TABLE OF CONTENTS

VOLUME 1

Innovative Design

Boston’s Central Artery and It's Interchanges ................................................................. 1
Keith Donington, Vijay Chandra

Design of Mississippi River Bridges Overcomes Environmental, Foundation and
Structural Challenges ........................................................................................................ 11
Iqbal Husain, Nicolas Theodor, Tony Sangiuliano, Dave McAvoy

Experience of Innovative Integral Bridges in China ....................................................... 21
Xiaojin Jin, Xudong Shao

Launching on Supple Skates .......................................................................................... 30
Marco Petrangeli, Marcello Petrangeli

Approaching the Big Dig: Use of Precast Transition Structures .................................... 41
Jennifer Hill, Ruchu Hsu, Vijay Chandra

Automated Weldless Grating for Bridge Decks and the Like ........................................ 51
Dennis M. Imm

Probabilistic Fatigue Assessment of Post-Weld Treated Tubular Truss Bridges ............. 60
Scott Walbridge, Alain Nussbaumer

Innovative Design of Short Span Steel Concrete Composite Bridges with Rolled
Beams Some Examples from France to Germany ............................................................. 70
Wasooodev Hoopah, Mark Hever

A Study on Multi-Stepwise Thermal Prestressing Method for Steel-Concrete
Composite Bridges ........................................................................................................... 81
Sang-Hyo Kim, Jin-Hee Ahn, Jun-Hwan Kim, Hyung-Ju Kim

Jointless Abutment Detailing for an Orthogonal-ended Structure .................................. 91
Kelvin L. Fields

Construction of Shaikh Zayed Arch Bridge in Abu Dhabi .............................................. 101
Parviz Djahani, Jamal Al-Hosani

Development of a Bridge Expansion Joint with Inflatable Seal System .......................... 112
Jim Au, Clifford Lam, Bala Tharmabala

Context Sensitivity in Practice the Design and Construction of the Hillsborough
Street Bridge Raleigh, North Carolina ............................................................................ 123
Christian T. Ray

Structurally Supported Single Point Urban Interchanges (SPUI) .................................... 133
Manas Asthana, Craig Smart

Short and Medium Span Bridges in Ontario Utilizing Sliding Isolation Bearings ............ 143
Ronald J. Watson

Bridge Decks High Speed Waterproofing Systems - Summary of Achievements in
Canada ............................................................................................................................. 152
Sabine Le Bec, Yvan Paquin

</table>
Innovative Bridge Design for the Sea-to-Sky Highway Improvement Project, Design-Build Work Package No. 2, Sunset Beach to Lions Bay
Monty Knaus, Keith Holmes, Jianping Jiang

Design of Highly Curved Concrete Ramp Bridges
Adel Fam, Hank Huitema, Derk Meyer

Design of Continuous Double Composite High-Speed Railway Bridges
Chang-Su Shim, Hyun-Ho Kim, Pil-Goo Lee

Bridges that Combine Function, Economy and Aesthetics
Yuhe Yang

Greenway Bridge
J. Meyboom, M. Sutton, A. Meyboom

Study on Rigid and Flexible Structure System of Giant Wheel in Cihai Bridge
Wang Xiaodun, Shi Yongjiu, Wang Yuanqing

Effect of Initial Bending Moment on Composite Girder under Flexure for Unshored Construction
V. K. Gupta, Y. Okui, M. Nagai

Three Spans in One. Bridge in Benicarlo
Alberto Domingo Cabo, Salvador Monleon Cremades, Carlos Lazaro Fernandez

Rotation Bridge on Waterway Structure based on Finger Touch Simulation Using Multi-Points Reaction at Joint Support Shell
Afshin Turk, Shabnam Ghanavatizadeh

New Type of Composite Bridge Structure with Concrete Filled Steel Tube Girder
Jae-Yoon Kang, Eun-Suk Choi, Won-Jong Chin, Jung-Woo Lee, Byung-Suk Kim

Design of the Canada Line Extradosed Transit Bridge
Andrew Griezic, Christopher R. Scollard, Don W. Bergman

Time-Dependent Effects in Continuous Composite NU-Girder Bridges
Walter H. Dilger, Gerd Birkle

Pretensioned Prestressed Concrete Beam Bridges and Industrial Supply
Pierre Passeman, Van-Tho Doan

Continuous Steel-Concrete Composite Construction for Bridges - An Economical Solution
Pydi Lakshmana Rao

Standardization of Bridge Detailing
Jure Radic, Zlatko Savor, Alex Kindij

Design and Construction of Steel Arch Bridge using Concrete Filled Tubes (CFT) at Thimpu City Bhutan
S. Sengupta

Design of Prestressed Concrete Bridge Girders Made with High to Ultra High Performance Fibre Reinforced Concrete
S. Braike, B. Massicotte, J. P. Charron

Comparative Analysis of Composite Overpasses
Jure Radic, Zlatko Savor, Gordana Hrelja, Nijaz Mujkanovic, Andjelko Vlasic

Proposed Connection Details for Precast Concrete Bulb Tee Girder Bridges
Khaled Sennah, Bijal Shah, Reza Kianoush, Siyin Tu, Clifford Lam

Long-Span Steel Plate Girder Bridge Erection
Jared G. Fasick
New Construction

Simulation of the Re-Decking of Jacques Cartier Bridge Considering Spatial Constraints ................................................................. 543
C. Zhang, A. Hammad, T. M. Zayed, G. Wainer

Innovative Concepts for Segmental Concrete Interchange.......................................................... 553
Vijay Chandra

How to Build a 700 ft. $20M Concrete Bridge in One Year ................................................................. 563
James M. Barker, Richard H. Walters

Study and Design of an Adaptive Tuned Mass Damper for Self-Climbing Formwork in the Construction of Concrete Piers ........................................................................ 572
Carlos Casado, Alfonso Poncena, Antolin Lorenzana

Experimental Studies of Prefabricated Bridge Deck Models and Closure Strip Connections .................................................................................. 582
Alexander Au, Clifford Lam, Bala Tharmabala

Incorporating Art into Bridge Design - Single and Multiple Span Precast Concrete Arch Applications .................................................................................. 593
Paul Proctor, John Shall

Ministry of Transportation Ontario Experience in Bridge Planning .................................................. 606
Quazi M. Islam, Iqbal Husain

Innovative Building Methods for Bridges with Small and Medium Spans - VFT and VFT-WIB .................................................................................. 616
Victor Schmitt, Michael Weizenegger

Manitoba Floodway Expansion Project - Bridge Replacement ......................................................... 626
Norman Ulyatt

East Pascagoula River Post-Tensioned Spliced Girder Bridge, Mississippi, USA .................................. 637
Teddy Theryo

Spanning Missiquoi Bay - Simple Yet Complex .............................................................................. 643
Steve W. Johnson

Towards 3D BIM for the Bridge Lifecycle .................................................................................. 653

The Wupper River Valley Bridge: A State-of-the-Art Composite Bridge .................................. 664
G. A. Marzahn, M. Hamme, W. Prehn, J. Swadlo

VOLUME 2

CN Railway New Memphis Super Terminal (MST) Intermodal Design and Construction of a Railroad Bridge over Horn Lake Cut-off Ditch ................................................. 674
Fernando Moreu

Construction Engineering on the Benicia-Martinez Bridge Replacement ........................................ 683
Jean-Guy Deschamps, Thomas Stelmack

Large Concrete Precast Box Girders Along the New Italian High Speed Railway Lines .................. 691
Marco Petrangeli, Camillo Andreocci, Francesco Magnorfi, Marco Orlandini, Giosafatte Geremia

Analysis and Prevention of In-Construction Cracks of Prestressed Concrete Bridges using Span-by-Span Technique ......................................................... 702
Zhao Liu, Sanpeng Cao, Qingzhong You, Shouchan Wu, Jianlin Zhou
Design of Short and Medium Span Steel Railway Bridges - Modern Practice on North American Freight Railroads ................................................................. 712
John F. Unsworth

Mechanical Behaviour of a Bonded Steel-Concrete Composite Girder ................................................................. 728
A. Si Larbi, E. Ferrier, B. Jurkiewicz, P. Hamelin

Thermal Crack Risk Analysis and Appropriate Measures for Preventing Thermal Cracks at Early-Age in Concrete Bridges ................................................................. 739
Ali A. Farhang, Kjell Wallin

Design and Construction for Durability: Comparison Between a North-American and European Approach ................................................................. 751
Gerard Desgagne, Brigitte Mahut, Florent Imberty, Patrick Guiraud

Construction of Midori-Bridge ........................................................................................................ 768
Hirayoshi Imai, Koji Ukai, Fujio Yokota, Shinji Yamanobe

The Diversity of Bridges over HWY 132 ........................................................................................ 779
Sevak Demirdjian, Olivier Joly

Seismic Design

Railway Bridge Performance in Earthquakes that Damaged Railroads ................................................................. 791
William G. Byers

Comparative Study of the Seismic Performance of Retrofitted Multi-Span Steel Bridges ................................................................. 799
Jamie E. Padgett, Reginald DesRoches

Seismic Design of the Saint-Laurent Boulevard Bridge .............................................................................................. 809
Sylvain Bedard, Ghislain Dionne, Christian Lemay, Pascal Beausejour, Patrick Lamontagne

Seismic Behaviour of Cable-Stayed Bridges and Dissipation of Additional Energy: A State-of-the-Art Review .............................................................................................. 818
Galo E. Valdebenito, Angel C. Aparicio

Seismic Response Analysis of the Girder Bridge with High Piers .................................................................................. 829
Kehai Wang, Qian Li

Bridge Seismic Expansion Joints ........................................................................................................ 836
Paul Bradford

Confinement Reinforcement for Bridges in Medium to High Seismicity Zone Based on New CSA A23.3-04 Approach .................................................................................. 846
Frederic Legeron, Aurelie Vivier, M. N. Sheikh, Patrick Paultre

Bi-Directional Seismic Analysis and Design of Bridge Steel Truss Piers Allowing a Controlled Rocking Response .................................................................................. 856
Michael Pollino, Michel Bruneau

Seismic Design and Construction of Two High Profile Concrete Bridges in a Cold Weather Environment .................................................................................. 866
Sylvain Montminy, Abdol Noureayan, Ronald J. Watson

Performance Based Retrofit of Bridge Piers with CFRP: Test Design, Model Updating, Pseudo-Dynamic Testing .................................................................................. 877
Nathalie Roy, Patrick Paultre, Jean Proulx, Thien Phu Le, Benedikt Weber

Importance of Accurate Shear Wave Velocity in Seismic Evaluation of Bridges .................................................................................. 887

Performance Based Seismic Design of Bridge with Energy Dissipation Devices .................................................................................. 898
A. Iqbal
Assessing the Adequacy of the 30% Combination Rule in Estimating the Critical Response of Bridge Piers Under Multi-Directional Earthquake Components

Amar Khaled, Robert Tremblay, Bruno Massicotte

Management of Bridge Asset

Location Based Mobile Bridge Inspection System
Y. Hu, A. Hammad

4D Modeling in Bridge Lifecycle Management Systems
C. Zhang, A. Hammad

Management of Bridge Decks using Stochastic Deterioration Models and Multi-Criteria Optimization
George Morcous, Zoubir Lounis

Design and Construction of a Full-Width, Full-Depth Precast Concrete Deck Slab on Steel Girder Bridge
N. David LeBlanc

Optimal Single Stage Strategies for Bridges
Bryan T. Adey, Rade Hajdin, Eugen Bruhwiler

Determination of Optimal Intervention Strategies for Multiple Bridges During Catch-up Periods
Bryan T. Adey, Rade Hajdin, Eugen Bruhwiler

Reliability-Based Assessment of Safety for Existing Bridges
Stuart G. Reid

Rehabilitation and Retrofitting

Re-Decking of Three Major Montreal Bridges Using Distinct Deck Replacement Methods
Glen P. Carlin, Guy Mailhot

Analysis on the Strengthening Efficiency of Near Surface Mounted CFRP Laminates
Jae-Yoon Kang, Young-Hwan Park, Jong-Sup Park, Young-Jun You, Woo-Tai Jung

Wind Tunnel Testing and Stability Analysis of the Ile D'Orleans Suspension Bridge
Brad Pridham, Stoyan Stoyanoff, Martin Talbot, Alain Brassard

Rehabilitation of Damaged Steel-Concrete Composite Beams using High Modulus CFRP Sheets
Amr Shatt, Amir Fam

Revisiting Replacement Rationale for the Clarke Road Bridge: "Rehabilitation of a Bridge with One Foot in the Grave"
John Pucchio, Matthew Murphy, Ian Blevins

Rehabilitation of the Lennoxville Bridge Incorporating the SPS (Sandwich Plate System) Technology
Sylvain Lapierre

Restoration of the Turcotte Bridge in Sorel-Tracy
Gaetan Couture, Michaela Aldea, Bernard Pilon

Design Guidelines for Strengthening of Steel-Concrete Composite Beams with High Modulus CFRP Materials
David Schnerch, Mina Dawood, Emmett Sumner, Sami Rizkalla
Flexural Behavior of RC Beams Strengthened with Externally Prestressed CFRP Laminates ................................................................. Jong-Sup Park, Young-Hwan Park, Jae-Yoon Kang, Woo-Tai Jung, Young-Jun You ................................................................. 1078

Evaluation of New Sacrificial Anode Cathodic Protection Systems for Highway Bridge Decks and Substructure Components ............................................................................................................. Frank Pianca, David Lai ................................................................. 1088

CN Railway Construction of a New 80’ - 0” Steel Girder Span Mile U5.6 Edgewood Subdivision, Cruse, IL .......................................................................................................................... Fernando Moreu

The Use of Glass Fibre-Reinforced Polymer for Retrofitting Split Timber Stringers .......... Sara M. Gomez, Dagmar Svecova ................................................................. 1114

The Art and Science of Retrofitting Historic Arch Bridges ........................................................................ Shernf Morcos, Boris Reznikov ................................................................. 1124

High Performance Concrete Overlay for Rehabilitation and Strengthening of Ortho-Tropic Steel Bridge Decks ................................................................................................................. Peter Buitelaar, Rene Braam, Niek Kaptijn, Henk Sliedrecht ................................................................................................................................. 1134

Deck Rehabilitation of the Peace River Bridge at Dunvegan ................................................................. Bob Ramsay ................................................................................................................................. 1144

Prefabricated Steel Grid Bridge Deck Panels - Twenty Years of History ........................................................................ Mark Kaczinski ................................................................................................................................. 1152

Effectiveness of Various Repair Systems for Flexural Strengthening of Steel-Concrete Composite Girders ............................................................................................................................. N. Ragab, R. El-Hacha ................................................................................................................................. 1160

Seismic Evaluation and Retrofit Strategy for an Overpass Crossing Railway Lines .......................... Alejandro De la Puente, Denis Mitchell, Luc Chouinard ................................................................................................................................. 1172

Impact Behavior of Concrete Bridge Deck Slabs with Composite Ultra-High Performance Fiber Reinforced Concrete (UHPFRC) Overlay ................................................................. Katrin Habel, Paul Gauvreau ................................................................................................................................. 1183

Ceiling Repair on a Rigid Frame Structure Using Self-Compacting Concrete (SCC) ...................... Bernard Pilon ................................................................................................................................. 1193

Life-Cycle Cost Analysis for the Gullwing River Bridge Replacement ........................................... K. W. Simbeya, P. A. Scatzo ................................................................................................................................. 1203

Effect of Design Variables on the Failure Mechanisms of FRP-Rehabilitated RC Inverted T-Beam Bridge Bentcaps ............................................................................................................................. Khaled Galal, Mukesh Sekar ................................................................................................................................. 1213

Strengthening of RC Inverted T Bentcap Girders using Anchored CFRP Sheets ......................... Khaled Galal, Mukesh Sekar ................................................................................................................................. 1224

Experiment on Strengthening Efficiency of RC Beams Strengthening with NSM CFRP Reinforcements ............................................................................................................................. Woo-Tai Jung, Young-Hwan Park, Jong-Sup Park, Jae-Yoon Kang, Young-Jun You ................................................................................................................................. 1234

Retrofitting of Bridge Girders ................................................................................................................................. Syed Ittikhar Ahmad, Fathalla Shalouf ................................................................................................................................. 1244

Small and Medium Span Bridges: Case Studies for Standard Solutions with Reduced Maintenance Requirements ............................................................................................................................. Bruno Briseghella, Enzo Siviero, Tobia Zordan ................................................................................................................................. 1254

Fatigue Study of the I-435 Missouri River Bridge .............................................................................. John Brestin, Jonathan C. McGormley, Shyam Gupta ................................................................................................................................. 1265
Strengthening Full-Scale Damaged Pre-Cast/Prestressed Concrete Double-Tee Girders Using CFRP Sheets ................................................................. 1275
Antonio Cofini, Khaled Sennah, Ali Emam, Ayman M. Okeil, Mohamed Attalla

The Reconstruction of L'Acadie Elevated Round-About .................................................. 1285
Olivier Joly, Adel R. Zaki

Intervention Strategies for the Replacement and Rehabilitation of the Laviolette Bridge Deck in Trois-Rivieres (Quebec, Canada) .................................................. 1295
Richard Fay, Bernard Breault

Analysis

Prediction of Loading-Induced Tendon Slip at Deviators in Beams Prestressed with External Tendons ................................................................. 1306
Bui Khac Diep, Junichiro Niwa

Surprises Inside Post-Tensioned Structures and Remedies ................................................ 1317
Vijay Chandra, Keith Donington

Fatigue Design of Steel-Concrete Composite Beams using F. E. M. ................................ 1329
Samy Guezouli

Pedestrian Comfort of Columbus Main Street Bridge under Vibrations Induced by Heavy Vehicles ................................................................. 1339
Stoyan Stoyanoff, David D. Byers, Steve Hague

VOLUME 3

Comparison of Design Effective Bridge Temperature Ranges using Different Bridge Design Codes .................................................................................. 1349
Alexander Au, Clifford Lam, Bala Tharmabala

Stability Analysis of Highway 11 Bridges over the P3 Tributary ........................................ 1359
Brent I. Archibald, Jonathan J. Werner

Application of Overload Fatigue Damage in Permit Load Bridge Rating ................................ 1369
Inmar Badwan, Robert Y. Liang

Arema Longitudinal Force Requirements ........................................................................ 1379
Robert A. P. Sweeney

Torsional Behaviour in Beam and Slab Decks ................................................................ 1389
Marco Petrangeli, Alberto Viskovic

Principles of Design of Pile Trestle Bridges ..................................................................... 1401
Anthony Ikpong

Dynamic Analysis of Bridges under Moving Loads .......................................................... 1412
Sanjay Gurav, Sukhvarsh Jerath

A Three Dimensional Nonlinear Finite Element Model for Analysis of Masonry Arch Bridges .............................................................................. 1422
A. Shayanfar, A. Sadeghian

Dynamic Analysis of Concrete Railway Bridge for High Speed Trains .......................... 1432
M. A. Shayanfar, M. Ansari, M. Ziaei

Railway Loadings and Reality .......................................................................................... 1443
Robert A. P. Sweeney

Probabilistic Methods in the Safety Assessment of Existing Bridges: A Step-by-Step Process ................................................................................. 1453
D. F. Wisniewski, J. R. Casas
Behavior and Load-Carrying Mechanism of RC Highway Bridge Deck Slabs with Strap
Tomio Yasuoka, Atsuhiko Machida, Samitha Jayakody

I-Girder Warping Stress Calculation in 2D FE Model
Yong Yang, Cory Imhoff

Fatigue of Tubular Bridge Joints using Welded or Cast Steel Node Solutions
Ann Schumacher, Alain Nussbaumer, Senta Haldimann-Sturm, Scott Walbridge

Control of Cracking for Concrete Bridges - The Performance of Calculation Models
Lars Eckfeldt

New Development to Calculate Friction Loss by 3D Finite Element Method (3DFEM)
F. Danesh, M. Ziaei, M. Ansari

Approach to the Design of High Speed Railway Bridges
J. Turmo, A. Meher Prasad

Some Implications of Using Eurocode 2 in the Design of Medium Span Bridges
J. Turmo, G. Ramos, A. C. Aparicio

Advanced Analysis and Technical Innovation of Lightweight Pedestrian Bridges
Stanislav Kmet, Jan Kanocz

Structural Evaluation of a Two-Cell Cast-in-Place Concrete Box Girder Bridge
Brad R. Craig, F. Michael Bartlett

Modeling of Existing Multi-Span Simply Supported Steel Girder Bridges under Seismic Loads
Bryant G. Nielson, Reginald DesRoches

Numerical Analysis of Rail - Structure Interaction and Resonance in Railway Bridges
Marco Petrangueli, Cristiano Tamagno

Impact of Hydration Heat on the Diaphragm Zone of a Rigid Frame Bridge - Case Study
Zhao Liu, Hua Zang, Wusong Wen, Xinya Zhou

Reliability-Based Bridge Rating Software
Michael H. Scott, Christopher C. Higgins, Gregory Esch

Live Load Distribution for Concrete Bridges with AASHTO/PCI Girders
Z. G. Yousif, R. A. Hindi

Ultimate Strength of Composite I-Girder in Pure Positive Bending
Masatsugu Nagai, Eiji Iwasaki, Yoshiaki Okui, Naofumi Inaba

Computer-Aided Geometric Design of Highway Bridges
Adel Fam, George Morcous, Mourad Baddoum

Prediction on Flexural Behaviour of Reinforced Concrete Beams: Application of a Fracture Mechanics Approach
Yail J. Kim, Mark F. Green, R. Gordon Wight

FE Analysis with Smeared Crack Model for Crack Width Evaluation in Continuous Composite Girders
Y. Okui, T. Honda, Q. Khan, M. Nagai

Structural Analysis of Cold Curved Steel Plate Girders
Antoine N. Gergess, Rajan Sen
Wind Loads on Pedestrian Bridges ................................................................. 1650
  J. P. C. King, U. Y. Jeong, L. Kong

Slab Cracking during Composite Bridge Construction: Effectiveness of Fractionated Castings in Controlling the Phenomenon ........................................ 1660
  Luigino Dezi, Fabrizio Gara, Graziano Leoni, Gianluca Ranzi

Numerical Study on the Dynamic Effects Caused by Vehicular Traffic on a Ferry Boarding Ramp .................................................................................. 1671
  Marc Savard

Design of Continuous Bridges with NU-Girders ........................................... 1684
  Gerd Birkle, James Hanley, Walter H. Dilger

Effective Slab Width in Composite Decks: New Formulas for Different Loading Conditions .............................................................................................. 1694
  Luigino Dezi, Fabrizio Gara, Graziano Leoni

The Soil Pressure Behind Integral Bridge Abutments ..................................... 1705
  Ming Xu

Some Considerations in Design of Bridges for Durability and Sustainability – Part 1 ........................................................................................................ 1712
  Saeed Mirza

Some Considerations in Design of Bridges for Durability and Sustainability – Part 2 ........................................................................................................ 1722
  Saeed Mirza

Assessing the North American Bridge Codes for the Design of T-Girders under Torsion and Shear ............................................................................ 1735
  A. Deifalla, A. Ghobarah

Advanced Materials in Bridges

Stainless Steel Rebar: A Long-Lasting Reinforcement for Bridges ................. 1745
  Frank N. Smith, Kevin Cornell

Behavior of Bridge Decks Reinforced with High-Performance Steel .............. 1752
  Hatem Seliem, Gregory Lucier, Sami Rizkalla, Paul Zia

New Parapet Wall on Existing Deck using GFRP for the Rehabilitation of Glendale Avenue Bridge Regional Road 89 over Twelve Mile Creek in the city of St. Catharines in Ontario, Canada ...................................................... 1762
  Brian Ellis, Duane VanGeest, Ralph Scholz

Development of Lightweight High Performance Concrete Mixes for Bridge Deck Reconstruction-Strength, Weight and Durability Characteristics .................. 1772
  Guy Mailhot, Glen P. Carlin

Glass FRP Jacketing of Prestressed Concrete Beams ...................................... 1783
  M. Demers, P. Labossiere, C. Mercier

Wear of Polyethylene Sheathings of External Tendons at Deviation Points in Post Tensioned Box Girder Bridges ......................................................... 1793
  Konrad Zilch, Hermann Weiher

Improving the Durability and Economy of Short and Medium Span Bridges through Internal Curing ..................................................................................... 1802
  John W. Roberts, Bruce Jones, Jessica Hulsman

Live Load Test of a SPS Deck Bridge .............................................................. 1813
  Devin K. Harris, Tommy Cousins, Thomas M. Murray, Angelo Ferro
Adhesively Bonded FRP Composite System for Rehabilitation of Bridge Deck .................. 1824
Zihong Liu, Tommy Cousins, Prasun K. Majumdar, Jack Lesko

High-Strength Concrete for Flexural Design of Bridge Girders .................................................. 1835
Halit Cenan Mertol, Sami Rizkalla, Paul Zia, Amir Mirmiran

Fatigue Behaviour of MMFX Corrosion-Resistant Reinforcing Steel .................................. 1846
Siebren J. DeJong, Colin MacDougall, Patrick J. Heffernan

The First Highway Bridge Applying Ultra High Strength Fiber Reinforced Concrete in Japan ......................................................................................................................... 1857
Hikari Okuma, Koichi Nishikawa, Ikuo Iwasaki, Tadatoshi Morita

Ductility and Deformability of Partially Prestressed Concrete Beams with Unbonded Tendons ...................................................................................................................... 1866
Karmen Tso, Francis T. K. Au, Ray K. L. Su

Investigation of an Innovative FRP-Reinforced Bridge Deck System .................................. 1877
D. Tardif, K. W. Neale, M. Demers, G. Tadros, A. R. Zaki

Shear Design and Behavior of High-Strength Concrete Bridge Girders .................................. 1888
Daniel A. Kuchma, Shaoyun Sun, Neil M. Hawkins

Mechanically-Fastened FRP Decking System ........................................................................... 1898
Dan Richards

Flexural Behaviour of Continuous Concrete T-Beams .................................................................. 1908
Shahryar Davoudi, Dagmar Svecova, Catalin Gheorghiu

Performance of Alberta Infrastructure and Transportation Fibre Reinforced Overlays .......................................................................................................................... 1918
Paul D. Carter, David J. Besuyen, Hamid Soleymani, Jingjing Chen

Ductal Prestressed Girders for a Traffic Bridge in Mayenne, France .................................. 1928
Mouloud Behloul, Olivier Bayard, Jacques Resplendino

Pedestrian Bridges using Rectangular FRP Box Sections Acting Compositely with Concrete Slabs ...................................................................................................................... 1939
Amir Fam

Energy Efficient Integrated Heating System for Bridge Deck De-Icing .................................. 1949
Pal s. Mangat, David G. Catley

Effect of Low and High Temperatures on the Transverse Thermal Expansion of FRP Bars Embedded in Concrete ........................................................................................................ 1959
Ali Zaidi, Radhouane Masmoudi

The Hillman Composite Beam ................................................................................................. 1970
John Hillman

Stainless Steel Use in Pedestrian Bridges .................................................................................... 1981
Frank N. Smith, Kirk D. Wilson

Building a Bridge with an Anticipated Service Life of 150 Years ........................................ 1991
Sylvain Goulet

Innovative Bridge System of Ultra High Performance Fibre Reinforced Concrete: Experiments, Modeling and Design .......................................................... 2004
L. G. Sorelli, P. Fanning, L. G. Sorelli, F. Toutlemonde

High Performance Steel for Highway Bridges ........................................................................... 2014
Vasant C. Mistry
New CHBDC Provisions for Design of Fibre Reinforced Structures ........................................ 2024

CHBDC Design Provisions for Rehabilitation of Bridges with FRPs ........................................ 2034

Utilisation of GFRP-Reinforced Concrete Panels for Box Girder Bridges ................................ 2044
T. Sabrah, H. Marzouk, A. Hussein

Evaluation of Medium Span Hybrid Cable Stayed Bridges with Advanced Composite Deck Using Finite Element Method ................................................................. 2055
Husham H. Almanour, M. S. Cheung

A New Concept for a Lightweight Hybrid-FRP Bridge Deck .................................................. 2066
Erika Schaumann, Till Vallee, Thomas Keller

Applications of CFRP-SIKA Carbodur for CPCI Girder Strengthening HWY 416-Dilworth Bridge, 2004 ................................................................. 2074
Wojciech Remisz

Proposed Shear Provisions for FRP Reinforced Bridge Beams and Girders .......................... 2084
J. Newhook, B. Benmokrane, G. Tadros

Static and Fatigue Performance of Concrete Bridge Deck Slabs Reinforced with Glass FRP Bars ........................................................................................................... 2095
Amr El-Ragaby, Sherif El-Gamal, Ehab El-Salakawy, Brahim Benmokrane

Shear Behaviour of Concrete Bridge Girders Reinforced with Carbon FRP Stirrups ......................... 2106
E. A. Ahmed, A. K. El-Sayed, E. F. El-Salakawy, B. Benmokrane

Instrumentation, Testing and Monitoring

Damage Identification of Girder Bridge's Flexural Stiffness ........................................ 2116
Hua Liu, Jianshu Ye

Application of Long Gage-Length Fiber Optic Sensors to Monitor Bridge Structures ................ 2124
R. C. Tennyson, N. Banthia, A. Mufti, E. Rivera

Structural Evaluation of Dreznik Bridge .......................................................................... 2134
Damir Tkalcic, Davor Banic, Igor Dzajic

Application of Long Range 3D Laser Scanning for Remote Sensing and Monitoring of Complex Bridge Structures ............................................................... 2144
Guy Mailhot, Sorin Busuioc

Fatigue Tests on Full-Scale Reinforced Concrete Slabs: A Case Study .................................. 2154
M. P. Natali Sora, G. Rosati

Non-Destructive Testing of Reinforced Concrete Bridge Decks by the GPR Technique .................. 2166
J. Rhazi, S. Laurens, O. Dous

Wavelet Analysis for Damage Assessment of an Existing Concrete Bridge .......................... 2172
Alireza Alvandi, Josee Bastien, Etienne Gregoire, Marc Jolin

Experimental Investigation of Ultimate Strength of Concrete Filled Steel Tube Girder ............. 2182
Won-Jong Chin, Jae-Yoon Kang, Eun-Suk Choi, Jung-Woo Lee
Experimental and Theoretical Natural Frequencies of Vibration for Fatigued Concrete Beams with FRPs ................................................................. 219
  Catalin Gheorghiu, Daniel Bockstael, Jamal E. Rhazi, Pierre Labossiere

Comparing Monitoring and Prediction Results of a HPC Cantilever Bridge ........................................... 2203
  Cornelis van der Veen, Ane de Boer

Remote Security Monitoring of Historic Covered Bridges .......................................................... 2213
  Micael D. LaViolette, James Vis, Brent Phares, Terry Wipf, Todd Hagan, Joe Murphy

Testing of Precast Prestressed Concrete Railroad Bridges .......................................................... 2222
  Duane Otter, Brian Doe, Muhammad Akhtar

Comparison of Two Identical Twin Highway Bridges ................................................................. 2233
  Jean-Francois Laffamme, Marc Savard, Martin Talbot

Assessment of Bridge Deck Slabs by Radar, Potential of Corrosion and Electric Resistivity .......... 2246
  O. Dous, J. Rhazi, G. Ballivy

Response of Helical Steel Culverts during Backfilling in a Full Scale Test Program ........................................... 2255

Dynamic Load Rating of Single-Span County Bridges ............................................................. 2265
  Shen-En Chen, Zhisong Zhao

Structural Acoustics for Bridge Reliability Evaluation ........................................................................... 2274
  D. Robert Hay, Joel R. Hay, Jose Cavaco, Thomas R. Hay

Field Tests of Soil-Steel Bridge Structure ...................................................................................... 2284
  Beben Damian, Manko Zbigniew

Relaxation of Prestressing Steel used in Construction of the Confederation Bridge .................. 2295
  S. Abu Dabous

An Efficient New Detailing of Reinforced in Dapped Ends of Bridge Girders .................................. 2305
  Rainer Herzinger, Mamdouh Elbadry

Repair, Maintenance and Evaluation

Learning-Based Bridge Inspection Decision-Support System ...................................................... 2316
  Y. Hu, A. Hammad

Field Performance of Prestressed Concrete Bridge Girders Protected by Cathodic Protection and Concrete Surface Treatment ........................................... 2327
  Nathalie Chagnon

Evaluation and Repair Strategies for Alubaale Dam Bridge ......................................................... 2337
  A. G. Kereli

Failure Investigation of Steel Arch Bridge in Latchford, Ontario ....................................................... 2347
  Dino Bagnariol, Walter Kenedi

Cleaning and Painting of the Jacques Cartier Bridge, Completing the Challenge after 15 Years of Work and More Than $45 M of Investment ......................................................... 2358
  Glen P. Carlin, Guy Mailhot

Evaluating the Fatigue Life of Reinforced Concrete Bridges .......................................................... 2368
  Artur F. Eckert, Luiz C. P. Da Silva Filho, Francisco P. S. L. Gastal

Fatigue Behavior of Impact Damaged Restressed Concrete Bridge Girder Repaired with CFRP Heats ................................................................. 2377
  Anthony Miller, Owen Rosenboom, Sami Rizkalla
Garden City Skyway Substructure Rehabilitation ................................................................. 2387
Issam ElKatib, Dennis Baxter

Performance and Design Considerations of Sliding Plate-Strip Seal Expansion Joints ................................................................. 2397
David Lai, Naran Patel

Testing and Monitoring the Performance of Queensway Pedestrian & Cyclist Bridge ................................................................. 2408
A. G. Kerale

Inspection of Timber Bridges ............................................................................................. 2417
Anna Pousette, Per-Anders Fjellstrom

Assessment and Maintenance of a 15 Year Old Stress-Laminated Timber Bridge ........ 2427
T. Russell Gentry, Karl N. Brohammer, John Wells, James P. Wacker

Fatigue of High Strength Bolted Connections in Tension .................................................... 2437
Ian MacPhedran, Gilbert Y. Grondin

Containment Design for the Pattullo Bridge Steel Coating Operations ............................. 2448
P. A. Scalzo, K. W. Simbeya, J. G. Hartviksen

Mechanical and Health Monitoring Performance of RC Concrete BridgeExternally Reinforced by CFRP Bonding ............................................................ 2458
E. Ferrier, A. Si-Larbi, P. Hamelin

Seismic Evaluation of Lemieux Island Pipeline Bridges - A Lifeline for the City of Ottawa Fresh Water Needs ................................................................. 2468
Jack Ajrab, Sylvain Montminy, Bruce Mason

Live Load Distributions on an Impact-Damaged Prestressed Concrete Girder Bridge ........ 2480
Yail J. Kim, Mark F. Green, R. Gordon Wight

System Reliability Models for Steel Girder Bridges ............................................................ 2491
Artur A. Czarnecki, Andrzeje S. Nowak

Analysis and Design of Rehabilitated Built-Up Hybrid Steel Compression Members ........ 2502
Katherine K. W. Shek, F. Michael Bartlett

Bridge Inspection and Evaluation on Croatian Highways .................................................. 2513
Davor Banic, Damir Tkalcic, Zana Banić

Preliminary Seismic Performance Evaluation of Highway Bridges ..................................... 2522
Ozgur Avsar, Alp Caner, Ahmet Yakut, Gizem Sevgili

Proposed Fatigue Criteria for Load Rating Prestressed Concrete Bridges Based on Stress Range in the Strand ................................................................. 2532
Michael J. Hagenberger

Reliability-Based Deterioration Model for Deflection Limit State of Steel Girder Bridges ................................................................. 2543
Pascal Laumet, Andrzej S. Nowak

Side-by-Side Box-Beam Bridge-Performance and Design Issues .................................... 2553
Upul Attanayake, Haluk M. Aktan

Historic Bridges

Application of Context Sensitive Design Principles and Processes to Replace a Heritage Bridge in Ontario ................................................................. 2565
Tanya Cross, Susan Wagter, Edward Li
Rehabilitation of the Historic Bridge of Lions, St. Augustine, Florida ...................................................... 2575
Joseph J. Pullaro, David T. Sweeney

Raising of the Jacques Cartier Bridge - Historical Account of a Daring Engineering Feat .................................................................................................................. 2585
Guy Mailhot, Glen P. Carlin, Peter Dozzi

Rehabilitation of the Historic Woodrow Wilson Memorial Bridge ................................................................. 2594
Evan C. Lowell, Richard C. Ferguson

Repair of a Steel Bridge with High Heritage Value ................................................................................................. 2604
Christian Mercier

Wrought-Iron Bowstring Arch-Truss Bridges: The One-Hit Wonder of the 1870s ...................... 2615
F. Michael Bartlett, Dana R. Tessler

Improving Infrastructure While Preserving History: Washington Bridge No. 200 Replacement .................. 2625
Bharat Patel

Aesthetics

Development of the "Aesthetic Guidelines for Bridges" for the Province of Ontario ........................................ 2636
Edward Li, Iqbal Husain

Port Moody Cable-Stayed Pedestrian Overpass .................................................................................................. 2646
Leslie Mihalik, Dejan Erdevicki

A Historical Review of Bridge Aesthetics in Ontario .......................................................................................... 2654
Roger Dorton, Mark Langridge, Edward Li

Bridge Design and Aesthetics in Fast Construction, Implemented on Motorways in Croatia ........................................ 2664
Ana Krecak, Petar Sesar

Aesthetic Enhancements of the Petitcodiac River Bridge No. 1 ................................................................. 2673
Bruce Boyd, Drista MacDonald

New Croton Dam Spill Way Bridge ..................................................................................................................... 2683
Ronald T. Roman

The East 153rd Street Bridge – New York City's First Vehicular Cable Stayed Bridge ................................ 2693
Alim Baycora, Jeffrey Han, Roly Parroco
