TABLE OF CONTENTS

Volume 1

Completions

A New Device Designed for Direct Yield Stress Measurements of Cement Spacer .................. 1
C. L. Gordon

Investigation of Effect of Equivalent Diameter Definitions on Determination of Pressure Losses of Non-Newtonian Fluids in Annuli ................................................................. 7
B. Demirdal

Laboratory and Field Studies of Plug Removal in Heavy Oil Reservoir With New Plug Removal Agent-Biological Enzyme: Mechanism and Removal .................................................. 11
Y. Wang

Optimum Well Completion Strategies in Reservoirs with Bottom and Edge Water Invasion.......................................................... 12
J. C. Hernandez

Development of a Mathematical Model for Casings Running Through Medium to High Curvature Wells .................................................................................. 25
A. C. Seibi

Heavy Oil & Bitumen Recovery I – Thermal Processes

Prediction of Hydrogen Sulphide Production in SAGD Projects ............................................. 26
H. F. Thimm

A History Match of CSS Recovery in the Grosmont ................................................................ 30
J. Novak

Economic Optimization and Uncertainty Assessment of Commercial SAGD Operations .......................................................... 40
C. Yang

A Unified Model for Prediction of CSOR in Steam-Based Bitumen Recovery .......................... 52
N. Edmunds

Clarifications on Oil/Heavy Oil Recovery Under Ultrasonic Radiation Through Core and 2D Visualization Experiments ................................................................. 64
K. Naderi

Reservoir Characterization

Bituminous Ore Characterization by Integrating Low-Field NMR With Density and Particle Size Distribution Measurements ......................................................... 75
Y. Niu

New Generation of Micromodels and Image Analysis for the Study of Dispersion in Porous Media ........................................................................................................ 84
D. Fisher

Effect of Oil/Brine Ratio on Interfacial Tension in Surfactant Flooding .................................... 85
Y. P. Zhang
X-Ray Absorption Studies of Local Structure in Iron Alkylphosphonate Ester Organogels .................................................. 96
B. P. Grady

Characterization of Fracture Network System of the Midale Field ........................................... 113
D. Bogatkov

Characterization of Matrix Wettability and Mass Transfer From Matrix to Fractures .............. 125
A. Gupta

Reservoir Simulation I

Fully Coupled Numerical Modelling of Ground Surface Uplift in Steam Injection ................. 126
S. Yin

New Solution for Anisotropic Formation Damage Due to Produced Water Re-Injection ........... 140
R. Salehi Mojarad

Coupled Geomechanics—Reservoir Simulation of UTF Phase A Project Using a Full Permeability Tensor .............................................................. 147
J. Du

Finite Element Modelling of Structural Shale Fracturing Around a Well Under Steam Stimulation ........................................................ 163
S. Xue

A New Method for Treating Wells in Reservoir Simulation ....................................................... 164
G. M. Gessel

Graduate Student Presentation I

Study of the Settling Characteristics of Tailings ................................................................. 170
S. C. Motta Cabrera

Flow of Ultra-Dispersed Particles Through Porous Media ....................................................... 171
A. Zamani

Oil-in-Water Emulsion Blocking Mechanism Through Porous Media .................................... 172
K. Zeidani

Wall Fouling and Water Uptake in Lubricated Oil-Water Pipelines ....................................... 173
M. M. A. Sayeed Rushd

Reservoir/Horizontal Well Coupling Using a Modified Homogenous Wellbore Model .......... 174
P. Gui

A Mixed-Integer Nonlinear Programming (MINLP) Approach for an Optimal Integrated Oil Production System and Facilities Design ........................................ 175
C. Seong Khor

Heavy Oil – Non-Thermal Investigations

Dynamic Modelling of Solution-Gas Drive in Heavy Oils .................................................... 176
M. Shahvali

Wormhole Related Cold Heavy Oil Production Insights From Field Observations ............... 177
M. Saltuklaroglu

Effect of Foaminess on the Performance of Solution Gas Drive in Heavy Oil Reservoirs ........... 178
A. B. Alshmakhy
Cold Flow: A Multi-Well Cold Flow (Production) Model
B. Tremblay .............................................................. 191

Study of Hydrated Clay Reactions to Various Cations Using Low-Field NMR
P. M. Chung ............................................................. 203

Polymer Flooding

Polymer Flood Application to Improve Heavy Oil Recovery at East Bodo
F. R. Wassmuth ............................................................. 211

Hydrophobically Associating Polymers for Oil Field Applications
K. C. Taylor ................................................................. 224

Comparative Performance of Polymer Based Fluids Invasion into Oil Saturated Formations
R. B. Z. L. Moreno .......................................................... 232

Polymer Flood Technology for Heavy Oil Recovery
F. R. Wassmuth .............................................................. 241

Performance of Polyacrylamide-Chromium (III) Gel in Carbonate Porous Media:
Effect of Source of Crosslinker on Disproportionate Permeability Reduction and Gel Strength
L. Kuzmichonok .............................................................. 253

Numerical Simulation of Oil Recovery after Cross-Linked Polymer Flooding
C. Xie ................................................................. 268

Heavy Oil & Bitumen Recovery II – Solvent Processes

Optimization of Solvent Aided Process
S. Gupta ................................................................. 278

Design of Steam-Hexane Injection Wells For Gravity Drainage Systems
M. E. McCormack ............................................................. 290

Impacts of Concentration Dependence of Diffusion Coefficient on VAPEX Drainage Rates
T. Okazawa ................................................................. 304

Thermal Solvent Reflux and Thermal Solvent Hybrid Experiments
J. Ivory ................................................................. 310

Measurements and Modelling of Phase Behaviour and Viscosity of a Heavy Oil-Butane System
A. Yazdani ................................................................. 322

Production

Coning Diagnostics
R. O. Baker ................................................................. 333

An Integrated Sand Cleanout System by Employing Jet Pumps
S. Chen ................................................................. 334

Plunger Lift Analysis, Troubleshooting and Optimization
O. L. Rowlan ................................................................. 344

Production Data Analysis— Future Practices for Analysis and Interpretation
D. Ilk ................................................................. 359
A Theoretical Model for Optimizing Surfactant Usage in a Gas Well Dewatering Process

H. Li

Well Management Increases Hydrocarbon Production in Mature Fields: PEMEX E&P Case History

J. A. Arévalo-Villagrán

Graduate Student Presentation II

Integrated Modelling, Risk Assessment and Decision Support for Facilitating Management of Geologic Storage of CO$_2$

X. S. Qin

A Fundamental Study on the Coalescence of Bitumen Drops in Water

P. Esmaeili

Seismic Monitoring of Cold Heavy Oil Production Reservoir

T. Wang

Quantification of Distillation Effects in Steam-Additive Injection

N. Jaiswal

A Pilot-Scale Landfarming System for the Disposal of Oil Sands Tailings in Northwestern Canada

X. D. Zhang

A Biosurfactant Enhanced Land Treatment Technology for Oil Sands Tailings Disposal in Northwestern Canada

Q. G. Lin

Drilling

Permeability Estimation From Inflow Data During Underbalanced Drilling

S. Farshidi

Reducing Formation Damage With Microbubble Based Drilling Fluid: Understanding the Blocking Ability

N. Bjorndalen

Method of Optimizing Motor and Bit Performance for Maximum ROP

H. R. Motahhari

Pressure Drop at the Bit During Foam Drilling

M. E. Ozbayoglu

Identifying Viable EOR Thermal Processes in Canadian Tar Sands

E. J. Manrique

Heavy Oil & Bitumen Recovery III – SAGD Variations

The Impact Of of Oil Viscosity Heterogeneity on the Production Characteristics of Tar Sand and Heavy Oil Reservoirs. Part II: Intelligent, Geotailored Recovery Processes in Compositionally Graded Reservoirs

I. D. Gates

Unlocking Bitumen in Thin and/or Lower Pressure Pay Using Cross SAGD (XSAGD)

J. L. Stalder

Improving the Performance of Classic SAGD With Offsetting Vertical Producers

K. A. Miller
Energy Optimization of Bitumen Production by Using Hybrid SAGD-ISC Recovery Processes .......................................................... 477
I. Gates

SAGD With a Longer Wellbore ........................................................................................................ 478
R. Parappilly

Reservoir Simulation II

Two-Phase Flow With Heat Transfer in a Bitumen-Filled Fracture ........................................... 495
I. D. Gates

Monitoring and Modelling in Coupled Geomechanics Processes ........................................ 496
M. B. Dusseault

Simultaneous Estimation of Relative Permeability and Porosity/Permeability Fields by History Matching Production Data ........................................................... 506
D. Eydinov

Recovery Performance of Steam-Alternating-Solvent (SAS) Process in Fractured Reservoirs ........................................................................................................... 516
A. Suat Bagci, O. M. Samuel

A Simulation Study of Effects of Operational Procedures in CO2 Flooding Projects for EOR and Sequestration ................................................................. 527
K. Vidiuk

Facilities and Production Optimization

Microbial Treatment of a Sulphide-laden Stream in a Continuous Biofilm Reactor ............... 540
K. M. Tang

Development of a Downhole Separator and Intensifier for Coiled Tubing Jetting .................. 543
J. J. Kolle

A New Approach for Multicomponent Vapor Solid Equilibrium Calculations in Gas Hydrate Formation ......................................................................................... 554
A. Bahadori

Is a Paradigm Shift in Produced Water Treatment Technology Occurring at SAGD Facilities? ........................................................................................................ 567
W. F. Heins

Arresting Production Decline of a Mature Offshore Field Using Horizontal Sidetracks .... 568
S. Bhattacharya

Reserves and Business Issues

Canadian Reserves Disclosure: Lessons From Three Years of NI 51-101 ............................... 578
D. Elliot

Oil and Gas Development and the Potential for Contamination of Moose (Alces alces) in Northeast BC ................................................................. 579
C. Maundrell

The Pitfalls of Capital Budgeting When Costs Correlate to Oil Price. Is the Real-Options Approach Superior to Traditional Valuation? ........................................ 584
R. F. Schiozer

Reserves Uncertainty Calculation Accounting for Parameter Uncertainty ............................ 590
O. Babak
Prediction of Oil Bypassing in Bottom Water Systems Using Dimensionless Groups
J. C. Hernandez

Reservoir Simulation III

Numerical Modelling of Geomechanical Response of Sandy Shale Formation in Oil Sands Reservoir During Steam Injection
J. Du

Modelling Geomechanics Into Petroleum Reservoir Numerical Simulation: A Coupled Technique in a Water Injection Project
L. G. Rodrigues

Enhanced Modelling of Sand Production Through Improved Deformation and Stress Analysis
A. Nouri

Practical Strategies for Evaluation and Modeling of Naturally Fractured Reservoirs
A. Gupta

Enhancing Natural Gas Recovery From Nearly Depleted Gas Reservoirs by Injecting Waste Gases
A. K. Singhal

Heavy Oil & Bitumen Recovery IV – Thermal Processes
Prediction of Scales in Boilers of Thermal Recovery Projects
H. F. Thimm

Laboratory Procedures and Testing for Optimizing the Recovery From High Temperature Thermal Heavy Oil Recovery
D. B. Bennion

Evaluation of SAGD Projects Using a Dynamic Economic Indicator
H. Shin

Start-Up of SAGD Wells: History Match, Wellbore Design and Operation
G. Parmar

Temperature Variation Across The Wellbore in SAGD Producer
V. Shako

TINBOP Cyclic Steam Injection Enhances Oil Recovery in Mature Steamfloods
C. Morlot

Unconventional Gas I – Coal Bed Methane

Production Decline Performance of CBM Wells
K. E. Okuszko

Type Curves for Dry CBM Reservoirs With Equilibrium Desorption
S. Gerami

Assessing the Water Uptake of Alberta Coal and the Impact of CO2 Injection With Low-field NMR
R. Guo

Gas Production System From Methane Hydrates Layers by Hot Water Injection Using Dual Horizontal Wells
K. Sasaki
Laboratory Investigation on the Permeability of Coal During Primary and Enhanced Coalbed Methane Production ................................................................. 756
   R. Guo

Well Test Analysis

After Closure Analysis in Tight Gas Reservoirs: A Case History of Pre-Fracture Injection Tests Performed in the Brassey Field ......................................................... 764
   N. Kostenuk

Transient Pressure Behaviour Under Non-Darcy Flow, Formation Damage, and Their Combined Effect for Dual-Porosity Reservoirs ......................................................... 775
   F. Zeng

Practical Considerations in Estimating Test Duration for Perforation Inflow Tests .......... 776
   S. O. P. Theys

Radius of Investigation for Composite Reservoirs ......................................................... 777
   S. Ewens

Investigation of Diffusivity Coefficient of Asmari Reservoir by Well Test Analysis .......... 778
   S. R. Shadizadeh

Technology in the Petroleum Industry

Technology in the Petroleum Industry ........................................................................ 787
   No Author Given

Drilling and Completions

Case Histories of Successful Acid Stimulation of Carbonate Completed With Horizontal Openhole Wellbores ................................................................. 788
   A. S. Metcalf

Heavy Oil-in-Water Emulsion as a Novel Sealant in the Near Well Bore Region .......... 794
   K. Zeidani

Measurement of Acid Reaction Rates with the Rotating Disk Apparatus ......................... 807
   K. C. Taylor

Drilling Simulation Improves Field Communication and Reduces Drilling Cost in Western Canada ......................................................................................... 815
   G. Hareland

Cutting Efficiency of a Single PDC Cutter on Hard Rock ............................................. 822
   G. Hareland

Heavy Oil & Bitumen Recovery V - VAPEX

Incorporation of Heat in the VAPEX Process: Warm VAPEX ........................................ 833
   N. Rezaei

Effect of Capillarity and Surface Tension on the Performance of VAPEX Process ........... 839
   B. Rostami

The Role of Capillarity in the VAPEX Process ................................................................. 847
   M. Ayub

Mass Transfer Coefficients in Vapour Extraction (VAPEX) ........................................... 863
   L. A. James

The Role of Connate Water Saturation in VAPEX Process ........................................... 868
   S. R. Etminan
