TABLE OF CONTENTS

Volume 1

MONDAY, JUNE 4

SESSION A: SOIL RECONSTRUCTION

Making and Building a Fluvial Geomorphic Reclamation Design at an Active Dragline Mine using the GeoFluvTM Design Method ................................................................. 1
   David Measles, N. Bugosh

Evaluation of a Mechanical System for Reconstructing Soil Without Traffic Compaction .................................................................................................................. 9
   Larry Wells, V.S. Bodapati

Tree growth and Natural Regeneration on Three Loose-Graded Surface Mine Spoil Types in Kentucky: Preliminary Findings ................................................................. 22

The Role of Large Storms in Determining Mean Annual Sediment Yield ........................................................................................................ 36
   Leonard Lane

Egg-Crate Mine Subsidence ........................................................................................................... 46
   M.L. Dunn, Jr.

SESSION B; FORESTRY: RECLAMATION AND REVEGATION

Appalachian Regional Reforestation Initiative and the Forestry Reclamation Approach ................................................................................................................................. 55
   V.M. Davis

Evaluation of Low Spoil Compaction Techniques for Hardwood Forest Establishment on an Eastern Kentucky Surface Mine ................................................................................. 61
   A. Michels, C.D. Barton, T. Cushing, P.N. Angel, R.J. Sweigard, and D.H. Graves

Comparison of Forest Regeneration in a Subsidence Zone to a Reference Area .......... 73
   A. Wagner, J. Niemeier, B. Buchanan, and J. Tucker

Evaluation of Mine Spoil Suitability for the Introduction of American Chestnut Hybrids in the Cumberland Plateau .................................................................................. 79
   M.E. French, C.D. Barton, D.H. Graves, P.N. Angel, and F.V. Hebard

Survival and Growth of Native Hardwoods on a Reclaimed Surface Mine .................. 89
   P. Emerson and J. Skousen

Survival of Commercial Hardwoods on Reclaimed Minesoils in West Virginia: 6th Year Results .................................................................................................................. 98
   J. Skousen, J. Gorman, and P. Emerson
SESSION C; BIOREACTORS

Evaluation of a Two-Stage Passive Treatment Approach for Mining Influenced Waters .............................................................................................................................................. 115
L. Figueroa, A. Miller, M. Zaluski, and D. Bless

Ethanol-Fed or Solid-Phase Organic Sulfate Reducing Bioreactors for the National Tunnel Drainage, Clear Creek/Central City Superfund Site? .............................................................. 125
E. Buccambuso, A. Ruhs, L. Figueroa, J.J. Gusek, T. Wildeman, M. Homes, and D. Reisman

Microbial Activity of the Peerless Jenny King Sulfate Reducing Bioreactor System ............................................................................................................................................. 136
E. Buccambuso, L. Figueroa, J. Ranville, T. Wildeman, and D. Reisman

Passive Removal of Selenium From Gravel Pit Seepage Using Selenium Reducing Bioreactors ....................................................................................................................................... 150
J. Pahler, R. Walker, T. Rutkowski, and J.G. Gusek

POSTER SESSION

Detection of Diesel Contamination From Storage Tanks at Two Mining Sites Using Geophysical Techniques..................................................................................................................... 163
J.S. Cooper and S. Jin

The Impact of Small Mammal Browsing on Vegetation Success on a Reclaimed Mine in New Mexico ........................................................................................................................................... 164
T.R. Ramsey, B.A. Buchanan, and J. Haen

Recolonization of Reclaimed Coal Mine Land in Wyoming by Arthropods and Nematodes .............................................................................................................................................. 167
V.A. Regula and P.D. Stahl

Assessing Visual Quality Through a GIS-Based Remote Access Methodology ............................................................................................................................................... 168
A. Mazure and J.B. Burley

Rooting Depth of 3 Year Old Seedlings into Overburden Piles at a High Elevation Hard Rock Mine ........................................................................................................................................... 169
A. Wagner, B.A. Buchanan, and S. Buchanan

Visual Impact and Reclamation of Limestone Quarries in Algarve, Portugal ............................................................................................................................................... 176
T. Panagopoulos, R. Matias, and B.R. Ramos

Raccoon Creek Restoration Project Washington County, PA ............................................................................................................................................... 183
K.J. Durrett, T.P. Danehy, and B.K. Leavit

Assessment of Inocula to Enhance Startup of Ethanol-Fed and Solid-Phase Organic Sulfate Reducing Bioreactors for the National Tunnel Drainage, Clear Creek/Central City Superfund Site ............................................................................................................................................... 184
A. Ruhs, L. Figueroa, T. Wildeman, M. Holmes, and D. Reisman

Survey of Low Flow Drainages and Seeps in Colorado to Assess Implementability of Passive Treatment Options ............................................................................................................................................... 192
L. Figueroa, M. Zaluski, D. Bless, and M. Holmes

Biological Source Treatment for the Treatment and Prevention of Acid Mine Drainage ............................................................................................................................................... 193
J.M. Morris and S. Jin

Genetically Engineered Mycorrhizal Fungi for Reforestation ............................................................................................................................................... 194
S. Hiremath and G. Podila
TUESDAY, JUNE 5

SESSION A: ACID MINE DRAINAGE

Testing Durability of Acid Rock Passivation to Root System Activity within Greenhouse Columns

A Preliminary Laboratory Study of Subaqueous Disposal of Contaminated Mine Waste
J.A. LaBar and R.W. Nairn

Comparison of Sludge Characteristics Between Lime and Limestone/Lime Treatment of Acid Mine Drainage
A.W. Miller, P.L. Sibrell, and T.R. Wildeman

Assessment of EcotiteTM for Use in Acid Rock Drainage
T.W. Schmidt and B.R. Schultz

Changes in Water Quality of 34 Above Drainage Mines in West Virginia
B. Mack and J. Skousen

Solving Mine Drainage Problems at Soudan State Park – One Step Forward, Two Steps Back
P. Eger

A Legacy of Nearly 500 Years of Mining in Potosí, Bolivia: Acid Mine Drainage Source Identification and Characterization
W.H. Strosnider, R.W. Nairn, and F.S. Llanos

The Use of Watershed Cooperative Agreement Program Funds to Reclaim Small Acid Mine Drainage Problems
J.W. Coleman

Treatment of Metal-Mine Effluents by Limestone Neutralization and Calcite Co-Precipitation
P.L. Sibrell, T.R. Wildeman, M. Deaton, and D.J. Reisman

The Use of Steel Slag in Passive Treatment Design for AMD Discharge in the Huff Run Watershed Restoration
J. Hamilton, J. Gue, and C. Socotch

Hybrid Treatment Systems for Very Acidic Mining Influenced Water
J.J. Gusek and K.W. Conroy

SESSION B: SOIL PROPERTIES

Carbon Accumulation Potentials of Post-SMCRA Coal-Mined Lands
C.E. Zipper, J.A. Burger, J.M. McGrath, and B. Amichev

The Influence of Management Practices on Microbial and Total Soil Nitrogen
L.J. Ingram, P.D. Stahl, and J. Anderson

Physical and Chemical Properties of Topsoil Used for Biological Restoration of Coal Mine Waste-Based Structures in the Upper Silesian Coal Basin in Poland
A. Patrzalek and M. Pozzi

Red Oak Seedling Response to Different Topsoil Substitutes After Five Years
J.A. Burger, D. Mitchem, and W.L. Daniels

Recovery of Reclaimed Soil Structure and Function in Relation to Plant Community Composition
A.F. Wick, P.D. Stahl, S. Rana, and L.J. Ingram
Constraints on Natural Revegetation of Hard Rock Milling Tailings Impoundments
R.L. White and R.W. Nairn

Preliminary Assessment of Time Trends in Bioavailable Metals in the Tri-State Lead/Zinc Mining District Through Analyses of Tree Cores
W.J. Andrews, R.W. Nairn, and W.G. Minarik

Soil Microbial Community Composition in Reclaimed Soil Under Different Vegetation in Wyoming Minelands
S. Rana, P.D. Stahl, L.J. Ingram, and A.F. Wick

SESSION C: COAL BED NATURAL GAS (CBNG) PRODUCED WATER PROJECT FUNDED BY THE DEPARTMENT OF ENERGY (DOE)

Estimation of Groundwater Recharge in the Powder River Basin
F.L. Ogden and K. Puckett

Isotopic and Geochemical Characterization of the Powder River, Wyoming and Montana
S.A. Carter, J. Mailloux, C.D Frost

Monitoring Groundwater Contamination by Trace Elements from CBNG Disposal Ponds Across the Powder River Basin, Wyoming
S. Sharma, and M.T. Meredith

Modeling of Groundwater Contamination by Trace Elements from CBNG Disposal Pond
B. Chen-Charpentier and F. Furtado

Getting the Salt Out: Technologies and Costs to Treat CBNG Waters
E.T. Sajtar, D.M. Bagley, and D.W. Johnson

Potential Utilization of Natural Zeolites for Treating Coal Bed Natural Gas (CBNG) Produced Water Studies
G.F. Vance, H. Zhao, M.A. Urynowicz, G.K. Ganjegunte, and R.W. Gregory

Using Strontium Isotopes to Evaluate CBNG Irrigation Amendments
E.L. Brinck and C.D. Frost

Longitudinal Changes in Potential Toxicity of Coal Bed Natural Gas Produced Water Along Beaver Creek in the Powder River Basin, Wyoming
L.A. Johnson, C.J. Boese, B.A Morris, and J.S. Meyer

Identifying Mosquito Larvae Habitat Created by CBNG Discharge Waters Using Remote Sensing
S.N. Miller, H.R. Griscom, R. Sivanpillai, and L. Zou

Aspects of Coalbed Natural Gas Water and Oil Recovery
X. Xie, H. Pu, and N.R. Morrow

Volume 2

WEDNESDAY, JUNE 6

SESSION A1; REVEGETATION: ESTABLISHMENT, DESIGN, AND EVALUATION

The Influence Of Different Ground Cover Treatments On The Growth And Survival Of Tree Seedlings On Remined Sites In Eastern Tennessee
John Rizza, Jennifer Franklin, David Buckley
Amending Bauxite Residue Sands With Residue Fines To Enhance Growth Potential ................................................................. 494
Jonathan D. Anderson, Richard Bell, Ian Phillips

Determination Of Phytoremediation Potential Of Desert Broom Grown In A Mine Tailings Reclamation Project ........................................ 509
Nazmul Haque, Jose R. Peralta-Videa, Gary L. Jones, Jorge L. Gardea-Torresd

Assessment Of Reclamation Potentiality In The Lignite Mines Of Northern Greece .................................................. 520
T. Panagopoulos

Nickle Plate Abandoned Mine Pool “Blowout” Washington And Allegheny Counties, Pennsylvania .................................................. 529

SESSION A2: WATERSHED HYDROLOGY

Adaptive Watershed Management In The Copper Basin: Evaluation Of Early Successes ............................................................. 546
K.Y. Bell., L. Stokes, F. Miller, K.L. Faulk

Design And Reporting Criteria For Reed Bed And Fen Restoration In Mineral Workings ............................................................... 569
R Neil Humphries And Roger Meade

Conversion Of Potomac River Dredge Sediments To Productive Agricultural Soils .................................................. 597
W. Lee Daniels, G. Richard Whittecar And Charles H. Carter III

SESSION B1: RECLAMATION POLICY AND STANDARDS

Kimery C. Vories

Reclamation Of Waste Rock Stockpiles At Cleveland-Cliffs Michigan Operations .................................................. 633
Allan E. Koski

The California State Mining And Geology Board: Regulation Of Mine Reclamation In California ................................................. 646
Stephen M. Testa

Backfilling Of Open-Pit Metallic Mines ......................................................................................................................... 658
Stephen M. Testa, James S. Pompy

California’s Statewide Reclamation Standards, A Quantitative Approach To Measuring Reclamation Success ............................................................................. 673
James S. Pompy

Osm Tips Service Shares Advanced Computer Based Technology Nationwide .................................................. 683
Louis Hamm

SESSION B2: WILDLIFE AND RECLAMATION/DATA ANALYSIS

Wildlife Mitigation Techniques At Surface Coal Mines In Northeast Wyoming .................................................. 694
Gwyn Mckee

Impact Of The Surface Mining Control And Reclamation Act On Species Of Special Concern In Pennsylvania ............................................................................. 707
Fred J. Brenner
Weighting Individual Datum For Nonparametric Analysis
J. A. Tucker, M. Ortiz

Coal Mining Geospatial Data For The Nation
Bill Card, Len Meier

SESSION C1; WATER CHEMISTRY

Mode Of Gypsum Precipitation In Vertical Flow Ponds
Arthur W. Rose, Terry Morrow, Margaret Dunn And Clifford Denholm

Modeling The Controls On Acidity Removal In Vertical Flow Ponds
Arthur W. Rose

Aeration To Degas CO2, Increase PH And Iron Oxidation Rates, And Decrease Treatment Pond Size In Treatment Of Net Alkaline Mine Drainage
Carl S. Kirby, Adam Dennis, And Adam K. Kahler

Examination Of Dissolved Concentrations of As, B, Cd, Hg, Se, and Al In Water Quality From The Backfill Aquifer, Eastern Powder River Basin, Wyoming, 2005
Kathy Muller Ogle

Role Of Accelerated Oxidation For Removal Of Metals From Mine Drainage
Don Budeit

SESSION C2: LANDSCAPE STRUCTURE AND PATTERNS

Managing The Large-Scale Reclamation Monitoring Network At Syncrude Canada Ltd
M. Phillip, M. O’kane

Assuring Stability Of Minimized Valley Fills: A Review Of Potential Causes Of Instability And Available Countermeasures
Peter R. Michael And Michael J. Superfesky

H. Raymond Sinclair Jr., Robert R. Dobos

NRCS Historic Climax Plant Communities As Reference Areas
Bruce A. Buchanan, Justin A. Tucker

SESSION D: COAL BED METHANE PRODUCTION AND RECLAMATION

Soil Bulk Density Impacts Of An Oak Mat Natural Gas Drill Pad Construction Technique
C. S. Mcwilliams, D. J. Dollhopf, K. C. Harvey And D. J. Dale

Changes In Soil Physical And Chemical Properties Of A Cropland Irrigated With Cbng Co-Produced Water
Christopher R. Johnston, George F. Vance, And Girisha Ganjegunte

Response Of Grass Species To Soil Salt Content And Soil Moisture On Lands Developed For Coalbed Methane
M.D. Mitchem, D.J Dollhopf, J.W. Bauder, And B.E. Olson

Beneficial Uses Of Water Produced By Coal Bed Natural Gas Development: More Surface Water Can Be Good For Frogs And Other Wildlife
William E. Vetter And Kimberley Brown
Effect Of Coalbed Methane Produced Water Discharge On Native And Reclaimed Stream Channels And Aquifers At Coal Mines In The Powder River Basin Campbell County, Wyoming. ................................................................. 934
Philip A. Murphree

Considerations For Evaluating Coalbed Methane Infiltration Pond Sites Based On Site Studies In The Powder River Basin Of Montana And Wyoming ............................................ 953
John R. Wheaton, Andrew L. Bobst, Elizabeth L. Brinck

Groundwater Monitoring At Coal Bed Natural Gas Produced Water Impoundments: The Wyoming Deq Database ................................................................. 971
T. Osborne, U. Williams, M. Smith, D. Fischer, K. Frederick

Author Index
