Proceedings

Seventh IEEE International Workshop on Policies for Distributed Systems and Networks

(Policy 2006)

5–7 June 2006
London, Ontario, Canada

Sponsored by
Office of the Dean of the Faculty of Science,
The University of Western Ontario
Office of the Vice President of Research and International Relations,
The University of Western Ontario
Centre for Advanced Studies, IBM Toronto Laboratory

Los Alamitos, California
Washington • Tokyo

## Session 1: Internet and Database Policies

- Bio-Inspired Policy-Based Management (bioPBM) for Autonomic Communication Systems
  
  Sasitharan Balasubramaniam, Keara Barrett, William Donnelly, Sven van der Meer, and John Strassner

- Workload Class Importance Policy in Autonomic Database Management Systems
  
  Harley Boughton, Pat Martin, Wendy Powley, and Randy Horman

- A Context-Aware, Policy-Based Framework for the Management of MANETs
  
  Antonis M. Hadjiantonis, Apostolos Malatras, and George Pavlou

## Session 2: Access Control Policies

- Access Control Inference and Feedback for Policy Managers: A Fine-Grained Analysis
  
  Ranga R. Vatsavai, Sharma Chakravarthy, and Mukesh Mohania

- Toward Information Sharing: Benefit and Risk Access Control (BARAC)
  
  Lei Zhang, Alexander Brodsky, and Sushil Jajodia

- Policy Languages for Digital Identity Management in Federation Systems
  
  Elisa Bertino, Abhilasha Bhargav-Spantzel, and Anna Cinzia Squicciarini

## Short Paper Session 1

- End-to-End Model Driven Policy Based Network Management
  
  Dave Raymer, John Strassner, Elyes Lehtihet, and Sven van der Meer

- An N-State Driven Policy-Based Network Management to Control End-End Network Behaviors
  
  Sitaram Kowtha and Xi Jiang

- PBMAN: A Policy-Based Management Framework for Ambient Networks
  
  Carlos Kamienski, Joseane Fidalgo, Djamel Sadok, Jennifer Lima, Leonardo Pereira, and Börje Ohlman

- Self-Configuration for Radio Access Networks
  
  Javier Baliosian, Huw Oliver, Ann Devitt, Françoise Sailhan, Epifanio Salamanca, Boris Danev, and Gerard Parr
Session 3: Policy Management

A Quantitative Approach to IT Investment Allocation to Improve Business Results........................................ 87
Antão Moura, Jacques Sauvé, João Jornada, and Eduardo Radziuk

A Policy-Based Management System with Automatic Policy Selection and Creation Capabilities by Using a Singular Value Decomposition Technique ................................................................. 96
Hoi Chan and Thomas Kwok

A Scalable History-Based Policy Engine......................................................................................................... 100
Pedro Gama, Carlos Riberio, and Paulo Ferreira

Session 4: Tools, Rules, and Goals

Cauldron: A Policy-Based Design Tool ............................................................................................................ 113
Lyle Ramshaw, Akhil Sahai, Jim Saxe, and Sharad Singhal

A Distributed Tabling Algorithm for Rule Based Policy Systems .................................................................. 123
Miguel Alves, Carlos Viegas Damásio, Wolfgang Nejdl, and Daniel Olmedilla

A Functional Solution for Goal-Oriented Policy Refinement ........................................................................ 133
Javier Rubio-Loyola, Joan Serrat, Marinos Charalambides, Paris Flegkas, and George Pavlou

Short Paper Session 2

Trust Meta-Policies for Flexible and Dynamic Policy Based Trust Management ........................................... 145
Karl Quinn, David Lewis, Declan O’Sullivan, and Vincent P. Wade

Domain-Independent, Composable Web Services Policy Assertions................................................................. 149
Anne H. Anderson

Distributed Control Enabling Consistent MAC Policies and IDS Based on a Meta-Policy Approach .......... 153
Mathieu Blanc, Jérémy Briffaut, Jean-François Lalande, and Christian Toinard

Specifying Data Sharing Agreements .............................................................................................................. 157
Vipin Swarup, Len Seligman, and Arnon Rosenthal

Session 5: Coordination

Coordination between Distributed PDPs ........................................................................................................... 163
David W. Chadwick, Linying Su, Oleksandr Otenko, and Romain Laborde

A Compositional Event and Time-Based Policy Model ................................................................................. 173
Helge Janicke, Antonio Cau, François Siewe, Hussein Zedan, and Kevin Jones

A Basis for Comparing Characteristics of Policy Systems .............................................................................. 183
Seraphin Calo and Jorge Lobo

Session 6: Access Control and Evaluation

Substituting COPS-PR: An Evaluation of NETCONF and SOAP for Policy Provisioning ........................... 195
Theo Ferreira Franco, Weldson Queiroz Lima, Giancarlo Silvestrin, Rafael Corezola Pereira, Maria Janilce Bosquiroli Almeida, Liane Margarida Rockenbach Tarouco, Lisandro Zambenedetti Granville, André Beller, Edgard Jamhour, and Mauro Fonseca

Self-Describing Delegation Networks for the Web .......................................................................................... 205
Lalana Kagal, Tim Berners-Lee, Dan Connolly, and Daniel Weitzner
Regulated Delegation in Distributed Systems ................................................................. 215  
Xuhui Ao and Naftaly H. Minsky

Short Paper Session 3

Enforceability vs. Accountability in Electronic Policies ................................................. 227  
Travis D. Breaux, Annie I. Antón, Clare-Marie Karat, and John Karat

Policy Management of Enterprise Systems: A Requirements Study .......................... 231  
Pranam Kolari, Tim Finin, Yelena Yesha, Kelly Lyons, Jen Hawkins, and Stephen Perelgut

Inferring Access-Control Policy Properties via Machine Learning .......................... 235  
Evan Martin and Tao Xie

Using a Policy Language to Control Tuple-Space Synchronization in a Mobile Environment .......... 239  
Vorapol Jittamas and Peter F. Linington

Author Index .................................................................................................................. 243
