2006 Fourteenth International Workshop on Quality of Service

**Message from Co-chairs** ........................................................................................................... vii

**Committee Members** ............................................................................................................... viii

**External Reviewers** ............................................................................................................... ix

**Session 1: P2P and Overlay Networks**

- [A Locating-First Approach for Scalable Overlay Multicast](#)
  - Mohamed Ali Kaafar (INRIA Sophia Antipolis), Thierry Turletti (INRIA Sophia Antipolis), Walid Dabbous (INRIA)

- [A Blueprint for Constructing Peer-to-Peer Systems Robust to Dynamic Worst-Case Joins and Leaves](#)
  - Stefan Schmid (ETH Zurich), Fabian Kuhn (ETH Zurich), Joost Smit (ETH Zurich), Roger Wattenhofer (ETH Zurich)

- [Echelon: Peer-to-Peer Network Diagnosis with Network Coding](#)
  - Chuan Wu (University of Toronto), Baochun Li (University of Toronto)

- [Stochastic Analysis and File Availability Enhancement for BT-like File Sharing Systems](#)
  - Bin Fan, Dah-ming Chiu (Chinese University of HK), John C.S. Lui (Chinese University of HK)

**Session 2: Incentive and Reward**

- [A Payment-based Incentive and Service Differentiation Mechanism for Peer-to-Peer Streaming Broadcast](#)
  - Guang Tan, Stepen Jarvis (Dept. of CS, U. of Warwick, UK), Daniel Spooner (Dept. of CS, U. of Warwick, UK)

- [Modeling the Peering and Routing Tussle between ISPs and P2P Applications](#)
  - Hui Wang, Dah-ming Chiu (Chinese University of HK), John C.S. Lui (Chinese University of HK)

- [Improving Performance of Internet Services Through Reward-Driven Request Prioritization](#)
  - Alexander Totok (New York University), Vijay Karamcheti (New York University)

- [Optimal Capacity Sharing of Networks with Multiple Overlays](#)
  - Zheng Ma (Yale University), Jiang Chen (Yale University), Y. Richard Yang (Yale University), Arvind Krishnamurthy (University of Washington)
Session 3: Sensor and Wireless Networks

Real-time Power-Aware Routing in Sensor Networks .......................................................... 83
Octav Chipara (Washington University in St. Louis), Zhimin He (University of Virginia), Guoliang Xing (Washington University in St. Louis), Qin Chen (University of Virginia), Xiaorui Wang (Washington University in St. Louis), Chenyang Lu (Washington University in St. Louis), John Stankovic (University of Virginia), Tarek Abdelzaher (UIUC)

Partial Network Coding: Theory and Application for Continuous Sensor Data Collection .................. 93
Dan Wang (Simon Fraser University), Qian Zhang (Hong Kong University of Science and Technology), Jiangchuan Liu (SFU)

Optimal Sleep/Wake Scheduling for Time-Synchronized Sensor Networks with QoS Guarantees .......... 102
Yan Wu (Purdue University), Sonia Fahmy (Purdue University), Ness Shroff (Purdue University)

Performance Analysis of a Reuse Partitioning Technique for OFDM Based Evolved UTRA ................ 112
Gabor Fodor (Ericsson Research)

Session 4: Mobile Ad-hoc and Wireless Networks

Integrating Stability Estimation into Quality of Service Routing in Mobile Ad-hoc Networks ............... 122
Weiyang Zhu (Old Dominion University), Min Song (Old Dominion University), Stephan Olariu (Old Dominion University)

GVGrid: A QoS Routing Protocol for Vehicular Ad Hoc Networks ........................................ 130
Weihua Sun (Graduate School of Information Science and Technology, Osaka University), Hirozumi Yamaguchi (Graduate School of Information Science and Technology), Shinji Kasumoto (Graduate School of Information Science and Technology)

Dynamic Resource Allocation in IEEE 802.16 Broadband Wireless Networks ................................ 140
Kamal Gakhar (ENST Bretagne), Mourir Achir (ENST Bretagne), Annie Gravey (ENST Bretagne)

Overload Protection for IEEE 802.11 Cells ........................................................................ 149
Héctor Velayas Muños (Jazztel), Ignacio Más Ivars (Ericsson Research), Gunnar Karlsson (KTH, Royal Institute of Technology)

Session 5: VoIP and Streaming

On the Performance of Error-Resilient End-Point-Based Multicast Streaming .............................. 160
György Dán (KTH), Ilias Chatzidrossos (KTH/S3), Viktória Fodor (KTH/S3), Gunnar Karlsson (KTH)

A Service Providers Approach for Improving Performance of Aggregate Voice-over-IP Traffic ........ 169
Camelia Al Najjar (Texas A&M University), A. L. Narasimha Reddy (Texas A&M University)

An Analytical Model for the Capacity Estimation of Combined VoIP and TCP File Transfers over EDCA in an IEEE 802.11e WLAN ........................................................................... 178
Sri Harsha (IISc), Anurag Kumar (Indian Institute of Science, Bangalore, India), Vinod Sharma (Indian Institute of Science, Bangalore, India)
Session 6: Security and Privacy

Network Decoupling for Secure Communications in Wireless Sensor Networks ........................................ 189
Wenjun Gu (The Ohio State University), Xiaole Bai (The Ohio State University), Sriram Chellappan (The Ohio State University), Dong Xuan (The Ohio State University)

Fast Detection of Denial-of-Service Attacks on IP Telephony ................................................................. 199
Hemant Sengar, Haining Wang (College of William & Mary), Duminda Wijesekera (George Mason University), Sushil Jajodia (GMU)

Efficient Proxy-Based Internet Media Distribution Control and Privacy Protection Infrastructure ............... 209
Songqing Chen, Shiping Chen (George Mason University), Huiping Guo (George Mason University), Bo Shen (HP Labs) Sushil Jajodia (George Mason University)

Session 7: Congestion Control and Queue Management

Host-Based Service Differentiation with Congestion Feedback .................................................................... 220
Henrik Lundqvist (NTNU), Gunnar Karlsson (KTH)

A Case of TCP-Friendly Admission Control ??9
Adrian Tam (Chinese University of HK), Dah-ming Chiu (Chinese University of HK), John C.S. Lui (Chinese University of HK), Y. C. Tay (National University of Singapore)

Supporting Loss Guarantees in Buffer-Limited Networks ........................................................................ 239
Mahmoud Elhaddad (University of Pittsburgh), Rami Melhem (University of Pittsburgh), Taieb Znati (University of Pittsburgh)

Session 8: Network Algebra and Calculus

QoC-based Optimization of End-to-End M-Health Data Delivery Services ................................................. 252
Ing Widya (University of Twente), Bert-Jan van Beijnum (University of Twente), Alfons Salden (Telematica Instituut)

An End-to-End Probabilistic Network Calculus with Moment Generating Functions ............................. 261
Markus Fidler (University of Toronto)

Short Papers

Protecting Bursty Applications Against Traffic Aggressiveness ................................................................. 272
Anat Bremler-Barr, Hanoch Levy (Tel-Aviv University), Nir Halachmi (Interdisciplinary Center Herzliya)

How Practical is Network Coding? ............................................................................................................. 274
Mea Wang (University of Toronto), Baochun Li (University of Toronto)
A Simple Framework for QoS Provisioning in Traffic Engineered Networks ........................................ 279
Stefano Avallone (Università di Napoli Federico II)

Gargi Dasgupta (IBM India Research Lab), Koustuv Dasgupta (IBM India Research Lab), Amit Purohit (IBM India Research Lab), Balaji Viswanathan (IBM India Research Lab)

An Enhanced Scalable Proximity Model ................................................................................................. 284
Mohammad Malli, Chadi Barakat (INRIA), Walid Dabbous (INRIA)

Flow-Cookies: Using Bandwidth Amplification to Defend Against DDoS Flooding Attacks ...................... 286
Martin Casado, Pei Cao (Stanford), Aditya Akella (University of Wisconsin, Madison), Niels Provos (Google)

QoS-Guaranteed Path Selection Algorithm for Service Composition .................................................... 288
Manish Jain (Georgia Tech), Puneet Sharma (HP Labs), Sujata Banerjee (HP Labs)

Dynamic Adaptation of Temporal Event Correlation for QoS Management in Distributed Systems ........... 290
Rean Griffith (Columbia University), Joseph Hellerstein (IBM Research), Gail Kaiser (Columbia University), Yixin Diao (IBM Research)

Performance of Ad Hoc Networks with Two-Hop Relay Routing and Limited Packet Lifetime ............... 295
Ahmad Al Hanbali (INRIA), Philippe Nain (INRIA), Eitan Altman (INRIA)

A Variation of Route Flap Damping to Improve BGP Routing Convergence ........................................... 297
Wang Lijun, Xu Ke (Tsinghua University), Wu Jianping (Tsinghua University)

Comparison of Performance Analysis Approaches for Bottleneck Detection in Multi-Tier Enterprise Applications ......................................................................................................................... 302
Jason Parekh (Georgia Institute of Technology), Guagyoung Jung (Georgia Institute of Technology), Galen Swint (Georgia Institute of Technology), Calton Pu (Georgia Institute of Technology), Akhil Sahai (HP Laboratories)
