**Conference Organizers** ...................................................................................... xiii
**International Technical Program Committee** ...................................................... xiv

## Keynote Address

Principles for Designing Software Architecture to Achieve Quality Attribute
Requirements ........................................................................................................ 2

*Len Bass*

## Technical Papers

**1A: Requirements Engineering**

Challenges in Requirements Engineering for a Platform Group: Case Study
with a Medical Imaging Platform ........................................................................ 5

*N. Chandrashekar, S. M. Gautam, K. S. Srinivas, and J. Vijayananda*

Models Derived from Automatically Analyzed Textual User Requirements .......... 13

*M. G. Ilieva and O. Ormandjieva*

Applying a Goal-Oriented Method for Hazard Analysis: A Case Study ........ 22

*Sam Supakkul and Lawrence Chung*

**1B: Design Patterns, Frameworks, Software Architecture**

Architectures Supporting RosettaNet ...................................................................... 31

*Jing Wang and Yeong-Tae Song*
2A: Component-Based Software Engineering I

SOFA 2.0: Balancing Advanced Features in a Hierarchical Component Model.........................................................40
Tomáš Bureš, Petr Hnětynka, and František Plášil

An Effective Method to Design CBD Components in Enterprise JavaBeans (EJB) .....................................................49
Hyun Gi Min, Jin Yeal Lee, Sung Ahn Kim, and Soo Dong Kim

Frameworks for Secured Business Process Management Systems..............................................................................57
Haeng-Kon Kim, Roger Y. Lee, and Hae-Sool Yang

3A: Component-Based Software Engineering II and Data Mining

Representation of Variability in Software Product Line Using Aspect-Oriented Programming ..........................................................66
Seung-hyun Heo and Eun Man Choi

Managing Variability for Software Product-Line ........................................................................................................74
Young-Gab Kim, Jin-Woo Kim, Sung-Ook Shin, and Doo-Kwon Baik

A Comparison of Two Contributive Analysis Methods Applied to an ANN Model ....................................................82
Karen L. Joy and David Primeaux

A Parallel Apriori Algorithm for Frequent Itemsets Mining .......................................................................................87
Yanbin Ye and Chia-Chu Chiang

3B: Agent Technology

A Hybrid Ant Colony Optimization Technique for Job-Shop Scheduling Problems ................................................95
Masaya Yoshikawa and Hidekazu Terai

Recommends System Using Re-extraction Methods on the Groups with a Similarity Pattern such as Clustered User’s Preference Tendency ..........................................................101
Kyung-Sang Sung and Hae-Seok Oh

Hybrid Prediction Model for Improving Reliability in Self-Healing System .........................................................108
Giljong Yoo, Jeongmin Park, and Eunseok Lee

4A: Component-Based Software Engineering III

Using Bayesian Belief Networks to Model Software Project Management Antipatterns ..............................................117
Dimitrios Settas, Stamatis Bibi, Panagiotis Sfetsos, Ioannis Stamelos, and Vassilis Gerogiannis

Reuse-Based Methodology in Developing System-on-Chip (SoC) ...........................................................................125
Soo Ho Chang and Soo Dong Kim

Study of Agent Based Process Management Environment-Mercury ........................................................................132
Jeong Ah Kim, Jin Young Taek, and Sun Myung Hwang

</table>
Mock Object Models for Test Driven Development ................................................................. 221
   Taeksu Kim, Chanjin Park, and Chisu Wu

Automated Test Data Generation Based on Program Execution ............................................. 229
   Jun-Yi Li, Jia-Guang Sun, and Ying-Ping Lu

Dynamic Impact Analysis Using Execution Profile Tracing .................................................... 237
   Lulu Huang and Yeong-Tae Song

6B: Visual and Multimedia Computing

2D Direct LDA Algorithm for Face Recognition ........................................................................ 245
   Dong Uk Cho, Un Dong Chang, Bong Hyun Kim, Se Hwan Lee, Young Lae J. Bae, and Soo Cheol Ha

Xlet-Based, IESG (Integrated Electronic Service Guide) in ATSC-ACAP ........................................ 249
   Hoyeon Jang and Nammee Moon

A Traffic Accident Detection Model Using Metadata Registry .................................................. 255
   Yong-Kil Ki, Jin-Woo Kim, and Doo-Kwon Baik

Development of a Seamless Data Streaming System Based on User Preference and Device Information ............................................................................................................................................. 260
   Yun-Ju Lee, Tae-Beom Lim, Yoon-Sang Kim, and Seok-Pil Lee

7A: Safety and Security Critical Software

An Inter-domain Authentication Mechanism for XMPP/Jabber .................................................. 268
   Lee-Sub Lee, Kyung Sun Choi, Dongwon Jeong, Soo-Hyun Park, and JuHum Kwon

Digital Watermark System Based on Improved Security through Pre-processing of Watermarked Data Using Information of Image Discrete Frequency .................................................. 276
   Kyung-Sang Sung, Seung-Heon Lee, Bo-Hyun Wang, and Hae-Seok Oh

An Effective Policy Management Framework Using RBAC Model for Service Platform Based on Components ...................................................................................................................................... 281
   Eun-Ae Cho, Chang-Joo Moon, Dae-Ha Park, and Doo-Kwon Baik

8A: Web Engineering, Web-Based Applications

Design and Implementation of a Rule-Based Security Engine for XML Web Services .................. 289
   Priya Vasudevan and Lan Yang

Towards Generic User Interface for Web Based Systems Serving Similar Functions .................. 297
   Rashid Ahmad, Zhang Li, and Farooque Azam

Measuring ‘Navigational Burden’ ............................................................................................... 307
   Rashid Ahmad, Zhang Li, and Farooque Azam

Integration of Semantic Web Service and Component-Based Development for E-business Environment ................................................................................................................................. 315
   Yan Ha and Roger Lee
8B: Modeling with UML and Object-Oriented Technology

A Systematic Method to Generate .NET Components from MDA/PSM for Pervasive Service ................................................................. 324
    Deuk Kyu Kum and Soo Dong Kim

A Method for Building Domain Ontologies Based on the Transformation of UML Models ................................................................................................. 332
    Hong-Seok Na, O-Hoon Choi, and Jung-Eun Lim

Extending UML for Development of Distributed Control Systems with Heterogeneous Languages ................................................................. 339
    Chongwon Lee, Jongdae Han, Jaekeun Shim, Chunwoo Lee, Taeksu Kim, Yoohoon Kang, Byungjeong Lee, and Chisu Wu

AGADUC: Towards a More Precise Presentation of Functional Requirement in Use Case Models ............................................................................. 346
    Mohamed El-Attar and James Miller

Is OO the Systems Development Technology for Your Organization? ......................................................................................................................... 354
    Fleming Woo, Romas Mikusauskas, Dean Bartlett, and Rob Law

9A: Software Process Models and Software Quality Improvement

Studies on Project Management Models for Embedded Software Development Projects .......................................................................................... 363
    Toyoshiro Nakashima, Kazunori Iwata, Yoshiyuki Anan, and Naohiro Ishii

An Empirical Model of the Game Software Development Processes ......................................................................................................................... 371
    Seung Hun Lee, Gum Hee Lee, Hyun Hoon Cho, Doo Heon Song, and Sung Yul Rhew

Specification for Visual Requirements of Work-Centered Software Systems ........................................................................................................... 378
    James R. Knapp, Vincent A. Schmidt, and Soon M. Chung

Risk Management through Architectural Design ......................................................................................................................................................... 386
    Poornima Ramachandra, Haeng-Kon Kim, Byeongdo Kang, Yan Ha, and Roger Lee

Six Sigma Approach in Software Quality Improvement ........................................................................................................................................... 396
    Cvetan Redzic and Jongmoon Baik

9B: Software Reuse, and Metrics, and Middleware Design Techniques

Monitoring and Improving the Quality of ODC Data Using the “ODC Harmony Matrices”: A Case Study ........................................................................... 407
    Nirav Saraiya, Jason E. Lohner, and Jongmoon Baik

An Elicitation Approach of Measurement Indicator Based on Product Line Context ........................................................................................................... 412
    Sun-Myung Hwang, Jin-sam Kim, and Jeong-Ah Kim
A Framework for Application-Independent Semantic Management for Ubiquitous Computing Environment ...........................................................................................................................................417
   Dongwon Jeong, Yixin Jing, Jinhyung Kim, and Doo-Kwon Baik

Modeling of Situation-Middleware for TPO Metadata Based on Event-Condition-Action Rule ...........................................................................................................................................423
   O-Hoon Choi, Jung-Eun Lim, Hong-Seok Na, and Doo-Kwon Baik

10A: Mobile/Wireless Computing and Case Studies

VPW: An Effective Personal Space Model for Providing Ubiquitous Computing Services ...........................................................................................................................................428
   Kyung-Lang Park, Joo-Kyoung Park, Chang-Deok Kang, Hoon-Ki Lee,
   Eui-Hyun Baek, and Shin-Dug Kim

Cost Effective Location Management Scheme for Moving Objects in a Ubiquitous IP-Based Network Platform ...........................................................................................................................................436
   Soo Young Shin, Soo Hyun Park, Byeong Hwa Jung, and Changhwa Kim

Design of a Description Model for Location Information (DMLI) ...........................................................................................................................................444
   Jae-Won Kim, O-Hoon Choi, and Doo-kwon Baik

Author Index ...........................................................................................................................................453
