“Meeting The Value Challenge:
Performance, Deliverability and Cost”

November 13-15, 2006
Bangkok, Thailand

Printed from e-media with permission by:
Curran Associates, Inc.

# TABLE OF CONTENTS

Current Accumulator Design Methods are Inadequate for Deepwater Drilling ........................................... 1
*M. Amani, Texas A&M U. at Qatar, and M.M. Rajabi, H.C. Juvkam-Wold, and J.J. Schubert, Texas A&M U.*

Rig Automation—Altering the Visage of the Oil Industry ................................................................................. 12
*Siddhartha Gupta, Indian School of Mines*

PDO’s Proactive Approach to Solving a Zonal Isolation Challenge in Harweel HP Wells Using Swell Packers ................................................................. 20
*M.S. Laws, J.E. Fraser, and H.F. Soek, Petroleum Development Oman, and N. Carter, Easywell, UAE*

Experimental Evaluation of Formation-Strengthening Potential of a Novel Gel System ............................ 27
*Md. Amanullah and Richard Boyle, CSIRO Petroleum*

Successful Use of a Multipurpose Vessel for Well Intervention and Stimulation: The Means To Manage Brownfield—Case History ........................................... 40
*N. Al-Araimi, Brunei Shell Petroleum, and J. Queirós, Keng Seng Chan, and M. Samuel, Schlumberger*

Resolving the Right Support Vessel Strategy for Offshore Coiled Tubing Operations ............................ 50
*Mahesh Mahajan, BJ Services*

An Offline Approach Utilising New Slickline Technology ............................................................................. 61
*Giang Ha The and Ngoc Tran Dinh, Japan Vietnam Petroleum Co. Ltd., and D. Flores and F. Wendlinger, TAM Intl. Inc.*

Swell Packers: Enabling Openhole Intelligent and Multilateral Well Completions for Enhanced Oil Recovery ........................................................................... 67
*Drew Hembling, Salam Salamy, and Abdullah Qatani, Saudi Aramco; Neale Carter, Easywell; and Saresh Jacob, WellDynamics*

High-Impact-Resistant Cement Allows Challenging Sidetrack in Abu Dhabi ............................................. 75
*Hassan El Hassan and Mahmoud Shagnoubi, Adco, and Abdel Belmahi, Haitham Jarouj, and Eric Voon, Schlumberger*

Experience With Rotary-Steerable System for Reservoir Drilling in Iranian Offshore Oil Fields ............. 81
*A. Molayee, Iranian Offshore Oil Co., and A. Teymoori, Petroiran Development Co.*

Formation of Underwater Cuttings Piles in Offshore Drilling ................................................................. 89
*Qian Fang, Boyun Guo, and Ali Ghalambor, U. of Louisiana at Lafayette*

Drilling Riser Alternative Repair Methods for Leaking Joint Seals Utilizing Pressure Activated Sealant Technology ............................................................................. 96
*D. Neil Cary and Vic Groomer, Seal-Tite Intl.*

Solid Expandable Tubular Technology: Case Histories of Value-Adding and Enabling Applications in Sabah Deepwater Campaign .............................................. 99
*Daniel Miesenner, Ochuko Erivwo, Wouter Wenting, Chris Hopkins, and Erik Nijveld, Shell E&P, and Markus Kaschke, Enventure Global Technology*

A Synergy of New Technologies Successfully Overcomes Openhole Horizontal Completion Problems in Malaysia .............................................................................. 106
*Kim King, Halliburton Energy Services Inc.; Jan H. Terwogt, Sarawak Shell Berhad; and Chen YeeChay and Alfred Azer, Halliburton Energy Services Inc.*

Service the Limit—Operational Excellence in Well Intervention ................................................................... 120
*Sylvester C. Anyanti and Paul A. Hopmans, Shell E&P*
New Device for Drilling in Deepwater Under Semisubmersible: ABS Unit..........................................................130
Guo Yongfeng, Ji Shaojun, and Ye Aijie, COSL, China Oilfield Services Ltd.

The Application of Air and Air/Foam Drilling Technology in Tabnak Gas Field, Southern Iran..........................................................137

Theory and Application of Buoyancy in Wells ..................................................................................................147
B.S. Aadnoy and E. Kaarstad, U. of Stavanger

Use of Non-API Cements for Critical Oilwell Applications..........................................................157
Murray J. Rogers, Robert L. Dillenbeck, and Windal S. Bray, BJ Services Co.

Underbalanced Drilling in Saudi Arabia-Start Up Experience ..........................................................169

Cementing Under Pressure in Well Kill Operations: A Case History From the Eastern Mediterranean Sea..................................................................................179
Kristian Johnstone, Alex Gill, and Tom Conlon, Peak-Group Inc.; Mahdy Bahr, Rashid Petroleum Co.; and Arshad Waheed, Halliburton

Improved Optimisation of Bit Selection Using Mathematically Modelled Bit-Performance Indices ..................................................................................................190
John Clegg and Steve Barton, ReedHycalog

Performance Step Change in Kuwait: Drilling Deep-Directional 16-in. Hole Build Section Saves Operator 13 Days Rig Time ..........................................................200
Mohd. Al-Saeedi, Mahesh Sounderajan, and Dakhil Al-Enezi, Kuwait Oil Co., and Ross Moore, Maneesh Sharma, and Darren Eckstrom, Hughes Christensen

A New Slim-hole Drill Bit ..................................................................................................................216
Qingyou Liu and Qin Hu, Southwest Petroleum U.

Experimental Investigations and Findings on Deep-Well Drill-Collar Failures To Improve Drilling Downtime in Teikoku Oil Co. ..........................................................222
Shoichi Ikeda and Makoto Tsuruta, Teikoku Oil Co. Ltd.

Evolutionary Well-Construction Method That Challenges Convention ..................................................................225
P.D. Howlett, M.T. Wardley, and C. Black, Caledus Ltd.; D. Reed, Senergy Ltd.; and G. Begg, Talisman U.K. Ltd.

Fills Cleanout With Coiled Tubing in the Reverse Circulation Mode ..................................................................237
Li J. and B. Luft, BJ Services Co.

Water Shutoff: The Through-Tubing Inflatable Solution ...............................................................................245
Graeme M. Kelbie and Garry L. Garfield, Baker Oil Tools

Guidelines and Technology for Through-Tubing Milling Intervention That Provide Flawless Execution and Rig Cost Savings ........................................................................253

Well Engineers Deserve a Seat at the Exploration Table: “The Role of Mechanical Earth Modeling in the Early Exploration Process” ..........................................................259
H.E. Goodman, Chevron Energy Technology Co.

Drilling and Testing of an HPHT Deep Gas Prospect From an Existing Well: Case History of Kra Al Maru 3 Deepening ..........................................................................................267
M.J. Al-Saeedi, J.R. Singh, V.S. Mahesh, H.S. Al-Ajmi, Kuwait Oil Co., and D. McKinnell, Total Kuwait

Nature Had It Right After All!—Constructing a “Plant Root”-Like Drainage System With Multiple Branches and Uninhibited Communication With Pores and Natural Fractures ..................................................................................281
P. Moss, L. Portman, P. Rae, and G. Di Lullo, BJ Services

Storm-Safe Deepwater Drilling ..................................................................................................................293
Chau Nguyen, Ricky Thethi, and Frank Lim, 2H Offshore Engineering Ltd.
Underbalanced Operation Can Extend Its Antennae To Breach the Barriers of Conventional Method

Gang Liu, Yangtse U., and Wengui Qin, China Natl. Petroleum Corp.

How Minimum Interval Concept Can Improve Bit Performance Evaluation

The Evolution of Advanced Well Completions Results in Enhanced Well Productivity and Recovery in Saudi Aramco's Offshore Fields

D.S. Al Qudaihy, H.B. Al Qahtani, A.H. Sunbad, and D. Hembling, Saudi Aramco, and G. Salerno, Baker Hughes

Well Work Challenges in a Matured Offshore Operation

Abdul Malek Ismail, Azmeer Ahmad, and Tom Lane, ExxonMobil E&P Malaysia Inc.

Infill Drilling—Rig Time Optimization in the Gulf of Thailand

Worawit Yingvorapant, Chevron Thailand E&P Ltd., and Richard Christiansen, Halliburton

Case History of One Trip Monobone Completion System

Walt Chapman, Baker Oil Tools; Khamatwat Sintheerasas and Khemchad Sumtra, Chevron Offshore Thailand Ltd.

The Special Challenges of Killing a Blowout Caused by Illegal Oil Bunkering

P. Oudeman, Shell Intl. E&P

HP/HT Drilling Fluids Challenges

Ron Bland, Greg Mullen, Yohny Gonzalez, Floyd Harvey, and Marvin Pless, Baker Hughes Drilling Fluids

The Reliability Problem Related to Directional Survey Data

Roger Ekselth, Gyrodata; Torger Torkildsen, Statoil ASA; Andrew Brooks, Baker Hughes Inteq; John Weston, Gyrodata; Erik Nyrenes, Statoil ASA; Harry Wilson, Baker Hughes Inteq; and Kazimir Kovalenko, Gyrodata

Managed-Pressure Drilling—Recent Experience, Potential Efficiency Gains, and Future Opportunities

John Kozicz, Transocean

Preventing Mud Losses and Differential Sticking by Altering Stresses of Depleted Sands

Saddok Benaissa, Baker Hughes Drilling Fluids; Alain Bachelot, Total E&P U.S.; and Seehong Ong, Baker Atlas

Rotary Steerable Systems Result in Step Change in Drilling Performance—A Case Study

Mirghani Malik and Raj Deo Tewari, GNPOC, and Sivaraman Naganathan, Schlumberger

In-Situ Acid System To Clean Up Drill-in Fluid Damage in High-Temperature Gas Wells

M.B. Al-Otaibi, A.M. Al-Moajil, and H.A. Nasr-El-Din, Saudi Aramco

An Integrated Approach to Risk and Hydraulic Simulations in a Well Control Planning Perspective

Øystein Arild, Kjell Kåre Fjelde, and Tove Laberg, IRIS (former RF-Rogaland Resech)

Borehole Instability Analysis in an Anisotropic and Heterogeneous Shale Formation

Synergy Between Engineered Fibers and Lightweight Cement Slurries To Cement Depleted Formations

Rafael Zepeda Garduño and José Antonio Martinez, Pemex, and Reinaldo Maldonado, Schlumberger

Evaluating Expandable Tubular Zonal and Swelling Elastomer Isolation Using Wireline Ultrasonic Measurements

Drillpipe Fatigue in a Fast Drilling Environment: How To Cope with the Extreme!

Guillaume J. Plessis, Grant Prideco; Christopher S. Wright, Chevron Thailand E&P; Agapito Aranas, D.J. Services, Thailand; and Michael J. Jellison and Andrei Muradov, Grant Prideco
LWD Formation Pressure Testing Allows Decision Making While Drilling ................................................................. 473
Ulrich Hahne, Aravindh Kanianppan, Jos Pragt, and Arno Buysch, Baker Hughes Inteq

Simulating Transient Behavior of Cuttings Transport Over Whole Trajectory of Extended-Reach Well ............................................................................................................................................. 480
Shigemi Naganawa, U. of Tokyo, and Tsuyoshi Nomura, Jogmec

Successful Drilling of Oil and Gas Wells by Optimal Drilling-Fluid Solids Control—A Practical and Theoretical Evaluation ............................................................................................................ 489
B. Dahl, Statoil ASA; A. Saasen, Statoil ASA and U. of Stavanger; and T.H. Omland, Statoil ASA

Rapid Planning and Execution of the First Multilateral Well in the Gulf of Thailand: Results and Lessons Learned ....................................................................................................................................... 496

Kuwait Oil Company’s Latest Semiautomated Deep Drilling Rig—HAH Rig 124, The Middle East’s Most Modern 3,000-HP Land Rig ................................................................................................. 514
Ayad Al-Kandari and Mohammed Al-Saeedi, Kuwait Oil Co.; Roger Kingsborough and T.W. Brewster II, Chevron Intl. E&P; and David McKinnell, Total Kuwait

Innovative Design Processes and Technologies Improve PDC Bit Performance in Harsh Drilling Environments ..................................................................................................................................... 523

Stability Analysis of Deviated Boreholes Using the Mogi-Coulomb Failure Criterion, With Applications to Some Oil and Gas Reservoirs .............................................................. 537
Al-Ajmi, A.M., Sultan Qaboos U., and Zimmerman, R.W., Imperial College, London

Well-Control Aspects of Underbalanced Drilling Operations ........................................................................................ 551
Ramalho, John, and Davidson, Ian A., Shell E&P Intl. Ltd.

Making Economic Decisions To Manage Lost Circulation .......................................................................................... 562
Don Whitfill, Hong Wang, Carl Thaemlitz, and Dale E. Jamison, Halliburton

Advanced Drilling Using a Dual-Bit System and Its Application in Coring Operations ............................................. 576
Mahendra Gopalsing Pardeshi and Rathin Nitin Deshmukh, Maharashtra Inst. of Technology, India
