Proceedings of the Air & Waste Management Association's (A&WMA) 99th Annual Conference & Exhibition
ACE-06-CD

Publication Policy

This compact disk contains technical papers presented at the A&WMA's 99th Annual Conference & Exhibition, held June 20-23, 2006, in New Orleans, Louisiana. The information and opinions expressed in these papers are solely of the authors and should not be considered as having the endorsement or support of the Association.

Compilation Copyright ©2006 by the Air & Waste Management Association. Copyright of the individual papers are retained by the authors. Published in June 2006.

Manufactured in the United States of America

Additional copies of this CD-ROM and the proceedings of previous Annual Conferences are available through the A&WMA Online Library. To place an order, please visit the Online Library at http://www.awma.org/onlinelibrary/ or contact the A&WMA Publications Order Department at onlinelibrary@awma.org or +1-412-232-3444.

For a complete listing of books, CDs, and educational materials offered in the Online Library, visit our Web Site, or contact the Publication Department at onlinelibrary@awma.org or +1-412-232-3444.
### TABLE OF CONTENTS

**VOLUME 1**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>

<tbody>
<tr>
<td>Does Sampling Frequency Play a Major Role in Determining PM-2.5 Ambient Air Statistics and Ultimately in Attainment Status?</td>
<td>1</td>
</tr>
<tr>
<td>Characterization of PM2.5 Composition and Concentration Levels in the Mexicali/Imperial Valley Border Area During Fall of 2004 and Spring of 2005</td>
<td>11</td>
</tr>
<tr>
<td>Water-Soluble Ions in Ultratine Particulate in southern Taiwan</td>
<td>23</td>
</tr>
<tr>
<td>Unusually Elevated PM2.5 Episode Occurring in Montgomery County, TN September 5-15, 2005</td>
<td>38</td>
</tr>
<tr>
<td>Short-time Reconstructed Aerosol Composition from Two Tennessee Valley Sites</td>
<td>47</td>
</tr>
<tr>
<td>Seasonal Distribution and Modeling of Diesel Particulate Matter in the Southeast U.S.</td>
<td>52</td>
</tr>
<tr>
<td>PM2.5 Chemical Speciation Results for Texas - 2001-2004</td>
<td>70</td>
</tr>
<tr>
<td>Physicochemical Characteristics of Suspended Particles and Hot-Spot Identification at a Highly Polluted Region</td>
<td>85</td>
</tr>
<tr>
<td>PM10 and PM2.5 Ambient Lead Levels in the Helwan and Tebbin Industrial Areas of Cairo</td>
<td>99</td>
</tr>
<tr>
<td>Concentration and Distribution of Ambient PAHs in the Greater Cairo Area</td>
<td>114</td>
</tr>
<tr>
<td>Petroleum Coke Fallout Study in Long Beach, California - Part III: A 5.5-Year Study</td>
<td>128</td>
</tr>
<tr>
<td>Overview of the 2004/2005 Clark County PM10 Saturation Study</td>
<td>133</td>
</tr>
<tr>
<td>Investigation of the Sources of Coarse Particles in Western United States</td>
<td>139</td>
</tr>
<tr>
<td>Relationships Between Particle Number and Mass Concentrations in an Urban Area</td>
<td>144</td>
</tr>
<tr>
<td>Atmospheric Pollution Associated to Mining Activities in Mexico</td>
<td>149</td>
</tr>
<tr>
<td>Direct Measurement of PM2.5 Organic Marker Compounds by a Novel Sampling-Detection System</td>
<td>155</td>
</tr>
</tbody>
</table>
Closure Between Semi-Continuous Measurement of PM 2.5 Mass and Composition .......................................................... 160
D. Eatough, J. Cannon, N. Eatough, B. Grover, R. Long

Development of Nanoparticle Generator with Controllable Size Distribution .................................................. 165
Y. Lee

Zapping the Dust in the Antelope Valley ........................................................................................................... 178
R. Farber

Intercomparison Study of Collocated IMPROVE and STN Samplers ...................................................... 203
J. O'Rourke, J. Flanagan, R. Jayanty

Sources of Uncertainty in X-ray Fluorescence Analysis .............................................................................. 208
A. McWilliams, J. Flanagan, W. Gutknecht, R. Kellogg

Characteristics of Gaseous Hydrogen Peroxide and Nitric Acid and Ozone Sensitivity in Pingtung, Southern Taiwan .............................................................. 213
Y. Peng, K. Chen, W. Wang, H. Wang

A New Smog Chamber to Evaluate the Effects of Highly Concentrated Preexisting Aerosol on Secondary Organic Aerosol Formation: Facility and Primary Results .................................................. 223
Z. Lu, J. Hao, S. Wu, Z. Zhao, J. Li, H. Takekawa

Uptake and UV-photooxidation of Gas-phase Naphthalene On Thin Water Films in a Horizontal Flow-reactor .................................................................................................................. 228
J. Chen, K. Valsaraj

Alternative Method for Conversion of NO to NO2 to Predict Ambient Concentrations in Canadian™s Oilsands Region .............................................................................. 243
P. Staniaszek, M. Davies

Modeled Effects of Heterogeneous N2O5 Hydrolysis in Houston, Tx .............................................................. 255
H. Simon, D. Allen

Comparison of the Carbon Bond and Saprc Photochemical Mechanisms Under Conditions Relevant to Southeast Texas .......................................................... N/A
M. Faraji, Y. Kimura, E. McDonald-Buller, D. Allen

Application of the CALPUFF Modeling System for Mercury Assessments in Maryland .................................................. 260
J. Sherwell, M. Garrison, A. Yegnan, A. Baines

Evaluation and Characterization of Acid Rain Precursors in an Industrial Zone .............................................................................. N/A
E. Ramirez-Lara, S. Gracia-Vasquez, Y. Gracia-Vasquez, M. Suarez-Herrera, R. Miranda-Guardiola

Advanced Algorithm in the Prediction of Ozone Peak .................................................................................. 282
H. Lee, S. Kim, J. Park

Challenges in Implementing AERMOD ................................................................................................. 298
R. Paine

Examination of Differences in 24-hour Average AERMOD and ISCST3 Concentrations .................................................. 312
J. Clary, J. Beene, G. Rothman

Evaluation of AERMOD/PRIME For Two Sites with Unusual Structures .................................................... 317
R. Petersen, J. Carter

Examination of Sensitivity of Land Use Parameters and Population on the Performance of the AERMOD Model for an Urban Area .................................................. 337
K. Bhardwaj, A. Kumar, C. Varadarajan

</table>
Regional Modeling Using One-Atmospheric Models to Address Regional Haze, 8-Hour Ozone and PM2.5 Air Quality Issues ................................................................. 501
R. Morris, G. Yarwood, C. Emery, B. Koo

8-Hour Ozone and PM2.5 Modeling to Support the Georgia SIP ............................................... 513
J. Boylan, A. Marmur, M. Khan, D. Cohan

Source Apportionment of Aerosols in Class I Areas of the Western United States .......................... 518
J. Xu, D. DuBois, M. Green, V. Etyemezian, M. Pitchford

Causes of Haze in the Columbia River Gorge .............................................................................. 524
M. Green

Use of Satellite Based Measurements of Aerosol Optical Depth to Characterize Aerosol Transport in Texas .................................................................................. 536
I. Mullet, Y. Kimura, S. Smith, E. McDonald-Buller, D. Allen

The Relationship between Atmospheric Visibility and Micrometeorological Factors in Taipei .................................................................................................................. 542
H. Yang, C. Yuan, Y. Wu, C. Lin

Investigation of Potential Impacts of Sources in the Four Corners Region to Wintertime Haze on the Colorado Plateau ........................................................................... 554
B. Schichtel, W. Malm, M. Bara, K. Gebhart, M. Rodriguez

The Regional Haze Rule Haze Metric and Precipitation .................................................................. 574
B. Schichtel, W. Malm, M. Pitchford

Comparison of in Situ Measurements and Rayleigh-Debye-Gans Theory for Optical Properties of Flame Generated Monodispersive Soot Particles .................................. 586
R. Chakrabarty

Health Benefit Assessment of Reduction in Exposure for a Rural Community With Improved Biostoves ........................................................................................................ 589
R. Patil, S. Dash

Research Summary of the Indoor Air Quality Monitoring With Respect to the Volatile Organic Compounds Concentration in New Composite Panel Houses ..................... 599
A. Bartekova, C. Lungu, P. Huelman, M. Cheple

HVAC Systems and Attics Are Sources of Formaldehyde ................................................................. 613
C. Davis

Simultaneous Measurement of Air Exchange and VOC Concentrations: Application in Vehicles, Houses and Garages .................................................................................. 629
S. Batterman, C. Jia, G. Hatzivasilis

Background Indoor Air Levels of Volatile Organic Compounds (VOCs) and Air-Phase Petroleum Hydrocarbons (APH) in Massachusetts Residences ................................. 634
R. Rago, R. McCafferty, A. Rezendes

Suspended Particulate Matter in Air-conditioned Public Long Distance Buses .................................. 638
H. Huang, H. Wang, P. Chuang

VOLUME 2

I/O Ratio of Ozone and Risk Assessment .......................................................................................... 652
J. Liu, J. Pei

A Web-based Database Providing Ready Availability to Measured Indoor Air Pollutant Concentrations and Supporting Information ........................................................................ 663
S. Swarts, V. Houck, M. Stephenson, P. Goodrum
Effectiveness of Titanium Dioxide Photocatalyst Filters and Ultraviolet for Controlling Bioaerosols in HVAC System ................................................................. 681
C. Lou, W. Lee, C. Wu, S. Yang, K. Yu

Design Approaches for a Cycling Adsorbent/photocatalyst System for Indoor Air Purification: Formaldehyde Example ..................................................... 693
P. Chin, D. Ollis

Decomposition of Indoor Volatile Organic Compound By the Combination of Ozone and Photocatalytic Oxidation Process (TiO2/UV, TiO2/UV/O3, and UV/O3) .................. 708
K. Yu, G. Lee

Removal and Germicidal Effects of Negative Air Ions On Bioaerosol .................. 723
C. Wu, W. Lee, S. Yang, K. Yu, C. Lou, H. Sun

Noise Impact and Improvement on Indoors Acoustic Comfort for the Building of Adjacent Heavy Traffic Road ................................................................. 735

Practical Approaches for the IAQ Management in Elementary Schools .............. 750
H. Lee, J. Jeong, S. Kim, J. Lee

P. Hughes, E. Woollenden, T. Schripp, M. Wensing

Mercury Oxidation by SCR Catalysts .................................................................... N/A
T. Gale, J. Cannon

Mass Transfer Limits for Mercury Capture within Electrostatic Precipitators ....... 770
H. Clack

Case Studies of Integrated Prediction of Mercury Speciation and Partitioning in Coal-fired Boilers .............................................................. 782
C. Senior, C. Montgomery, J. Wendt, A. Sarofim

Pr-Combustion Management for Compliance Planning for Mercury Control ........ 804
B. Toole O'Neil

Chemically Treated Activated Carbon Injection for Mercury Control in Flue Gases Derived from North Dakota Lignite and PRB Coal .......................... 809
K. Dombrowski, C. Richardson, R. Chang, M. Strohfus, S. Smokey, T. Ebner, L. Brickett

NOx Removal from Medium/Small Diesel Engine Generator Using Zero Valant Iron-A Case Study ............................................................... 823

Plasma Enhanced Chemical Scrubbing Systems for Flue Gas NOx Control ........ 835
L. Chen, C. Yang

Contribution of Various Point Sources Towards Air Pollutant Emissions in Texas-Mexico Border Region ................................................................. N/A
B. Deshpande, A. Martinez, M. Nayak

Kinetic and Mechanism of Fluidized Zero Valant Iron process for NO removal .......... 853
C. Cheng, S. Chen, C. Tang, H. Chen

Modeling of a NOx Emission Control System Using Enhanced Oxidation, Scrubbing and Biofiltration .............................................................. 872
J. Cabezas, A. Martinez

Combined NOx/SOx Scrubber Tests ................................................................. 886
H. Spencer, H. Cooper
Membrane WESP - A Lower Cost Technology to Reduce PM2.5, SO3 & Hg+2 Emissions
J. Caine

Complex Fibrous Media Efficiency for Multi-pollutant Treatment
A. Rochereau, L. Le Coq, A. Subrenat, P. Le Cloirec, M. Benesse

Numerical Investigation of the Flow Profiles in the Electrically Enhanced Cyclone
L. Shi, D. Bayless, G. Kremer, B. Stuart

Simultaneous Removal of NO and SO2 by High Temperature Fluidized Zero Valant Iron Processes
S. Chen, C. Tseng, C. Wei, C. Cheng, W. Liu

Removal of Sulfuric Acid Mist Emissions from Semiconductor Manufacturing Process with An Efficient Scrubber System
H. Wu, C. Huang, H. Chein

Photoreduction of Carbon Dioxide by Ultraviolet Light in the Presence of Copper Titanium Oxide Photocatalyst in CuCl2 solution

Effects of Mineral Sorbents on Leaching and Volatilization of Arsenic, Chromium and Copper During the Disposal of CCA Treated Wood
A. Misra, B. Dubey, C. Wu, T. Townsend, H. Solo-Gabriele

Biofilm Characterization and Degradation Parameter Description During Gasoline Vapor Biofiltration
J. Paca, M. Halecky, K. Jones

Performance of a Trickle Bed Air Biofilter for Removal of Paint Booth VOCs Mixture
Z. Cai, D. Kim, G. Sorial

Treatment of VOCs Mixture in a Trickling Bed Air Biofilter Integrated With Cyclic Adsorption/desorption Beds
Z. Cai, G. Sorial

Biofiltration on an Inorganic Filtering Media of Contaminated Air by Styrene Vapors
M. Dion St-Pierre, L. Bibeau, M. Heitz

Cyclic Operation of Two Fixed-Beds Adsorption System as Load Equilization for Air Biofiltration System
D. Kim, Z. Cai, G. Sorial

Biofiltration of Mixtures of Dimethyl Sulphide and Methanol for treating Exhaust Gases in the Pulp and Paper Industry
Y. Zhang, G. Allen, S. Liss

Water Recycle Optimization for Hydrogen Sulfide Removal in a Sequential Biotrickling Filter and Biofilter Treatment Unit for Wastewater Lift Station Emissions
K. Jones, P. Bairu, S. Santos, A. Martinez, J. Cabezas, J. Boswell, J. Paca

Performance Evaluation of JCPT-MBR Bioscrubber System for Iso-propanol off-gas Treatment
S. Hsu

Treatment of DMSO Using Activated Sludge As a Seed
S. Hwang, Y. Wen
The Bacterial Community Potential Function of Two Laboratory-Scale Biofilters Operating in Parallel .............................................................. 1085
J. Grove, W. Anderson, M. Moo-Young

Simultaneous Removal of Ethyl Acetate- and Toluene-containing Waste Gases in Biofiltration Using Different Substrate Selective Bacterial Strains .............................................................. 1089
S. Hwang, W. Chang, J. Cai

To Improve the Removal of Carbonyl Sulfide Emitted in Combination with Hydrogen Sulfide in Typical Odorous Streams Using Biofiltration .............................................................. 1106
D. Garrepalli, M. Sattler

Application of Activated Carbon Fiber Coated with TiO2 Catalyst on Removing Gas-phase Acetone ............................................................. 1124
C. Yuan, H. Lin, Y. Wu, J. Wu, C. Lo, D. Wang

Catalytic Oxidation of Naphthalene Using a Pt/Al2O3 Catalyst with Ozone .................................................................................... 1135
M. Yuan, C. Chang, W. Du, D. Lee, J. Shie, W. Tsai

Influence of Temperature and Humidity on the Removal of Indoor Formaldehyde by Photocatalytical Oxidation ...................................................... 1147
Y. Li, K. Wang, Q. Zhao, C. Yuan

Kinetics for Mineralization of Naphthalene with Ozone .................................................................................................................. N/A
M. Yuan, C.Y. Chang, J. Shie, C. Chiu, C.F. Chang, Yi-Hung Chen

Preparation and Modification of Doped Titanium Oxide Photocatalysts by Radio-Frequency Plasma Process .................................................. 1160
W. Den, L. Hsiao

Photodegradation of Formaldehyde by Ultraviolet Light Emitting Diode (UVLED) in the Presence of Composed Silver Titanium Oxide Photocatalyst ........................................................................... 1166

Effects of Mixed Ethanol on Adsorption of Gaseous Toluene by Granular Activated Carbon ........................................................................... 1180
W. Cheng

Hydrogen Sulfide Adsorption and Oxidation onto Different Activated Carbons .............................................................. 1191
L. Le Leuch, A. Subrenat, P. Le Cloirec, A. Louvet, C. Giral

Effects of Chemical Modifications on Characteristics and Adsorption Capacities of Multi-walled Carbon Nanotubes .................................................. 1204
Y. Chiang, C.Y. Lee, C.C. Lee

Modelling Coupled Heat and Mass Transfers During Adsorption of Volatile Organic Compounds onto Activated Carbons .............................................. 1218
S. Giraudet, P. Pré, P. Le Cloirec

Recovering VOCs from Paint Spraybooth Air Using an Activated-Carbon Fluidized-Bed Adsorber for Subsequent Power Generation .................................................. 1232

Microwave Regeneration of Carbonaceous Adsorbent for Air Pollution Control Applications ...................................................... 1237
Z. Hashisho, M. Rood, L. Botich

Electrothermal-Swing Adsorption with Novel Morphologies of Activated Carbon Adsorbents for the Capture and Recovery of Hazardous Air Pollutants ...................................................... 1250
D. Ramirez, M. Rood, K. Hay, L. Luo, G. Grevillot
Bench-Scale and Pilot-Scale Electrothermal-Swing Adsorption Systems for the Capture and Recovery of Hazardous Air Pollutants ................................................................. 1268
E. Vidal, D. Ramirez, H. Emamipour, M. Rood, J. Hay

Using Satellite Imagery for an Inventory of Erodible Land Areas in Clark County, Nevada ..................................................................................................................... 1285
F. Hall, W. Kemner, C. Cowherd, M. Borengasser

VOLUME 3

First Order Approximation Methodology to Estimate Aircraft PM Emissions ........................................... 1299
R. Lovinelli

New Revolutionary Solution for LDAR Compliance ....................................................................................... 1310
A. Tucker Peeler, F. Callegari

Effects of Fuel Formulation on Exhaust Emissions From Motorcycle ....................................................... 1318
Y. Yao, J. Tsai, A. Chang

Analysis of the Fine Fraction of Particulate Matter in Fugitive Dust ......................................................... 1330
C. Cowherd, J. Donaldson, R. Hegarty, D. Ono

Development of Welding Emission Factors with a Confidence Level .......................................................... 1341
M. Serageldin, D. Reeves

PM Emission Models Applicable to Garnet-Based Dry Abrasive Blasting Source Category .............................................................. 1356
B. Kura, K. Kambham, S. Sangameswaran, S. Datar

A Study on Evaluating the VOC Emission Factors of Gravure and Semiconductor Manufacturing Industry in Taiwan .............................................................................. 1366
C. Tsao, K. Shen

Mercury Emissions from Coal Combustion in China: Current Status and Future Trends .................................................. 1374
Y. Wu, D. Streets, S. Wang, J. Hao, M. Chan

Developing and Applying Surveys to Improve Emissions Estimates for Minor Sources in Victoria, Texas .............................................................................................................. 1379
C. Durrenberger

Contribution of Various Point Sources Towards Air Pollutant Emissions in Texas-Mexico Border Region ........................................................................................................... 1385
B. Deshpande, A. Martinez, M. Nayak

Design Criteria for Emissions Test Facility: A Case Study of PM Emissions Modeling in Dry Abrasive Blasting ........................................................................................................... 1397
B. Kura, K. Kambham

Effects of Uncertainties in the Biogenic Emission Inventory on Gas Phase Oxidant and Particle Formation in Texas ........................................................................................................... 1412
G. Heo, D. Allen

A Model for Predicting SO3 Concentrations ........................................................................................................... N/A
S. Lee, T. Keener

Development of an Inventory of Air Pollutant Emissions from Fires in Texas Based on Satellite Data .......................................................................................................................... 1417
I. Mullet, Y. Kimura, S. Smith, E. McDonald-Buller, A. David

Mobile Source Emission Inventory for the Monterrey Metropolitan Area Using the Mobile6 Mexico Model ......................................................................................................................... 1422
G. Mejia, L. Vidal, M. Sierra
