Proceedings

Fourth Annual IEEE International Conference on Pervasive Computing and Communications

March 13 – 17, 2006
Pisa, Italy

Los Alamitos, California
Washington • Tokyo
Table of Contents

Fourth Annual IEEE International Conference on Pervasive Computing and Communications — PerCom 2006

Message from the General Chairs ........................................................................................................ viii
Message from the Program Chair and Vice Chairs ........................................................................... ix
Organizing Committee .......................................................................................................................... x
Program Committee .............................................................................................................................. xi
Reviewers ............................................................................................................................................... xii

Session 1: Pervasive Systems

A Keystroke and Pointer Control Input Interface for Wearable Computers ........................................ 2
   Farooq Ahmad and Petr Musilek

Cantag: An Open Source Software Toolkit for Designing and Deploying Marker-Based Vision Systems .... 12
   Andrew C. Rice, Alastair R. Beresford, and Robert K. Harle

A Collaborative Web Browsing System for Multiple Mobile Users ................................................. 22
   Takuya Maekawa, Takahiro Hara, and Shojiro Nishio

Session 2A: Sensors and RFIDs (Concise Contributions)

Enhancing Bluetooth Connectivity with RFID ................................................................................ 36
   Timo Salminen, Simo Hosio, and Jukka Riekki

JiTS: Just-in-Time Scheduling for Real-Time Sensor Data Dissemination ........................................ 42
   Ke Liu, Nael B. Abu-Ghazaleh, and Kyoung-Don Kang

Application-Based Routing Optimization in Static/Semi-Static Wireless Sensor Networks ................ 47
   Cesare Alippi and Giovanni Vanini

A Wearable Wireless Sensor Platform for Interactive Dance Performance .................................... 52
   Chulsung Park, Pai H. Chou, and Yicun Sun

Session 2B: User Interfaces and Interaction Models (Concise Contributions)

Dialing for Displays: Session Initiation Protocol for Opportunistic Augmentation ......................... 60
   John J. Barton, Stina Nylander, and Fopefolu Folowosele

Multi-User Mobile Applications and a Public Display: Novel Ways for Social Interaction ............... 66
   Jaana Leikas, Hanna Strömberg, Veikko Ikonen, Riku Suomela, and Juhani Heinilä

Inverted Browser: A Novel Approach towards Display Symbiosis .................................................... 71
   Mandayam Raghunath, Nishkam Ravi, Marcel-Cătălin Roșu, and Chandra Narayanaswam

Omero: Ubiquitous User Interfaces in the Plan B Operating System ............................................. 77
   Francisco J. Ballesteros, Gorka Guardiola, Katia Leal, and Enrique Sortano
Session 3: Pervasive Networking

Context Aware Service Using Intra-body Communication ................................................................. 84
Duck Gun Park, Jin Kyung Kim, Sung Jin Bong, Jung Hwan Hwang, Chang Hee Hyung, and Sung Weon Kang

Concept for Hierarchical and Distributed Processing of Area Based Triggers ......................................... 92
Sven D. Hermann, Guenter Schäfer, Adam Wolisz, and Michael Lipka

Virtual Channel Management for Densely Deployed IEEE 802.15.4 LR-WPANs ........................................ 103
Tae Hyun Kim, Jae Yeol Ha, Sunghyun Choi, and Wook Hyun Kwon

Session 4: Resource Management in Pervasive Systems

An Adaptive Multi-Constraint Partitioning Algorithm for Offloading in Pervasive Systems .................. 116
Shumao Ou, Kun Yang, and Antonio Liotta

Plan B: An Operating System for Ubiquitous Computing Environments ................................................ 126
Francisco J. Ballesteros, Enrique Soriano, Katia Leal, and Gorka Guardiola

OmniStore: A System for Ubiquitous Personal Storage Management .................................................. 136
Alexandros Karypidis and Spyros Lalis

Session 5: Best Paper Candidates

Context-Aware Resource Management in Multi-Inhabitant Smart Homes:
A Nash H-Learning Based Approach ...................................................................................................... 148
Nirmalya Roy, Abhishek Roy, and Sajal K. Das

Mapping Human Networks .................................................................................................................... 159
Jonathan Gips and Alex (Sandy) Pentland

Is Your Cat Infected with a Computer Virus? ............................................................................................. 169
Melanie R. Rieback, Bruno Crispo, and Andrew S. Tanenbaum

Session 6: Sensor Networks

Distributed Cross-Layer Scheduling for In-Network Sensor Query Processing ....................................... 180
Hejun Wu, Qiong Luo, and Wenwei Xue

CAPS: Energy-Efficient Processing of Continuous Aggregate Queries in Sensor Networks .................... 190
Wen Hu, Archan Misra, and Rajeev Shorey

Exploring Spatial Correlation for Link Quality Estimation in Wireless Sensor Networks ........................ 200
Yingqi Xu and Wang-Chien Lee

Session 7: Security

The Master Key: A Private Authentication Approach for Pervasive Computing Environments ............. 212
Feng Zhu, Matt W. Mutka, and Lionel M. Ni

Avoiding Privacy Violations Caused by Context-Sensitive Services ..................................................... 222
Urs Hengartner and Peter Steenkiste
Session 8A: Pervasive Computing and Context Awareness (Concise Contributions)

Ordering Management Actions in Pervasive Systems Using Specification-enhanced Policies ........................................... 234
Chetan Shankar and Roy Campbell

Customizable Pervasive Applications .................................................................................................................................. 239
Torben Weis, Marcus Handte, Mirko Knoll, and Christian Becker

Analysis of Appropriate Timing for Information Notification Based on Indoor User’s Location Transition .......... 245
Vlaho Kostov, Takashi Tajima, Eiichi Naito, and Jun Ozawa

Criticality Aware Access Control Model for Pervasive Applications ................................................................................ 251
Sandeep Gupta, Tridib Mukherjee, and Krishna Venkatasubramanian

Session 8B: Discovery and Location (Concise Contributions)

An Adaptive Lightweight Trust Reliant Secure Resource Discovery for Pervasive Computing Environments ........................................... 258
Moushumi Sharmin, Sheikh Iqbal Ahamed, and Shameem Ahmed

A Peer-to-Peer Data Structure for Dynamic Location Data ........................................................................................................ 264
Dominic Heutelbeck and Matthias Hemmje

A Secure and Efficient RFID Protocol That Could Make Big Brother (partially) Obsolete .................................................. 269
Tassos Dimitriou

Session 9: Architectures and Platforms for Pervasive Environments

Evaluating Service Oriented Architectures (SOA) in Pervasive Computing ........................................................................................................... 276
Swaroop Kalasapur, Mohan Kumar, and Behrooz Shirazi

CASMAS: Supporting Collaboration in Pervasive Environments ......................................................................................................................... 286
Federico Cabitza, Marco P. Locatelli, Marcello Sarini, and Carla Simone

InterPlay: A Middleware for Seamless Device Integration and Task Orchestration in a Networked Home .......... 296
Alan Messer, Anugeetha Kunjithapatham, Mithun Sheshagiri, Henry Song, Praveen Kumar, Phuong Nguyen, and Kyoung Hoon Yi

Session 10: Self-organizing Networks

A Multi-Commodity Flow Approach for Globally Aware Routing in Multi-Hop Wireless Networks .................. 308
Vinay Kolar and Nael B. Abu-Ghazaleh

Resource Allocation in Wireless Networks Using Directional Antennas ....................................................................... 318
Imad Hussein Jawhar and Jie Wu

Localized Sensor Area Coverage With Low Communication Overhead ........................................................................ 328
Antoine Gallais, Jean Carle, David Simplot-Ryl, and Ivan Stojmenović

Author Index ............................................................................................................................................................................. 338
