TABLE OF CONTENTS

Volume 1

5001 - Long-term melt stabilization as part of the severe accident mitigation strategy of the European Pressurized Reactor (EPR) ................................................................. 1
  FISCHER, MANFRED

5005 - Fuel Cladding Failures following a Large Break LOCA .................................................. 10
  ORIVE, RAUL

5006 - Visualization of Fluid Mixing Phenomena in T-Junction with 90-Degree Bend Upstream .................................................................................................................. 18
  HOSSEINI, SEYED MOHAMMAD

5007 - A Semi-Passive Approach to GFR Depressurized Decay Heat Removal Accidents ............................................................................................................................... 28
  WEI, THOMAS Y.C.

5008 - Thermal-Hydraulic Analysis of Annular Fuel-Based Assemblies of Liquid Metal Reactors .......................................................................................................................... 38
  HAN, KYU-HYUN

5010 - Transient Characteristics of RAPID Highly Automated Fast Reactor Without Any Control Rods .............................................................................................................. 47
  KAMBE, MITSURU

5011 - Methane-Methanol-Iodomethane Cycle Coupled to the HTGR for Nuclear Hydrogen Production .............................................................................................................. 56
  SHIN, YOUNG-JOON

5012 - Fatigue Analysis of Integrated Reactor Feedwater & Steam Outlet Nozzles .................. 61
  CHUNG, SUNG HO

5013 - Development of a Numerical Analysis Methodology for a MHD Flow In a Linear Induction Pump .......................................................................................................... 72
  SEONG, SEUNG-HWAN

5014 - A Numerical Simulation of the Temperature Fluctuation beyond the Exit of a Partially Blocked Subassembly in KALIMER ...................................................................... 80
  SEONG, SEUNG-HWAN

5015 - Development of Vitrification Process for LLW Generated from Nuclear Power Plants ................................................................................................................................. 90
  KIM, CHEON-WOO

5017 - Development of 1455mW Nuclear Steam Turbine and Generator Units for Korea Next Generation Reactor ............................................................................................. 98
  SHIN, CHUL-GYU

5018 - Heavy Load Drop Analysis Within Low Power and Reactor Shutdown PSA for Mochovce NPP .............................................................................................................. 106
  CILLIK, IVAN
5019 - Design Concept of Safety Assessment System Module for SITES ver.2.0 ......................................... 114
PARK, SE-MOON

5023 - Uncertainties Study into the LWR Containment Analyses ................................................................. 120
ORIVE, RAUL

5025 - Simulating In-Containment Aerosol Behaviour During Severe Accidents: A Validation of CONTAIN 2.0 Code Based on the PHEBUS-FPT1 Experiment .................................................. 128
HERRANZ, LUIS E.

5026 - A Preliminary Selection Approach of the Anticipated Operational Occurrences and Design Basis Accidents for a Hydrogen Conversion Reactor ............................................... 137
HAN, SEOK-JUNG

5027 - A re-estimation of the accident sequences in the current PSA model for the KSNP ................................................................. 138
HAN, SEOK-JUNG

5028 - House Load Operation After Full Load Rejection on Nuclear Steam Turbine Generator ................................................................. 145
AHN, HONG-JIN

5030 - Reactor Physics Studies of a Breed and Burn Gas-cooled Fast Reactor ............................................. 153
YARSKY, PETER

5032 - SCOR: an economic and innovative conceptual design of a medium-sized PWR ................................................................. 163
GAUTIER, GUY-MARIE

5034 - A Sensitivity Analysis of the Spent Fuel Inventory for the Fast Reactor Fuel Cycle .............................. 174
JEONG, CHANG JOON

5035 - Compatibility of the DUPIC Fuel with a Fuel Management Strategy ..................................................... 181
CHOI, HANGBOK

5036 - Performance Evaluation of KSNP Using RETRAN-3D ................................................................. 186
LEE, DOO YONG

5037 - Low Pressure Drop Large GFR Pin Core Designs ........................................................................ 195
WEI, THOMAS Y.C.

5038 - Development of Digital CRCS for Nuclear Power Plant ................................................................. 202
NAM, JUNG-HAN

5039 - A Study on the Intergranular Characteristics of Austenite Stainless Steel Pipe Heated Low Temperature by Oxygen Flame ........................................................................ 210
BANG, SANG-HYUK

5040 - Optimization of Gas Stripping through Start-Up Operation for KSNP ............................................... 215
SEO, YOUNG-BIN

5041 - Triggered Steam Explosion Experiments in the TROI Facility ............................................................. 223
KIM, JONG-HWAN

5042 - Mechanical/Structural Performance Test of the KAERI Devised Spacer Grids for the PWR ................................................................. 232
SONG, KEE-NAM

5044 - Design Improvement of Reactor Internals Lift Rigs for Shin-Kori Nuclear Power Plant Units 3 & 4 ........................................................................ 239
BANG, SANG-YOUN
5045 - NSSS Design Improvements and System Designer's Role for Ulchin Nuclear Power Plant Units 5&6
SEO, HOTAEK

5046 - Residual Stresses in Expanded Transition Region
LEE, SANG CHEOL

5047 - Experimental Study on Fretting Wear Characteristics for SG Tube
PARK, JUN-SOO

5048 - The Performance Evaluation of Moisture Separation System of a Steam Generator Using Computational Fluid Dynamics
KIM, JONG-IN

5050 - Advances in HTGR Fuel Technology - A New IAEA Coordinated Research Program
LEE, YOUNG-WOO

5055 - An Updated Simplified FE Model Generation Technique for Fuel Assembly Seismic/LOCA Analysis
CHOI, JOON-HYUNG

5061 - Starategic Approach to Improve the Public Acceptance through the Advances of Nuclear Power Plant
KIM, SOO-AM

5063 - RCM Analysis Performed for the Diesel Generator of the J.Bohunice V2 NPP
HLAVAC, PAVOL

5064 - Results of a coupled Neutronics and Thermal-hydraulics Analysis of a HPLWR Fuel Assembly
WAATA, CHRISTINE

5069 - Application of the PERCOLA Ejection Model to Reactor Scenario of Molten Core Concrete Interaction under Water
TOURNIAIRE, BRUNO

5070 - Analysis of In-Vessel Retention with Special Interest in Physico-Chemistry Effect
TOURNIAIRE, BRUNO

5071 - Three-Dimensional Analysis of Flow and Heat Transfer in A Wire-Wrapped Fuel Assembly
AHMAD, IMTEYAZ

5072 - MCCI Analysis and Applications with the TOLBIAC-ICB Code based on Phase Segregation Model
SPINDLER, BERTRAND

5074 - A Study on the Nuclear Characteristics of 50MWt Particle Fuel Pressurized Water Reactor, PFPWR50
NAGAI, MASATOSHI

5077 - Optimization of a Fuel Assembly for a HPLWR
HOFMEISTER, JAN

5080 - Thermal Hydraulic Investigations on 1 MW Pilot Liquid Lead Bismuth Eutectic Spallation Target
Batta, Abdalla

5081 - Status of the Qualification Program of the Multiphase Flow Code MC3D
MEIGNEN, RENAUD
5083 - Equilibrium Cycle Analysis in Support of Fuel Specification for Next Generation Nuclear Power Plant ................................................................. 380
   KIM, TAEK-KYUM

5084 - Conceptual Design of Hydrogen Production Plant with Thermochemical and Electrolytic Hybrid Method Using a Sodium Cooled Reactor ................................................................. 387
   CHIKAZAWA, YOSHITAKA

5085 - Proving Test and Analyze for Critical Power Performance in the RMWR Tight Lattice Rod Bundles under Transient Condition ................................................................. 395
   LIU, WEI

5086 - Nuclear exothermic reactions in lattices: a theoretical study of d-d reaction ............. 405
   FRISONE, FULVIO

5087 - Comparative Review of FCI Computer Models Used in the OECD-SERENA Program ........................................................................................................... 411
   MEIGNEN, RENAUD

5088 - Polonium Contamination Removal Experiment For Lead-Bismuth Cooled Fast Reactor ......................................................................................... 424
   MIURA, TERUMITSU

5089 - Development of Measure for Polonium Contamination in Pb-Bi Cooled Direct Contact Water FBR (PBWFR) ............................................................................ 431
   OBARA, TORU

5090 - Assessment of Gas Cooled Fast Reactor with Indirect Supercritical CO2 Cycle .................................................................................................................. 436
   HEJZLAR, PAVEL

5092 - Generalized Pin Factor Methodology ......................................................................... 447
   HAH, CHANG

5095 - IRIS Reactor Design Overview and Status Update ........................................................................................................ 451
   PETROVIC, BOJAN

5096 - 3D Rod Ejection Transient Analysis Methodology Application to Korean 3-Loop Plants ............................................................................................................ 460
   JANG, CHAN SU

5097 - Simulation of the OECD Main Steam Line Benchmark Using the Westinghouse RAVE(TM) methodology .................................................................................. 468
   ORIANI, LUCA

5099 - Power Uprate Program for Pressurized Water Reactors (PWRs) Track No. 4.06 Power Uprating ............................................................................................... 478
   BRAUER, GREGORY

5100 - Water Hammer Analysis in Containment Fan Cooler Systems ........................................ 488
   ARASTU, ASIF

5101 - Effects of Water Rods on Supercritical Water Reactor Stability ........................................ 497
   YANG, WON SIK

   YANG, WON SIK

5103 - Conceptual Design Study of Small Sized Sodium Cooled Reactor ........................................ 516
   USUI, SHINICHI

5104 - High Temperature Gas-Cooled Fast Reactor (HTGFR) .................................................. 526
   KARAM, RATIB
