Metropolis-Hastings Algorithm and Continuous Regression for Finding Next-State Models of Protein Modification Using Information Scores ................................................................. 35
David J. John, Jacquelyn S. Fetrow, James L. Norris (Wake Forest University, USA)

Protein Function Prediction from Interaction Networks Using a Random Walk Ranking Algorithm ............... 42
Valerio Freschi (University of Urbino, Italy)

Intrinsically Disordered Proteins: An Update ....................................................................................................... 49
A. Keith Dunker, (Indiana University School of Medicine and School of Informatics, USA); Jack Y. Yang, (Harvard Medical School, Harvard University, USA); Christopher S. Oldfield, (Indiana University School of Informatics, USA); Zoran Obradovic, (Temple University, USA); Jingwei Meng, Pedro Romero (Indiana University School of Informatics, USA); Vladimir N. Uversky (Indiana University School of Medicine, USA);

Linking Protein Mass with Function via Organismal Massome Networks .......................................................... 59
Gil Alterovitz (Harvard Medical School and Massachusetts Institute of Technology, USA); Eugenia Lyashenko (Columbia University, USA); Michael Xiang (Harvard Medical School, USA); Marco F. Ramoni (Harvard University and Massachusetts Institute of Technology, USA)

Ensemble of Probabilistic Neural Networks for Protein Fold Recognition ....................................................... 66
Yuehui Chen, Xueqin Zhang (University of Jinan, China); Mary Qu Yang (National Human Genome Research Institute, National Institutes of Health (NIH) and Oak Ridge, DOE., USA); Jack Y. Yang, (Harvard Medical School, Harvard University, USA)

Session 2: Microarray Data and Applications (Part A)

HICCUP: Hierarchical Clustering Based Value Imputation Using Heterogeneous Gene Expression Microarray Datasets .................................................................................................................. 71
Qiankun Zhao (AOL Labs, China); Prasenjit Mitra, Dongwon Lee (Penn State University, USA); Jaewoo Kang (Korea University, Korea)

On the Effectiveness of Constraints Sets in Clustering Genes ............................................................................. 79
Erliang Zeng, Chengyong Yang, Tao Li, Giri Narasimhan (Florida International University, USA)

Integrate Qualitative Biological Knowledge to Build Gene Networks by Parallel Dynamic Bayesian Network Structure Learning ........................................................................................................ 87
Song Li (Iowa State University, USA)

Finding Clusters of Positive and Negative Coregulated Genes in Gene Expression Data ................................. 93
Kerstin Koch (Hasselt University, Belgium); Stefan Schönauer (University of Helsinki, Finland); Ivy Jansen, Jan van den Bussche, Tomasz Burzykowski (Hasselt University, Belgium)

Pattern Cores and Connectedness in Cancer Gene Expression ........................................................................... 100
Noha A. Yousi, Mohamed S. Kamel (University of Waterloo, Canada); Mohamed A. Ismail (University of Alexandria, Egypt)

PANP – A New Method of Gene Detection on Oligonucleotide Expression Arrays ........................................ 108
Peter Warren (Wyeth Research, USA); Deanne Taylor (Harvard School of Public Health, USA); Paolo G.V. Martini, Jennifer Jackson (EMD Serono, USA); Jadwiga Bienkowska (Biogen-Idec)

Session 3: Microarray Data and Applications (Part B)

Cooperative Partitional-Divisive Clustering and Its Application in Gene Expression Analysis ............................ 116
Rasha Kashef, Mohamed S. Kamel (University of Waterloo, Canada)

On the Design of Oligos for Gene Synthesis ........................................................................................................... 123
Chris Thachuk (Simon Fraser University, Canada); Anne Condon (University of British Columbia, Canada)
Evidence for Proximal to Distal Appendage Amputation Site Effects from Global Gene
Expression Correlations Found in Newt Microarrays .........................................................131
Kenneth A. Marx, John Sharko, Georges G. Grinstein (University of Massachusetts Lowell, USA); Shannon Odelberg (University of Utah School of Medicine, USA); Hans-Georg Simon (Northwestern University, USA)

Denoising of Array-Based DNA Copy Number Data Using the Dual-tree Complex Wavelet Transform ..........137
Nha Nguyen, Heng Huang, Soontorn Oraintara (University of Texas at Arlington, USA); Yuhang Wang (Southern Methodist University, USA)

Quality Assessment of Affymetrix GeneChip Data Using the EM Algorithm and a Naïve Bayes Classifier ........145
Brian E. Howard, Imara Perera, Yang Ju Im, Heike Winter-Sederoff (North Carolina State University, USA); Beate Sick (Zurich University of Applied Science Winterthur, Switzerland); Steffen Heber (North Carolina State University, USA)

Comparing Cancer and Normal Gene Regulatory Networks Based on Microarray Data and
Transcription Factor Analysis ........................................................................................................151
Yu-Chun Lin, Hsiang-Yuan Yeh, Shih-Wu Cheng (National Tsing Hua University, Taiwan); Von-Wun Soo (National University of Kaohsiung, Taiwan)

Session 4: Microarray Data and Applications (Part C)

Finding Cancer-Related Gene Combinations Using a Molecular Evolutionary Algorithm .........................158
Chan-Hoon Park, Soo-Jin Kim, Sun Kim, Dong-Yeon Cho, Byoung-Tak Zhang (Seoul National University, Korea)

A Two-Stage Gene Selection Algorithm by Combining Relief and mRMR .........................................................164
Yi Zhang (Florida International University, USA); Chris Ding (University of Texas, USA); Tao Li (Florida International University, USA)

Estimating Classification Error to Identify Biomarkers in Time Series Expression Data .................................172
John H. Phan, May D. Wang (Georgia Institute of Technology, USA)

Detection and Prediction of Alternative Splicing within Acceptor/Donor Sites in Pre-mRNA
of Arabidopsis Thaliana ...................................................................................................................180
Minseo Park, Deane L. Falcone, Kil-Young Yun, (University of Massachusetts, USA); Kil-Young Yun (University of Maine, USA); Karen M. Daniels (University of Massachusetts, USA)

An Effective Interwoven Loop Design Application for Two-Channel Microarray Experiments ......................187
Mehdi Pirooznia, Arun Rawat (The University of Southern Mississippi, USA); Ping Gong (SpecPro Inc., USA); Jack Y. Yang (Harvard Medical School, Harvard University, USA); Edward J. Perkins (US Army Engineer Research and Development Center, USA); Mary Qu Yang (National Human Genome Research Institute, National Institutes of Health (NIH), USA); Youping Deng (The University of Southern Mississippi, USA)

SNPMiner: A Domain-Specific Deep Web Mining Tool ......................................................................................192
Fan Wang, Gagan Agrawal (Ohio State University, USA); Ruoming Jin, Helen Piontkivska (Kent State University, USA)

Session 5: Biomedical Engineering

Fast and Robust Detection of Epilepsy in Noisy EEG Signals Using Permutation Entropy ...............................200
Iman Veisi, Naser Pariz, Ali Karimpour (Ferdowsi University, Iran)

A Robotic System for Real-Time Tumor Manipulation During Image Guided Breast Biopsy .........................204
Vishnu Mallapragada, Nilanjan Sarkar, (Vanderbilt University, USA); Tarun K. Podder (Thomas Jefferson University Hospital, USA)

Morphometric Analysis of Hippocampal Shape in Mild Cognitive Impairment: An Imaging Genetics Study........211
Li Shen, Andrew J. Saykin (Indiana University School of Medicine, USA); Moo K. Chung (University of Wisconsin Madison, USA); Heng Huang (University of Texas at Arlington, USA)

A Compartmentalized Approach to the Assembly of Physical Maps ...............................................................218
Serdar Bozdag, Timothy J. Close, Stefano Lonardi (University of California, Riverside, USA)
Graph Theory Application in Cell Nucleus Segmentation, Tracking and Identification .................................................226
Lelin Zhang, Hongkai Xiong, Kai Zhang (Shanghai Jiao Tong University, P.R. China); Xiaobo Zhou (Harvard Medical School, USA)

An End-to-End Process for Cancer Identification from Images of Lung Tissue..............................................................233
Walker H. Land, Jr. (Binghamton University, USA); Dan McKee (Mansfield University, USA); Tatyana Zhukov, Dansheng Song, Wei Qian (University of South Florida, USA)

Rat Mammary Fat Pad Segmentation and Growth Rate Evaluation in T1 Weighted MR Images........................................240
Bin Wang, Jianhua Xuan (Virginia Tech, USA); Matthew T. Freedman, Peter G. Shields (Georgetown University, USA); Yue Wang (Virginia Tech, USA)

A Simulation-Based 3D Axon Axis Extraction in Confocal Fluorescence Microscopy Images...........................................246
Kai Zhang, Hongkai Xiong (Shanghai Jiao Tong University, China); Xiaobo Zhou (The Methodist Hospital Research Institute and Cornell University, USA)

Advancements in Automated Diagnostic Mammography ....................................................................................................251
Walker H. Land, Jr., Alda Mizaku, Thomas Raway (Binghamton University, USA); John Heine, Claudia Berman, Nataliya Kovalchuk (H. Lee Moffitt Cancer Center and Research Institute and University of South Florida, USA)

Calcium De-blooming in Coronary CT Images ...................................................................................................................257
Zhuanli Liang, W. Clem Karl (Boston University, USA); Synho Do, Udo Hoffmann, Thomas Brady, Homer Pien (Massachusetts General Hospital and Harvard Medical School, USA)

Session 6: Computational Methods in Bioinformatics

Distance Preserving Dimension Reduction Using the QR Factorization or the Cholesky Factorization .........................263
Hyunsoo Kim, Haesun Park, Hongyuan Zha (Georgia Institute of Technology, USA)

Discrete Methods for Association Search and Status Prediction in Genotype Case-Control Studies........................270
Dumitru Brinza (University of California at San Diego, USA); Alexander Zelikovsky (Georgia State University, USA)

A Multi-Objective Genetic Algorithm that Employs a Hybrid Approach for Isolating Codon Usage Bias Indicative of Translational Efficiency ...........................................................................................................278
Douglas Raiford, Dan E. Krane, Travis E. Doom, Michael L. Raymer (Wright State University, USA)

Rapid Detection and Classification of Bacterial Contamination Using Grid Computing.................................................286
Wamiq M. Ahmed, Bulent Bayraktar, Arun K. Bhunia, E. Dan Hirleman, J. Paul Robinson, Bartek Rajwa (Purdue University, USA)

Sensitivity Analysis of Biomolecular Simulations Using Symbolic Models ........................................................................294
Sadaf R. Alam, Nikhil Bhatia, Jeffrey S. Vetter (Oak Ridge National Laboratory, DOE, USA)

Session 7: Sequence Analysis

Detecting and Assessing Conserved Stems for Accurate Structural Alignment of RNA Sequences..............................301
Xiaoyong Fang, Zhigang Luo (National University of Defense Technology, China); Bo Yuan, Zhenghua Wang (Ohio State University, USA)

The RNA String Kernel for siRNA Efficacy Prediction .........................................................................................................307
Shibin Qiu (Pathwork Diagnostics, Inc., USA); Terran Lane (University of New Mexico, USA)

A Machine Learning Approach for Prediction of Lipid-Interacting Residues in Amino Acid Sequences ......................315
Stephanie Jiménez Irausquin (University of South Carolina, USA); Liangjiang Wang (Clemson University, USA)

Assessing the Performance of Macromolecular Sequence Classifiers ..............................................................................320
Cornelia Caragea, Jivko Sinapov, Vasant Honavar, Drena Dobbs (Iowa State University, USA)

Shortest Path Approaches for the Longest Common Subsequence of a Set of Strings ..................................................327
Marina Barsky, Ulrike Stege, Alex Thomo, Chris Upton (University of Victoria, Canada)
Resolving Scientific Service Interoperability with Schema Mapping .................................................................448
Nadia Yacoubi Ayadi, Zoe Lacroix (Arizona State University, USA)

A Machine Learning Approach to Pharmacological Profiling of the Quinone Scaffold in the NCI Database:
A Compound Class Enriched in Those Effective Against Melanoma and Leukemia Cell Lines .........................456
M.L. Ujwal (Eli Lilly & Co. USA); Patrick Hoffman (Inforsense, USA); Kenneth A. Marx (University of Massachusetts Lowell, USA)

Biomarker Selection for Predicting Alzheimer Disease using High-Resolution MALDI-TOF Data .........................464
Jung Hun Oh, Young Bun Kim (The University of Texas, Arlington, USA); Prem Gurnani, Kevin P. Rosenblatt (University of Texas at Southwestern Medical Center, USA); Jean Gao (University of Texas at Arlington, USA)

Multivariate Analysis of Imaging Mass Spectrometry Data .................................................................................472
Eric R. Muir, Ibrahima J. Ndour, Nolwenn A. Le Goaduff, Richard A. Moffitt, Ying Liu, M.C. Sullards,
A.H. Merrill,Jr., Yanfeng Chen, May D. Wang (Georgia Institute of Technology, USA)

Phagocyte Transmigration Modeling Using System Dynamic Controls ...............................................................480
Jiaxing Xue, Jean Gao, Liping Tang (University of Texas at Arlington, USA)

WORKSHOP PAPERS

WORKSHOP on Bio-Nano-Info Integration for Personalized Medicine

Toward a Nanobioinformatics Infrastructure for Nanotechnology-Based Prostate Cancer
Therapeutic Response Tracking ..............................................................................................................................486
David Paik (Stanford University, USA)

A Novel Approach for Signal Transduction Networks Simulation at a Mesoscopic Level ....................................487
Chenxi Shao, Hongli Deng (University of Science and Technology of China, China)

Microtubule Dynamics Classification using a Statistical Model of the Movement of Outer Tips .................................495
Christopher Alberti, Jean-Phillipe Villareal, Delano Billingsley, Koon Yin Kong (Georgia Institute of Technology, USA); Adam I. Marcus (Emory University, USA); Paraskevi Giannakakou (Cornell University, USA); May D. Wang (Georgia Institute of Technology, USA)

Computer Aided Histopathological Classification of Cancer Subtypes .................................................................503
Sohaib Waheed, Richard A. Moffitt, Qaiser Chaudry (Georgia Institute of Technology, USA); Andrew N. Young (Emory University, USA); May D. Wang (Georgia Institute of Technology, USA)

Evolving Biological Behavior in Gene-Based Cellular Simulations ........................................................................509
John H. Phan, Richard A. Moffitt, Todd H. Stokes, May D. Wang (Georgia Institute of Technology, USA)

Engineering Multifunctional Biologically-Amenable Nanomaterials for Interfacial Therapeutic Delivery and
Substrate-Based Cellular Interrogation ..................................................................................................................517
Mark Chen, Brian Huang, Eric Shin, Erik Robinson, Erik Pierstorff, Houjin Huang, Dean Ho (Northwestern
University, USA)

Non-Monotonic Radio-Sensitivity over Tumor Volumes on Adjuvant Radio Therapy -
A New Insight on Cell Killing and Modeling .....................................................................................................524
Jack Y. Yang, (Harvard Medical School and Massachusetts General Hospital, USA); Mary Qu Yang (National
Institutes of Health (NIH), USA); Andrzej Niemierko (Harvard Medical School and Massachusetts General
Hospital, USA); Youping Deng (University of Southern Mississippi, USA)

WORKSHOP on Joint Research in the Southern Illinois University, University of Illinois,

Novel Materials for the Direct Removal of Water and Ions from the Body for Patients with Dialysis Needs ..........532
Lisa Furby, Ravinder Gupta, Ajay Mahajan, Jarlen Don, Tsuchin Chu, Bakul Dave (Southern Illinois University at
Carbondale, USA); Brad Schwartz (Southern Illinois University School of Medicine at Springfield, USA)
A Robust Method for Generating Discriminative Gene Clusters .................................................................538
Min Xu (University of Southern California, USA); Louxin Zhang (National University of Singapore, Singapore); Pei Li Zhou (Monash University, Australia)

Biological Mechanism on a Chip: Modeling and Realization of Growth Hormone Secretion Mechanism ..........546
John R. Shell, Yongliang Wang, Nazeih M. Botros (Southern Illinois University at Carbondale, USA)

Retrieval Analysis of a Cementless Modular Total Hip Arthroplasty Prosthesis ........................................553
Manish Paliwal (The College of New Jersey, USA); D. Gordon Allan (Southern Illinois University School of Medicine at Springfield, USA); Peter Filip (Southern Illinois University at Carbondale, USA)

Trabecular Metal Patella Implanted into Soft-Tissue in a Post-Patellectomized Knee: A Case Report .................559
D. Gordon Allan (Southern Illinois University School of Medicine at Springfield, USA); Manish Paliwal (The College of New Jersey, USA); Peter Filip (Southern Illinois University at Carbondale, USA)

A Comparison Between Traditional Shift-and-Add (SAA) and Point-By-Point Back Projection (BP) - Relevance to Morphology of Microcalcifications for Isocentric Motion in Digital Breast Tomosynthesis (DBT) .................................................................563
Ying Chen (Southern Illinois University Carbondale, USA); Joseph Y. Lo, James T. Dobbins, III (Duke University and Duke University Medical Center, USA)

Methodology for Evaluating DNA Pattern Searching Algorithms on Multiprocessor ..................................570
Benfano Soewito, Ning Weng (Southern Illinois University at Carbondale, USA)

An Efficient Compression Method for Multiplanar Reformulated Biomedical Images ................................578
Qiang Cheng, Mehdi Zargham (Southern Illinois University at Carbondale, USA)

A Computational Approach to Understand Arabidopsis thaliana and Soybean Resistance to Fusarium solani (Fsg) .................................................................................................585
Jiazheng Yuan, Mengxia Michelle Zhu, M. Javed Iqbal (Southern Illinois University at Carbondale, USA); Jack Y. Yang (Harvard Medical School, Harvard University, USA); David A. Lightfoot (Southern Illinois University at Carbondale, USA)

Biostatistical Considerations of the Use of Genomic DNA Reference in Microarrays ................................593
Yunfeng Yang (Oak Ridge National Laboratory, USA); Mengxia Michelle Zhu (Southern Illinois University at Carbondale, USA); Liyou Wu, Jizhong Zhou (University of Oklahoma, USA)

Dynamic Load Balancing for Mining of Molecular Substructures using Genetic Algorithm .........................601
Salahuddin Masum, Mohammed Yeasin (The University of Memphis, USA)

WORKSHOP on Progress Toward Petascale Applications in Bioinformatics And Computational Biology
I/O Induced Scalability Limits of Bioinformatics Applications ........................................................................609
Robert Henschel, Matthias Mueller (Technische Universität Dresden, Germany)

Large-Scale QM/MM Calculations of Electronic Excitations in Yellow Protein: Toward Petascale Level of Protein Calculations ..................................................................................................................................614
Marek Freindorf, Matthew D. Jones (State University at Buffalo, USA); Yihan Shao, Jing Kong (State University at Buffalo, and Q-Chem Inc. USA); Thomas R. Furlani (State University at Buffalo, USA)

MotifNetwork: A Grid-Enabled Workflow for High-Throughput Domain Analysis of Biological Sequences: Implications for Annotation and Study of Phylogeny, Protein Interactions, and Intraspecies Variation ..........620
Jeffrey Tilson (Renaissance Computing Institute, USA); Gloria Rendon (National Center for Supercomputing Applications, USA); Mao-Feng Ger, Eric Jakobsson (University of Illinois at Urbana-Champaign, USA)

Toward Petascale Simulation of Cellular Microphysiology ..............................................................................628
Scott B. Baden (University of California, San Diego, USA); Terrence J. Sejnowski, Thomas M. Bartol (The Salk Institute, USA); Joel Stiles (Pittsburgh Supercomputing Center and Carnegie Mellon University, USA)
VOLUME II

Special Sessions Papers

Session 11: Special Session on Computational Intelligence in Medical Informatics

Silent Killing: An Object-Oriented View of Hypertension and Kidney Failures - Part I ........................................635
Jacqueline Signorini, Patrick Greussay (University Paris 8, France)

Medical Image Retrieval Based on Bidimensional Empirical Mode Decomposition ........................................641
Wei Liu, Weidong Xu, Lihua Li (Hangzhou Dianzi University, China)

A Modified Fuzzy Kohonen’s Competitive Learning Algorithms Incorporating Local Information for
MR Image Segmentation .................................................................................................................................................647
Jun Kong, Wenjing Lu, Jianzhong Wang, Na Che, Yinghua Lu (Northeast Normal University, China)

An Efficient Modeling and Simulation System on the Kidney Matching, Distribution and
Exchange Problems ..........................................................................................................................................................654
Siyuan Liu, Chao Liu (Chinese Academy of Sciences, China); Yu Liu (Shandong University, China); Chunzhe Zhao
(Chinese Academy of Sciences, China)

SiteSeeker – A Motif Discovery Tool ..............................................................................................................................662
Klaus Ecker, Lonnie Welch, Dazhang Gu (Ohio University, USA)

Session 12: Special Session on Evolutionary Systems Biology

Modeling Protein Interaction Network and Mechanisms in Exocytosis.................................................................665
Wen Zhou, Tian Xia, Jiansong Tong, Julie Dickerson, Bo Su, Xun Gu (Iowa State University, USA)

Toward a Realistic Model for Gene Network Evolution .................................................................................................673
Wenhai Chen (Chinese Academy of Science, China); Tian Xia (Iowa State University, USA); Tianzi Jiang (Chinese
Academy of Science, China); Xun Gu (Iowa State University, USA)

Application of Wavelet Transform to the MS-Based Proteomics Data Preprocessing ..............................................680
Pan Du (Northwestern University, USA); Haihui Wang (Beihang University, China); Simon M. Lin, Warren A. Kibbe
(Northwestern University, USA)

Pathway Complements of Four Yersinia ..........................................................................................................................687
Jennifer L. Neary, Maribel Sanchez (University of Texas at San Antonio, USA); Timothy G. Lilburn (American Type
Culture Collection, USA); Yufeng Wang (University of Texas at San Antonio, USA)

An Improved Ant Colony Optimization Algorithm Based on Route Optimization and
Its Applications in Travelling Salesman Problem .........................................................................................................693
Yi Zhang, Zhi-li Pei, Jin-hui Yang, Yan-chun Liang (Jilin University, China)

Characterization of MYC Expression in Gefitinib Versus Acute Myeloid Leukemia Reveals
Novel Therapeutic Targets ..............................................................................................................................................699
James F. Courage, Saurabh Gupta, Yufeng Wang (University of Texas at San Antonio, USA)

Hot and Cold: Spatial Fluctuation in HIV-1 Recombination Rates .............................................................................707
Misha L. Rajaram (Iowa State University, USA); Vladimir N. Minin (University of Washington, USA);
Marc A. Suchard (University of California, Los Angeles, USA); Karin S. Dorman (Iowa State University, USA)
Special Session 13: Special Session on Research in Bioinformatics, Neuroinformatics, and Systems Biology in East Asia

Computational Genome-Wide Discovery of Aberrant Splice Variations with Exon Expression Profiles.........................715
Ryo Yoshida (Institute of Statistical Mathematics, Japan); Kazuyuki Numata, Seiya Imoto, Masao Nagasaki (University of Tokyo, Japan); Atsushi Doi (Gene Network International, Japan); Kazuko Ueno, Satoru Miyano (University of Tokyo, Japan)

Mining Frequent Contiguous Sequence Patterns in Biological Sequences.................................................................723
Tae Ho Kang, Jae Soo Yoo, Hak Yong Kim (Chungbuk National University, Korea)

Efficient Methods for Biomedical Named Entity Recognition .........................................................................................729
Shing-Kit Chan, Wai Lam (The Chinese University of Hong Kong, China)

Stochastic Simulation Model for Patterned Neural Multi-Electrode Arrays.............................................................736
Dong-Soo Kahng, Yoonkey Nam, Doheon Lee (Korea Advanced Institute of Science Technology, Korea)

Classification of Enzyme Function from Protein Sequence based on Feature Representation.................................741
Bum Ju Lee, Heon Gyu Lee, Jong Yun Lee, Keun Ho Ryu (Chungbuk National University, Korea)

Inferring Behavioral-Level Circuits of Caenorhabditis elegans from the Topology of Its Wiring Diagram ...............748
Yunkyu Sohn (Korea Advanced Institute of Science Technology, Korea); Jaeseung Jeong (Korea Advanced Institute of Science Technology, Korea and Columbia University, USA)

HAMMER Algorithm: Hashing with Arithmetic Modulo-4 for Motif Extraction of Regulatory Elements............753
Huitao Sheng, Kishan Mehrotra, Chilukuri Mohan, Ramesh Raina (Syracuse University, USA)

A Tale of Intronless Genes in Eukaryotic Genomes.................................................................................................759
Meena Sakharkar, Kishore R. Sakharkar (Nanyang Technological University, Singapore)

To Fuse or Not to Fuse..................................................................................................................................................766
Kishore R. Sakharkar, Meena Sakharkar (Nanyang Technological University, Singapore)

Session 14: Special Session on Sequence Alignment and Phylogenetic Analysis

Using Parsimony to Guide Maximum Likelihood Searches .........................................................................................774
Kenneth Sundberg, Timothy O'Connor, Hyrum Carroll, Mark Clement, Quinn Snell (Brigham Young University, USA)

QOMA2: Optimizing the Alignment of Many Sequences...............................................................................................780
Xu Zhang, Tamer Kahveci (University of Florida, USA)

A Reliable Metric for Quantifying Multiple Sequence Alignment..............................................................................788
Ken D. Nguyen, Yi Pan (Georgia State University, USA)

Amino Acid Substitution Matrices Based on 4-Body Delaunay Contact Profiles.........................................................796
Ahmet Sacan, I. Hakki Toroslu (Middle East Technical University, Turkey)

A Heuristic for Phylogenetic Reconstruction Using Transposition ...........................................................................802
Feng Yue (University of South Carolina, USA); Meng Zhang (Jilin University, China); Jijun Tang (University of South Carolina, USA)

Phylogeny By Top Down Clustering Using a Given Multiple Alignment.....................................................................809
Abdullah N. Arslan, Peyman Bizargity (University of Vermont, USA)

Reconstructing Mutational Pathways from Serial Evolutionary Trees........................................................................815
Patricia Buendia (University of Miami, USA)
Session 15: Special Session on Development of Algorithms for Solving Problems in Molecular Biology

Towards Construction of Optimal Strip-Exchanging Moves
Swapnoneel Roy, Ashok KumarThakur (IBM India Pvt. Ltd., India) ................................................................. 821

Rough Overlapping Biclustering of Gene Expression Data
Ruizhi Wang, Duoqian Miao, Gang Li, Hongyun Zhang (Tongji University, P.R. China) ........................................... 828

Using Domain-Based Structural Ensemble to Improve Structure Modeling
Fa Zhang, Zhaoyun Ma, Zhiyong Liu (Chinese Academy of Sciences, China); Bo Yuan (Shanghai Jiao Tong University, China) ................................................................. 835

Support Vector Regression with Feature Selection for the Multivariate Calibration of Spectrofluorimetric Determination of Aromatic Amino Acids
Guo-Zheng Li, Hao-Hua Meng (Nanjing University, China); Mary Qu Yang (National Human Genome Research Institute, National Institutes of Health (NIH), USA); Jack Y. Yang (Harvard Medical School, Harvard University, USA) ................................................................. 842

Session 16: Special Session on High-Throughput Data Analysis for Genomics and Proteomics

Bottom-Up Multiple Row Addition Algorithms for the Biclustering-Problem
Hyung-Won Koh (ISAS - Institute for Analytical Sciences, Germany); Lars Hildebrand (University of Dortmund, Germany) ................................................................. 849

Fast Computation of Human Genetic Linkage
Hongling Wang (Columbus Children's Research Institute, USA); Alberto Maria Segre (University of Iowa, USA); Yungui Huang (Columbus Children's Research Institute, USA); Jeffrey R. O'Connell (University of Maryland, USA); Veronica J. Vieland (The Ohio State University, USA) ................................................................. 857

3D Spectrum Analysis of DNA Sequence: Application to Caenorhabditis elegans Genome
Afef Elloumi Oueslati, Zied Lachiri, Noureddine Ellouze (ENIT, Tunis) ................................................................. 864

MotifNetwork: Genome-Wide Domain Analysis Using Grid-Enabled Workflows
Jeffrey L. Tilson, Alan Blatecky (Renaissance Computing Institute, USA); Gloria Rendon (National Center for Supercomputing Applications, USA); Eric Jakobsson, Mao-Feng Ger (University of Illinois at Urbana-Champaign, USA) ................................................................. 872

Profilins, Formins and Katanins as Flagellar Proteins of Leishmania spp.: A Genome-Based, Multi-StepBioinformaties-Driven Description
Elton J.R. Vasconcelos, Ana C.L. Pacheco, João J.S. Gouveia, Fabiana F. Araújo, Michely C. Diniz, Michel T. Kamimura, Marcilia P. Costa, Rodrigo Maggioni, Raimundo Araujo-Filho, Raimundo B. Costa, and Diana Magalhães de Oliveira (Universidade Estadual do Ceará - UECE, Brazil) ................................................................. 880

Session 17: Special Session on Bio-Medical Soft Computing

FPGA Acceleration of Phylogeny Reconstruction for Whole Genome Data
Jason D. Bakos, Panormitis E. Elenis, Jijun Tang (University of South Carolina, USA) ................................................................. 888

A Preliminary Study of Correlation between Depth and Path Length of GO Nodes with Gene Sequence Similarity
Elham Khabiri (University of Houston-Clear Lake, USA) ................................................................. 896

Mathematical Models and Optimization Discussions on EA System on AIDS/HIV Spread
Estimating and Countermeasures Evaluating
Siyuan Liu, Chao Liu, Chunzhe Zhao (Chinese Academy of Sciences, China); Yu Liu (Shandong University, China) ................................................................. 900
Session 18: Special Session on Bio-Complexity

Fractal Dimension of Mie Scattering Spectra for the Appraisal of Infected HeLa Cells in Cultures .........................908
Radu Dobrescu (Politehnica University of Bucharest, Romania); Loretta Ichim (Politehnica University of Bucharest, Romania and Romanian Academy, Romania)

Complexity-Theoretic Modeling of Biological Cyanide Poisoning as Security Attack in Self-Organizing Networks ...............................................................................................................................................914
Jiejun Kong (University of Florida, USA); Xiaoyan Hong (University of Alabama, USA); Dapeng Wu (University of Florida, USA); Mario Gerla (University of California, Los Angeles, USA)

Quantitative and Probabilistic Modeling in Pathway Logic ...............................................................................................................922
Alessro Abate (University of California, Berkeley, USA); Yu Bai (Stanford University, USA); Nathalie Sznajder, Ecole Normale Superieure, France; Carolyn Talcott, Ashish Tiwari (SRI International, USA)

A 2D Vibration Array as an Assistive Device for Visually Impaired .........................................................................................930
Dimitrios Dakopoulos, Sanjay K. Boddhu, Nikolaos Bourbakis (Wright State University, USA)

Session 19: Special Session on Machine Learning Methods in Structural and Functional Genomics

Characterizing and Predicting Catalytic Residues in Enzyme Active Sites Based on Local Properties:
A Machine Learning Approach ..................................................................................................................................................938
Leonardo Bobadilla, Ferno Niño, Edilberto Cepeda (National University of Colombia, Colombia); Manuel A. Patarroyo (Fundacion Instituto de Inmunologia de Colombia, Colombia)

Predicting Protein-Protein Interaction Based on Fisher Scores Extracted from Domain Profiles ..............................................946
Tapan Patel, Li Liao (University of Delaware, USA)

A Novel Sequence-Structure Approach for Accurate Prediction of Resistance to HIV-1 Protease Inhibitors ..................952
Majid Masso, IosiF I. Vaisman (George Mason University, USA)

Prediction of Histone Modifications in DNA Sequences ............................................................................................................959
Tho Hoan Pham (Hanoi National University of Education, Vietnam); Tu Bao Ho, Dang Hung Tran, Kenji Satou (Japan Advanced Institute of Science and Technology, Japan)

Feature Selection and Partial Least Squares Based Dimension Reduction for Tumor Classification ........................................967
Hua-Long Bu, Guo-Zheng Li (Shanghai University, China); Jack Y. Yang (Harvard Medical School, USA); Mary Qu Yang (National Institutes Health (NIH), USA)

Session 20: Special Session on Pattern Recognition and Gene Discovery in Molecular Genetics

aCORR: A Novel Algorithm for Clustering Gene Expression Data .................................................................................................974
Hossam Sharara, Mohamed A. Ismail (Alexandria University, Egypt)

An Intelligent System for Searching Genomic Sequences .............................................................................................................982
Vana Gummuluru (University of Florida, USA); Su-Shing Chen (University of Florida, USA; and Shaghai Institute of Biological Sciences, China)

XML Encoding of Features Describing Rule-Based Modeling of Reaction Networks with Multi-Component Molecular Complexes .................................................................................................................................................987
Michael L. Blinov, Ion Moraru (University of Connecticut Health Center, USA)

Session 21: Special Session on DNA Microarray Data Analysis

BALBOA: Extending Bicluster Analysis to Classify ORFs using Expression Data .................................................................995
Kenneth Bryan, Pádraig Cunningham (University College Dublin, Ireland)

A Comprehensive Fuzzy-Based Framework for Cancer Microarray Data Gene Expression Analysis ..........................1003
Zhenyu Wang, Vasile Palade (Oxford University, UK)
Ensemble of Kernel based Classifiers to Improve the Human Cancer Prediction using DNA Microarrays........1011
Ángela Blanco, Manuel Martín-Merino (Universidad Pontificia de Salamanca, Spain); Javier De Las Rivas (Cancer Research Center (CIC-IBMCC, CSIC/USAL), Spain)

Mining Order Preserving Patterns in Microarray Data by Finding Frequent Orders.................................1019
Li Teng, Laiwan Chan (The Chinese University of Hong Kong)

A New Smoothing Model for Analyzing Array CGH Data .................................................................1027
Nha Nguyen, Heng Huang, Soontorn Oraintara, An Vo (University of Texas at Arlington, USA)

Inference of Gene Regulatory Networks using Time Sliding Comparison and Transcriptional Lagging Time from Time Series Gene Expression Profiles .........................................................1035
Sheehyun Kim, Dongsup Kim (Korea Advanced Institute of Science and Technology, Korea)

Regular Research Papers (Part II)

Session 22: Microarray Gene Expression Analysis

Multivariate Feature Selection using Random Subspace Classifiers for Gene Expression Data..........................1041
Vidya Kamath (University of South Florida and H. Lee Moffitt Cancer Center & Research Institute, USA); Lawrence Hall (University of South Florida, USA); Timothy J. Yeatman, Steven A. Eschrich (H. Lee Moffitt Cancer Center & Research Institute, USA)

Gene Selection via Matrix Factorization .........................................................................................1046
Fei Wang (Tsinghua University, China); Tao Li (Florida International University, USA)

Mutual Information based Minimum Spanning Trees Model for Selecting Discriminative Genes ............1051
Fang Zhou, Jieyue He (Southeast University, China); Wei Zhong (University of South Carolina Upstate, USA)

Gene-Markers Representation for Microarray Data Integration .........................................................1056
Elena Baralis, Elisa Ficarra, Alessandro Fiori, Enrico Macii (Politecnico di Torino, Italy)

Partial Mixture Model for Tight Clustering in Exploratory Gene Expression Analysis .................................1061
Yinyin Yuan, Chang-Tsun Li (University of Warwick, UK)

rSWTi: A Robust Stationary Wavelet Denoising Method for Array CGH Data ........................................1066
Yuhang Wang, Siling Wang (Southern Methodist University, USA); Andrew R. Zinn (UT Southwestern Medical Center at Dallas, USA)

An Empirical CDF Approach to Estimate the Significance of Gene Ranking for Finding Differentially Expressed Genes ..........................................................1071
Jahangheer Shaik, E.O. George, Mohammed Yeasin (University of Memphis, USA)

Gene Expression Profiling and Machine Learning to Understand and Predict Primary Graft Dysfunction 1076
Monika Ray, Sekhar Dharmarajan (Washington University, USA); Johannes Freudenberg (Cincinnati Children's Hospital, USA); G. Alexander Patterson, Weixiong Zhang (Washington University, USA)

Sensitivity and Consistency of Affymetrix GeneChip Normalization Methods ..........................................1081
Jared Fox, Nik Brown (UCLA, USA)

Session 23: Bioengineering (Part A) -- Deformable and 3D Modeling

Statistical Shape Analysis of the Corpus Callosum in Subtypes of Autism .............................................1087
Qing He, Ye Duan, Judith Miles, Nicole Takahashi (University of Missouri-Columbia, USA)

Simulation and Visualization of Menisci-Femur Contact using Patient-Specific Deformable Models ..........1092
Ying Zhu (Georgia State University, USA)
Improved Edge Map of Geometrical Active Contour Model based on Coupling to Anisotropic Diffusion Filtering
Foued Derraz, Abdelmalik Taleb-Ahmed (Valenciennes and Hainaut Cambresis University, France); Azzeddine Chikh, Fethi Bereksi-Reguig (Abou Bekr Belkaid University, Algeria)

Analysis of Cardiac Wall Motion Estimation Methods
Soroor Behbahani, Keivan Magholi (Islamic Azad University, Iran)

Partial Transmission High-Speed Continuous Tracking Multi-Leaf Collimator for 4D Adaptive Radiation Therapy
Tarun Podder, Ivan Buzurovic, Yida Hu, James M. Galvin, Yan Yu (Thomas Jefferson University, USA)

Quantitative Analysis of Inter-Object Spatial Relationships in Biological Images
Wamiq Ahmed, Magdalena Jonczyk, Ali Shamsaie, Arif Ghafoor, J. Paul Robinson (Purdue University, USA)

Session 24: Bioengineering (Part B) – Biomedical Image Processing I

Histogram Transformation for Inter-Modality Image Registration
Joerg Meyer (University of California at Irvine, USA)

The GPU on Biomedical Image Processing for Color and Phenotype Analysis
Antonio Ruiz, Manuel Ujaldon, Jose Antonio Andrades, Jose Becerra (University of Malaga, Spain); Kun Huang, Tony Pan, Joel Saltz (Ohio State University, USA)

Tissue Identification in Ultrasound Images using Rayleigh Local Parameter Estimation
Santiago Aja-Fernández, Marcos Martin-Fernández, Carlos Alberola-Lopez (Universidad de Valladolid, Spain)

Exploring Cardioneural Signal from Noninvasive ECG Measurement
Amirali Shayan Arani, Yi Zhu, Yi-Ning Cheng (University of California San Diego, USA); Shien-Fong Lin, Peng-Sheng Chen (Indiana University, USA); Chung-Kuan Cheng (University of California San Diego, USA)

MS Lesions Detection in MRI using Grouping Artificial Immune Networks
Akmal Younis, Ahmed T. Soliman, Mansur R. Kabuka, Nigel M. John (University of Miami, USA)

Non-Negative Tensor Factorization Based on Alternating Large-Scale Non-Negativity-Constrained Least Squares
Hyunsoo Kim, Haesun Park (Georgia Institute of Technology, USA); Lars Eldén (Linkoping University, Sweden)

Session 25: Bioengineering (Part C) – Biomedical Image Processing II

A Computer Aided Tool for the Assessment of Human Sperm Morphology
Henry Carrillo Lindado, Jorge Villarreal, Miguel Sotaquirá, Álvaro Goelkel, Ricardo Gutiérrez (Universidad del Norte, Colombia)

Feature Estimation for Vocal Fold Edema Detection Using Short-Term Cepstral Analysis
Benedito G. Aguiar Neto, Joseana M. Fechine, Silvana Cunha Costa (Federal University of Campina Grande, Brazil); Menaka Muppa (University of Washington, USA)

A New Hybrid Technique for Dermatological Image Registration
Heng Huang (University of Texas at Arlington, USA); Paul Bergstresser (University of Texas Southwestern Medical Center, USA)

PID Control based on BP Neural Network for the Regulation of Blood Glucose Level in Diabetes
Chengwei Li (Harbin Institute of Technology, China); Ruiqiang Hu (Yan Shan University, China)

Spatiotemporal Analysis of an Agent-Based Model of a Colony of Keratinocytes: A First Approach for the Development of Validation Methods
Cesar Pichardo-Almarza, Rod Smallwood, S.A. Billings (University of Sheffield, UK)
Session 26: Sequence Analysis and Sequence Alignment

A Suffix Tree Construction Algorithm for DNA Sequences ................................................................. 1178
Hongwei Hu (Xidian University, China); Vojislav Stojkovic (Morgan State University, USA)

Identifying Fungal Regulatory Motif Patterns Using SCOPE, an Ensemble Learning Method Motif Finder ...... 1183
Viktor Martyanov, Larkin Elderon, Amy Gladfelter, Dhanalakshmi R. Nair, Robert H. Gross (Dartmouth College, USA)

Computational Identification of Cis-regulatory Elements Associated with Pungency of Chili Peppers .......... 1188
Tiening Ji, Desh Ranjan, Jeanne Curry, Mary O’Connell (New Mexico State University, USA)

Speeding Up Pairwise Sequence Alignments: A Scoring Scheme Reweighting Based Approach ................. 1194
Yong Gao, Michael Henderson (University of British Columbia Okanagan, Canada)

Iterative Refinement of Repeat Sequence Specification Using Constrained Pattern Matching ...................... 1199
Dan He, Abdullah N. Arslan, Yu He, Xindong Wu (The University of Vermont, USA)

Differential Scoring for Systolic Sequence Alignment .............................................................................. 1204
Antonio de la Serna (IEEE)

Determining Domain Similarity and Domain-Protein Similarity Using Functional Similarity Measurements of Gene Ontology Terms ................................................................. 1209
Jennifer Leopold, Anne Maglia, Lisa Guntly (University of Missouri - Rolla, USA)

Signal Representation and Processing of Nucleotide Sequences ............................................................. 1214
Paul Cristea, Rodica Tuducu, Iulian Nastac (University "Politehnica" of Bucharest, Romania); Jan Cornelis, Rudi Deklerck (Vrije Universiteit Brussel, Belgium); Marius Andrei (Google Inc., USA)

Cluster Analysis of Regulatory Sequences with a Log Likelihood Ratio Statistics-Based Similarity Measure .................................................................................................................. 1220
Huiru Zheng, Haiying Wang (University of Ulster, UK); Jinglu Hu (Waseda University, Japan)

Session 27: Bioengineering (Part D) – Biomedical Applications

A PQRM-Based PACS System for Advanced Medical Services Under Grid Environment ............................ 1225
Yong-Jie Ni, Chan-Hyun Youn, Byoung-Jin Kim, Young-Joo Han, Peng Liu (Information and Communications University, Korea)

Middleware Based Inpatient Healthcare Information System ..................................................................... 1230

Generating Social Networks of Intimate Contacts for the Study of Public Health Intervention Strategies ........ 1235
Courtney R. Corley, Lindsey Brown, Armin R. Mikler (University of North Texas, USA); Diane J. Cook (Washington State University, USA); Karan Singh (University of North Texas Health Science Center, USA)

YinYang Mental Squares – An Equilibrium-Based System For Bipolar Neurobiological Pattern Classification and Analysis .................................................................................................. 1240
Wen-Ran Zhang, Karl Peace (Georgia Southern University, USA)

 Automatically Extracting Acronyms from Biomedical Text ..................................................................... 1245
Jared Fox, Nik Brown (UCLA, USA)

Feature Extraction and Parameters Selection of Classification Model on Brain-Computer Interface .............. 1249
Mingyuan Zhao, Mingtian Zhou, Qingxin Zhu, Ping Yang (University of Electronic Science Technology of China)

Session 28: Biological Networks

Consistent Modeling, Integration and Simulation of Molecular Interaction Networks in Space-Time Dimension .......................................................................................................................... 1254
Rui Chang (Technical University of Munich, Germany)
Feature Reduction for Gene Regulatory Network Control .................................................................1260
Mehmet Tan (University of Calgary, Canada); Faruk Polat (Middle East Technical University, Turkey);
Reda Alhajj (University of Calgary, Canada)

Graph Mining of Networks from Genome Biology .............................................................................1265
George Chin, Jr., Grant C. Nakamura, Daniel G. Chavarria, Heidi J. Sofia (Pacific Northwest National
Laboratory, USA)

Structural Prediction of Protein-Protein Interactions in Saccharomyces Cerevisiae .........................1270
Martin S.R. Paradisi, Doina Caragea, William H. Hsu (Kansas State University, USA)

Complete Backtranslation of Oligopeptides for Metabolic Pathways Exploration of
Complex Environments Using Functional Microarrays ...........................................................................1275
Mohieddine Missaoui, David R.C. Hill (Laboratoire d’ informatique et de Modélisation et Optimization des Systèmes
(LIMOS), France); Cécile Milion, Pierre Peyret (Laboratoire de Biologie des Protistes (LBP), France)

A Structure Learning Algorithm for Inference of Gene Networks from Microarray Gene
Expression Data Using Bayesian Networks.................................................................................................1280
Kazuyuki Numata, Seiya Imoto, Satoru Miyano (University of Tokyo, Japan)

Session 29: Algorithms in Bioinformatics

An Algorithm for Mining Fuzzy Association Rules Based on Immune Principles .................................1285
Zhang Lei, Li Ren-hou (Xi’an Jiaotong University, China); Zhang Lei (Henan University of Science and
Technology, China)

Toward The Recognition Code Of Protein-DNA Recognition .................................................................1290
Juan Shan, Yuxuan Wang, Changhui Yan (Utah State University, USA)

Self-Optimizing Parallel Algorithms for Haplotype Reconstruction and Their Evaluation
on the JPT and CHB Genotype Data ...........................................................................................................1294
Dragoș Trincă, Sanguthevar Rajasekaran (University of Connecticut, USA)

Reducing Folding Scenario Candidates in Pseudoknots Detection Using PLMM_DPSS Algorithm
Integrated with Energy Filters .....................................................................................................................1299
Xiaolu Huang, Hesham Ali (University of Nebraska at Omaha, USA)

Exploring Topological Properties of NMR Graphs................................................................................1304
Paulius Micikevicius (Armstrong Atlantic State University, USA); Narsingh Deo (University of Central Florida, USA)

Probability Analysis on Associations of Adverse Drug Events with Drug-Drug Interactions ..............1308
Yu-Ting Huang, Shih-Fang Lin, Chung-Cheng Chiu, Hsiang-Yuan Yeh, Von-Wun Soo (National Tsing
Hua University, Taiwan)

Session 30: Bioinformatics Tools

Combining Semantics, Context, and Statistical Evidence in Genomics Literature Search ..................1313
Jay Urbain, Nazli Goharian (Illinois Institute of Technology, USA); Ophir Frieder (Georgetown University, USA)

Graph and Topological Structure Mining on Scientific Articles ............................................................1318
Fan Wang (The Ohio State University, USA); Ruoming Jin (Kent State University, USA); Gagan Agrawal
(Ohio State University, USA); Helen Piontkivska (Kent State University, USA)

Supervised HITS Algorithm for MEDLINE Citation Ranking .................................................................1323
Ying Liu, Yongjing Lin (University of Texas at Dallas, USA)

Storing Efficiently Bioinformatics Workflows .........................................................................................1328
Michel Kinsy, Zoe Lacroix (Arizona State University, USA)
Intelligent Interfaces for Mining Large-Scale RNAi-HCS Image Databases ................................................................. 1333
Chen Lin, Wayne Mak, Pengyu Hong (Brandeis University, USA); Katharine Sepp (Harvard Medical School, USA); Norbert Perrimon (Harvard Medical School and Howard Hughes Medical Institute, USA)

GPX: A Tool for the Exploration and Visualization of Genome Evolution .............................................................. 1338
Neha Nahar, Lutz Hamel (University of Rhode Island, USA); Maria S. Poptsova, J. Peter Gogarten (University of Connecticut, USA)

SBLAST: Structural Basic Local Alignment Searching Tools using Geometric Hashing ............................................. 1343
Tom Milledge (Florida International University, USA); Gaolin Zheng (North Carolina Central University, USA); Tim Mullins (IBM Systems and Technology Group, USA); Giri Narasimhan (Florida International University, USA)

Session 31: Protein Structural Prediction and Functional Analysis

G-Protein Coupled Receptor Subfamilies Prediction Based on Nearest Neighbor Approach ................................. 1348
Mudassir Fayyaz, Adnan Mujahid (Ghulam Ishaq Khan Institute of Engineering Science & Technology, Pakistan); Asifullah Khan, Taesun Choi (Gwangju Institute of Science Technology, Korea); Nadeem Iqbal (Korea Advanced Institute of Science and Technology KAIST, Korea)

Protein Secondary Structure Prediction Using Genetic Neural Support Vector Machines ...................................... 1355
Anjun Reyaz-Ahmed, Yan-Qing Zhang (Georgia State University, USA)

An HV-SVM Classifier to Infer TF-TF Interactions Using Protein Domains and GO Annotations ....................... 1360
Xiao-Li Li (Institute for Infocomm Research, Singapore); Jun-Xiang Lee, Bharadwaj Veeravalli (National University of Singapore, Singapore); See-Kiong Ng (Institute for Infocomm Research, Singapore)

Supervised Statistical and Machine Learning Approaches to Inferring Pairwise and Module-Based Protein Interaction Networks .............................................................................................................. 1365
Fiona Browne, Haiying Wang, Huiru Zheng, Francisco Azuaje (University of Ulster at Jordanstown, UK)

Predicting Protein Subcellular Localizations Using Weighted Euclidian Distance .................................................. 1370
Jing Hu, Changhui Yan (Utah State University, USA)

An Efficient Data Structure for Applying Multiple Seeds in Homology Search ....................................................... 1374
Alireza Hadj Khodabakhshi (Simon Fraser University, Canada); Mehdi Mirzazadeh (University of Waterloo, Canada); Arvind Gupta (Simon Fraser University, Canada)

A Mixture of Experts Method for Predicting Domain Boundaries in Proteins ....................................................... 1379
Ian MacDonald (College of Saint Rose, USA); George Berg (University at Albany, SUNY, USA)

SIGN: Reliable Protein Interaction Identification by Integrating the Similarity in GO and the Similarity in Protein Interaction Networks ............................................................................................................... 1384
Woochang Hwang, Taehyong Kim, Young-rae Cho, Aidong Zhang, Murali Ramanathan (State University of New York at Buffalo, USA)

Session 32: Bioinformatics Applications

Identification of Differential Flow Cytometry Expression ............................................................................................ 1389
Elizabeth Rossin, Saumyadipta Pyne (Broad Institute of MIT and Harvard, USA); Florian Hahne (German Cancer Research Center, Germany); Philip L. De Jager (Brigham & Women's Hospital, USA)

Performance Characterization of BLAST for the Grid ................................................................................................. 1394
Enis Afgan, Purushotham Bangalore (University of Alabama at Birmingham, USA)

Large-Scale Discovery of Regulatory Motifs Involved in Alternative Splicing ...................................................... 1399
Sihui Zhao, Jiuye Kim, Steffen Heber (North Carolina State University, USA)

Semiparametric RMA Background-Correction for Oligonucleotide Arrays ............................................................ 1404
Ionut Bebu, Françoise Seillier-Moiseiwitsch, Hongfang Liu (Georgetown University, USA)
Alternative Splicing: Associating Frequency with Isoforms ....................................................................................................................... 1409
Anuradha Roy, Jennifer L. Leopold, Anne M. Maglia (University of Missouri - Rolla, USA)

A Proposed Statistical Protocol for the Analysis of Metabolic Toxicological Data Derived from NMR Spectroscopy .......................................................................................................................... 1414
Benjamin Kelly, Paul Anderson, Nicholas Reo (Wright State University, USA); Nicholas DelRaso (Wright-Patterson AFB, USA); Travis Doom, Michael Raymer (Wright State University, USA)

A Framework for Mass Spectral Quality Assessment without Prior Information .............................................................................................................. 1419
Fang-Xiang Wu, Jiarui Ding (University of Saskatchewan, Canada); Guy G. Poirier (Laval University Medical Research Center (CHUL), Canada)

Using Long Fragments to Reconstruct RNA Backbones ................................................................................................................................. 1424
Tapani Utriainen, Graham Kemp (Chalmers University of Technology, Sweden)

A Modified Uniformization Method for the Chemical Master Equation ................................................................................................................. 1429
Jingwei Zhang, Layne Watson (Virginia Polytechnic Institute and State University, USA)

Decision Fusion of Circulating Markers for Breast Cancer Detection in Premenopausal Women .................................................................................. 1434
Jonathan L. Jesneck, Sayan Mukherjee, Loren W. Nolte (Duke University, USA); Anna E. Lokshin (University of Pittsburgh, USA); Jeffrey R. Marks, Joseph Lo (Duke University, USA)

IEEE BIBE Plenary Keynote Lecture Notes (Part II)

Partial Least Squares Based Dimension Reduction with Gene Selection for Tumor ........................................................................................................... 1439
Guo-Zheng Li; Xue-Qiang Zeng (Shanghai University, China); Jack Y. Yang (Harvard Medical School, Harvard University, USA); Mary Qu Yang (National Human Genome Research Institute, National Institutes of Health (NIH), USA)

Functional and Molecular Imaging: Key Components of Personalized Healthcare .................................................................................................. 1445
Steven E. Seltzer (Harvard Medical School and Brigham & Women’s Hospital, USA)

Biomedical Literature Mining ...................................................................................................................................................................................... 1446
Xiaohua Hu (Drexel University, USA)

An Overview of Bidirectional Promoters ......................................................................................................................................................... 1447
Mary Qu Yang (National Human Genome Research Institute, National Institutes of Health (NIH), U.S. Department of Health and Human Services and Oak Ridge, DOE, USA); Laura L. Elnitski (National Human Genome Research Institute, National Institutes of Health (NIH), U.S. Department of Health and Human Services, USA)

Distributed wireless sensors on the Human Body .................................................................................................................................................. 1448
Ruzena Bajcsy (University of California at Berkeley, USA)

Transforming Medicine: Genomics, Bioinformatics, and Human Health ............................................................................................................. 1449
Andreas D. Baxevanis (National Human Genome Research Institute, National Institutes of Health (NIH), U.S. Department of Health and Human Services, USA)

Integrative Biomedical Informatics ............................................................................................................................................................... 1450
Brain D. Athey (University of Michigan Medical School and National Center for Integrative Biomedical Informatics (NCIBI), USA)

Bio-Nano-Info Integration for Personalized Medicine ................................................................................................................................. 1451
Eric Jakobsson (National Center for Biomimetic Nanoconductors and University of Illinois at Urbana-Champaign, USA); May D. Wang (Georgia Tech and Emory University); Linda Molnar (National Cancer Institute, National Institutes of Health, U.S. Department of Health and Human Services, USA)
Tutorial Lecture Notes

Using the Soybean Genome Database (SoyGD) To Display and Analyze a 1 Gbp Genome Sequence ..................1453
David Lightfoot, Mengxia Michelle Zhu (Southern Illinois University, Carbondale, USA)

Biometrics Intelligence Information Systems and Applications ..............................................................................1454
Patrick S. P. Wang (Northeastern University, USA)

Knowledge Modeling for High Content Screening of Multimedia Biological Data ...........................................1455
Arif Ghafoor, J. Paul Robinson (Purdue University, West Lafayette, USA)

Reconstructing Signal Transduction from Raw Genomic Data .............................................................................1456
Igor B. Zhulin (Oak Ridge National Laboratory, DOE, USA)

Studying co-Regulation and Inter-regulation of Genes via eQTL Mapping ........................................................1457
Tian Zheng (Columbia University, USA)

Lecture on Progress Toward Petascale Applications in Bioinformatics and Computational Biology ...............1458
Craig A. Stewart, Malinda Lingwall (Indiana University, USA); David Bade (Georgia Institute of Technology, USA)

Performance Evaluation of a Scalable Molecular Dynamics Simulation Framework on a Massively-Parallel System .................................................................1459
Sadaf R. Alam, Pratul K. Agarwal and Jeffery A. Kuehn (Oak Ridge National Laboratory, DOE, USA)

Author Index for Volume I and II ................................................................. Follows page 634

Author Index for Volume I and II ................................................................. Follows page 1467
