### TABLE OF CONTENTS

#### Volume 1

**Technical Papers Contents**

**Gearbox Corrosion Prediction Via Oil Condition Sensing and Model Fusion**
*Carl Byington, Ryan Brewer, Sanket Amin, Ted Meyer, Vijit Nair, James Hopkins*
1

**Friction and Flash Temperature Under Transient EHL Conditions**
*Dr. Vasilios Bakolas*
20

**Experiences and Testing of An Autonomous On-Line Oil Quality Monitor for Diesel Engines**
*Carl Byington, Ryan Brewer, Vijit Nair, Adam Mott*
45

**High Performance Liquid Chromatography Identification, Quantification, and Fractionation of A Suspect Allergen, 4-Chloro-3-Methylphenol, In A Lina Positive Metalworking Fluid**
*Kenneth Brown, Keisha Robinson*
68

**Sub-Foil Stiffness Effects In Gas Lubricated Foil Journal Bearings**
*Marc Carpino, Gita Talmage*
89

**Prediction of Hot Spots By Correlating Finite Element Analysis and Measurement for Automotive Disk Brake**
*Hojoon Cho, Chongdu Cho*
119

**Prediction of Polymer Wear - An Analytical Model and Experimental Validation**
*S. K. Roy Chowdhury, Prasun Chakraborty*
131

**Sensitivity of Air-Coupled Ultrasound and Eddy Current Sensors To Bearing Fault Detection**
*Azzedine Dadouche, A. Rezaei, V. Wickramasinghe, W. Dmochowski, J. Bird, F. Nitzsche*
161

**Dynamic Behavior of A Dual Rotor Integrating An Oil Damped Intershaft Bearing**
*Cyril Defaye, Mihai Arghir, Olivier Bonneau, Frederic Imbogne*
195

**Visual Identification of Surface Defects on a CGI Honed Cylinder**
*Dr. Jefferson De Oliveira Gomes, Marcelo Vasconcelos De Carvalho, Cassio Luiz Francisco De andrade, Carlos Eduardo Turino*
203

**Sensitivity of Tilting-Pad Journal Bearing Performance To Manufacturing Tolerances: Dynamic Properties**
*Waldemar Domchowski, Azzedine Dadouche, Michel Fillon*
211

**Real-Time Viscosity Measurement for Condition Based Monitoring Using Solid-State Viscosity Sensor**
*K. Durag, J. andie*
225

**Cost Justification for Industrial Oil Analysis**
*Ray Garvey*
237

**The Ultrasonic Tribologist – Using A Sonic/Ultrasonic Sensor To Monitor for Inadequate Lubrication**
*Ray Garvey*
252

**Thin Film Lubrication: Replenishment of Rolling Bearings**
*Leonid Gershuni, Mats G. Larson*
260

Prediction of Stick-Slip Behaviour With The Aid of The Oscillation Friction Wear Tester SRV .................................................................................................................. 898

Jan Zuleeg

Extended Abstracts Contents

Wear Evaluation of High Interstitial Stainless Steels ................................................................. 908
J.C. Rawers, J.H. Tylczak, D.E. Alman

Investigation of A Water-Lubricated Journal Bearing Using Conventional and CFD Approaches .......................................................................................................................... 911
R. W. Armentrout, Fellow Engineer, A. E. Reed, M. He

A Quantitative Test of The Einstein-Debye Relation Using The Shear-thinning of Low Molecular Weight Monodisperse Liquids ................................................................. 921
Scott Bair, George Woodruff

Effect of Joule and Coulomb Heating On Wear and Coefficient of Friction In Sliding Electrical Contacts .................................................................................................................. 924
Dinesh Bansal, Jeffrey Streator

The Effects of Selected Contaminants & Walking Speed On Tendency To Slip During Walking As A Function of Foot Velocity and Acceleration: An In Vivo Characterization .................................................................................................................. 928
Marcus P. Besser, Howard Medoff, Mark Marpet

Classic Fretting Fatigue of Forged Ti-6Al-4V for Compressor Disc Application ......................... 931
Robert K. Betts

A Simple of Approach of The TEHD Behavior of Mechanical Face Seals ........................................ 935
Noël Brunetière, Alexandru Apostolescu

Industrial Gear Oil Foam Control .................................................................................................. 938
Dr. Angeline B. Cardis

Identification of Bearing and Gear Tooth Damage In A Transmission System ................................... 940
F.K. Choy, W. Jia, R. Wu

Lubrication and Deep Cryogenic Treatment—Reducing Failures and Extending Wear Life In Power Generation Equipment .................................................................................................. 943
William E. Defelice, Richard N. Wurzbach

Application of Impedance Spectroscopy To The Development of Superior Corrosion Inhibitors for Metalworking Fluids ......................................................................................................... 947
B.-J. De Gans, J. Wenzmer, R. Hansel, S. Stadtmueller, G. Khemchandani

On The Multiplicity and Transition of Taylor-Couette Flow .......................................................... 950
D. Deng, M.J. Braun

Deterministic Modeling of Elasto-Plastic Contact and Mixed Lubrication In Small Fluid Film Bearings .......................................................................................................................... 954
Mihai B. Dobrica, Michel Fillon, Patrick Maspeyrot

Novel Microscale Surface Textures for Hydrodynamic Lubrication .................................................. 958
Ravi S. Duvvuru, Robert L. Jackson, Jong Wook Hong

Modified Pibsa Dicarboxylate: A Multifunctional Emulsifier and Corrosion Inhibitor for Water Based Metalworking Fluids .................................................................................................. 960
Alan Eckard, Philip Littlewood, Andrew Ishwood

New Materials With Greatly Improved Wear Resistance ................................................................... 968
Xuan Li, James Economy

Recovery, Cleaning and Eventual Re-Use of Oil and Water From Dumped Rolling Oil Emulsions ................................................................................................................................. 974
MARIE EKMAN, Arne Berg
A Study of The Thermodynamic Performance of A Three – Wave Journal Bearing
Nicoleta M. Ene, Florin Dimofte, Theo G. Keith Jr., Laurentiu Moraru, Robert F. Handschuh

Surface Tearing When Machining Sintered Nickel-Base Alloy
E. O. Ezugwu, J. Bonney, A. Mantle, W. F. Sales, Minas Gerais

Laser Textured Tappet Shims for Valvetrain Friction Reduction
Arup Gangopadhyay, Douglas G. Mowatt, Mike Broda

Operating Experience In Monitoring Anti-Oxidants In Lubricating Oils By Ruler Technique In Nuclear Power Generating Station
Bernie Heath

Novel Environmental Lubricant Additive Derived From Natural Resources
S. Hiyoshi, S. Nakayama, T. Inayama, Y. Isogai, L. Minami

Diagnosis for Lubricating Oils By Colorimetric Analysis
Tomomi Honda, Yoshihiro Ito

Color Characterization of Membrane Patches
Tomomi Honda, Yoshihiro Ito

A Numerical Solution of Lubricated Grooved Self-Adapting Surfaces
Jiang Lei, Robert Jackson

Friction and Wear Characteristics of Biodiesel Contaminated Lubricants

Understanding Mechanical Seal Performance In Moderate Pressure, Light Hydrocarbon Services
Bill Key, Alan O. Lebeck,

Fuel and Water Diagnostic Enhancements At BNSF Railway
Alex Kreyn, John Turner, Allison M. Toms

Effect of Surface Texturing On Thin Film EHD Lubricated Contact
Ivan Krupka, Martin Hartl

Effect of Thin Viscous Boundary Films On Real Surface Roughness Under Thin Film Lubrication Conditions
Ivan Krupka, Martin Hartl

Correlation Between Friction and Flow In A New Tribometer Device
Jörg Läuger, Patrick Heyer

Design and Synthesis of A New Family of Sterically Hindered Aliphatic Polyester Lubricants for Hard Disk Drives
Xuan Li, Wei Xiao, Christian Fischer, Brian Fabio, James Economy

An Elastohydrodynamic Lubrication Model for Coated Surfaces In Point Contacts
Yuchuan Liu, W. Wayne Chen, Dong Zhu, Shuangbiao Liu, Qian Jane Wang

Palm-Based Bio-Fluids and Lubricants
S.K. Loh, M. Choo

Permeability of Sinter Bronze Friction Material for Wet Clutches
Par Marklund, Roland Larsson, T. Staffan Lundstrom

Uncertainty Issues In Tribometric Testing: Isolating The Contribution of The Tribometer
Mark I. Marpet, Howard P. Medoff, Marcus Besser

Evaluation of Trifluorotris(Pentafluoroethyl) Phosphate Derivatived Ionic Liquids As Lubricants
I.Minami, M. Kita

Thermo-Oxidative Stability of Ionic Liquids As Lubricating Fluids
I.Minami, H.Kamimura
Precise Measurements of The Stiffness of The Wave Bearing Elastic Support With Micrometric Displacements ................................................................. 1041
L. Moraru, F. Dimofte, K.C. Masiulaniec, A. Afjeh, N. Ene, A. Flegel

Modtc Low Friction Tribofilm Durability – Effect of Interactions With ZDDP and Their Dependence On Substrate Material........................................... 1044
Ardian Morina, Anne Neville, Tabassumal Haque

Complexing of Lithium Soap Greases – A New Approach ........................................ 1047
G Baskaran, C S Krishnaswamy

Tribological Studies Under Starved Lubrication Conditions Using C02 As A Refrigerant ........................................................................................................ 1050
Emerson Escobar Nunez, Nicholas G. Demas, Andreas A. Polycarpou

Biodegradable Elevator Hydraulic Fluids ................................................................. 1053
J.M. Perez, B.K. Sharma, N. Higgins, S.Z. Erhan

Amino Alcohol Effects On Fluid Longevity – A Laboratory Study ..................... 1056
Bonnie Pyzowski, Dr. Charles Coburn, John L. Pohlman, Patrick Brutto

The Influence of Metalworking Fluids On Common Plastics ............................ 1058
Edward Rolfert

Static Characteristics of The Hybrid Air Wave Bearing ........................................ 1059
Adrian Sescu, Carmen Sescu, Florin Dimofte, Sorin Cioc, Abdollah A. Afjeh, Robert Handschu

Formulations of Performance Parameters for Adiabatic Infinitely Wide Journal Bearings In Turbulent Isothermal and THD Regimes ............................ 1062
Shiuh-Hwa Shyu, Yeu-Ren Jeng, Fuli Lee, Wei-Ren Lee, Sheng-Jii Hsieh

Thermal and Roughness Effects In A Slider Bearing With Special Reference To Load Generation In Parallel Sliders ....................................................... 1065
Prawal Sinha, Getachew Adamu

Evaluation of Vapor Pressure and Ultra-High Vacuum Tribological Properties of Ionic Liquids ................................................................. 1069
Kenneth W. Street, Jr., Wilfredo Morales, Victor R. Koch

The Influence Parameters of High Pressure Mechanical Gas Face Seals ............... 1072
Sébastien Thomas, Noël Brunetiere, Bernard Tournerie

Fourier-Transform Infrared (FTIR) Spectroscopy – Applying The Correct Method for Your Application ................................................................. 1075
Allison M. Toms

Friction Analysis In Laser Textured Surface Lubricated Contacts ....................... 1078
Christophe Vincent, Costin Caciu, Guy Monteil, Etienne Decenciere, Dominique Jeulin

A Three-Dimensional Numerical Model for Squeeze Film Dampers With Gaseous Cavitation Using Navier-Stokes Equation ..................................... 1082
Changhu Xing, Minel J. Braun, Hongmin Li

Damascene Structure of Ge-Sb-Te for Chalcogenide Phase Change Memory By Chemical Mechanical Polishing With In-Situ Detection ....................... 1085
Kailiang Zhang, Zhitang Song, Jun Xiao, Songlin Feng, Norm Gitis
