Message from the Chairs .................................................................................. xiii
Organizing Committee ...................................................................................... xiv
Program Committee ........................................................................................... xv

Foundations of Services Computing

Fuzzy Similarity from Conceptual Relations......................................................... 3
   Ling Song, Jun Ma, Li Lian, Zhumin Chen

Fuzzy Petri Net-Based Evaluation to the Process of ERP Implementation .................. 11
   Shaojun Wang, Gang Wang, and Guoan Gao

Improved Secret Sharing with Access Structures in a Hierarchy .......................... 18
   Yi Liu, Ling Zhang, and Yumin Wang

A Semantic Matchmaking Method of Web Services Based On SHOIN· (D) .................. 26
   Hai Wang and Zengzhi Li

An Efficient Approach to Web Services Discovery and Composition when Large
Scale Services are Available .................................................................................. 34
   Zhumin Chen, Jun Ma, Ling Song, Li Lian

An Effective Technique for Personalization Recommendation Based
on Access Sequential Patterns .............................................................................. 42
   Xiaoqiu Tan, Min Yao, and Miajun Xu

An Algorithm for Predicting Customer Churn via BP Neural Network Based
on Rough Set ......................................................................................................... 47
   E Xu, Liangshan Shao, Xuedong Gao, and Baofeng Zhai

A Fuzzy Multi-attribute Decision Making Algorithm for Web Services Selection
Based on QoS .......................................................................................................... 51
   Hongxia Tong and Shensheng Zhang

Three Dimensional Layered Approach for Analyzing Value Chain Re-organization
Cross ICT Industries for Converged Mobile Multimedia Services ......................... 58
   Yun Jiang and Laurent Gille

An Efficient Algorithm for Web Services Composition with Chain Data Structure ........ 64
   Li Lian, Jun Ma, Zhu-min Chen, and Ling Song
TreeLogit Model for Customer Churn Prediction ................................................................. 70
   Jiayin Qi, Yangming Zhang, Yingying Zhang, and Shuang Shi

An Improved Trust Model in P2P ....................................................................................... 76
   Xiaohui Ren, Kenli Li, Renfa Li, and Lei Yang

A Model-Driven Aspect Framework for Grid Service Development ........................................ 82
   WenJun Li, ChuWei Huang, QiangChao Chen, and Hui Bian

Business Process Management and Business Integration

Reversible Sketch Based on the XOR-Based Hashing ..................................................... 93
   Wenfeng Feng, Zhibin Zhang, Zongpu Jia, and Ziyi Fu

Process-Based Design Verification for Systems Involving Shared Resources ......................... 99
   K.S. Cheung and K.O. Chow

Fair E-cash Payment Model on Credit Overdraft ..................................................... 107
   Shaobin Wang, Na Su, and Lei Hu

A Fuzzy Neural Network Model with Application to Telecommunications Business ............. 112
   Yongping Li and Rongjun Li

Cooperative Design and Development of Logistics Information System Based on Simple Factory Pattern ........................................................................................ 118
   Bo Yan, Biqing Huang, Hongbo Sun, and Chin E. Lin

An Integration of Web Service and Workflow to a Wealth Management Order Placement System: A Case Study of International Brokerages ......................................................... 123
   Brenda Y. Hon and Dickson K.W. Chiu

Lot Sizing, Pricing and Lead Time Decisions with Time and Price Sensitive Demand ................ 130
   JianJun Shao and DaGang Ke

The Research on the Application Strategies of Information and Communication Technologies to Promote the Knowledge Transfer in Regional Innovation System ............................................. 138
   Jie Xue and Zhengang Zhang

Applied Research on Logistics Grid Based on ASP .......................................................... 146
   Bo Yan, Yiyun Chen, and Zhiyong Zhang

Task-Role-Based Access Control in Application on MIS ............................................. 153
   Li Zhang, Lili Luo, Liyong Zhang, Tiesuo Geng, and Zongge Yue

Alert-Driven E-government Service Management: A Case Study on Road Maintenance Management System ............................................................ 160
   Trewina P. Y. Leung and Dickson K.W. Chiu

A Modified Particle Swarm Algorithm Combined with Fuzzy Neural Network with Application to Financial Risk Early Warning ......................................................... 168
   Fu-yuan Huang, Rong-jun Li, Liu Han-xia Liu, and Rui Li

The Analyses of Strategic Deterrence Effect’s Impact on Strategic Alliance’s
Decision-Making Based on Horizontally Differentiated Product Market................................. 272
   Tiebo Song, Wenfeng Cen, Liangxing Zhang, and Xiong Chen

Explore New Profiting Method for TV Based on P2P Streaming Media Technology ................... 276
   Jing Tang, Can Yang, and Xinxin Chen

The Study of Strategy of Persuasive Advertising Investment...................................................... 280
   Tiebo Song, Xiong Chen, Yonggang Yin, and Wenfeng Cen

The Research and Realization of a New Workflow Model with Step-Task
Two Layers Based on Document ................................................................................................. 285
   Lin Zhao, Jianping Xing, and Lingguo Meng

The research of Competitive Intelligence Organization of Dynamic Alliance
(CIODA) in E-Commerce ........................................................................................................... 293
   Xiaowei Wu, Xiaobei Liang, and Wenguan Song

Suspicious Financial Transaction Detection Based on Empirical Mode
Decomposition Method ................................................................................................................. 300
   Tianqing Zhu

A Sandwich Model for Business Integration in BOA (Business Oriented Architecture) .................. 305
   Juan Zhu and Li Zhen Zhang

Evaluating ERP Performance from User Perspective ................................................................. 311
   Jen-Yin Yeh

Process Computing of Complaint Service Management in Reverse Logistics ............................... 315
   Yi He and Zhixue Liu

**Service-Oriented Architecture (SOA)**

An Approach to SOA-Based Bioinformatics Grid ................................................................. 323
   Guoshi Xu, Yin Luo, Huashan Yu, and Zhuoqun Xu

Web Services Publishing and Discovery on Peer-to-Peer Overlay ............................................. 329
   Jianjun Yu, Rui Chen, Hao Su, and Shengmin Guo

Applying Software Component Technology to NP-based System for Novel
Network Services ......................................................................................................................... 335
   Xian-Cheng Xu and Ling Zhang, and Shou-Bin Dong

Semantic Web Services Composition Using AI planning of Description Logics ........................ 340
   Lirong Qiu, Fen Lin, Changlin Wan, and Zhongzhi Shi

Discovering Web Services Based on Functional Semantics ...................................................... 348
   Lei Ye and Bin Zhang

Personalized Recommendation Services Based on Service-Oriented Architecture ...................... 356
   Quan Wen and Jianmin He
The Lagrangian Algorithm Implement of QoS-Aware Service Composition on P2P Network .......................................................... 362
  Xiao_Yan Gao, Zhen-Wei Yu, and Yin-Long Shi

A Grid-Enabled Architecture for Geospatial Data Sharing .......................................................... 369
  Yanfeng Shu, Jack Fan Zhang, and Xiaofang Zhou

Investigating Rivalry in Tele-mobile Service Industry in China: A System Dynamics Approach .......................................................... 376
  Yueping Chen and Yongguang Zhong

A New Architecture of Data Access Middleware under Grid Environment .......................................................... 384
  Qingyang Wang, Jingshu Chen, Xibin Gao, Wei Zhou, and Baoping Yan

A Lightweight Approach towards Autonomic Service-Oriented Computing System Development .......................................................... 392
  Guoyong Cai, Ji Gao, and Bin Hu

ZigBee Routing Selection Strategy Based on Data Services and Energy-Balanced ZigBee Routing .......................................................... 400
  Peng Ran, MaoHeng Sun, and YouMin Zou

A BPEL4WS-based Composite Service Modeling Solution in Manufacturing Grid .......................................................... 405
  Lei Duan, Shijun Liu, Changhe Yu, and Xiangxu Meng

Research on Grid-Based Traffic Simulation Platform .......................................................... 411
  Jiankun Wu, Linpeng Huang, Jian Cao, and Minglu Li, and Xin Wang

Grid/Utility Computing

An ECA-Rule-Based Workflow Approach for Advance Resource Reservation in ShanghaiGrid .......................................................... 421
  Yi Wang, Minglu Li, Jian Cao, Ying Li, Lin Chen, Xinhua Lin, and Feilong Tang

Dual-Role Based Access Control Framework for Grid Services .......................................................... 427
  Lina Ge, Shaohua Tang, and Qiao Kuang

QoS-aware Scheduling Algorithm Based on Complete Matching of User Jobs and Grid Services .......................................................... 433
  Weidong Hao, Yang Yang, Chuang Lin, and Zhengli Zhai

GlobalWatch: A Distributed Service Grid Monitoring Platform with High Flexibility and Usability .......................................................... 440
  Sheng Di, Hai Jin, Shengli Li, Ling Chen, and Chengwei Wang

An Adaptive Resource Scheduling Algorithm for Computational Grid .......................................................... 447
  Tao Wang, Xingshe Zhou, Qiu-rang Liu, Zhi-yi Yang, and Yun-lan Wang

Portal Access to Scientific Computation and Customized Collaborative Visualization on Campus Grid .......................................................... 451
  Yingjie Xia, Guanghua Song, and Yao Zheng
GSGCP-FEM: A General Service-Oriented Grid Computing Platform for FEM-Based Simulations ................................................................. 458
Kejing He, Shoubin Dong, Jianfei He, and Liqun Tang

AOCMS: An Adaptive and Scalable Monitoring System for Large-Scale Clusters ............................................................... 466
Zhenghua Xue, Xiaoshe Dong, and Weiguo Wu

GridPPI: A Lightweight Grid-Enabled Parallel Programming Framework ......................................................................................... 473
Sikan Chen, Minglu Li, and Feng He

FEISI: towards Enterprise Information Semantic Integration .................................................................................................................. 481
Xiongwen Pang, Deyu Qi, and Yong Jun Li

Adaptive Task Scheduling on Optical Grid .............................................................................................................................. 486
Xuebin Liang, Xinhua Lin, and Minglu Li

MICE: An Efficient Grid Scheme for Mathematical Computing ........................................................................................................... 492
Yi Yang, Li Liu, Lian Li, Zhenfang Li, and Rui Zhou

Optimizing Repetitive Resource Accesses with Stateful Web Services ................................................................................................. 499
Huashan Yu and Zhuoqun Xu

Research on the Grid/Web-Service-Based Visualization Model and Its Application ................................................................. 507
Chunmei Duan and Xiangxu Meng

A Systematic Approach for Application Migration in a Grid Computing Environment ................................................................. 512
Anirban Chakrabarti, Subhashis Sengupta, Adarsh Upadhyay, and Anish Damodaran

Web Resource Monitoring Based on Common Information Model ............................................................................................................ 520
Hongyan Mao, Linpeng Huang, and Minglu Li

GHIDS: Defending Computational Grids against Misusing of Shared Resources ....................................................................................... 526
Guofu Feng, Xiaoshe Dong, Weizhe Liu, Ying Chu, and Junyang Li

Free-Riding Analysis of BitTorrent-Like Peer-to-Peer Networks ................................................................................................................... 534
Jiadi Yu, Minglu Li, Feng Hong, Guangtao Xue

Using Ant Colony Optimization for SuperScheduling in Computational Grid .......................................................................................... 539
Li Liu, Yi Yang, Lian Li, and Wanbin Shi

Research on Association Rules Based Group Ranking Model with Fuzzy Preference Relation Structure .................................................................................................................. 546
Xinqiao Yu, Bo Meng, and Fei Yan

GOI-Based Information Service Architecture in Grid ............................................................................................................................... 553
Xiangang Zhao, Bai Wang, Liutong Xu, and Nan Du

The Research on an Adaptive Information Grid Architecture for Recommendation System ................................................................................. 560
Xiao-gao Yu and Xiaopeng Yu

Remote Sensing Data Distribution by a Grid-Based Data Distribution System .......................................................................................... 566
ZhenChun Huang and Guo Qing Li
ICA/RBF-Based Prediction of Varying Trend in Real Exchange Rate ................................................................. 572
   Ling Huang, Fenggang Li, and Lin Xing

Short Papers

Find the Best to share ........................................................................................................................................................................ 581
   Mingwei Yuan, Ping Jiang, and Jian Wu

A New Pricing Approach for Service Network Using Explicit Congestion Notification ................................................................. 585
   Jun Tao and DianXun Shuai

EbXML-Based Application Integration in Service-Oriented Business .................................................................................................. 589
   Quan Wen

Model and Algorithm for a Time-Constrained Regions-Integrated Distribution Problem ................................................................. 593
   Xiang Liu and Yanhui Li

Research and Design of Phishing Alarm System at Client Terminal .................................................................................................. 597
   Ming Qi and Chaobo Yang

An Outlier Detection Model Based on Cross Datasets Comparison for Financial Surveillance .......................................................... 601
   Tianqing Zhu

Transform from Models to Service Description Based on MDA .............................................................................................................. 605
   Bin Yu, Chen Zhang, and Yang Zhao

Research on Supply Chain Performance Evaluation Based on DEA/AHP Model .................................................................................. 609
   JingYuan Guo, Jia Liu, and Li Qiu

Coordination Strategy for Production Planning in Supply Chain Based on Lagrange Relaxation Algorithm .................................................. 613
   Cuihua Zhang, Guangshu Chang, Yan Fan, and Haibin Yu

GAOM: Genetic Algorithm Based Ontology Matching ......................................................................................................................... 617
   Junli Wang, Zhijun Ding, and Changjun Jiang

Reliability Modeling and Analysis of Service-Oriented Robot Management System .................................................................................. 621
   Ping Zhang, Renqing Lu, and Jing Zhang

State Machine Based CDMA Stress Testing Service System ................................................................................................................. 625
   Lan Liu, Jun Lin, Zhitang Li, and Jiachun Li

An Approach to Dynamic Model Combination on Solving Decision-Making Problem ................................................................. 629
   Chao Wu, Ming Jun Xin, and Wei Hua Li

Entropy Evaluation Model of Enterprises Performance Based on Supply Chain Management Theory ......................................................... 635
   Jun Xu and Qi Zeng

A Workflow Model Supporting Flexible Process Based on Extensible Organization ........................................................................... 640
   Hongli Wu, Baolin Yin, Xia Zhao, and Gang Xiang
Dynamic Selection and Optimization of Design Paradigms in Mobile Services ........................................ 646
   Songqiao Han, Shensheng Zhang, and Yong Zhang

Design and Implementation of Intelligent Vehicle Monitoring and Management System Based on the Multi-net .............................................................. 650
   Kaihua Xu, Ya Wang, Wei Teng, and Yuhua Liu

Double-Indexing Mechanism of Search Engine Based on Campus Net ............................................. 654
   Changsheng Zhou, Wei Ding, Na Yang, and Zhiqiang Ma

Research on the Preventive Strategy of Credit Risk in On-Line Auction Market .................................... 658
   Qinghua Zhang

On Loan-to-Value Ratios of Inventory Financing with Doubly Stochastic Poisson Default Processes .............................................................................. 663
   Yixue Li, Yu Xu, Gengzhong Feng, and Wenqiang Dai

An Evolutionary Algorithm for Constrained Multi-objective Optimization Problems ................................... 667
   Hua-Qing Min, Yu-Ren Zhou, Yan-Sheng Lu, and Jia-Zhi Jiang

Author Index ................................................................................................................................................. 671
