# TABLE OF CONTENTS

## Volume 1

### PORT PLANNING

#### Master Planning of New Ports

- **Planning the Prince Rupert Container Terminal**
  
  H. Westerman and L. Nye

- **Port of Kamsar Expansion: Development of a Greenfield Bulk Terminal in Guinea, West Africa**
  
  William Lee Allen, Glenn Gaydar, and John Bardi

- **Master Planning for a New Seaport in Doha, Qatar**
  
  S. Butler and J. Denton-Brown

#### Master Planning for Port Expansion 1

- **Overview of the Comprehensive Miami Harbor Study**
  
  Bradd Schwichtenberg, Richard B. Powell, Jr., and Terri L. Jordan

- **Master Planning and Implementation of Phase IV Expansion: Manzanillo International Terminal - Panama, S.A., Colón, Republic of Panama**
  
  Chris Cornell, Ricardo Cheng, and Viswanath Kumar

- **Master Plan for Expansion of Jebel Ali Port**
  
  Dennis Padron, Javier Itriago, and Adnan Al Abbar

- **Re-setting the Productivity Bar: Conceptual Planning of Jebel Ali New Container Terminal, Dubai**
  
  Dan Johnson

#### Master Planning for Port Expansion 2

- **U.S. Ports’ Market Share Analysis**
  
  Doug Rubin and Eleanor Hadland

- **South Gate Complex Planning and Design - Port of Palm Beach, Riviera Beach, Florida**
  
  J. Casey Long, Thomas J. Lundeen, and David W. Mock

- **Port of Oakland Maritime Expansion**
  
  Michael Leue, Imee Osantowski, and Mark Erickson

### INCREASING PORT CAPACITY WITH LIMITED PHYSICAL GROWTH

- **Densification is the Only Solution to Increase the Port Capacity in US**
  
  Milan B. Lazic

- **Planning for Major Improvements on an Operating Terminal During a Period of Unprecedented Growth**
  
  Nathan Watson and Ticson Mach
Determining Surge Capacity and Maximizing Throughput by Integrating Landside Seaport Operations with Rail and Roadway

J. Michael Walters and Jenish J. Joseph

Terminal Planning & Vessel/Equipment Trends

The Impact of Technology on Terminal Design

Robert S. Johansen

Tandem-40 Dockside Container Cranes and Their Impact on Terminals

Derrick Lind, Jonathan K. Hsieh, and Michael A. Jordan

The Floaterm Concept: Reducing Terminal Congestion with Waterside Cranes

Michael Jordan, Catherine Morris, and Anna Dix

Working Waterfront in the Urban Environment

Eureka Fisherman’s Terminal

Brent Siemer, Robert Richardson, Clinton Scott Branlund, James Brennan, and Marty Lay

Balancing the Needs of the Working Waterfront with Commercial Development at Terminal 91, Port of Seattle

Mark Griffin, Michael McLaughlin, Don Oates, and Nathan Watson

Thea Foss Waterway: Transition through Remediation Projects

Bill Conley, Susan Bialous, Mary Henley, and John O’Loughlin

Master Planning the Port of Gulfport, Mississippi - Rebirth after Katrina

J. Webb and R. Everett

ENVIRONMENTAL ISSUES & MITIGATION

Dredging 1

A Potential Alternative to Berth Maintenance Dredging

Joe T. Bryant and Marianne D. Moseley

The Cost of Environmental Protection In Construction Dredging

T. T. Leeser

Cox Creek Dredged Material Containment Facility Design and Construction

Peter W. Kotulak and John R. Headland

Cost-Effective Sediment Remediation at Port of Richmond on San Francisco Bay

Scott A. Bourne and Norman Chan

Dredging 2

Innovative Construction Contracting for Todd Pacific Shipyards Sediment Superfund Cleanup

Stephen Reimers, Kate Snider, Tom Coultas, and Allen Rainsberger

Sediment Movement and Dredging in Newark Bay, NJ

Thomas H. Wakeman, Alan F. Blumberg, Dov B. Kruger, and Anne M. Fullerton

Collaborative Strategy for Dredging and Environmental Restoration Projects: Annapolis, Maryland

Robert D. Agee, Christopher L. Overcash, and Thomas G. Sprehe

Minimizing Harbor Siltation (MHS)

John R. Headland, Robert Kirby, Han Winterwerp, Horst Nasner, Jacob Vested, Marc Sas, Koen Lamers, Yasuyuki Nakagawa, Javier Enriquez, Franz Westermeier, and Jaques Paul
### Environmental Issues 1

**Rainfall Simulation to Evaluate Pollutant Build-Up and Wash-Off from Selected Land Uses Within a Port Environment**

B. Kitchen and A. Goonetilleke

- Page 281

**Copper Loading Assessment from In-Water Hull Cleaning following Natural Fouling, Shelter Island Yacht Basin, San Diego Bay, San Diego, California**

Rolf Schottle and Paul Brown

- Page 292

**Integrating Air Emission Management into Port Planning, Engineering and Construction**

J. G. McNally, R. M. Rhoads, J. A. Fink, and T. Fidell

- Page 302

**Portwide Storm Water Pollution Prevention and Dust Control Program**

Emily Ueda, Douglas Thiessen, Denise Yaffe, and Travis Taylor

- Page 312

### Environmental Issues 2

**Supporting a Vision: Redeveloping the Port of Bellingham Waterfront**

Mark Larsen, Jack Cox, and Jim Darling

- Page 325

**Rapidly Revising an Approved Sediment Remedial Action Plan: A Brownfield Redevelopment Success Story**

William Elmer and Clifford J. Whitmus

- Page 335

**Ships and Shorebirds: A Case Study on the Development of a Constructed Roosting Site at the Port of Brisbane**

B. P. Kitchen and W. Young

- Page 345

**Port of Everett Rail/Barge Transfer Facility: Permitting in Tribal Treaty Right Areas, Lessons Learned**

John Mohr, William Stelle, and Michael Wray

- Page 356

### WATERWAYS AND CHANNELS

#### Widening & Deepening Projects

**Impact of Large Container Ships on Port Infrastructure**

E. D. Allen and D. A. Thiessen

- Page 366

**Adding Capacity to a Leading Waterway**

Rodolfo R. Sabonge and Valentine Lynch

- Page 376

**Blair Waterway Widening, Port of Tacoma, Tacoma, Washington**

Scott Bickel, Sally Fisher, Tom Kress, and Elmer Ozolin

- Page 386

**Port of Oakland Inner Harbor Turning Basin**

B. A. Porter, L. Cardoza, and D. V. Doak

- Page 396

#### Navigation Improvement Projects

**Reconciling Conflicting Utility Location Data: A Case Study of Submarine Gas Lines in the Providence River**

John A. DeRugeris and Susan E. Nilson

- Page 406

**Manipulating Harbor Geometries to Defeat Long Wave Agitation Problems**

Jack C. Cox and Mauricio Wesson

- Page 416
Port Canaveral Navigation Improvements: Section 203 WRDA 1986 Engineering Investigations ................................................................. 426
Gary D. Ledford, Jeannie Adame, Sandra D. Rice, Donald L. Kingery, and Mohamad Al-Hawaree

In-Situ Capping of Contaminated Sediments with Reactive Materials ............................................................. 436
J. T. Olsta

Modeling & Simulation 1

Enhancement of a Tidal Model for the Loxahatchee River Estuary (Southeastern Florida) ................................. 445
Peter Bacopoulos and Scott C. Hagen

Mooring Loads Due to Parallel Passing Ships ................................................................. 455
David Kriebel

Ferry Wake Wash Analysis in San Francisco Bay ................................................................. 465
S. Anil Kumar, Justus Heimann, Bruce L. Hutchison, and Scott W. Fenical

Coupled Field Measurements and Numerical Modeling of Harbour Resonance at Marina di Carrara ................................. 475
G. Cuomo, L. Franco, and I. Melito

Modeling & Simulation 2

Reverse Engineering Harbor Geometries to Achieve Water Basin Agitation Goals ................................. 485
Jack C. Cox and Murat Utku

Propwash Model Development, Verification, and Port Applications ................................................................. 495
M. Tirindelli and S. Fenical

Sediment and Shoaling Processes: Bolivar Ferry Terminal, Galveston, Texas ................................................................. 505
R. D. Kite II, B. L. Edge, and W. D. Mears

Navigation at the Amazon River Mouth: Sand Bank Migration and Depth Surveying ................................................................. 515
Rodrigo D. Fernandes, Susana B. Vinzon, and Felipe A. M. de Oliveira

Modeling & Simulation 3

Vessel Hydrodynamics and Berthed Vessel Loading Model Verification with Field Data and Laboratory Data ................................. 525
S. Fenical

Vessel Hydrodynamics Analysis for Impacts of Port Expansion in Corpus Christi Ship Channel ................................................................. 535
J. D. Carter, M. D. Campbell, S. W. Fenical, and D. L. Krams

Water Quality Modeling System for Charleston Harbor, South Carolina ................................................................. 545
Hugo N. Rodriguez and Jamie Miller

LANDSIDE TRANSPORTATION

Roads and Railroads

Port of Los Angeles Port-wide Transportation Master Plan ................................................................. 556
Sue Lai, Dina Aryan-Zahlan, and Michael Leue

Georgia Ports Authority Intermodal Planning ................................................................. 566
Jonathan E. Thomas, Larry W. Nye, and H. Wilson Tillotson
## San Pedro Bay Ports Rail Enhancement Program
*Michael Leue, Carlo Luzzi, and David Walsh*

---

## Planning Rail Service Connections
*Terry Wilcox, Thomas Ellert, Michael Holmquist, and Christopher A. Lawrence*

---

## TERMINALS & SPECIFIC FACILITIES

### Container Terminals

#### Sustainable and Green Ports: Application of Sustainability Principles to Port Development and Operation
*Karim A. Abood*

---

#### The Port of Houston Authority Delivers the Bayport Terminal Complex
*E. Tyson Thomas, Stephen A. Gilbreath, Sarah Kresta, and Mark E. Vincent*

---

#### Sustainable Building Design: The "Greening" of Container Terminals
*Bruce R. Farrell and Emil Zordilla*

---

#### Reconstruction of Maher Terminals, Elizabeth, New Jersey
*Christopher A. Lawrence, David J. Nisula, Christopher A. Dorang, Crystal Pecora, Leroy Luft, and Don Olesky*

### Petroleum & LNG Terminals

#### Marine Aspects of a Baja California LNG Terminal Development
*C. D. Fassardi and G. D. Baxter*

---

#### Recent Oil and Gas Port Projects in Northern British Columbia
*R. Byres and V. Szabo*

---

**Volume 2**

#### Design of First California Marine Oil Terminal in 25 Years Rises to the Challenge: "What Does it Take to Build an MOT in Today's Environment?"
*Ron Heffron and Nestor Taura*

---

#### Idiosyncrasies of LNG Marine Terminals
*Dominic D. Legoe and John A. Imrie*

---

### Cruise Passenger Terminals

#### Strategic Implementation of Cruise Facility Improvements in Ketchikan, Alaska
*Robert Riley, Susan Bialous, and Harvey Hansen*

---

#### New York City Cruise Terminal Developments
*Robert W. Beasley*

---

#### Bayport Cruise Terminal Complex Master Plan, Port of Houston Authority, Houston, Texas
*J. Casey Long, Mark Vincent, and David W. Mock*

---

#### Cozumel's International Cruise Terminal: Hurricane Wilma Recovery and Reconstruction
*John C. Bardi, Bruce I. Ostbo, S. Fenical, and M. Tirindelli*
Passenger Ferry Terminals

Anacortes Tie-Up Slip Relocation, Washington State Ferries, Anacortes, Washington .............................................................. 715
Frank Yang, Scott Branlund, and Hien Trinh

South Mitkof Island Ferry Terminal: New Routes for Southeast Alaska ................................................................. 725
Douglas R. Playter and Bern Savikko

Delivering a New High-Speed Inter-Island Ferry Service for Hawaii........................................................................ 735
David O. Torseth, Marshall Ando, and Theodore W. Bell

Navigable Approaches to New San Francisco Bay Area Ferry Terminals ................................................... 745
M. Culnane, S. Fenical, and V. Shepsis

Military Facilities

U. S. Navy Double Deck Piers ........................................................................................................ 755
Frank Cole and Anthony Farmer

Mobile Crane Load Assessment of Berth 8, Fleet Activities Yokosuka, Japan............................. 763
C. M. Inaba

Open-Ocean Roll-on/Roll-off Cargo Pier on San Nicolas Island .......................................................... 771
R. F. Zueck and T. A. Blount

The DeLong Pier Repair Project: The Unique Challenges of Designing Repairs to a 1950 Vintage Marine Structure in the Arctic.............................................................................. 781
Noah J. Elwood and John W. Gaythwaite

SPECIFIC TECHNICAL TOPICS

Waterfront Structures & Cold Ironing

The First Permitted Cold Ironing Project at the Port of Long Beach, Pier G Phase 2 Wharf ................................................................. 790
Luke Mahier, Nicholas C. Kozma, and P. "Ben" Chavdarian

Design of Sustainable Marine Concrete Structures : A Case Study ............... 800
Markus Wernli and Preston S. Springston

Upgrade of Berth 15 for Gantry Cranes, Panama Ports Company, Balboa, Republic of Panama ................................................................. 810
Chris Cornell, William Bohlen, Viswanath Kumar, and Alex Reyes

Design and Development of Bid Documents for Cold Ironing of Oil Tanker Vessels at Berth T121 at the Port of Long Beach ................................................................. 820
S. Nagel, J. Khouri, and R. Mast

Fender Systems

Floating Rubber Fenders for All-Tide Moorage of Vessels........................................ 828
Kirk D. Miller

Flexible Steel Dolphins, System-Wide Performance Study .................................................. 838
Louis A. Klusmeyer, Robert E. Richardson, and Nicole McIntosh

Fender System Evaluation and Upgrade at Waterfront Street Terminal ......................... 848
Jeffrey Schechtman, Brian Cresenzi, and John Fucci

Analysis of Historic Wind Data for Use in Vessel Mooring Analyses ...................... 858
Joseph F. Marrone

**Bulkheads & Seawalls**

Development of Replacement Concepts for the Alaskan Way Seawall, Seattle, Washington .......................................................... 867  
   Robert Harn, John Arnesen, Ralph Peteriet, and Bill Perkins

Design and Construction of Bulkheads Using Synthetic Sheeting .......................................................... 877  
   Siama Vaghar and Francis Fung

Bulkhead Design Using Recycled Materials as Backfill .......................................................... 887  
   Dennis G. Grubb, Wanxing, Liu, Allen W. Cadden, and Dana N. Humphrey

New York City Harbor - Remediation of Seawalls on the Historic Liberty and Ellis Islands .......................................................... 898  
   Helen D. Robinson, Jesús E. Gómez, Carlos M. Englert, and Allen W. Cadden

**Waterfront Structures**

Design of a Floating Breakwater for the Port of Bremerton .......................................................... 909  
   Robert F. Henry, Woosuk Ahn, C.J. Garrison, and Vladimir Shepsis

Recent Experience in Analysis and Design of Perforated Vertical Breakwaters .......................................................... 919  
   V. Shepsis, J. D. Carter, S. Fenical, and M. Tirindelli

Design and Construction of the Energy Berthing Dock and Access Pier at the Esso Bahamas Clifton Terminal Facility .......................................................... 929  
   Patrick R. Graney and Arturo Hernandez

Seismic Design of the Unloading Platform and North Trestle at the Port of Los Angeles Pier 400 Crude Oil Marine Terminal .......................................................... 941  
   Angel Lim, John Posadas, and Omar A. Jaradat

**Wharf Upgrades**

Increasing Hurricane Winds? Dockside Crane Retrofit Recommendations .......................................................... 950  
   Patrick McCarthy, Michael Jordan, Kenton Lee, and Stu Werner

Port of Oakland Wharf and Embankment Strengthening Program Phase 3 Final Design and Construction of Wharf Modifications for Deepening of Berths 23-26 & 30 .......................................................... 960  
   Jeff Aldrich, Rajendram Arulnathan, David Hebert, Ken Jung, Tom Labasco, and Said Salah-Mars

Wharf Deepening Enabled by Modern Analysis Techniques .......................................................... 970  
   B. P. Erickson, C. G. Bader, J. L. Carlson, W. Haynes, D. W. Mageau, and W. L. Schroeder

Spruce Mill Dock Replacement, Demolition, Design, and Construction .......................................................... 980  
   Kamyar Nikzad, Anne Fabrello-Streufert, and Joseph May

**Seismic Analysis & Design 1**

Seismic Engineering Program at the Port of Los Angeles .......................................................... 990  
   Peter Yin, Nigel Priestley, Geoffrey Martin, Max Weismair, Omar A. Jaradat, and (Arul) K. Arulmoli

Ports of Los Angeles and Long Beach Port-Wide Ground Motion Study .......................................................... 1000  
   Arul K. Arulmoli, Ignatius Po Lam, Bruce A. Schell, Norman A. Abrahamson, Jim Santa Ana, and Peter Yin

Tsunami Propagation into the Ports of Los Angeles and Long Beach .......................................................... 1010  
   David Dykstra
| Title                                                                 || Page |
|----------------------------------------------------------------------|------|
| Probabilistic Tsunami Hazard Analysis for Ports and Harbors          | 1019 |
| Hong Kie Thio, Paul Somerville, Jascha Polet, and Gene Ichinose      |      |
| **Seismic Analysis & Design 2**                                       |      |
| Performance of New Pile-Deck Connections under Earthquakes           | 1029 |
| J. I. Restrepo, P. Yin, O. A. Jaradat, and M. Weismair               |      |
| Seismic Response of Jumbo Container Cranes and Design Recommendations to Limit Damage and Prevent Collapse | 1039 |
| Erik Soderberg and Michael Jordan                                    |      |
| Evaluating the Seismic Capacity of a Newly Designed Wharf at the Port of Oakland | 1049 |
| Shah Vahdani, John Egan, Robert Pyke, Chih-Cheng Chin, Tom Griswold, and Tom LaBasco |      |
| **Geotechnical Analysis & Design 1**                                  |      |
| Geotechnical Considerations for National City Marine Terminal Development | 1058 |
| Leo D. Handfelt and Jennifer L. Nevius                               |      |
| Compaction Grouting of Loose Soil Beneath the West Coast's Largest Dry Dock | 1068 |
| M. A. Nykamp, S. R. Boyle, M. M. Bonus, and J. B. Spady              |      |
| Development of a Landfill in Difficult Site Conditions at the Port of Los Angeles | 1078 |
| (Raj) S. Varatharaj, Arul K. Arulmoli, Eric Brown, Richard Mast, and John Foxworthy |      |
| Full-Scale Testing of Piles in Wharf-Foundation-Dike System           | 1088 |
| Teerawut Juirnarongrit, Yohsuke Kawamata, Carlos A. Blandon, Scott A. Ashford, Jose I. Restrepo, Peter Yin, Omar A. Jaradat, Max Weismair, and Carlo G. Lai |      |
| **Geotechnical Analysis & Design 2**                                  |      |
| Prediction and Impacts of Pile Driving on Port Terminal Facilities    | 1098 |
| D. D. Lindquist, G. E. Horvitz, and S. Asavareunghai                 |      |
| Large Diameter Steel Pipe Piles Running under Self Weight in Soft Clay: Predicted vs. Observed Behavior - Richmond San-Rafael Bridge Seismic Retrofit | 1107 |
| A. R. Dover and J. Davidson                                          |      |
| Port of Everett Rail/Barge Transfer Facility Seismic Design, Everett, Washington | 1117 |
| Michael Wray, Robert Ham, and John Jacob                              |      |
| **Geotechnical Analysis & Design 3**                                  |      |
| Stone Columns for Underwater Wall Stability, U.S. Coast Guard, Seattle, Washington | 1127 |
| Pete Carroll, David Phelps, Rich Davis, and Scott Branlund            |      |
| Stabilization of Dredge Spoil Basin and Filled Marsh for Container Terminal Development at the Former Charleston Naval Base | 1137 |
| A. D. Goldberg, G. J. Canivan, and D. N. Smith                       |      |
| Finite Element Modeling of New Marine Terminal at the Port of Tacoma  | 1147 |
| D. W. Mageau and K. H. Chin                                           |      |
| Unconservative Outcomes from Conservative Soil Properties Used in Waterfront Applications | 1157 |
| N. J. McCullough, S. E. Dickenson, and J.J. Esterhuizen              |      |
## Security

### Security Systems & Strategies

**Spending Federal Security Funds Wisely**

John McIntyre and David P. Cruz

**Exciting Opportunities for Change in Container Terminal Gates**

Dan Johnson and Steve Kingsley

## Life-Cycle Management

### Facilities Management Systems 1

**Engineered Management System for Waterfront Facilities**

Thomas E. Spencer

**Instrumentation and Monitoring of Port Facilities: Planning, Funding, Field Applications, and Long-Term Benefits**

Stephen E. Dickenson

**Instrumentation of Waterfront Structures for Monitoring During Extreme Events and Life-Cycle Management**

Stephen E. Dickenson, Martin L. Eskijian, and Thomas LaBasco

## Facilities Management Systems 2

**Pile Condition Index Development**

Kurt A. Keifer, Mohamed Y. Shahin, and David E. Pendleton

**Terminal 5 Asset Management Plan**

Michael McLaughlin and Don Oates

**Effective Expert Reports for Marine Structure Investigations**

Joseph F. Marrone, Stanley M. White, and David R. Hornig

## Piling Maintenance & Repair

**Accelerated Freshwater Corrosion Study in the Duluth-Superior Harbor**

Gene Clark, Dave Bowman, Jim Sharrow, Chad Scott, and Jeff Gunderson

**Update: The PANYNJ Experience with Protecting Marine Timber Piles**

Daniel Webber

**Innovative Techniques for Extending the Service Life of Deteriorating Concrete Piers and Wharves**

Ron Heffron

## Non-Traditional Projects

### Project Delivery Methods

**Modern Delivery of Construction Management Services with Emphasis on Environmental Risk Management for Projects in Marine and Tidal Areas**

Andrea Rosenthal and Samuel Scozzari

**Marine Construction Cost Estimating - Thinking like a Contractor**

Scott R. Anastasio and Stephen A. Famularo

**Sustainable Precast-Concrete-Block Structural System**

Reece F. Shaw
