# TECHNICAL PAPER INDEX

## TASK SCHEDULING

- **A Rapid Heuristic for Scheduling Non-Preemptive Dependent Periodic Tasks onto Multiprocessor**  
  Omar Kermia and Yves Sorel (INRIA, France)  
  .......................................................... 1

- **Deadline-based Scheduling of Divisible Real-Time Loads**  
  Suriayati Chuprat (Universiti Teknologi Malaysia, Malaysia) and Sanjoy Baruah (University of North Carolina, USA)  
  .......................................................... 7

- **A Performance-Effective Task Scheduling Algorithm for Multiprocessor Computing Systems**  
  Ehab Abdel Maksoud (Cairo University, Egypt) and Reda Ammar (University of Connecticut, USA)  
  .................. 13

## DATA AND INFORMATION ACCESS

- **Grid Enabling a Content Based Image Retrieval Application**  
  Ritu Arora and Purushotham Bangalore (University of Alabama at Birmingham, USA)  
  .................. 19

- **SDSS: A Strategy Decision Support System in Distributed Campus Information Systems**  
  Takayuki Fujimoto (Sonoda Women's University, Japan) and Tokuro Matsuo (Yamagata University, Japan)  
  .................. 24

- **Multi-Tier Data Access & Hierarchical Memory Optimization**  
  Marwan Sleiman and Lester Lipsky (University of Connecticut, USA)  
  .................. 30

- **Metadata Lookup for Distributed Query Optimization in P2P Environment**  
  Raddad Al-King, Abdelkader Hameurlain, Franck Morvan (Université Paul Sabatier, France)  
  .................. 36

- **Replica Traffic Manager for Data Grids**  
  Adam H. Villa and Elizabeth Variki (University of New Hampshire, USA)  
  .................. 44

- **Design Considerations for Resilient Distributed Data Centers**  
  Yehia H. Khalil, Anup Kumar and Adel Elmaghraby (University of Louisville, USA)  
  .................. 51
MOBILE COMPUTING

Supporting Geographic Data in the Mobile Computing Environment
Les Miller, Hua Ming (Iowa State University, USA), Hsine-Jen Tsai (Fu Jen Catholic University, Taiwan, R.O.C.), Becca Wemhoff and Sarah Nusser (Iowa State University, USA) ........................................... 56

Real-time Data Processing based on Caching Algorithm in Ubiquitous Information Middleware
Jun-Hwan Lee, Byung-Kook Son, Kyung-Lang Park, Cheong-Ghil Kim, Shin-Dug Kim (Yosei University, Korea) .................................................................................................................. 62

Tracing DDoS Attacks Using VPNs and Mobile Agents
Ahmed M. Azab and Samir I. Shaheen (Cairo University, Egypt) and Sherif El-Kassas (American University in Cairo, Egypt) ........................................................................................................ 68

SOFTWARE METHODS

Evaluation of Architectural Support for Speech Codecs Application in Large-Scale Parallel Machines
Naeem Zafar Azeemi (University of Technology Vienna, Austria) ........................................................... 74

P2P Backup Storage: Are They Really Useful?
Bill Studer and Shivakant Mishra (University of Colorado, USA) ............................................................ 79

FT-OpenVZ: A Virtualized Approach to Fault-Tolerance in Distributed Systems
John Paul Walters and Vipin Chaudhary (The University of Buffalo, SUNY, USA) ................................. 85

SPECIAL SESSION on AUTONOMIC COMPUTING

Performance-Based Multi-channel Clustered Web Application Servers
K. M. Sobh, A. Sameh (The American University in Cairo, Egypt) and R. A. Ammar (University of Connecticut, USA) ................................................................. 91

Improving Performance of Collective Operations: UPC Case
Rafik A. Salama and Ahmed Sameh (The American University in Cairo, Egypt) ........................................ 97

Enhancing Cellular Network Performance through Mobile User Position and Service Prediction
Sherif Akoush, Ahmed Sameh and Awad Khalil (The American University in Cairo, Egypt) ..................... 103

AD HOC NETWORKS

A Study of Handoff Management in Nested NEMO
Jae-Kwon Seo, Sung-Hyun Nam and Kyung-Geun Lee (Sejong University, Korea) ............................... 109

A Generalized Token-based Mutual Exclusion Algorithm for Wireless Networks
Mitchell L. Neilsen (Kansas State University, USA) .................................................................................. 114

Efficient Soft QoS Guarantee in Mobile Ad Hoc Networks
Gaogang Xie (Chinese Academy of Sciences, China, INRIA, France and Alcatel Research & Innovation Center, France), Zhenyu Li (Chinese Academy of Sciences, China), Valerie Issarny (INRIA, France), and Alberto Conte (Alcatel Research & Innovation Center, France) ........................................................................................................... 120
TASK AND RESOURCE ALLOCATION

Effects of Decentralized Ordering of Large-scale Software System
Tokuro Matsuo and Yoshihito Saito (Yamagata University, Japan) ........................................................ 127

System for Trading Processors' Quanta on a Digital Market
Michal Kostal and Pavel Tvrdik (FEE CTU Prague, Czech Republic) .......................................................... 133

Dynamic Mapping and Deployment of Independent Tasks on Distributed Systems using Residual Execution Time
Amal S. Khalifa (Ain Shams University, Egypt), Reda A. Ammar (University of Connecticut, USA), Tahany A. Fergany (University of New Haven, USA), and Mohammed F. Tolba (Ain Shams University, Egypt) ............................................................................................................................. 139

SENSOR NETWORKS

Optimal Configuration of a Secure Clustering Protocol for Sensor Networks
Pubali Banerjee and Doug Jacobson (Iowa State University, USA) ................................................................. 145

Distributed Algorithms for Dynamic Coverage in Sensor Networks
Lan Lin and Hyunyoung Lee (University of Denver, USA) ................................................................................. 151

Robust In-Network Data Processing for Target Tracking in WSNs
Jae Sung Choi, Byoungyong Lee, Kyungseo Park and Ramez Elmasri (University of Texas at Arlington, USA) ................................................................................................................................. 157

PARALLEL ALGORITHMS

Parallelizing Frequent Web Access Pattern Mining with Partial Enumeration for High Speedup
Peiyi Tang and Markus P. Turkia (University of Arkansas at Little Rock, USA) ............................................ 163

An Efficient Scheme for Parallelizing Fast Search Algorithm on SIMD Architecture in H.264/AVC
Jung-Min Park, Jung-Wook Park, Cheong-Ghil Kim (Yonsei University, Korea), Gi-Ho Park (Samsung Electroncis Co., Ltd) and Shin-Dug Kim (Yonsei University, Korea) ............................................................................. 169

Parallel Algorithms for Motif Search
Sanguthevar Rajasekaran (University of Connecticut, USA) ............................................................................. 175

COMPUTATIONAL GRID

Parallel Implementation of Shallow Water Model on Distributed Memory Architectures
K. Ganeshamoorthy, D. N. Ranasinghe and K.P.M.K. Silva (University of Colombo, Sri Lanka), and R. Wait (Uppsala University, Sweden) ................................................................................................................. 181

Analysis of Parallel Binary Merge Sort in a Grid Environment
Werner Mach and Erich Schikuta (University of Vienna, Austria) ........................................................................ 187
# ALGORITHMS

**Real-Time Predicate Detection in Timed Asynchronous Systems**  
Chunbo Chu and Monica Brockmeyer (Wayne State University, USA) ................................................................. 193

**A Node-to-Set Cluster-Fault-Tolerant Disjoint Routing Algorithm in Pancake Graphs**  
Tatsuro Watanabe and Keiichi Kaneko (Tokyo University of Agriculture and Technology, Japan), and Shietung Peng (Hosei University, Japan) ................................................................. 200

# PARALLELIZATION

**Towards Mixed-Parallelism of Space-Time Adaptive Processing**  
Kyusoon Lee and Adam W. Bojanczyk (Cornell University, USA) ................................................................. 206

**Porting Transformations for HPC Applications**  
Jaroslaw Slawinski, Magdalena Slawinska, and Vaidy Sunderam (Emory University, USA) ......................... 212

**Model and Analysis of the Checkpointing Aided Parallel Execution Technique**  
Laura Mereuta and Eric Renault (GET-INT, France) ................................................................. 218

# INTERCONNECTION NETWORK and ROUTING

**Enhanced Butterfly: A Cayley Graph with Node Degree 5**  
Osman Guzide (Shepherd University, USA) and Meghanad D. Wagh (Lehigh University, USA) ......................... 224

**On the Effective Paths for the General Tori**  
Zhizhang Shen (Plymouth State University, USA) and Ke Qiu (Brock University, Canada) ......................... 230

**On the Vertex Disjoint Effective Path for the General Tori**  
Zhizhang Shen (Plymouth State University, USA) and Ke Qiu (Brock University, Canada) ......................... 236

# BIO-COMPUTING

**Architectural Requirements of Parallel Computational Biology Applications with Explicit Instruction Level Parallelism**  
Naeem Z. Azeemi (University of Technology Vienna, Austria) ................................................................. 242

**PARALLEL-TCOFFEE: A Parallel Multiple Sequence Aligner**  
Jaroslaw Zola and Xiao Yang (Iowa State University, USA), Adrian Rospondek (Czestochowa University of Technology, Poland), and Srinivas Aluru (Iowa State University, USA) ......................... 248

**Massively Parallel Expressed Sequence Tag Clustering**  
Scott J. Emrich (Iowa State University, USA), Ananth Kalyanaraman (Washington State University, USA), and Srinivas Aluru (Iowa State University, USA) ................................................................. 254

# DISTRIBUTED SYSTEMS

**Implementations of Asynchronous Self-Organizing Maps On OpenMP and MPI Parallel Computers**  
Jie Hu (St. Cloud State University, USA), Liqiang Zhang and Jing Cheng (Open Access Technology Int'l Inc., USA) ........................................................................................................... 262

**A Performance-driven Clustering Approach to Minimize Coupling in a Distributed Object Oriented System**  
Safwat H. Hamad (Ain Shams University, Egypt), Reda A. Ammar (University of Connecticut, USA), Amal A. Abd El-Raouf (Southern Connecticut State University, USA), and Mohamed E. Khalifa (Ain Shams University, Egypt) ........................................................................................................... 267

**An Autonomic Element Design for a Distributed Object System**  
M. Muztaba Fuad (Winston-Salem State University, USA), Debzani Deb (Montana State University, USA), and Michael J. Oudshoorn (University of Texas at Brownsville, USA) ........................................................................................................... 273
PROCESSOR HARDWARE

The Performance of Parallel Prefix Adders on Nanometer FPGA
F. Kharbash and G. Chaudhry (University of Missouri-Kansas City, USA) ................................................ 280

QSDN: Quantum-dot Cellular Automata Signed Digit Number Adder
F. Kharbash and G. Chaudhry (University of Missouri-Kansas City, USA) ............................................. 285

A Multi-core Architecture for Bi-network Protocol Conversion
Omar S Elkeelany and Ghulam M Chaudhry (University of Missouri-Kansas City, USA) ......................... 290

FPGA & EMBEDDED and REAL-TIME SYSTEMS

An FPGA Implementation of Elliptic Curve Cryptography for Future Secure Web Transaction
Jian Huang, Hao Li, and Philip Sweany (University of North Texas, USA)..................................................... 296

An Efficient Embedded System Design for Capturing and Storing Analog Data
Omar Elkeelany, Mohammed A. S. Abdallah and Ali Alouani (Tennessee Technological University, USA) ................................................................................................................................. 302

A Queueing Model for Data Scheduling in Real-time Distributed Systems
Mohammed S Eltayeb and Fusun Ozguner (Frostburg State University, USA) .............................................. 308
