Table of Contents

CLID: A general approach to validate security policies in a dynamic network ................................................................................................................................. 1
Yanyan Yang, Charles U. Martel, S. Felix Wu

A model for checking consistency in access control policies for network management ............................................................................................................. 11
Vincent Cridlig, Radu State and Olivier Festor

Towards simplified specification of policies in different domains ................................................................................................................................. 20
Kris Verlaenen, Bart De Win, Wouter Joosen

Issues in Designing a Policy Language for Distributed Management of IT Infrastructures ............................................................................................ 30
Dakshi Agrawal, Seraphin Calo, Kang-Won Lee, Jorge Lobo

Efficient Resource Virtualization and Sharing Strategies for Heterogeneous Grid Environments ..................................................................................... 40
Paweł Garbacki, Vijay K. Naik

Compass: Cost of Migration-aware Placement in Storage Systems ................................................................................................................................. 50
Akshat Verma, Upendra Sharma, Rohit Jain, Koustuv Dasgupta

Towards an Accounting System for Multi-Provider Grid Environments ......................................................................................................................... 60
Gabi Dreos Rodosek, Matthias Gohner, Mario Golling, Michael Kretzschmar

A Service Middleware that Scales in System Size and Applications ............................................................................................................................... 70
Constantin Adam, Rolf Stadler, Chunqiang Tang, Malgorzata Steindler and Michael Spreitzer

Evaluation of a Decentralized Architecture for Large Scale Collaborative Intrusion Detection .................................................................................. 80
Chenfeng Vincent Zhou, Shanika Karunasekera and Christopher Leckie

Interactive Informatics on Internet Infrastructure ......................................................................................................................................................... 90
F. Zhao, V. R. Vemuri, S. F. Wu, F. Xue and S. J. B. Yoo

Real-Time Analysis of Flow Data for Network Attack Detection .............................................................................................................................. 100
Gerhard Munz and Georg Carle

VoIP Honeypot Architecture .............................................................................................................................................................................................. 109
Mohamed Nassar, Radu State and Olivier Festor

Dynamic Placement of Virtual Machines for Managing SLA Violations ......................................................................................................................... 119
Norman Bobroff, Andrzej Kochut and Kirk Beaty

Self-Adaptive Capacity Management for Multi-Tier Virtualized Environments .................................................................................................. 129
Italo Cunha, Jussara Almeida, Virgilio Almeida and Marcos Santos

Server Virtualization in Autonomic Management of Heterogeneous Workloads .................................................................................................. 139
Malgorzata Steindler, Ian Whalley, David Carrera, Ilona Gaweda and David Chess

Capacity and Performance Overhead in Dynamic Resource Allocation to Virtual Containers .......................................................................................... 149
Zhikai Wang, Xiaoyun Zhu, Pradeep Padala and Sharad Singhal

Deterministic Models of Software Aging and Optimal Rejuvenation Schedules ..................................................................................................... 159
Artur Andrzejak and Luis Silva

PANACEA- Towards a Self-Healing Development Framework ................................................................................................................................. 169
David Breitgand, Maayan Goldstein, Ealan Henis, Onn Shehory and Yaron Weinsberg

Autonomic Software Release Management for Communications Networks ........................................................................................................ 179
Pratik K. Biswas

Management of Multidomain End-to-End Links: A Federated Approach for the Pan-European Research Network Géant 2 ............................................................................................................. 189
Mark Yampolskyy and Matthias K. Hamm

Using the Network Description Language in Optical Networks ......................................................................................................................... 199
Jeroen van der Ham, Paola Grosso, Ronald van der Pol, Andree Toonk and Cees de Laat

Path Computation Algorithms for Dynamic Service Provisioning in SDH Networks .......................................................................................... 206
R. Madanagopal, N. Usha Rani and Timothy A. Gonsalves

iii
Table of Contents

Real-Time Application Monitoring and Diagnosis for Service Hosting Platforms of Black Boxes ........................................... 216
Huadong Liu, Hui Zhang, Rauf Izmailov, Guofei Jiang and Xiaojiao Meng

Robust Monitoring of Network-Wide Aggregates through Gossiping .................................................................................... 226
Fetahi Wuhib, Mads Dam, Rolf Stadler and Alexander Clemm

Toward Globally Optimal Event Monitoring & Aggregation for Large-Scale Overlay Networks ........................................... 236
Yongning Tang, Ehab Al-Shaer and Bin Zhang

UAMA: A Unified Architecture for Active Measurements in IP Networks: End-to-End Objective Quality Indicators ............... 246
Gléderson Lessa dos Santos, Vinicius Tavares Guimarães, Jorge Guedes Silveira, Alexandre T. Vieira, José Augusto de Oliveira Neto, Roberto Irajá Tavares da Costa Filho and Ricardo Balbinot

Business-Driven Optimization of Policy-Based Management Solutions ................................................................................. 254
Issam Aib and Raouf Boutaba

Automated Availability Management Driven by Business Policies .............................................................................................. 264
Zhongtang Cai, Yuan Chen, Vibhore Kumar, Dejan Milojicic and Karsten Schwan

Predicting Labor Cost through IT Management Complexity Metrics .................................................................................... 274
Yixin Diao, Alexander Keller, Sujay Parekh and Vladislav V. Marinov

The Evaluation of the Efficient Prepaid Scheme TICA for All-IP Networks and Internet Services ........................................... 284
Pascal Kurtansky, Peter Reichl and Burkhard Stiller

Estimating End-to-End Performance by Collaborative Prediction with Active Sampling ......................................................... 294
Irina Rish and Geraldo Tesouro

A Generic Application-Oriented Performance Instrumentation for Multi-Tier Environments .................................................. 304
Markus Schmid, Marcus Thoss, Thomas Termin and Reinhold Kroeger

Network Instrumentation for End-to-End Measurements ........................................................................................................ 314
Bengt Karacali and Balaji Rao

SNMP Traffic Analysis: Approaches, Tools, and First Results ................................................................................................. 323
Jurgen Schonwalder, Aiko Pras, Matus Harvan, Jorrit Schippers, Remco van de Meent

SANchk: An SQL-Based Validation System for SAN Configuration ...................................................................................... 333
Eray Gencay, Wolfgang Küchlin and Thorsten Schäfer

A Decision Support Tool to Optimize Scheduling of IT Changes .............................................................................................. 343
Rodrigo Rebouças, Jacques Sauvé, Antônio Moura, Claudio Bartolini and David Trastour

Planning and Managing the IPTV Service Deployment ........................................................................................................ 353
Dakshi Agrawal, Mandid S. Beigi, Chatschik Bisdikian and Kang-Won Lee

Automation Controller for Operational IT Management ....................................................................................................... 363
Sven Graupner, Nigel Cook and Derek Coleman

Assessing the Security of VoIP Services ................................................................................................................................ 373
H. Abdelnur, R. State, I. Chriskent and C. Popi

A Trustworthy Mobile Agent Infrastructure for Network Management ................................................................................. 383
Alexandros Koliosius and Joseph Sventek

A Hybrid Approach to Operating System Discovery Using Answer Set Programming ........................................................... 391
François Gagnon, Babak Esfandiari and Leopoldo Bertossi

A Version-Aware Approach for Web Service Client Application .......................................................................................... 401
Ru Fang, Ying Chen, Liana Fong, Linh Lam, David Frank, Christopher Vignola and Nan Lu

Flexible Automatic Service Brokering for SOAs ......................................................................................................................... 410
Steffen Bleul, Michael Zapf and Kurt Geihs

An Evaluation of Service Composition Technologies Applied to Network Management ....................................................... 420
Ricardo Lemos Vianna, Everton Rafael Polina, Clarissa Cassales Marquezan, Leandro Bertholdo, Liane Margarida Rockenbach Tarouco, Maria Janice Bosquïrol Almeida and Lisandro Zambenedetti Granville
# Table of Contents

**Declarative Specification of Service Management Attributes**
Vitalian A. Danciu, Nils genschens Felde and Martin Sailer

**Service Assurance Process Re-Engineering Using Location-Aware Infrastructure Intelligence**
Hani Jamjoom, Nikos Anerousis, Raymond Jennings and Debanjan Saha

**Service Management in a Dynamic E-Business Environment**
Marcus O’Connell and Vincent Wade

**On the Performance of Web Services Management Standards - An Evaluation of MUWS and WS-Management for Network Management**
Giovane César Moreira Moura, Giancarlo Silvestrin, Ricardo Nabinger Sanchez, Luciano Paschoal Gaspary and Lisandro Zambrunetelli Granville

**Access Point Selection for Improving Throughput Fairness in Wireless LANs**
Vasilios A. Siris and Despina Evaggelatou

**Design and Evaluation of Distributed Load-Balancing for Wireless Networks**
G. Nunzi, S. Schuetz and M. Brunner

**A Toolbox of Mechanisms for Robust and Scalable Service Discovery in Mobile Ad-Hoc Networks**
Michael Kreutzer and Manuel Hartl

**Network Element Auto-Configuration in a Managed Network**
Henning Sanneck, Christoph Schmelz, Thomas Baumgarth and Konstantin Keutner

**Customer Equipment Configuration Manager for Managed Network Service Providers**
Kenji Hori, Kiyohito Yoshihara and Hiroki Horiuchi

**The Cost Effective, Efficient Integrated-View Solution: Identification & Personalization for OSS Created Contents**
Kyunghwa Ohk and Deokhan Kim

**Automated Management of Disaster Recovery Systems Using Adaptive Scheduling**
Tapan Kumar Nayak and Upen德拉 Sharma

**Management of Biometric Data in a Distributed Internet Environment**

**Towards Usable and Reasonable Identity Management in Heterogeneous IT Infrastructures**
Sebastian Rieger and Bernhard Neumair

**Building a Grid Infrastructure with Instant-Grid**
Christian Boehme and Ulrich Schwardmann

**Managing P2P Services Via the IMS**
Antonio Liotta and Ling Lin

**Troubleshooting SIP Environments**
Shiva Shankar and Malathi Latha

**TestYour VoIP - A System for Measuring Internet Voice Quality**
Mark Sylor, Nagarjunna Venna, Harrison Rips and Benjamin Bennett

**Finding Elephant Flows for Optical Networks**
Tiago Fioreze, Mattijs Ouwe Wolbers, Remco van de Meent and Aiko Pras

**Mining Infrastructure Data for System Management Optimization**
Chang-shing Perng and Shang Guo

**Applying Autonomic Computing with Open Standardized Resource Interface WSDM to Managing Multi-Vendor IT Systems**
Yoshikazu Satoh, Yuhuise Kameyusa, Jung-kook Hong, Yuhichi Komatsu, Kazuo Iwano, Sanoshi Tutiya, Tsuneo Katsuyama and Hiroshi Yoshida

**Entity MIB and Virtualization**
Shiva Shankar
Table of Contents

A CASE Tool to Support the MIB Development Process ................................................................. 684
Shyvann Sharan Lin and Mike Cheng

Fault Management Based on Peer-to-Peer Paradigms: A Case Study Report from the CELTIC Project
Madeira .............................................................................................................................................. 697
Markus Leitner, Philipp Leitner, Martin Zach, Sandra Collins and Claire Fahy

Galapagos: Automatically Discovering Application-Data Relationships in Networked Systems .................. 701
Kostas Magoutis, Murthy Devarakonda and Kiran Muniswamy-Reddy

Hierarchically Federated Registration and Lookup Within the perfSONAR Framework ............................ 705
Jason Zurawski, Jeff Boote, Eric Bayd, Maciej Glowiak, Andreas Hanemann, Martin Swany and Szymon Trocha

IT Service Management for Campus Environment - Practical Concerns in Implementation ...................... 709
Stewart H. C. Wan and Yuk-Hee Chan

Learning Attack Strategies through Mining and Correlation of Security Alarms ......................................... 713
Wang Li, Li Zhi-tang and Lei Jie

OSPF Failure Identification Based on LSA Flooding Analysis .................................................................. 717
Yuichiro Hei, Tomohiko Ogishi, Shigehiro Ano and Toru Hasegawa

Policy-Driven Business Management Over Web Services ...................................................................... 721
Stephen Gorton and Stephan Reiff-Marganiec

Realising Adaptive Web Services through Automated Policy Refinement ............................................ 725
Kevin Carey and Vincent Wade

Reducing Complexity of Software Deployment with Delta Configuration ............................................. 729
A. Ganguly, J. Yin, H. Shaikh, D. Chess, T. Eilem, R. Figueiredo, J. Hansom, A. Mohindra and G. Pacifici

Reliability of Service Level Estimators in the Data Centre .................................................................. 733
Jon Henrik Bjørnstad and Mark Burgess

Requirements for Managing Distributed Packet Filter Configurations in Carrier-Grade IP Networks .......... 737
Birger Tödtemann and Erwin P. Rathgeb

Roles Considered Harmful in Policy-Based Management for Dynamic Organisations ............................. 741
Kevin Feeney, David Lewis and Vincent Wade

Seamless Integration of Network Management Tools in a Multi-Domain Environment ............................ 745
Slavko Gajin, Vedrin Jeliazkov, Constantinos Kotsokalis and Yannis Mitsos

Self-Management of Context-Aware Overlay Ambient Networks ......................................................... 749
Bertrand Mathieu, Meng Song, Alex Galis, Lawrence Cheng, Kerry Jean, Roel Ocampo, Marcus Brunner,
Martin Stiemerling and Marco Cassini

Server Capacity Planning with Priority Allocation for Service Level Management in Heterogeneous Server Clusters ...................................................................................................................... 753
Shinji Nakadai and Kunihiro Taniguchi

Service Provider Considerations for IT Service Management .................................................................. 757
Larisa Shvartz, Naga Ayachithula, Melissa Buco, Maheswaran Surendra, Christopher Ward and Steve Weinberger

SML Model-Based Management ............................................................................................................ 761
Ricardo Rivaldo, Guillerme Germoglio, Flávio Santos, Yuan Chen, Dejan S Milojicic and Robert Adams

Storage Planning and Management Using a Web-Based Management Service ....................................... 765
V. Gogate, I. Narang, V. K. Naik, U. Sharma and P. Varma

Towards Automatic Composition of Network Management Web Services .......................................... 769
Torsten Klie, Felix Gebhard and Stefan Fischer

Towards Autonomic Provisioning of Wireless Grid Services .................................................................... 773
Mohamed El-Darweby and Diwakar Krishnamurthy
