STATEMENT OF POLICY ON RELEASE FOR PUBLICATION OF SPE CONFERENCE PAPERS

Selected conference papers and discussions are added to SPE literature through publication by the Society in its established periodicals

1. All papers submitted to and accepted by the Society for presentation at one of its conferences (including ANTEC) are copyrighted by and are the property of Society of Plastics Engineers. Publication rights are reserved by the Society.

2. As soon as is practicable after a conference, the Society will contact all authors whose papers are being considered for publication in a SPE journal of Plastics Engineering.

3. The Society shall not be responsible for statements or opinions expressed in publications, reports, papers or discussions at its meetings unless specifically approved by the Council.

4. An abstract, not to exceed seventy-five words may be published without further permission from the Society provided appropriate source credit is given to Society of Plastics Engineers and the conference (including dates and location) at which the paper was presented.

This CD-ROM of the Annual Global Plastics Environmental Conference was produced for the Society of Plastics Engineers - Environmental Division by Omnipress. This product contains Adobe Acrobat® software with OmniPRO structuring, formatting and design features.

Duplication of this CD-ROM and its content in print or digital form for the purpose of sharing with others is prohibited without permission from Society of Plastics Engineers - Environmental Division and Omnipress. Also, copying this product’s instructions and/or designs for use on future CD-ROMs or digital products is prohibited without written permission from Omnipress and Adobe® Systems Inc.

In no event will Omnipress or its suppliers be liable for any consequential or incidental damages to your hardware or other software resulting from the installation and/or use of this CD-ROM.

Adobe®, Acrobat® and the Acrobat logo are trademarks of Adobe Systems Incorporated or its subsidiaries and may be registered in certain jurisdictions.
TABLE OF CONTENTS

Bio-based and Biodegradable Materials

Characterization Of Environmentally Friendly Polymers: Amylopectin And Its Blends .................................................................................................................. 1
Mohammad O. Melibari

The Shear, Extensional and Degradation Rheology of Renewable Resource Polymers .............................................................................................................. 2
Graham M. Harrison

Effects Of Crosslinkers, Glycerol, And Processing Temperature On Properties Of Soy Protein Based Plastics ........................................................................... 14
Brian E. Ralston, N. Wochner, Tim A. Osswald

EcoflexT meets Renewable Materials ............................................................................................. 23
Keith A. Edwards

Bioplastics in Electronic Plastics ........................................................................................................ 24
Markku T. Hieno, Antti O. Helminen

Biodegradation of Compostable Plastics in Cow-manure Compost Environment ....................... 25
Joseph P. Greene, PhD

Comparison of the Degradability of Commercially Available Biodegradable Packages in Composting and Ambient Exposure Conditions ..................................................... 31
Rafael Auras, Gaurav Kale, Sher Paul Singh

Considerations Affecting Biodegradability of PVC ........................................................................ 50
Richard F. Grossman, John E. Schleicher, Jr., Lorna D'Alessio

Effects Of Bamboo And Kenaf Fibers On The Flexural Modulus Of Biocomposites ............... 59
Shinichi Shibata, Takuya Kamyama, Isao Fukumoto

Thermoformed Packaging from Soy Protein Isolate Resin .......................................................... 64
Dr. Lou Reifschneider

Mechanical properties of soy protein isolate/soy hydrolysate plastics ........................................ 73
Dr. David Grewell, Maria Vlad, Jay-Lin Jane, Perminus Mungara

Metabolix’s Natural Plastics: Property Space and Processing Capabilities .............................. 83
Robert Whitehouse

Design, Synthesis and Characterization of Nano-engineered Biochemical Decontaminants ........................................................................................................... 84
Brian Ray, Chih-ang Chang, Dilip Paul, Christopher Ibeh

Some Recent Advances In Thermoplastically-Processable Biodegradable Starch-, Polyvinyl Alcohol- And Polylactide-Based Polymer Blends ........................................ 97
Graham J. Whitchurch, Terence A. Cooper

The Effect of Fiber Surface Treatment on Laminated Biocomposites from Poly(lactic acid) (PLA) and Natural Fibers ........................................................................ 122
Manjusri Misra, Masud S. Huda, Lawrence T. Drzal, Amar K. Mohanty
**Automotive**

Automotive Foams and Composites from Renewable Resources ............................................ 123  
Ellen C. Lee, PhD

Creation of Vibrant and Long-Lasting Coatings for Light Trucks and Automobiles  
with Reduced Emissions to the Environment using Paint Film Technology .......................... 124  
Gordon C. Miller

Effect of Regrind on Vibration Welding Strength of Polyolefins ........................................... 131  
Ewa Lebert, Dr. Chung Wu, Susan Kozora

Advanced Methods for Paint & Coating Removal from Recyclable Substrates ..................... 139  
Lin Zhihong, PhD

Sustainable Technologies For Automotive Acoustic Comfort: Overview ............................... 140  
Hameed S. Khan

Recycling Exterior Grade Painted TPO’s .................................................................................. 156  
Bob Egbers

White Paper: Automotive Plastics Opportunities .................................................................. 167  
Steve Schellenberg

**Electronics**

Recycled Electronic Housings Mixed ABS Material and Flame Retardant  
Identification Using Near-IR and Mechanical Testing ....................................................... 169  
Mike W Dattner

Recycling Mixed Plastics from End-of-Life Electronics ......................................................... 180  
Rakesh Gupta

Using Portable XRF tools to meet EU’s Restriction of Hazard Substances/Waste  
Electrical and Electronic Equipment (RoHS/WEEEE) Requirements ................................. 185  
Jim Martin

Large Scale Co-combustion of Plastics from the End-of-Life Electrical and  
Electronic Equipment at the Wuerzburg Municipal Solid Waste Energy Recovery  
Plant (MHKW) (GPEC 2006) ........................................................................................................ 186  
Dr. Michael M. Fisher, Britta Bergfeldt, Hans Dresch, Bogdan Dima, werner Gruettner, Kai  
Kramer, Theo Lehner, frank E. Mark, Juergen Vehlow

RoHS Challenges and Restricted Substances Compliance Solutions .................................. 197  
George J. Fechtmann

**Reclamation and Supply**

Technological Advancements In Separation and Sorting Technology For  
Recycled Plastics ...................................................................................................................... 198  
Peter Mayer

Carpet Reclamation .................................................................................................................... 204  
Bob Peoples

Postconsumer Resin (PCR) Quality Assurance and Testing Protocol: Proposed  
Testing Protocol for PCR ........................................................................................................ 205  
Joseph P. Greene, PhD

Latest Advances In Drying And Crystallizing Technology Using Infrared Drying (IRD) ................................................................................................................................. 211  
John W. Doub, Jr.

Recycling of Fibers and Non-wovens ..................................................................................... 217  
Barry B. Hunter
It's not easy Being Green, Especially when it's Brown! Diapers: The Ongoing Recycling Opportunity

Keith Bell

Success of Closed-Looped Plastic Recycling Systems: A Case Study focusing on recycling PVC materials and how this business strategy can decrease your material costs and increase your profits

Anthony S. Georges

A Case Study of a PVC Pipe Recycling Program

Craig Fisher

Who Says PVC Can't Be Recycled?

Craig Fisher

Closing the Loop in the Plastic Film Industry

Daniel Schrager

The Dilemmas of Plastic Wastes in a Developing Economy: Proposals for a Sustainable Management Approach for Ghana

Julius N. Fobil, Jonathan N. Hogarh, Kwame Nkrumah

New Technological Solutions For Reducing Landfill Waste

M.A. McMillan, T. Black, M.B. Johnston, T.A. Cooper

Recycling, processes which enable economical conversion, including that of difficult to handle materials

Mike Horrocks

Study On The Construction Of Flexible Road Using Plastic Coated Aggregate

Dr. R. Vasudevan, S. Rajasekaran

Regulatory: Laws/Safety/Legislation

Current Issues & Regulatory Status Concerning Flame Retardants

Susan D. Landry, Raymond B. Dawson

Challenges Faced By Thermoplastic Suppliers Due to WEEE and RoHS Directives

Nancy Concepcion

Emission Of Styrene From Vinyl Ester Resin: Effect Of Styrene Percentage, Temperature And Resin Depth

Dr. Uday Vaidya, Chad A. Ulven, James M. Sands, John J. La Scala, Joshua A. Orlicki, Giuseppe R. Palmese

The Health and Environmental Impacts of Polyvinyl Chloride

Nick Newman, Ryan Hertel

Use Of Plastics With Care: Code For India

Dr. N. Rajalakshmi

Marketing and Business; Recycling/Sustainability/ELV

Methyltins: Sustainable Stabilizers For PVC

Dr. Richard W. Johnson, Michael B. Clark

Branding is One of a Company's Most Important Assets

John R. Kowalski

Design of Business Chain for the Development and Sustainable Growth of PET Recycling in India

Clement Ambros

PVC/Natural Fiber Composites Back to the future for fun and profit!

Edward Schut
Student Poster to Date:

Recycled Electronic Housings Mixed ABS Material and Flame Retardant Identification Using Near-IR and Mechanical Testing .................................................................403  
Mike W. Dattner

Development of a Respirometric System to Test Biopolymer Degradation .........................404  
Thitisilp Kijchavengkul, Rafael Aura, Maria Rubino, Mathieu Ngouajio, R. Thomas Fernandez

The Effects of Foaming Temperature, and Time on the Tensile Strength, size and Morphology of Microcellular Foam of Biomax .................................................................405  
Napawan Kositruangchai

Design, Synthesis and Characterization of Nano-engineered Biochemical Decontaminants .................................................................................................406  
Brian Ray, Chih-ang Chang, Dilip Paul, Christopher Ibeh
