American Institute of Chemical Engineers

22nd Annual International Conference of the Center for Chemical Process Safety

CCPS 2007

Held at the AIChE Spring Meeting 2007

April 22-27, 2007
Houston, Texas, USA

Printed from e-media with permission by:

TABLE OF CONTENTS

Examining Organizational and Safety Culture Causes of the BP Texas City Refinery Explosion
Mark Kaszniak .............................................................................................................................. 1

Finding Potential Failures Deliberately
Jack Hipple ........................................................................................................................................ 2

Quantification of Human Factors for Quantitative Risk Analysis
Katharina Lowe .......................................................................................................................... 11

Safety Culture: "Black Art" or "Paradigm Shift"?
Cinzia De Santis ......................................................................................................................... 23

Six Sigma® Analysis Applied to Process Safety Systems
Jon Ritz ........................................................................................................................................... 30

Labor Accidents and the Relation with Human Error and Factors
Americo Neto .................................................................................................................................. 37

The Next Generation Operational Discipline Program at Dupont
James A. Klein, Bruce K. Vaughan ................................................................................................ 38

OECD Guidance on Safety Performance Indicators
Kin Jennings ....................................................................................................................................... 53

Management Review: The Way to be Sure Your Process Safety Systems are Working
Jack McCavit .................................................................................................................................... 63

Improve The Risk Ranking Process by Categorizing and Detailing Consequence and Probability Categories
Adrian L. Sepeda ........................................................................................................................ 72

Implementing A Risk-Based Process Safety Management System Because It Makes (Dollars and) Sense
William Bradshaw, James R. Thompson ...................................................................................... 91

How to Incorporate the Health, Safety and Environment Management System In Quantitative Risk Assessments
Antonio Ribeiro, Anna Leticia De Sousa, Fernando Jose Brasil De Souza ..................................................... 99

Excellence in Stationary Equipment Reliability
Walter Pinto .................................................................................................................................... 111

From PSM to Operational Excellence: Safety Critical Variables and Equipment
Tim Salmon ......................................................................................................................................... 143

Field-based Evaluation of PFD Values for Safety-related Loop Typicals
Daniel Dupont, Lothar Litz, Pirmin Netter .................................................................................. 149

Legal Consideration of Changing Industry Standards
Mark S. Dreux .................................................................................................................................. 163
The ATEX Directives: Explosion Safety and Regulation – An Update on the European Approach

Nico H.A. Versloot

Retrofitting New Standards Into Existing Facilities is Not Always as Easy as it Seems

Brian R. Dunbobbin, Shakeel Kadri, Timothy McLear, Richard O'Reilly

Reactivity Issues in Storage: A Simplified Approach

Peter N. Lodal, Wayne Chastain, Scott Berger, William Doerr

Spreading the Word of the Concept 'Inherent Safety' in a General Industrial Setting in the Dutch Province of Zeeland

Johan Gort, M. Jongen, M. Zwaniken, Anja Dijkman, Gerard Zwetsloot

Regulating Inherent Safety Contra Costa County’s Industrial Safety Ordinance

Randall Sawyer, Cho Nai Cheung, Michael Dossey, Don Nixon, Habib Amin, Nicole Alaniz

Inherently Safer Chemical Processes - 2nd Edition

David A. Moore, Michael Hazzan, Marty Rose, David Heller, Dennis C. Hendershot, Arthur M. Dowell III

Legal Consideration of Risk Tolerance

Mark S. Dreux
