**TABLE OF CONTENTS**

**Volume 1**

**Successful PDC/RSS Vibration Management Using Innovative Depth-of-Cut Control Technology: Panna Field, Offshore India**
Anil Jaggi and Sunil Upadhyaya, BG E&P India Ltd., and Ashabikash Roy Chowdhury, Hughes Christensen

**Casing Collapse Strength Reduction Under Lateral Loads From Yielding Shales in the Daqing Oil Field**
Chi Ai and Wanchun Zhao, Daqing Petroleum Inst., and Boyun Guo, U. of Louisiana at Lafayette

**Backi ng Off a Free Drillstring: Planning and Execution on a World-Class ERD Well**
Johan Eck-Olsen, Statoil ASA, and Brandon M. Foster, K&M Technology Group

**C125 Casing—A Viable Solution for HPHT in Mild, Sour Service Applications**
Bruce E. Urband, Grant Prideco, and Steve Morey, BP America

**Maximizing Drilling Performance With State-of-the-Art BHA Program**
David C-K Chen, and Min Wu, Halliburton Sperry Drilling Services

**Evolutionary Well-Construction Method That Challenges Convention**
P.D. Howlett, M.T. Wardley, and C. Black, Caledus Ltd.; D. Reed, Senergy Ltd.; and G. Begg, Talisman U.K. Ltd.

**UniTong Combined Tong for Drilling Operations**
Helge-Ruben Halse, V-Tech A/S

**Novel Approach for Estimating Pore Fluid Pressures Ahead of the Drill Bit**
John Jones, Marathon Oil Co., and Martin D. Matthews and William Standifird, Knowledge Systems Inc.

**Step Changes Needed To Modernize T&D Software**
Colin J. Mason, BP Exploration, and David C.-K. Chen, Halliburton Sperry Services

**Application of Novel Technology Improves Drilling Performance in Multilateral Field Development Offshore West India—Reducing Risk and Increasing Production**
Anil Jaggi, Sanjeev Gera, and Sunil Upadhyay, BG Group; Manoj Gupta, Ashok Thorat, and Jon Ruszka, Inteq; and Sandeep Tatake, Hughes Christensen Co.

**Trapped Annular Pressure—A Spacer Fluid That Shrinks**

**New Offshore Rigless Intervention System**
David Harris and Paul G. Adams, BJ Tubular Services

**Fractured Wellbore Stress Analysis: Sealing Cracks To Strengthen a Wellbore**
Hong (Max) Wang, Halliburton; Brian F. Towler, U. of Wyoming; and Mohamed Soliman, Halliburton
Enhanced Cementing Practices Address Unique Issues Found With Solid Expandable Tubular Applications

James Heathman, Halliburton, and Eduardo Arredondo and Akin Olufowoshe, Enventure Global Technology

Casing-Drilling Step Improvement: PDC Successfully Drills Out Casing Bit and Finishes Hole Section at Lowest Cost

Ian Johnstone, Alistair Chomley, Gheorghe Cernev, Mahbub Hoq, Geoff Atherton, Santos Simon Cornel, and Martin Jacobs, Hughes Christensen

Drilling Tests of an Active Vibration Damper

Martin E. Coben, Carl A. Perry, Jason A. Barbely, and Daniel E. Burgess, APS Technology Inc., and Mark E. Wassell, APS Oilfield Services Ltd.

Drilling With Liner on Horizontal Oil Wells

Assuring Stability in Extended-Reach Wells—Analyses, Practices, and Mitigations

Stephen M. Willson and Stephen T. Edwards, BP America Inc.; Anthony Crook and Adam Bere, Rockfield Software Ltd.; Daniel Moos and Pavel Peska, GeoMechanics Intl. Inc.; and Nigel Last, BP plc

Cementing Considerations for Casing While Drilling: Case History

Robert D. Strickler, ConocoPhillips, and Pablo Solano, Halliburton

Connection Qualification for Casing-Drilling Application

Qing Lu, Grant Prideco; Jiang Wu, Chevron; and Dan Hannahs, Grant Prideco

Mathematical Temperature Simulators for Drilling Deepwater HT/HP Wells: Comparisons, Applications, and Limitations

David Stiles and Mark Trigg, ExxonMobil Development Co.

The Next Major Step in Total Hands-Free Pipe Handling—No Derrickman in the Derrick Racking and Unracking Pipe

Dave Richard, Iron Derrickman Ltd.

Are Swelling-Elastomer Technology, Preperforated Liner; and Intelligent-Well Technology Suitable Alternatives to Conventional Completion Architecture?

Gary P. Hertfelder and Kurt Koerner, Plains E&P Co.; Allen Wilkins, Easywell; and Lilian Izquierdo, Schlumberger

Design of Well Barriers To Combat Circulation Losses

Bernt S. Aadnoy, Mesfin Belayneh, and Miguel Arriado, U. of Stavanger, and Roar Flateboe, BP

Kick Detection and Control in Oil-Based Mud: Real Well-Test Results Using Microflux Control Equipment

Helio Santos and Erdem Catak, Impact Solutions Group; Joe Kinder, Secure Drilling; and Paul Sonnemann, Chevron ETC

Combination of Drilling With Casing and Stage Tool Cementing: A Unique Approach to Mitigating Downhole Conditions

The Introduction of Electromagnetic LWD Technology in Saudi Arabia—A Case History and Future Application to Underbalanced Campaigns

Field Result of Equivalent-Circulating-Density Reduction With a Low-Rheology Fluid

Bolivar, N. and Young, J., Hibernia Management and Development Co. Ltd.; Dear, S., ExxonMobil Development Co.; and Massam, J., and Reid, T., M-I Swaco
World's First Annular Safety Valve for Dual Concentric Water Injection

Managed-Pressure Drilling Reduces China Hard-Rock Drilling by Half

Chen Shen and Xinming Niu, Sinopec Corp., and Steve Nas and Calvin Holt, Weatherford Intl. Ltd.

Unique Pivot Stabilizer Geometry Advances Directional Efficiency and Borehole Quality With a Specific Rotary-Steerable System

Steve Barton, Alan Clarke, and Daniel G. Perez, ReedHycalog, and Simon Peach, Weatherford Intl. Ltd.

Design, Construction, and Optimisation of Big-Bore Gas Wells in a Giant Offshore Field

Implementation of ROP Management Process in Qatar North Field

Stephen M. Remmert and Joseph W. Witt, RasGas Co. Ltd., and Fred E. Dupriest, ExxonMobil Development Co.

Drilling Without WOB: Dream or Reality? An Effective Field Test by Total Angola

Christophe Simon, DrillScan; David Goyallon, Total E&P Angola; Jean-Paul Poloce, Total S.A.; Hedi Sellami and Laurent Gerbaud, École des Mines de Paris; and Alfazazi Dourfaye, Varel Europe

The Evolution of a TAML L-4 Multilateral System To Meet the Challenges of a BP Deepwater Subsea Well

Ken Horne and Robbie Allam, BP; Mark Glaser and Peter Chandler, Weatherford Intl. Ltd.; and Thilo Scharf, Schlumberger

Magnolia Deepwater Experience—Frac-Packing Long Perforated Intervals in Unconsolidated Silt Reservoirs

VOLUME 2

Lessons Learned on Sand-Control Failure and Subsequent Workover at Magnolia Deepwater Development

Qualifying a New Expandable Reservoir Completion System

Pierre-Charles Wood and Don Duhrkopf, BP, and Annabel Green, Weatherford

High-Integrity Wellbore Surveys: Methods for Eliminating Gross Errors

Roger Ekseth, Gyrodata; Torger Torkildsen, Statoil ASA; Andrew Brooks, Baker Hughes Inteq; John Weston, Gyrodata; Erik Nyrnes, Statoil ASA; Harry Wilson, Baker Hughes Inteq; and Kazimir Kovalenko, Gyrodata

Aggressive Drilling Parameters Capitalize on Cutter Technology and PDC Frame Advancement in Mature Field

Peter Langille, Marathon Oil Co., and Jason Hildebrand and Kyle Massie, Hughes Christensen

Detailed Post-Event Analysis of Drilling Problems Significantly Alters the Root Cause Reality for Technical Sidetracks

Marit Blaasmo, Arne V. Singelstad, and Kjetil Bekkeheien, Statoil

Improved Method for Use of Chelation to Free Stuck Pipe and Enhance Treatment of Lost Returns

John K. Montgomery, Stuart R. Keller, SPE, Nancy Krahel, ExxonMobil Upstream Research Company and Martin V. Smith, SPE, ExxonMobil Development Company
Achieving Shoe-to-Shoe Drilling Performance in Hole-Opening Application With Rotary-Steerable Systems ................................................................. 631
Heisig, G., Hood, J., Okewunmi, S., and Robnett, E., Baker Hughes Inteq

Hydraulic Predictions for Polymer-Thickened Foam Flow in Horizontal and Directional Wells ................................................................................. 643

Effects of RPM and ROP on PDC Bit Steerability ........................................ 653
Stephen Ernst, Paul Pastusek, and Paul Lutes, Hughes Christensen

PDC Casing Drilling Improves HS&E, Cuts Drilling Costs—West Africa .................................................. 664
Klaas Hartsema, Shell Gabon, Enis Aliko, Jaime Campos, Lester Clark, Franck Delgado, Peter Folling, and John Wingate, Hughes Christensen

Demonstrating Managed-Pressure Drilling With the ECD Reduction Tool ........................................... 681

Effect of Length: Diameter Ratio on Collapse Test Results and Frame Design ........................................ 686
P.D. Pattillo, BP America

Hydraulic Blowout Control Requirements for Big-Bore and HP/HT Developments: Validation With Field Experience .................................................. 692
P. Oudeman, Shell Intl. E&P

Encountering an Unexpected Tar Formation in a Deepwater Gulf of Mexico Exploration Well ............................................................. 702
M.H. Weatherl, Chevron North America E&P Co.

Premature Yielding Identified in First Comprehensive 2-million-lbm Deepwater Landing String Test Program .................................................................. 712
Dale W. Bradford, BHP Billiton; Michael L. Payne, BP; Donald E. Schultz, Nexen; Burt A. Adams, Oil & Gas Rental Services; and Kurt D. Vandervort, Mohr Engineering Div.

Application of Purpose-Built Rig Technology Results in Step Change of Drilling Time, Cost, and Opportunities ..................................................... 732

Application of Enhanced Ultrasonic Measurements for Cement and Casing Evaluation ................................................................. 739
C. Morris and L. Sabbagh, Schlumberger; R. Wydrinski and J. Hupp, BP; and R. van Kuijk and B. Froelich, Schlumberger

CIDS to Orlan: Transformation and Startup of Sakhalin’s Ice-Resistant Drilling Platform ................................................................. 754
Anthony M. Higgins, Boris Zuskov, and Paul Vande Zande, ExxonMobil Development Co.

Development of a Subsea TTRD Capability West of Shetland ................................................................. 764
Robert Johansen, BP Exploration Operating Co. Ltd., and Angus MacLeod, Leading Edge Advantage

Applying Risk Analysis to Casing While Drilling ........................................... 777
Houtchens, B., Foster, J., and Tessari, R., Tesco Corp.

Drilling and Completing Intelligent Multilateral MRC Wells in Haradh Inc-3 .................................................. 784
Fahad Al-Bani and Ahmad Shah Baim, Saudi Aramco, and Suresh Jacob, WellDynamics Inc.

Strain-Based Design of Tubulars for Extreme Service Wells ................................................................. 791
J. Nowinka and T. Kaiser, Noetic Engineering Inc., and B. Lepper, Shell Canada Ltd.

Lubricants Enabled Completion of ERD Well .................................................. 800
Jonny Holand, Svein Arne Kvamme, Tor Henry Omland, Arild Saasen, and Knut Taugbøl, Statoil, and John Jamth, Intertek West Lab
