Proceedings

AHS 2006

Table of Contents

Preface ...........................................................................................................xi
Conference Organizers .............................................................................xiii
Program Committee .................................................................................xiv

Session 1: Adaptive Analog Circuits

Adaptive Multifunctional Circuits and Systems for Future Generations
of Wireless Communications (Invited Paper) ......................................................... 3
  Aleksandar Tasić

A Self-Tuning Analog Proportional-Integral-Derivative (PID) Controller ...................... 12
  Varun Aggarwal, Meng Mao, and Una-May O'Reilly

A Tuning Technique for Switched-Capacitor Circuits .............................................. 20
  Mustafa Keskin and Nurcan Keskin

A Background Mismatch Calibration for Capacitive Digital-to-Analog Converters ............ 24
  Mustafa Keskin

Temperature-Adaptive Circuits on Reconfigurable Analog Arrays .............................. 28
  Adrian Stoica, Ricardo S. Zebulum, Didier Keymeulen, Rajeshuni Ramesham,
  Joseph Neff, and Srinivas Katkoti

A Modular Framework for the Evolution of Circuits on Configurable
Transistor Array Architectures ........................................................................ 32
  Martin Trefzer, Jörg Langeheine, Karlheinz Meier, and Johannes Schemmel
Session 2: Adaptive Antennas

Adaptive Micro-antenna on Silicon Substrate ................................................................. 43
  Nakul Haridas, Ahmet T. Erdogan, Tughrul Arslan, and Mark Begbie

Using Hardware-Based Particle Swarm Method for Dynamic Optimization
of Adaptive Array Antennas .......................................................................................... 51
  Gabriella Kókai, Tonia Christ, and Hans Holm Frhauf

Systolic Array Based Adaptive Beamformer Modelling in SystemC Environment ............................................. 59
  Ozgur Tamer and Ahmet Ozkurt

Session 3: Adaptive Optical Systems

Automatic Alignment of Multiple Optical Components Using Genetic Algorithm ................................. 67
  Hirokazu Nosato, Masahiro Murakawa, and Tetsuya Higuchi

Wofer-Tweeter Adaptive Optics Test Bench .................................................................................. 74
  Onur Keskin, Peter Hampton, Rodolphe Conan, Colin Bradley, Aaron Hilton,
  and Celia Blain

Switchable Glass: A Possible Medium for Evolvable Hardware ...................................................... 81
  Mihai Oltean

Evolvable Hardware Applied to Nanotechnology ............................................................................. 88
  Omar Paramaiba Vilela Neto, Leone Pereira Masiero, Marco Aurélio C. Pacheco,
  and Carlos R. Hall Barbosa

Session 4: Adaptive Signal Processing

The Novel Stochastic Bernstein Method of Functional Approximation ........................................ 97
  Joseph Kolibal and Daniel Howard

An Adaptive Heuristic Filter for Acceleration Measurements
in Planetary Atmospheres ............................................................................................... 101
  Horia-Nicolai Teodorescu

Power Driven Reconfigurable Complex Continuous Wavelet Transform
Processor ......................................................................................................................... 109
  Nizamettin Aydin and Tughrul Arslan

Self-Configurable Neural Network Processor for FIR Filter Applications ................................ 114
  Gorn Tepvorachai and Chris Papachristou

A New State Space Representation Method for Adaptive Log Domain Systems .......................... 122
  Remzi Arslanap and Abdullah T. Tola
Session 5: Morphogenetic and Cellular Adaptive Hardware

Hardware/Software Coevolution of Genome Programs and Cellular Processors ............................................................... 129
Gianluca Tempesta, Pierre-André Mudry, and Guillaume Zufferey

Gunnar Tuft

Gate-Level Morphogenetic Evolvable Hardware for Scalability and Adaptation on FPGAs ................................................................. 145
Justin Lee and Joaquin Sitte

Evolving Hardware with Self-Reconfigurable Connectivity in Xilinx FPGAs .................................................................................. 153
Andres Upegui and Eduardo Sanchez

Session 6: Evolution of Digital Systems

Particle Swarm Optimization with Discrete Recombination: An Online Optimizer for Evolvable Hardware ........................................................................................................... 163
Jorge Peña, Andres Upegui, and Eduardo Sanchez

Lukas Sekanina

Generalized Disjunction Decomposition for the Evolution of Programmable Logic Array Structures ................................................................................................................... 179
Emanuele Stomeo, Tatiana Kalganova, and Cyrille Lambert

Evolution of Multifunctional Combinational Modules Controlled by the Power Supply Voltage ................................................................................................................ 186
Lukas Sekanina, Lukas Starecek, Zbysek Gajda, and Zdenek Kotasek

Designing Electronic Circuits by Means of Gene Expression Programming ................................................................................................. 194
Xue-song Yan, Wei Wei, Rui Liu, San-you Zeng, and Li-shan Kang

Genetic Algorithm Based Engine for Domain-Specific Reconfigurable Arrays ......................................................................................... 200
Wing On Fung, Tughrul Arslan, and Sami Khawam

Towards the Integration of Drive Control Loop Electronics of the JPL/Boeing Gyroscope within an Autonomous Robust Custom-Reconfigurable Platform ............................................................................. 207
Evangelos F. Stefatos, Tughrul Arslan, Didier Keymeulen, and Ian Ferguson

An Efficient Multi-objective Evolutionary Algorithm for Combinational Circuit Design ................................................................................. 215
Rui Liu, Sang-you Zeng, Lixin Ding, Lishan Kang, Hui Li, Yaping Chen, Yong Liu, and Yueping Han

Hardware Accelerators for Evolving Building Block Modules for Artificial Brains ....................................................................................... 222
Hugo de Garts
Session 7: Reconfigurable Devices and Architecture

An Adaptive FPGA-Based Mechatronic Control System Supporting Partial Reconfiguration of Controller Functionalities ................................................................. 225
  Steffen Toscher, Thomas Reinemann, and Roland Kasper

Reconfigurable Parallel Computing Architecture for On-Board Data Processing ........................................................................................................ 229
  Mohsin A. Syed and Eberhard Schueler

Population-Based FPGA Solution to Mastermind Game ................................................................. 237
  H. Fatih Ugurdag, Yahya Sahin, Onur Baskirt, Soner Dedeoglu,
  Sezer Goren, and Yasar S. Kocak

Session 8: Reconfigurable Systems (Invited Papers)

Chair: Tughrul Arslan, University of Edinburgh, UK

Adaptable Architectures for Signal Processing Applications ................................................................. 247
  Martin Margala

The Gannet Service-Based SoC: A Service-Level Reconfigurable Architecture ................................................................. 255
  Wim Vanderbauwhede

On-Board Partial Run-Time Reconfiguration for Pico-Satellite Constellations ................................................................. 262
  Tanya Vladimirova and Xiaofeng Wu

Embedded Reconfigurable Array Fabrics for Efficient Implementation of Image Compression Techniques ................................................................. 270
  Sajid Baloch, Tughrul Arslan, and Adrian Stoica

Session 9: Fault Tolerance and Self Repair

A Honeycomb Development Architecture for Robust Fault-Tolerant Design ................................................................. 281
  Andy M. Tyrrell and Hong Sun

Strategies to On-Line Failure Recovery in Self-Adaptive Systems
Based on Dynamic and Partial Reconfiguration ........................................................................ 288
  Katarina Paulsson, Michael Hübner, and Jürgen Becker

An Efficient Technique for Preventing Single Event Disruptions in Synchronous
and Reconfigurable Architectures ......................................................................................... 292
  Sajid Baloch, Tughrul Arslan, and Adrian Stoica

Self-Adaptive System Based on Field Programmable Gate Array for Extreme
Temperature Electronics ........................................................................................................ 296
  Didier Keymeulen, Ricardo Zebulum, Ramesham Rajeshuni, Adrian Stoica,
  Srinivas Katkori, Sharon Graves, Frank Novak, and Charles Antill

A FPGA Simulation Using Asexual Genetic Algorithms for Integrated Self-Repair ......................................................................................... 301
  Robert Ross and Richard Hall
SW-HW Co-design and Fault Tolerant Implementation for the LRID Wireless Communication System

Stefanos Skoulaxinos

Analytical Modelling of Power Attenuation under Parameter Fluctuations with Applications to Self-Test and Repair

H. J. Kadim

An Automatic Technique to Synthesize Avionics Architecture

Savio Chau, Van Dang, Joseph Xu, and James Lu

State-Space Based Analytical Modelling for Real-Time Fault Recovery and Self-Repair with Applications to Biosensors

H. J. Kadim

Session 10: ESPACENET—Evolvable Networks of Intelligent and Secure Integrated and Distributed Reconfigurable System-on-Chip Sensor Nodes for Aerospace Based Monitoring and Diagnostics (Invited Papers)

Chair: Adrian Stoica, JPL, USA

ESPACENET: A Framework of Evolvable and Reconfigurable Sensor Networks for Aerospace-Based Monitoring and Diagnostics

Enabling Technologies for Distributed Picosatellite Missions in LEO

Tanya Vladimirova, Xiaofeng Wu, Kawsu Sidibe, David Barnhart, and Abdul-Halim Jallad

A Generic On-Chip Debugger for Wireless Sensor Networks

Andrew B. T. Hopkins and Klaus D. McDonald-Maier

Novel Techniques for Ensuring Secure Communications for Distributed Low Power Devices

Gareth Howells, Evangelos Papoutsis, and Klaus McDonald-Maier

Session 11: Adaptive Techniques in Space Applications

N. Ismailoğlu, O. Benderli, S. Yeşil, R. Sever, B. Okcan, O. Şengül, and Ruşen Öktem

A Comparative Design of Satellite Attitude Control System with Reaction Wheel

Shengmin Ge and Hao Cheng
Session 12: Applications to Sensing and Image Processing

Towards Fluent Sensor Networks: A Scalable and Robust Self-Deployment Approach ................................................................. 365
  Muhammed R. Pac, Aydan M. Erkmen, and Ismet Erkmen

On-Chip Evolution Using a Soft Processor Core Applied to Image Recognition ................................................................. 373
  Kyrre Glette, Jim Torresen, Moritoshi Yasunaga, and Yoshiki Yamaguchi

An Efficient Hardware Architecture for H.264 Adaptive Deblocking Filter Algorithm ......................................................... 381
  Mustafa Parlak and Ilker Hamzaoglu

An FPGA Implemented Processor Architecture with Adaptive Resolution ............................................................................. 386
  Jim Torresen and Jonas Jakobsen

Automatic Hybrid Genetic Algorithm Based Printed Circuit Board Inspection ................................................................. 390
  Syamsiah Mashohor, Jonathan R. Evans, and Ahmet T. Erdogan

Session 13: Applications in Communications

Routing in Wireless Sensor Networks Using Ant Colony Optimization ............................................................................. 401
  Selcuk Okdem and Dervis Karaboga

Architecture of a Dynamically Reconfigurable NoC for Adaptive Reconfigurable MPSoC ......................................................... 405
  B. Ahmad, Ahmet T. Erdogan, and Sami Khawam

A Novel Self-Organizing Hybrid Network Protocol for Wireless Sensor Networks ................................................................. 412
  Jichuan Zhao and Ahmet T. Erdogan

Wormhole Routing with Virtual Channels Using Adaptive Rate Control for Network-on-Chip (NoC) ......................................................... 420
  Ioannis Nousias and Tughrul Arslan

A Multi-objective Genetic Algorithm for On-Chip Real-Time Adaptation of a Multi-carrier Based Telecommunications Receiver ......................................................... 424
  Nasri Sulaiman and Ahmet T. Erdogan

A Low-Complexity Self-Calibrating Adaptive Quadrature Receiver ............................................................................. 428
  Ediz Cetin, Suleyman S. Demirsoy, Izzet Kale, and Richard C. S. Morling

Design Concepts for a Dynamically Reconfigurable Wireless Sensor Node ............................................................................. 436
  Heiko Hinkelmann, Peter Zipf, and Manfred Glesner

On the Trellis Structures of Geometric Augmented Product Codes ............................................................................. 442
  Gökmen Altay, Osman N. Ucan, Nejla Altay, and Şenay Yalçınt
Session 14: Biometrics and Content Based Security Systems (Invited Papers)

Chair: A. Bouridane, Queens’ University Belfast, UK

Protecting Fingerprint Data Using Watermarking ................................................................. 451
  Khalil Zebbiche, Lahouari Ghouti, Fouad Khelifi, and Ahmed Bouridane

Finite State Machine IP Watermarking: A Tutorial ............................................................... 457
  Amr T. Abdel-Hamid, Sofiène Tahar, and El Mostapha Aboulhamid

Face Recognition Using a Gabor Filter Bank Approach ....................................................... 465
  Walid R. Boukabou, Lahouari Ghouti, and Ahmed Bouridane

VLSI Design IP Protection: Solutions, New Challenges, and Opportunities .......................... 469
  Lin Yuan, Gang Qu, Lahouari Ghouti, and Ahmed Bouridane

A Large Scale Adaptable Multiplier for Cryptographic Applications .................................. 477
  Osama Al-Khaleel, Chris Papachristou, Frank Wolff, and Kiamal Pekmezzi

Author Index .......................................................................................................................... 485
