correct Jute Reinforced Polyethylene Composites .................................................. 349

Morphological, Mechanical and Optical Characterization of Flyash Filled Nylon 6 .............................................................. 359
P.A. Mahanwar, S. Bose, and H. Raghu

Mechanical and Structural Characterization of Curaua Fibers ............................................................... 369
S.N. Monteiro, J.F. de Deus, and J.R.M. D‘Almeida

General Abstracts:
Extraction and Processing Division
Copper and Nickel Hydrometallurgy

Development of a Hydrometallurgical Process for Copper Concentrate Treatment by Sumitomo Metal Mining .......................................................... 381
M. Imamura, K. Takeda, K. Ando, N. Nagase, and Y. Ojima

High Aspect Ratio Nickel Structures Fabricated by Electrochemical Replication of Hydrofluoric Acid Etched Silicon .......................................................... 391
X. Zhang, and K.N. Tu

Hydrometallurgy

Effect of Normality, Temperature and Time on the Tungsten Losses in The Residue Separated from Diluted Scheelite-Slurry-in-NaOH after Digestion ......................................................................................... 1094
R.P.S. Gaur

Comprehensive Utilization of Zinc Leach Residues by Flotation – Reduction Roasting - Magnetic Separation Process .......................................................... 401
Y. Zhang, Z. Huang, T. Jiang, G. Li, Y. Yang, Y. Guo, and B. Xu

Study on Recovery of Ferrous Minerals from Nickle Metallurgical Residues by Selective Flocculation-Magnetic Separation .......................................................... 411
Y. Guo, H. Dong, G. Li, Z. Huang, Y. Yang, and T. Jiang

The Technological Characteristics of Blended Nkalaha and Nsu Clays .......................................................... 421
N.E. Idenyi, S.I. Neife, and S.O. Agha

A Clean Method Applying Anion-Exchange Separation and Membrane-Electrolysis to Regenerate Fe-Zn-HCl Spent Pickling Liquors .......................................................... 427
G. Csicsovszki, T. Kékesi, and T.I. Türök
Copper/Nickel

Neutralization of Smelter Gases with Limestone in a Countercurrent Multiple Fluidized Bed System .......................................................... 439
I. Wilkomirsky, F. Parada, and R. Parra

Decomposition Kinetics of Flash Smelting Flue Dust Sulphates ............. 451
E. Nurminen, and P. Taskinen

Controlling of Foaming Phenomena During Copper Blow in Copper P-S Converter ................................................................................. 461
P. Tan, P. Vix, and P. Telford

Reduction of Nickel Oxide from Liquid Slags with Carbon and Silicon ........................................................................................................ 475

Energy Requirements in Nickeliferous Laterite Treatment ....................... 487
E.N. Zevgolis, C. Zografidis, J. Gaitanos, I.P. Kostika, and I. Halikia

Lead and Other Metals

Improving Metallurgical Operations Through Application of Systems Thinking Principles .............................................................................. 499
K.N. Swamy

Thermodynamic Modeling of Copper Drossing Process in Lead Refining ...... 509
P. Tan, and P. Vix

Thermodynamic Modeling of Kivcet Lead Process ...................................... 517
P. Tan, and P. Vix

Application of Transformational Roasting to the Treatment of Metallurgical Wastes ................................................................. 525
P.C. Holloway, and T.H. Etsell

Granulation of Molten Materials

Granulation of Molten Materials ................................................................. 539
D. Norval

Evolution of Granulation Technology ........................................................ 553
W. Van Hooff, B. Greiveldinger, and M. Wenner
Granulation of Molten Materials
Session II

Common Granulation System Problems with a Focus on Non-Ferrous Applications ...........................................623
A. Cooper

Atomisation as a One Step Process for Hydrometallurgical and Flash Furnace Feed .............................................633
D. Norval

Atomization of Granules Using a Single Fluid Technique .................................................647
H. Henein

Materials Processing Fundamentals
Process Modeling

Fluid Flow and Transport Phenomena During Steel Refining and Casting Process ............................................659
L. Zhang

Numerical Simulations of Jet Break-Up Phenomena for the High Pressure Die Casting Process .................................669
V. Viti, K. Kuvana, A.S. Sabau, M. Hassan, and K. Saito

P. Navarra, H. Zhao, F. Mucciardi, and T. Van Rompaey

Numerical Model of the Temperature Field and Heterogeneity of a Casting of Ductile Cast-Iron .................................689
F. Kavicka, B. Sekanina, J. Heger, K. Stransky, J. Dobrovaska, and J. Stetina
Design of Supersonic Nozzles for Ultra-Rapid Quenching of Metallic Vapours .............................................699
M.N.H. Khan, P. Witt, G. Brooks, T. Barton, and M. Nagle
Study of Non-Wetting Liquid Flow in a Bed of Mono-Sized Particle Packing Under the Influence of Lateral Gas Injection .......................................................711
V. Singh, and G.S. Gupta

Computer Modeling of a Self-Reducing Agglomerate in a Shaft Furnace.......721

Solidification and Deformation Processing

Comparative Study of the Effects of Solidification Rate on the Cast Microstructures of Aluminum Alloys 6016 and 6009 .......................................................733
P.N. Anyalebechi

On Chemical Heterogeneity Measurement and Evaluation in CC Steel Slab ...745
J. Dobrovská, F. Kavicka, V. Dobrovská, and K. Stranský

Metallic Wires Elaboration Directly from Thin Liquid Jets .......................753
L. Charpentier, Y. Duterrail-Couvat, Y. Delannoy, and C. Trassy

The Model of Structure Refinement in Metals at Large Deformations and Factors Effecting Grain Sizes ...............................................................763
F.Z. Utyashev, and G.I. Raab

Age Hardening Behavior of AA2618...............................................................773
H. Lu, P.B. Kadolkar, K. Nakazawa, T. Ando, and C.A. Blue

Characterization of Mechanical Properties and Microstructure in Copper Nanopowder Alloyed Al7075 T651 Via Friction Stir Process.........................783
D. Kim, J. Wu, W.F. Schmidt, and A.P. Malshe

Smelting and Refining

Mechanisms of Oxygen Partial Lead Softening..............................................795
S. Firoozi, D. Vineberg, and R. Harris

Carbothermal Reduction Study of Kaolin and Two Different Silica Sources ...805
S. Niyomwas

Increase in Concentration of a Zn-Containing Volatile Complex by UV Irradiation of a Target for ZnO Films Synthesis...........................................813
E. Arakelova, V. Parvanyan, F. Grigoryan, G. Asatryan, and G. Petrosyan

Preparation of SmCOs by Chemical Coprecipitation-Reduction-Diffusion Method (CPRD) .................................................................819
L. Ping, G. Xueyi, X. Ping, H. Kai, and L. Rongyi

Prevention of Resulfurization in Magnesium Desulfurization Process of Molten Iron.................................................................827
J. Yang, M. Kuwabara, K. Okumura, Z. Liu, and M. Sano
Powders and Composites

EMF Study of Nb-Al Intermetallics ................................................................. 841
P. George, and R.G. Reddy

In Situ Synthesis of Al-TiC-Al2O3 and Al-SiC-Al2O3 Composites ............... 847
N. Memongkol, and S. Niyomwas

Effects of Temperature and Precursors on Preparation of Fe-TiC Composite from Ilmenite ........................................................................................................ 857
S. Niyomwas

Preparation of Mono-Dispersed Cobalt Oxide Particles by Homogeneous Precipitation with Urea ................................................................. 865
Q. Bo, G. Xueyi, X. Liu, H. Kai, and R. Liu

Study of the Metallizing of the Continuous Carbon Fiber Surface ............. 875
T. Luo, G. Yao, L. Wu, and Y. Liu

Study of Decomposition Regularities for a Zn-Containing Volatile Complex Used in ZnO Film Synthesis ................................................................. 883
E. Arakelova, F. Grigoryan, V. Parvanyan, and G. Asatryan

The Formation of Misty Band Near the Substrate During Contact Angle Measurement ........................................................................................................ 889
L. Wu, G. Yao, T. Luo, and X. Zhang

Recycling

Electronics Recycling

Metallurgical Recycling of Electronic Scrap .................................................. 899
H. Antrekowitsch, M. Potesser, W. Spruzina, and F. Prior

Eco-Efficient Recycling Alternatives for End-of-Life Cathode Ray Tubes .... 909
J. Gregory, and R. Kirchain

Filtration of Solar Cell Silicon Scrap ............................................................. 919
A. Kvithyld, D. Chithambaranadhan, A. Çiftja, E. Øvrelid, and T.A. Engh

Leaching of Copper from Waste Printed Circuit Boards Using Electrogene rated Chlorine in Hydrochloric Acid Solution ..................................... 929

Recovery of Tellurium from Cadmium Telluride Photovoltaic Module Manufacturing Scrap and Other Sources ......................................................... 935
W. Wang, and V.M. Fthenakis

A Clean-Lead Factory is Available for Lead-Acid Batteries Recycling by Means of the “Cleanlead Process” ................................................................. 943

Cost Analysis of Used Battery Recycling in Taiwan ..................................... 953
E. Hsu, and C.-M. Kuo
General Recycling

Immobilization Process Via Solidification of Hazardous Heavy Metals for Recycling Industry Waste .................................................................963

Effect of Magnetic Separation in Removal of Heavy Metals in Municipal Solid Waste Incineration Bottom Ash ..........................................................967
N.-I. Um, G.-S. You, G.-C. Han, and J.-W. Ahn

A New Recycle Process of Uranium from Spent Fuel by Selective Sulfurization ..........................................................................................973
N. Sato, G. Shinohara, O. Tochiyama, and S. Sato

Recycling of Oxidic Waste from Ferroalloy Production ........................................979
M. Hochenhofer, H. Antrekowitsch, M. Potesser, and W. Labenbacher

Repeatedly Utilizing of Carbon Fiber Chemistry Copper Plating Waste Liquid ..........................................................989
T. Luo, G. Yao, L. Wu, X. Zhang, and H. Li

Sampling, Sensors & Control for High Temperature Metallurgical Processes

Session I

Challenges in Sampling, Metallurgical Accounting and Reconciliation of Primary Smelting Furnaces .................................................................999
J.J. Eksteen, and C. Cutler

Prototype Camera for Monitoring Aluminium Tapping ....................................1009
D. Death, L. Pollard, C. Rogers, P. Gwan, S. Maunder, F. Giurco, P. Herd, and A. Johnston

Local Temperature Control for Die Casting Processes .....................................1015
T. Yang, H. Hu, X. Chen, Y.-L. Chu, and P. Cheng

Modelling, Control and Optimisation of Chemistry and Viscosity of Copper Converter Slag .................................................................1023
P. Tan, and P. Vix

Variance and Heterogeneity in Melt Samples from Industrial Ferro-Alloy Furnaces .........................................................................................1035
J.J. Eksteen, E.L. Thyse, and M. Nkohla

Modelling and Control of Copper Isasmelt Furnace ........................................1107
P. Tan, and P. Vix
Separation Technology for Aqueous Processing
Session I

Bioleaching of Nickel Laterite Ore Using Halotolerant *Aspergillus Foetidus* Under Saline Conditions .................................................................1049
V. Thangavelu, D. Ryan, A. Deepatana, and M. Valix
Ion-Exchange Recovery of Nickel and Cobalt from Metal-Organic Complexes Generated in Bioleaching of Low Grade Nickel Laterite Ores.........................1059
A. Deepatana, and M. Valix
Kinetics of Limonite and Nontronite Ore Leaching by Fungi Metabolic Acids .......................................................................................................................1069
A. Deepatana, J. Tang, and M. Valix
Semi-Batch Manganese Removal from a Zinc Leach Solution Using SO₂/O₂. ....................................................................................................................1079
V. Menard, and G.P. Demopoulos
Study of Organic Phase Composition and Solvent Extractive Process for Purifying Nickel Chloride Solution with N₂35 .............................................1089
S. Chen, L. Wang, L. Zhang, and Y. Luo
