Copyright Transfer Agreement
All authors must agree to the following conditions regarding the publication of papers as part of the 2007 No-Dig Conference Proceedings.

Whereas NASTT is undertaking to publish the paper named above, of which the undersigned is author of one or more parts, the author transfers and assigns to NASTT the copyright therein and all rights protected by copyright. The author shall receive no royalty or other monetary return from NASTT for the use of his/her material.

Authors have the right to publish their papers in scholarly or professional journals when they wish to do so, subject to NASTT receiving proper credit in the journals in which the contribution is subsequently published. Thus, this agreement will in no way impede the rapid dissemination of research material.

The author(s) guarantee that the material furnished for NASTT publication has not been previously published elsewhere, or that, if it has been previously published in whole or in part, permission has been obtained for publication by NASTT. The author will show due credit in his contribution for any previously published material. The author warrants that the paper is original and that he/she is the author and owner of the paper.
TABLE OF CONTENTS

Volume 1

**TRACK A1: CIPP REHABILITATION**

Principles and Practice for the Design and Selection of Pressure Pipe Lining Systems ......................................................................................................................... 1  
Dec Downey, John Heavens, Simon Ngo

Large Bore Rectangular Box Culvert and Non Circular Rehabilitation with CIPP ................................................................. 11  
Fred Tingberg, Jr.

Testing of CIPP Resins used within the City of Toronto Sewers .................................................................................................................. 17  
Mark Knight, Kamran Sarrami

Cured in Place Pipe - Minimizing Risk by Defect Coding .................................................................................................................... 28  
Robert K. Lee

Risk Mitigation of Large Diameter Cured-In-Place-Pipe Rehabilitation Work Utilizing Fiber-Reinforced Composite Sandwich Technology .................................................................................................................. 37  
David Hahn

**TRACK A2: CONDITION ASSESSMENT**

Roseville Begins Rehabilitation of Pipelines ................................................................................................................................. 47  
Bruce Corwin, Michael Zacharia, Mike Fisher

Crestwood Neighbourhood Rehabilitation and Upgrading .................................................................................................................. 56  
Herman Ng, Ken Chua, John Cairns, Michael Kan, Gary Fei, Sean Novak

San Diego County Water Authority's Aqueduct Protection Program ........................................................................................................ 66  
John J. Galleher, Jr., Mark Holley, Myron Shenkiryk, Gary Eaton

What Happens in Las Vegas..Happens Everywhere ....................................................................................................................... 74  
Bud Swensen, Steve Weber

Northcrest Afton Sewer Rehab Project Multiple Technologies ........................................................................................................... 84  
James W. Shelton, Michael T. Harmer

**TRACK A3: HDD CASE STUDIES**

HDD Design and Construction Challenges ................................................................................................................................. 93  
David Bennett, Glenn Duyvestyn, Neil Woodroffe

HDD Design and Construction Challenges or Blair Waterway Utility Relocation ....................................................................................... 104  
Mark Havekost, Scott Bicke

Utility Services to Peddocks Island - Fort Andrews ....................................................................................................................... 117  
K.E. McHugh, P.F. Gabriel

Design and Risk Management for a Multiple Crossing Project ...................................................................................................... 125  
Nicholas H. Strater, Pascale J. Ambrosio, Brian C. Dorwart, Ron Haldeman
HDD Dealmakers and Dealbreakers ................................................................. 134
Mathew Francis, Richard Harada, Larry Rapp, Timothy Steinberger

TRACK A4: PIPE REPLACEMENT

City of Calgary - Decision to Apply Pipe Bursting for Challenging Sewer and
Storm Drain Replacement .............................................................................. 147
Cliff Brady, Wing Chan

Open-cut vs. Trenchless Technology Bursting Tradition at the Bagley Industrial
Park .............................................................................................................. 156
Leo Florence

West 2nd Avenue and Sasamat Street - The City of Vancouver Advances in
Trenchless Technology Installing Twinned Sewers Simultaneously by Pipe
Bursting ..................................................................................................... 160
Ken Nguyen, Mike Prentice, Jenn Veenstra

The Need For Trenchless Pipe Replacement Techniques in Developing Countries ............ 165
Alan Atalah

Lessons Learned from Large Diameter Sanitary Sewer Pipe Bursting Project:
Conversion of Abandoned Gravity Sewer Main into Upsized Sanitary Force Main .......... 173
Collins Orton, Kent Von Aspern

TRACK B1: CIPP PERFORMANCE

Numerical & Experimental Examination of the Long-Term Performance of CIPP
Pressure Pipe Liner ..................................................................................... 182
G. Shanhai, E.N. Allouche, M.E. Baumert, R.L. Sterling, K. Bainbridge

A Comparison of Cured In Place Pipe (CIPP) Mechanical Properties .................. 192
David J. Herzog, Anthony J. Bennett, Kaleel Rahaim, Jason D. Schiro

Long-Term CIPP Performance and It's Design Implications .............................. 201
Robert K. Lee, Steve Ferry

A Higher Level of Quality & Testing for CIPP Installations is a Reality ................. 212
Gerhard P. Muenchmeyer

TRACK B2: CONDITION ASSESSMENT

Fairfax County Storm System Rehabilitation Program ........................................ 218
James W. Shelton, Kathryn A. Moore

Using GIS and GPS for Sanitary Sewer Condition Assessment .......................... 226
Terry Moy, Gilbert Inouye, Eric MacDonald

Super Sanitary Sewer Solution: Solving Complicated Sanitary Sewer Problems
with Innovative Engineering, Fieldwork and computer software ....................... 235
John Schroeder, Rodney Moeller, Timothy Fallara

Innovative Technology Provides Real-Time Sewer Flow Data Management .......... 245
Larry Sherry, Patrick Stevens

TRACK B3: MICROTUNNELING: CASE STUDIES

Microtunneling in San Diego ........................................................................ 255
Craig Camp

BWARI Project Trenchless Technology ......................................................... 265
Thomas L. Richardson
