ISSCAA 2006

1st International Symposium on Systems and Control in Aerospace and Astronautics

Sponsored by:

China Space Agency

Co-Sponsored by:

China Aerospace Science and Technology Corp
China Aerospace Science and Industry Corp
Chinese Society of Aerospace
Asia-Pacific Space Cooperation Org. Secretariat

Organized by:

Harbin Institute of Technology, Harbin, China
—Space Control and Inertial Technology Research Center

In Technical Co-operation with:

AIAA (American Inst. Aero. & Astro.)
IEEE Aerospace & Electronic Systems Society
IEEE Industrial Electronics Society

Harbin, China

January 19-21, 2006

# Table of Contents

## Session I:

### FrM1  Space Missions, Systems and Architecture  1

- **Hybrid Inverse Dynamics Control of a Free-Flying Space Robot in Contact with a Target Satellite**  
  Murad Shibli, Farhad Aghili and C.Y. Su  
  ........................................................................................................... 1

- **MicroSpacecraft General Cell Research**  
  Xiaochun Gong, Guodong Xu, Feng Wang and Yunhai Geng  
  ........................................................................................................... 7

- **Satellite Formation Keeping Using Robust Constrained Model Predictive Control**  
  Baolin Wu and Xibin Cao  
  ........................................................................................................... 13

- **Alternate of GPS for Ballistic Vehicle Navigation**  
  Farid Gul and Jiuncheng Fang  
  ........................................................................................................... 19

### FrM2  Spacecraft Avionics Systems and Technologies  1

- **A Hybrid Optimization Method Based on LP and MAPS in PSC**  
  Yubin Zhu, Siqi Fan, Huacong Li and Xiuhua Zhang  
  ........................................................................................................... 25

- **Path Planning for Space Robot Based on the Self-adaptive Ant Colony Algorithm**  
  Wen Ye, Dengwu Ma and Hongda Fan  
  ........................................................................................................... 30

- **APS Star Tracker and Its Attitude Estimation**  
  Fei Xing, Ying Dong, Zheng You and Qin Zhou  
  ........................................................................................................... 34

- **A Fast Algorithm of Attitude Measurement for APS-Based Digital Sun Sensors**  
  Li He and Yihua Hu  
  ........................................................................................................... 39

### FrM3  Image and Signal Processing  1

- **Face Recognition in Color Images using Principal Component Analysis and Fuzzy Support Vector Machines**  
  Xutao Zhang, Yudong Guan, Shen Wang, Jianquan Liang and Taifan Quan  
  ........................................................................................................... 42

- **Low Delay Rate Control Algorithm for an Embedded Video Encoder**  
  Qinglei Meng, Chunlian Yao and Weijin Huang  
  ........................................................................................................... 46

- **Improved Angular Resolution of Beamspace MUSIC for Finding Directions of Coherent Sources**  
  Navapol Phaisal-atsawasenee and Raungrong Sulesathira  
  ........................................................................................................... 51

- **An Improved Fast Mode Decision Algorithm in H.264 for Video Communications**  
  Shen Gao and Tiejun Lu  
  ........................................................................................................... 57

### FrM4  Modeling and Identification  1

- **Optimized process Operation by Advanced Control System**  
  Peng Wu  
  ........................................................................................................... 61

- **Robust Optimal Sensor Configuration for Modal Sensing**  
  Feng Wang, Daokui Li and Guojin Tang  
  ........................................................................................................... 67
Optimization of Dispatch Strategy with Multi-Runway by Markov Decision Process
Songchen Han and Liyuan Cheng

Higher-Order Moment Based Target Tracking
Liping Song and Hongbing Ji

FrM5  Complex System Theory

Frameworks of Agent-Based Autonomous Control of Autonomous Satellite Systems
Jian Zhang and Jinhai Dai

Comparison Analysis of MAUT Expressed in Terms of Choquet Integral and Utility Axioms
Ling Zhang, Dejun Zhou, Peifeng Zhu and Hongwei Li

Noncooperative Conflict Resolution using Differential Game
Songchen Han, Liyuan Cheng and Hu Tong

DEVS-Flou: a Discrete Events and Fuzzy Sets Theory-Based Modeling Environment
P-A. Bisgambiglia, E. De Gentili, J.-F. Santucci, and P.A. Bisgambiglia

FrM6  Communication and Navigation  I

A Self-Compensation Algorithm for Drift of Platform Inertial Navigation System
Qu Tiejun, Yang Xudong and Tian Ziyun

Kinetic Model Analysis and Testing of HRG
Qian Yang, Guoxing Yi, Bochang Shen and Henian Wang

Research on HRG System Based on Virtual Instrument
Henian Wang, Guoxing Yi, Bochang Shen and Wei Jiang

Application of the Atomic Function in the Field of HRG Dynamics
Chunlei Yu, Basarab M.A and Qingshuang Zeng

Session II:

FrF1  Space Missions, Systems and Architecture  II

Simulation Research of Damping Control Based on MicroSim System
Guoqiang Wu, Zhaowei Sun, Dan Zhao and Weiqing Zhang

A Simulation Method Based on SIMULINK for a Supersonic Inlet
Wen Bao, Zhaohui Yao, Baocheng He and Juntao Chang

The Application of Error Quaternion and PID Control Method in Earth Observation
Qiyu Wang, Jianping Yuan and Zhanxia Zhu

Canonical Modeling Approach of a Micro/Nano Free-Flying Space Robot: A Proposal towards Detecting the Nature of Space-Time
Murad Shibli

Development of Reconfigurable Space Robot Arm
Shicai Shi, Xiaohui Gao, Zongwu Xie, Fenglei Ni, Hong Liu, Erich Kraemer and Gerd Hirzinger

Design of Gain-Scheduled Autopilot for a Highly-Agile Missile
Ali R. Mehrabian and Jafar Roushanian

H-infinity Synthesis for Satellite Formation Keeping: An LMI Approach
Baolin Wu, Xibin Cao and Fuqiang Liu

Study of Termination-Concerned Routing Performance in LEO and MEO Satellite Communication Networks
Hui Li and Xuemai Gu
### FrF2 Spacecraft Avionics Systems and Technologies II

- **Design of an Satellite Attitude Control Simulator** ................................................................. 160  
  Mehrdad Nasiri, Hossein Bozandi, Ali Khaki Sedigh and A R Khosragh
- **Correction of Remanent Disturbance Torque** ............................................................................... 164  
  Lin Huang and Wuxing Jing
- **A Hybrid Control Scheme of Vibration Reduction of Flexible Spacecraft during Attitude Maneuver** ........................................................................................................... 169  
  Zhong Shi, Guangfu Ma and Qinglei Hu
- **Space Balance: Instrument for Measuring Mass under Microgravity Conditions** ......................... 175  
  Yusaku Fujii
- **Research of the Flywheel Motor Driver in Satellite Attitude Control System** ................................. 180  
  Shuang Wang, Guijie Yang and Tiecai Li
- **Design and Implementation of Attitude-Control Flywheel Controller Based on RTOS** .................... 185  
  Jianyong Su, Guijie Yang and Tiecai Li
- **Study on the Application of Fibre Channel in Future Spacecraft Avionics System** .......................... 189  
  Yajun Xu, Xiaolin Zhang and Huagang Xiong
- **Space Robot Modeling and Control Considering the Effect of Orbital Mechanics** ............................. 193  
  Feng Wang, Fuchun Sun and Huaping Liu

### FrF3 Image and Signal Processing II

- **Target Tracking for Maneuvering Reentry Vehicles with Reduced Sigma Points** ......................... 199
- **Unscented Kalman Filter** ............................................................................................................ 203  
  Shuchuan Zhang, Guangda Hu and Sihua Liu
- **High-precision Image Mosaic Method in Big Frame Measurement** .................................................. 203  
  Xin Wang and Zhiqiang Zhao
- **Detecting the Man Made Target Based on Enhanced Fractal Feature Using PRIA** ......................... 208  
  Zheming Peng, Bin Huang and Qiheng Zhang
- **Feature Point Set Image Matching Algorithm for Satellite Attitude Determination** ......................... 212  
  Xiaodong Cai and Peijian Ye
- **A Novel Technique for Image Segmentation with Markov Chain Model** ...................................... 217  
  Song Wang and Weihong Wang
- **Automatic Extraction of Road Network from Aerial Images** ......................................................... 220  
  Xuemei Ding, Wenjing Kang, Jiwen Cui and Lei Ao
- **3D Structure from Uncalibrated Image Sequence** ........................................................................... 224  
  Dan Fu, Zhiqiang Qiu and QiFeng Yu
- **Spatio-Temporal Motion Segmentation and Tracking under Realistic Condition** ......................... 229  
  Li Li, Yancheng Qu, Qingshuang Zeng and Hongwei Xia

### FrF4 Modeling and Identification II

- **An Adaptive Threshold of Two-stage Data Correlation Algorithm for Three-Passive-Sensor Location System** ............................................................................................................. 233  
  Li Zhou, Weihua Zhang and You He
- **A Flexible Data Driven Cooperative Simulation Environment for Digital Spacecraft Design** ............ 238  
  Shoupeng Han, Xinyu Yao and Kedi Huang
- **Physical Insight of Universe Dark Energy: the Space Mission** ...................................................... 244  
  Murad Sulbi
- **Accuracy Enhancement in HiMAT Aircraft Controller Reduction** .................................................. 250  
  Hamid Reza Shaker and Mahmoud Samavat
Study on the Frequency Domain Identify Method to the Accelerometer Dynamic Model on a Centrifuge
Xijun Chen, Ren Li and Zhenfan Tan

An HTN-Based Mission Planning Model and Algorithm for Autonomous Spacecraft
Zhengqiang Zhang, Renjie He and Yuejin Tan

Study on Credibility Evaluation Indexes of Synthetic Natural Environment Conceptual Model in Simulation Systems
Guobing Sun, Ming Yang and Songyan Wang

Equivalent Switching Modeling of ZVZCS FB PWM Converter
Tiechong Sun, Peng Gao and Hongpeng Liu

A Control Scheme for Bilateral Teleoperation Systems Based on Time-Varying Communication Delay Identification
Zhang Tao and Yuanchun Li

FrF5  Fuzzy System and Fuzzy Control

A Novel Active Disturbances Rejection Fuzzy Servo System Position Controller
Ying Zhang, Ling Cai, Qingde Meng and Ming Dong

Nonlinear Inverse Modeling of Sensor Characteristics Based on Compensatory Neurofuzzy Systems
Jun Li and Feng Zhao

Static Output Feedback Controller Design for Fuzzy Systems: An ILMI Approach
Dan Huang and Sing Kiong Nguang

Stabilization of Sampled-Data T-S Fuzzy Systems
Huixun Gao and Tongwen Chen

Research on Robust Fuzzy Control Technology of Machining Quality
Shigang Wang and Yili Fu

Research on the Method for Attitude Fuzzy Control of the Interceptor
Yongxin Yin, Ming Yang and Zisai Wang

A New Kind Of Fuzzy Particle Swarm Optimization FUZZY_PSO Algorithm
Bo Wang, GuoQiang Liang, ChanLin Wang and YunLong Dong

A New Particle Swarm Optimizer Algorithm and Application
Bo Wang, Yunlong Dong, CanLin Wang and QinLin Qu

FrF6  Communication and Navigation  II

Extensional Methods and Application in the Robot Navigation
Jieqiong Han, Bi Zeng, Guangchang Liu and Zengyuan Bian

Xian Sun, Huli Shi and Zhiqiang Yin

Simulation Research of Direct Spread Spectrum Communication System for Micro-satellite
Formation-flying Constellation
Dan Zhao, Zhaowei Sun, Guoqiang Wu and Baolin Wu

Autonomous Relative Navigation for Formation Flying Satellites
Yunhua Wu, Xibin Cao and Dan Xue

Decentralized Determination of Relative Orbit for Formation Flying Satellite
Dan Xue, Xibin Cao and Yunhua Wu

DDS-Driven PLL Frequency Synthesizer for X-band Radar Signal Simulation
Longjun Zhai, Yonghua Jiang, Xiang Ling and Weilang Gao

Research on Location Method for Mobile Robots Formation based on Global-camera
Xiaogang Guo, Zhengwen Qu and Changhong Wang

Robust Vibration Control Of Uncertain Flexible Structures With Poles Placement
Yalan Xu, Jianjun Chen and Xiaobing Wang
Session III:

FrA1  Space Missions, Systems and Architecture  III

Optimal-Fuel, Low-Thrust Earth-Ivar Transfer Trajectory with Venus Gravity-Assist .................................................. 355
Haibin Shang, Hutao Cui, Pingyuan Cui and Enjie Luan

High-Performance Fault-Tolerant CORDIC Processor for Space Applications ......................................................................... 360
Sicong Wang, Zhiping Wen and Lixin Yu

Moving-Mass Control System for Spinning Vehicle Guidance Based on GA ........................................................................... 364
Songyan Wang, Ming Yang and Zicai Wang

Adaptive ATM Routing in Walker Delta Satellite Communication Networks ........................................................................... 368
Hui Li and Xuemat Gu

Dynamics Modeling and Simulation Analysis of 6-DOF Space Manipulator ........................................................................ 374
Shizuo Yan, Jian Xie and Wenyi Qiang

A Method for Solving The Inverse Kinematics Problem of 6-DOF Space Manipulator .............................................................. 379
Jian Xie, Shizuo Yan and Wenyi Qiang

Error Analysis of Airborne Fire Control System Radar via Monte Carlo Approach ................................................................ 383
Ali Karsaz and Hamid Khaloozadeh

Coordinating Remote Sensing for Earth Observing Satellites .................................................................................................... 389
Qiming Ruan, Renjie He, Yuejin Tan, Yingwu Chen and Xiong Liu

FrA2  Spacecraft and Launch Vehicle Systems and Technologies  I

Spacecraft Attitude Tracking Control Based on Nonlinear H\_\infty Control .............................................................................. 395
Chuangjiang Li, Guangfu Ma and Bin Song

A New Method for the Compensation of Unbalance Torque of 3-DOF Spacecraft Attitude Control Simulator ............................. 400
Yanbin Li, Gang Bao and Zuwen Wang

Attitude Tracking Control Using Recursive Passivation Technique ............................................................................................. 404
Boqi Xi, Guoxing Yi and Bochang Shen

Research on New Materials of Metallic Thermal Protection System Panel for Reusable Launch Vehicle ........................................ 408
Deming Zhang, Guqing Chen and Jiecai Han

A Small Wheeled Robotic Rover for Planetary Exploration ......................................................................................................... 413
Jianguo Tao, Zongquan Deng, Ming Hu, Jiecheng Liu and Zhenfa Bi

Optimal Rendezvous Trajectory Planning with Time Constraint .................................................................................................... 419
Yinhong Qi and Xibin Cao

Robust Fuzzy Controller Design for a Rigid Spacecraft Attitude Regulation System ................................................................. 424
Bin Song, Guangfu Ma and Chuangjiang Li

An On-orbit Calibration System for Satellite Attitude Control ...................................................................................................... 430
Xueqin Chen, Feng Wang, Yunhai Geng and Yingchun Zhang

FrA3  Image and Signal Processing  III

Hao Chen, Ye Zhang and Liguo Wang

Visual Tracking of a Stochastically Mobile Object ................................................................................................................... 440
Fazhen Yi, Yonglin Jiang and Jincheng Li

A Discontinuity-preserving Optical Flow Algorithm ................................................................................................................... 445
Lei Yuan, Jinzhong Li, Bing Zhu and Yulong Qiao
FrA4  Modeling and Identification  III

A New Method for Recognition of 3D Object .................................................. 475
Jian Sun, Fengqi Zhou and Jun Zhou

Design and Development of an Expert System-Like Validation Tool for Distributed
Simulation Systems .................................................................................... 478
Fei Liu, Ming Yang, Zicai Wang and Songyan Wang

The Multiscale Sequential Filter with Multisensors Data Fusion .................... 483
Chenglin Wen and Chuanbo Wen

An Agent-based Study on Personalized Travel Information Service ................ 489
Jian Wang, Zhengfei Ding and Shi An

Combining Independent Component Analysis with Support Vector Machines .... 493
Genting Yan, Guangfu Ma, Jianting Lv and Bin Song

Automatic Option Generation in Hierarchical Reinforcement Learning via Immune Clustering ................................................................. 497
Jing Shen, Guochang Gu and Haibo Liu

An Improved Algorithm for DDAGSVM ......................................................... 501
Xiaodan Wang, Zhaohui Shi, Chongming Wu and Chunying Zheng

Kernel Method for Constructing Fuzzy Inference System ............................... 506
Liangkuan Zhu, Guangfu Ma and Zhong Shi

FrA5  Fuzzy and Robust Control

Fuzzy Terrain Following Flight: A New Approach .......................................... 510
Mohammad Rahim and Mohammad B. Malaek

Parallel Double-layered Fuzzy Control System of Autonomous Robot in Unknown Environment ................................................................. 514
Yili Fu, Han Li, Hongyan Xu, Shuguo Wang and Yulin Ma

A New Algorithm based on Combined Fuzzy Logic and Kalman Filter for Target
Maneuver Detection ..................................................................................... 520
Hassan Bahari, Ali Karsaz and Hamid Khaloozadeh

A Study on the TFN-Based AHP Model for the Evaluation of Missile Systems Performance .............................................................. 525
Jian Cao, Chunjie Yang and Yan Yang

A New Approach to Robust Stability Analysis of Uncertain Time-delay Systems .................................................................................. 530
Xisheng Zhan, Shuchen Li, Chunyan Zhao, Jie Wu and Jing Ma

The Robust Sector Stability Analysis of An Interval Polynomial .................... 535
Sergey A. Gaiyersonsky and Sergey V. Zamiatin

A Delay-Dependent Approach to H-infinity Filtering for 2-D State-Delayed Systems ................................................................. 540
Shyh-Feng Chen and I-Kong Fong

Application of One-degree-of-freedom QFT Tracking Controller to Hydraulic
Simulator Design .......................................................................................... 545
Jinying Yu, Keding Zhao and Jian Cao

FrA6  Communication and Navigation  III

xvi
Session IV:

FrL1  Space Missions, Systems and Architecture  IV

The Nereus Asteroid Rendezvous Mission Design With Multi-Objective Hybrid Optimization ................................................................. 587
   Dong Qiao, Pingyu Cui and Huitao Cui
Avoiding Unbounded Priority Inversion by Integrating Task Inheritance and Classification into
Preemption Threshold Scheduling ........................................................................................................................................ 593
   Tao Wang and Daixin Liu
A Fault Tolerant Filter Applied on Magnetometer-Based Autonomous Satellite Navigation ................................................................. 597
   Siyuan Rong, Rongjun Mu and Naigang Cui
Federated Filter with Strengthened FDIR Capability for Multiple Sensor Navigation System ................................................................. 601
   Rongjun Mu, Siyuan Rong and Naigang Cui
A Stereo Matching Algorithm for Lunar Rover Navigation .................................................................................................................. 605
   Naiming Qi, Jian Hou and Hong Zhang
Modeling and Dynamics Analysis of Micro-Satellite ................................................................................................................................. 610
   Dafu Xu, Xianren Kong and Benli Wang
A Ground Semi-physical Simulator for Satellite Autonomous Rendezvous and
Space Robot Capture .............................................................................................................................................................................. 614
   Weinan Xie, Guangcheng Ma, Qiyong Wen and Hongwei Xia
Study on the Damping Characteristics of MR Damper in Flexible Supporting of
Turbo-Pump Rotor for Engine ............................................................................................................................................................ 618
   Hongrui Ao, Hongyuan Jiang, Wei Wei and A.M. Ulanov

FrL2  Spacecraft Avionics Systems and Technologies  II

Re-Entry Attitude Two-Loop SMC of the Spacecraft
and Its Logic Selection ........................................................................................................................................................................... 623
   Jie Jia, Fengqi Zhou, Jun Zhou
Attitude Stabilization of Averaging Magnetic Torque ................................................................................................................................. 627
   Lin Huang and Wuxing Jing
Entry Control Allocation for Reusable Launch Vehicle .............................................................................................................................. 633
   Guodong Ning, Shuguang Zhang and Zhenping Fang
Reentry Maneuver Control Strategy Study of Common Aero Vehicle ..............................................639
Hongbo Chen and Di Yang
Simulation and Comparison of Two Classes of Circularly Polarized Triple-frequency Antennas .....................643
Jinghui Qiu, Wei Li and Ying Suo
Analytical Solution to 3D Differential Geometric Guidance Problem ..............................................647
Chao Yong Li, Wuxing Jing, Hui Wang and Zhiquan Qi
Near Eigenaxis Maneuver for On-Orbit-Servicing Spacecraft .........................................................653
Feng Wang, Xibin Cao, Xueqin Chen and Dai Gao
Application of Predictive Guidance to Reentry Vehicle ....................................................................659
Liwei Zheng, Wuxing Jing

FrL3  Image and Signal Processing  IV

Embedded Hybrid Coding for Lossy to Lossless Image Compression using Integer Wavelet Transform .................................................................664
Libao Zhang and Xianchuan Yu
New Region of Interest Coding for Remote Sensing Image Based on Multiple Bitplanes Up-down Shift ........................................................................669
Libao Zhang and Xianchuan Yu
Image Measures for Segmentation Algorithm Evaluation of Automatic Target Recognition System .............674
Min Li and Guilin Zhang
Super-Resolution Image Restoration of a PMMW Sensor Based on POCS Algorithm ...............................680
Zeliang Xiao, Jianzhong Xu, Shusheng Peng and Shaorui Mou
Denoising of Impulse Response Using LS-SVM and SVD for Aircraft Flight Flutter Test .........................684
Wei Tang, Zhongke Shi and Hongchao Li
The Discrete Algorithm of Log-Polar Transformation ..........................................................................689
Qi Wang, Ke Zhang, Youyi Jiang and Xianze Xiong
A 3D Object Location Method Using a Laser Source ........................................................................693
Wenchuang Zhao, Fanfeng Meng and Wenqiang Dai
A Fast Wavelet-Based Depth Estimation Algorithm for Arbitrary Stereo Configuration .......................697
Yonglin Jiang, Zhengshen Qu, Wei Liu and Wenqing Dai

FrL4  Intelligent Control Architectures

Multiple Satellite Formation Based on Multi-Agent .............................................................................702
Hongwei Xia, Guangcheng Ma, Weinan Xie and Baomin Feng
A Modified Control Algorithm for Integrating Processes with Long Dead-Time .....................................706
Yue Hu, Shuchen Li, Chunyan Zhai and Jun Xiao
Design of Iterative Learning Controller Based on Model Prediction Control ........................................711
Jing Ma, Shuchen Li, Chunyan Zhai and Jun Xiao
Application of Particle Swarm Optimization in Multi-sensor Multi-target Tracking .............................715
Lei Yang, Weiwei Hu, Shenyuan Yang and Shujin Pu
A Switching Control Scheme for Underactuated Cart-Pole Systems with Aggressive Swing-up ...............720
Bingtuan Gao, Hongjun Chen, Xiaohua Zhang and Haiming Qi
A Practical Optimal Controller for Underactuated Gantry Crane Systems ..............................................726
Bingtuan Gao, Hongjun Chen, Xiaohua Zhang and Haiming Qi
Active Vision Tracking Using an Artificial Intelligent Control Scheme .................................................731
Fazhen Yi and Zhongfa Liu
Task Scheduling and Voltage Selection in Low Power Embedded System .............................................737
Shicai Liu, Tiecui Li, Xianglong Tang

FrL5  Robust and H-infinity Control
Delay-Dependent Dissipative Control for Uncertain Linear Neutral Systems with Discrete and Distributed delays .......................................................... 742
Ming Li and Guanqun Hu

Mitigation of the Adverse Effects of PWM Inverter through Passive Cancellation Method .......................................................... 747
Abdolreza Esmaili

On-Line Robust Aeroservoelastic Stability Margin Analysis from Wavelet-Processed Flight Testing Data .................................................. 752
Hongchao Li, Zhongke Shi and Wei Tang

Fault Accommodation for a Class of Nonlinear Flight Control systems .......................................................... 758
Zehui Mao, Bin Jiang and Fahmida Chowdhury

H-infinity Estimation for Uncertain Systems with Multiple State Delays .......................................................... 764
Chuanbo Wen, Zhulin Zheng and Huijun Gao

Mitigation of the Adverse Effects of PWM Inverter through Active Filter Technique .......................................................... 770
Abdolreza Esmaili, Yaxiu Sun and Li Sun

Delay-Dependent Robust Stability for a Class of Uncertain Time-Delay Systems .......................................................... 775
Junfeng Wu, Ning Lv and Lizhi Dong

Robust Control of Magnetic Bearing with Gyroscopic Effects using Output Feedback Controller .......................................................... 778
Yingxin Yan and Guangrén Duan

FrL6 Communication and Navigation III/Discrete Events and Systems

Error Analysis for the Gyro North Seeking System .......................................................... 783
Shuangqin Ren, Zhenlaio Zhao and Yan Chen

Application of TD Filter in DTG North Seeking System .......................................................... 787
Wei Jiang, Guoxing Yi, Qingshuang Zeng and Lixian Zhang

Precise Navigation for GRACE Formation Flying .......................................................... 792
Long Yang, Xurong Dong and Dongmei Xu

Autonomous Satellite Navigation Using Magnetic Measurements .......................................................... 798
Changsang Gao and Wusong Jing

Research on the Logistics Distribution System Based on Witness .......................................................... 801
Yanbing Ju, Aihua Wang, Fengchun Zhu and Chuanyang Xia

Compound Zeno Behavior-based Autonomous Mobile Robot Obstacle Avoidance Algorithm in Unknown Environment .......................................................... 806
Shoutao Li and Yuanchun Li

Research on Evacuation Outside of the Building Using Multi-Agent Simulation .......................................................... 811
Shi An, Xianrui Du and Jian Wang

Session V:

SaM1 Digital Communications

The Application of SCM Embedded with Bluetooth Protocol in Wireless Data Transmission .......................................................... 816
Yudong Gnan, Xutao Zhang, Shen Wang, Jinen Yang and Xuequan Chen

Design and Implementation of FPGA-Based FSK IF Digital Receiver .......................................................... 819
Shuiruiang Yang, Zhilu Wu and Guangrui Ren

Performance of Two-User Cooperation in Frequency Selective Rayleigh Fading Channel .......................................................... 822
Charawat Jittlertwirun, Kazl M. Ahmed and R. M. A. Premnamandu Rajatheva

A New Software Demodulation Method for MSK Signal Based On Phase Information .......................................................... 828
Junnia Shang

A New Fast Line Detection Algorithm .......................................................... 831
Jian Sun, Fengqi Zhou and Jun Zhou

An Improved Pseudo-Chaotic Time Hopping Scheme for UWB Multiple Access .......................................................... 834
Yan Fan, Jun Zheng, Shouyi Liu and Guangming Huang
### SaM2  Hybrid Systems and Control

**Robust Stability of a Class of Uncertain Discrete-time Switched Systems with Time-Delay**
Ying Zhang, Guangren Duan and Liang He

**The Research of Interactive System of Emotional Robot Based on Multi-Agent**
Xueyuan Zhang, Ping Dong, Zhiliang Wang and Masatake Nagai

**State Feedback Guaranteed Cost Control of Uncertain Networked Control Systems**
Dan Huang and Sing Kiong Nguang

**Lp Input-Output Stability Analysis of an Electromotive Simulation Table System**
Jie Ma and Mingdong Zheng

**Nonlinear Control via Exact Linearization for Hydrostatic Transmission System with Secondary Regulation**
Haichang Liu, Jihai Jiang and Okoye Celestine

**A Current Control Scheme with Tracking Mode for PMSM System**
Pinghua Tang, Guojie Yang, Min Luo and Tiecai Li

**State Feedback Controller Design for a Class of Hybrid Systems with Time-delay under Input Constraints**
Zhilin Liu, Run Pei, Xiangyong Mu and Jun Zhang

**Development of a FPGA-Based High-performance Servo Drive System for PMSM**
Naizheng Cui, Guojie Yang, Yajing Liu and Pinzhi Zhao

### SaM3  Pattern Recognition and Neural Networks

**Multimodal Recognition Using Face Profile and Ear**
Li Yuan, Zhichun Mu and Ying Li

**New Type of Support Vector Machine by Moving Separating Hyperplane**
Hongsheng Lue, Jiamin He and Xiaoping Hu

**A Survey of All-sky Autonomous Star Identification Algorithms**
Meng Na and Peifai Jia

**Robust Tracking Control of Space Robot via Neural Network**
Baomin Feng, Guangcheng Ma, Weinan Xie and Changhong Wang

**A Novel Evolution Strategy Algorithm Based on the Selected Direction by the Polar Coordinates**
Zengyuan Bian, Yongquan Yu, Bi Zeng, Menghui Wang and Huifeng Tao

**A New Approach to Direct Torque Control of Interior Permanent Magnet Synchronous Motor**
Chunmei Zhang, Baozhu Ma, Heping Liu and Shujin Chen

**Any Fractional Order Bionic Neural-Type Pulse Oscillator**
Jiliu Zhou, Yifei Pu and Ke Liao

**Surface Roughness Modeling of High Speed Machining TC4 Based on Artificial Neural Network Method**
Zhixin Liu, Dawei Zhang and Houjun Qi

### SaM4  Variable Structure Control

**Discrete Sliding Mode Control Based on Disturbance Observer and its Application on Flight Simulator Servo System**
Jinkun Liu and Liang Han
Session VI:

SaF1 Computer Networks

Performance of CFDA-MCFA Multiple Access Protocol via Satellite
Xi Zhou, Zhuo Bing, Longhao Cao and Yang She

Anomaly Detection Based-on the Regularity of Normal Behaviors
Feng Pan and Weihong Wang

Differentiated Processing Policies for Near-Real Time and Reliable Traffics in Ad Hoc Network
Min Yin and Quan Yu

Extending XML-RL with Some Object-Oriented Features
Xiaolin Zhang, Guoren Wang, Yuesheng Tan and Huazhong Dai

Delay Characteristics and Synchronization Architecture of Networked Control System
Lei Fu and Guanzhong Dai

Ranging Schemes in HFC Networks and its Embedded Implementation
Ping Long, Xiaotong Zhang and Qin Wang

A Modified Evidential Reasoning Rule in Data Fusion System
Shujin Pu, Lei Yang, Shenyuan Yang and Weiwei Hu

Real-Time Prediction Algorithm Research of Ship Attitude Motion Based on Order
Selection with Corner Condition
Xiu Yuan, Xiren Zhao, Linlin Xu

SaF2 Antenna Systems and Technologies I

A Coupled Oscillator Array with its Application in Null Directions Forming
Longjun Zhai, Yonghua Jiang, Longhe Liu and Zhikai Tang

2-D DOA Estimation of LFM Signal Based on FRFT
Fang Ye, Yibing Li and Shenyuan Yang

A Novel Transmit–Receive Module Based on Coupled Oscillators
Tang Zhikai, Longhe Liu, Yonghua Jiang, Yuan Hao and Wei Li

Direct Laser Fabrication of Aluminum-Alloy Slot Antenna Array
Xuyue Wang, Renke Kang, Wenji Xu and Dongming Guo

Single Access Antenna Pointing Control System Design of TDRS
Jinpeng Yuan, Di Yang and Xiaosong Sun

Reliability Allocation of Large Spaceborne Antenna Deployment Mechanism System Using
Unascertain Method
Zhentao Liang, Jianjun Chen, Wei Gao and Zengqing Zhu

Movement Reliability Analysis of Umbrella Antenna Rotation Joint
Taibin Hu, Jianjun Chen and Zhentao Liang

Reliability Analysis of the Deployment Mechanism of a Large Satellite Antenna Based on the
Non-Probabilistic Model
Jianguo Zhang, Jianjun Chen and Taibin Hu

SaF3 Neural Networks II

Identification of Dynamical Systems Using Radial Basis Function Neural Networks with Hybrid
Learning Algorithm
Jun Li and Feng Zhao
An Improved Architecture Based on Typical ART-2 Neural Network .................................................. 1119
Xiujiang Lv, Guangshun Yao, Yan Zhao, Qiwen Zhang, Yu’e Li and Ning Wang
Application of Artificial Neural Networks Coupled with an Orthogonal Design to Simulation for Powder Mixed EDM ............................................................. 1122
Fuling Zhao, Yuangang Wang and Hui Wang
A Modified Nonlinear Forces Compensation Scheme Based on Decomposition Control in High-precise Servo System ............................................................. 1126
Yang Song and Baoku Su
Modeling of Ship Vertical Motion With Self-Organizing Radial Basis Function Artificial Neural Network .......................................................... 1131
Xuejing Yang and Xiren Zhao
Ultrasonic Motor’s Velocity Control Based on the BP Fuzzy Neural Network with Stored Information ................................................................. 1137
Xuctao Zhao, Weishan Chen and Shenjun Shi
An Algorithm of Data Fusion Combined Neural Networks with DS Evidential Theory .......................................................... 1141
Chiping Zhang, Pingyuan Cui and Yingjun Zhang
Backstepping Position Tracking Controller Design with Neural Network Deadzone Compensation ........................................................................ 1145
Qiang Wu and Jinkun Liu

SaF4 Robust Control Systems

A Kind of Robust Rudder Roll-Damping System ........................................................................ 1151
Xianku Zhang, Yicheng Jiu, Cheng’ei Yang and Ltuku Zhang
Off-Line Robust Constrained MPC with Stable Polytopic Invariant Set ......................................... 1155
Zhiqiang Zou, Libong Xu and Meng Yuan
A Fault Detection and Accommodation Framework for Dynamic Systems with Control Effector Failures ................................................................................. 1160
Hao Yang, Bin Jiang and Jianliang Wang
Robust Stability of a Class of Networked Control Systems Based on Descriptor System ................ 1166
Zhanzhi Qi, Qinghong Zhang, Chenghai Diao and Li Yang
Statistic Model for LQG Control of Ship Longitudinal Motion .................................................. 1171
Xianfeng Wang, XiRen Zhao, Xinian Peng and Hongfang Sun
Torque Control of Electrohydraulic Servo System Based on $\mu$-synthesis Theory ................................ 1175
Ruibo Yuan, Jian Cao, Geqiang Li and Keding Zhao
Design of Robust Tracking Observer for Perturbed Descriptor Linear Systems .......................... 1180
Guosheng Wang, Qiang Lv, Ahua Mu and Guangren Duan
GA Based Automatic Design and Optimization of QFT Controller ........................................... 1184
Qingwei Wang, Zhenghua Liu and Lianjie Er

SaF5 Computer Vision

A Navigation Strategy Based on Global Geographical Planning and Local Feature Positioning for Mobile Robot in Large Unknown Environment ............................................. 1189
Yilu Fu, Hongyan Xu, Han Li, Shuguo Wang and He Xu
A Novel Image Retrieval Algorithm Using Wavelet Packet Histogram Techniques ..................... 1194
Zhiyong Zeng and Lihua Zhou
A Study of Color Image Segmentation Base on Stochastic Expectation Maximization Algorithm in HSV Model ............................................................................. 1198
Yudong Guan, Qi Zhang, Xutao Zhang, Youhua Jia and Shen Wang
Multiscale Edge Detection Based on Fuzzy C-Means Clustering ................................................ 1201
Yishu Zhai and Xiaoming Liu
Synthetic Aperture Radar Image Segmentation Based on Improved Fuzzy Markov Random Field Model .............................................................................. 1205
Xiaodong Lu, Fengqi Zhou and Jun Zhou
Modified ROA Algorithm Applied to Extract Linear Features in SAR Images .................................................. 1209
Huadong Sun, Fulin Su and Ye Zhang

A Feasible Vision-based Measurement Method for Robot Orientation Error .................................................. 1214
Guangcheng Ma, Fuyou Wang, Zhenshen Qu and Baomin Feng

A Method to Recognize and Track Runway in the Image Sequences Based on Template Matching .................. 1218
Meng Ding, Yunfeng Cao and Lin Guo

SaF6  Diagnostics, Prognostics and Health Management

Fault Tolerance Design on Onboard Computer Using COTS Components ..................................................... 1222
Xinsheng Wang, Hanxu Sun

Integrated Software Failure Diagnosis Model Based on the Software Black Box ........................................... 1225
Yigang Wang and Xiaodong Zhu

Validation of Fault Tolerance Mechanisms of an Onboard System ............................................................... 1230
Junjie Peng, Jun Ma, Bingrong Hong and Chengjun Yuan

Research on Method of the Fault Diagnosis for Digital Circuits .................................................................... 1235
Yanli Hou, Chunhui Zhao, Yanping Liao and Shujin Pu

Robust Fault Detection for a Class of Discrete-Time LPV Systems with Time-Delays ....................................... 1239
Changhong Wang, Hongru Wang, Huijun Gao and Ligang Wu

Controller Reconfiguration against Reaction Wheel Failure Based on Predictive Filters ............................... 1245
Ji Li and Hongyue Zhang

Analysis and Measurement of Wobble Error on Simulation Turntable ......................................................... 1250
Zhuyong Qu and Yu Yao

Research on the Intelligent Agent of Distributed Fault Diagnose System .................................................... 1255
Bo Chen, Changhong Wang and Xiue Gao

Session VII:

SaA1  Digital Technologies

Design and Implementation of Software Radio Based Signal Generator Using LabVIEW .............................. 1259
Guangbin Liu, Yingfeng Qiu, Zhiyong Yu and Chaoshan Liu

An Insight into Ultra-Wide Band Remote Communication .............................................................................. 1263
Yong Wang and Yihua Hu

Derivation of Generic Error Models Procedure for 6-DOF Motion System Using Multi-Body Kinematics ............. 1267
Yu Yao and Zhiyong Qu

Improved Baker Map for Image Encryption ......................................................................................................... 1273
Fengling Han, Xinghuo Yu and Songchen Han

Error Model and Vibration Analysis of Timoshenko Beam Subjected to A Moving Mass ............................. 1277
Zhiyong Qu and Yu Yao

SaA2  Antenna Systems and Technologies II

On Optimization of Large Cable Mesh Surface Antenna with Both Deployed and Retracted States .................. 1282
Baoyan Duan and Ying Luo

The Reflector Shape Adjusting Methods for Cable Mesh Deployable Antenna .................................................. 1287
Jiejian Di, Baoyan Duan and Fei Zheng

Conceptual Design for a Long Flexible Beam in Space Environment ............................................................. 1291
Fei Zheng, Baoyan Duan and Guoqian You

Design and Simulation of a Closed-Loop Deployable Structure .................................................................... 1295
Fei Zheng, Mei Chen and Bei Hao

On Control Method of Cable-Mesh Reflector Adjustment for a Deployable Antenna ....................................... 1299
Hong Bao, Baoyan Duan and Guoqiang You
SaA3  Intelligent Control Architectures

An Efficient Fault-Tolerant Scheme for Mobile Agent Execution .................................................. 1302
  Xuejun Meng and Huaguang Zhang
A Distributed Deadlock Detection Scheme in Mobile Agent System ........................................... 1307
  Xuejun Meng and Huaguang Zhang
An Autonomous Docking Simulation System Based on Monocular Vision ................................. 1312
  Zhigao Zhang, ZhenShen Qu and Qinghua Li
Distributed ID3 Model Based on Mobile Agent ................................................................................. 1316
  Dongsheng Liu and Yi Zhou
The SCIT Multi-Vehicle Networked Control Testbed ................................................................. 1321
  Qinghua Li, Mingxiang Ling, Zhenshen Qu and Weinan Xie

SaA4  Adaptive Control

Time-Delay Dependent Robust Dissipative Control For a Class of Nonlinear Time-Delay Systems .... 1325
  Li Yang, Qingling Zhang, Zhanzhi Qu and Guozi Liu
Adaptive Attitude Control of a Flexible Satellite ............................................................................. 1329
  M. Bahrami and K. Kalantari Nezhad
Research and Simulation on Dynamic Performance of Adaptive ADC ......................................... 1334
  Miao Han, Zezong Chen, Zijie Yang and Hengyu Ke
Newton-Raphson Based Adaptive Inverse Control Scheme for Tracking of Nonlinear Dynamic Plants ... 1339
  Muhammad Shafiq and Tahir Khan
A Data Fusion Approach Based on Sequential and Strong Tracking Filters with
Nonlinear Dynamic Systems ........................................................................................................... 1344
  Quanbo Ge, Zhulin Zheng, Sujun Zhang and Chenglin Wen

SaA5  Miscellaneous Control Schemes I

Second-Order Nonsingular Terminal Sliding Mode Control of Uncertain MIMO Linear Systems ...... 1350
  Yong Feng, Lin Li and Xiangwei Han
Fuzzy Controller Design for Nonlinear Uncertain System with Time Delay Based on LMI Approach .... 1356
  Li Cao and Jianxin Liu
A Symmetric Image Encryption Approach Based on Line Maps ................................................. 1362
  Yong Feng, Linjing Li and Feng Huang
Chaos Synchronization Based on Sliding Mode Observer ............................................................. 1368
  Yong Feng, Jianfei Zheng and Li Xia Sun
  Yongxin Yin, Ming Yang and Zicai Wang

SaA6  Unmanned Arial Vehicle Systems and Technologies

Design of a Smart Sensor for Load Insulation Failure Detection in DC Supply System of UAV .......... 1378
  Qiongjian Fan, Zhong Yang, Jiang Cui and Chunlin Shen
Nonlinear Optimal Control for the Soft Landing of Lunar Lander ................................................. 1382
  Xinglong Liu and Guangren Duan
Autonomous Helicopter Navigating and Tracking with Stereo-Vision in IIM-USCT ........................ 1388
  Zhu Min, Ming Liu, Wenbing Chen and Fucheng He
A New Smooth Switching Strategy for Multi-model Control and Its Application on A BTT Missile ..... 1392
  Guangren Duan and Feng Tan
Three-Dimensional Optimal Trajectory for Global Range of CAV ............................................. 1396
  Enmi Yong, Guojin Tang and Lei Chen
Session VIII:

**SaL1  Miscellaneous Space and Launch Technologies**
