Proceedings

Fourth IEEE International Workshop on
Wireless, Mobile and Ubiquitous Technology in Education
WMUTE 2006

16-17 November 2006
Athens, Greece

Sponsored by
IEEE Computer Society
IEEE Technical Committee on Learning Technology

Los Alamitos, California
Washington • Tokyo
Table of Contents

Preface..................................................................................................... viii
Committees ............................................................................................... ix

Keynote
Profile Enhanced Classroom Learning ................................................................. 3
Tak-Wai Chan, Fei-Ching Chen, and Chih-Yueh Chou

Conference Papers
A Framework for Interoperability with VLEs for Large Scale Deployment
of Mobile Learning.......................................................................................... 13
Fatma Elsayed Meawad and Geneen Stubbs

A Lifecycle Approach to Evaluating MyArtSpace .................................................. 18
Giasemi Vavoula, Julia Meek, Mike Sharples, Peter Lonsdale, and Paul Rudman

A Massive Multiplayer Game Framework for Mobile Learning .............................. 23
Nawaz Mohamudally

Adaptive Mobile Learning.................................................................................... 26
Anastasios A. Economides

An Investigation of Learning Style Differences and Attitudes toward
Digital Game-Based Learning among Mobile Users ........................................ 29
Ching-Chiu Chao

Cognitive Work Analysis and Design Research: Designing for Mobile
Human-Technology Interaction within Elementary Classrooms ......................... 32
Latika Nirula and Earl Woodruff

Designing a Ubiquitous Learning Workspace for Conducting Creative
Thinking Exercise in Tertiary Design Education .............................................. 36
Robert Kung-Wong Lau

Development and Pilot Study of a Mobile Phone-Aided Mutual
Monitoring Support System ........................................................................... 39
Makiko Takenaka, Masahiko Ohkubo, Shigenori Inagaki, and Hideko Kuroda

Development of a XML-Based Ubiquitous System for Testing
Using Smartphones .......................................................................................... 47
Antonio Peñalver Benavent, Oscar Martínez Bonastre, and Miguel Martínez Girona
Mobile Web Services for Collaborative Learning .............................................................. 129
Mohamed Amine Chatti, Satish Srirama, David Kensche, and Yiwei Cao

Oyako de Science (Learning about Science with Parents): Developing an Educational Program for Scientific Experiments Using Cell Phones ......................... 134
Jun Nakahara, Etsuji Yamaguchi, Toshihisa Nishimori, Toshio Mochizuki, Mai Nakano, Yutaka Furuta, Seiji Sekine, Junichi Ofusa, and Yuhei Yamauchi

PDAs as Input Devices in Brainstorming and Creative Discussions ................................ 137
Lars Bollen, Guillermo Juarez, Micha Westermann, and H. Ulrich Hoppe

Practical Issues in Mobile Education ................................................................................. 142
Marguerite L. Koole

ProBoPortable: A Cellular Phone Software to Promote Emergent Division of Labor ................................................................. 147
Toshio Mochizuki, Kazaru Yaegashi, Yusuke Nagamori, Hiroshi Kato, and Toshihisa Nishimori

Real World Interaction Oriented Edutainment Using Ubiquitous Devices .................... 150
Hiroyuki Mitsuhara, Hiroaki Ogata, Kazuhide Kanenishi, and Yoneo Yano

The Focus Problem in Mobile Learning ........................................................................ 153
Christoph Göth, Dirk Frohberg, and Gerhard Schwabe

uClassroom: Expanding Awareness in Classroom to Ubiquitous Teaching and Learning ........................................................................................................ 161
Shoji Kajita and Kenji Mase

Unified and Personalized Messaging to Support E-learning ........................................ 164
Keith Mitchell, Nicholas J. P. Race, Duncan McCaffery, Mark Bryson, and Zhen Cai

Using Advanced Technologies to Connect Schools to Science Museums .................. 169
Sofoklis Sotiriou, Stamatina Anastopoulou, Sherman Rosenfeld, and Marcelo Milrad

Wristbands as Interaction Devices: A Vision-Based Interaction Space for Facilitating Full-Body Learning ................................................................. 171
Chen-Chung Liu, Wen-Chi Chiou, Shu-Ju Tai, Chin-Chung Tsai, Gwo-Dong Chen, Chen-Wei Jong, and Baw-Jhiune Liu

Author Index ..................................................................................................................... 174
