Investigations of Density Transducers for Natural Gas Metering ........................................ 1
F. Weber, Physikalisch-Technische Bundesanstalt, Germany

Guidelines for efficient improvement of accuracy in oil and gas flow measurements ........................................ 24
Risto Kuoppamäki, Indmeas Oy, Finland

Transient Diffraction Effects in Ultrasonic Meters for Volumetric, Mass and Energy Flow Measurement of Natural Gas ......................................................... 31
Magne Vestrheim, University of Bergen, Norway

Wet Gas

Venturi Meters in Wet Gas Flow ................................................................................................................. 58
D. G. Stewart, D. Hodges and G. Brown, National Engineering Laboratory, UK

Penguin Wet Gas Measurement .................................................................................................................. 73
Ian M. Wood, Shell U.K. Exploration & Production, UK, Paul Daniel, Alan Downing, Solartron ISA, UK

Suitability of Dry Gas Metering Technology for Wet Gas Metering ...................................................... 96
D. G. Stewart and D. Hodges, National Engineering Laboratory, UK

Wet Gas Allocation on the Canyon Express Project ..................................................................................... 113
Chris Cooley, TotalFinaElf Chip Letton and / Jim Hall, Letton-Hall Group

New Method to Determine the Liquid Content of a Wet gas Stream and Provide a Sample of the Liquid Phase for Composition ......................................................... 134
Mark Jiskoot, Jiscoot Autocontrol Ltd, UK and Ken Payne, Amec, UK

Wet Gas Experience with Single Path Ultrasonic Meter ......................................................................... N/A
Skule Smørgrav, FMC Kongsberg Metering AS, Norway

Flow meter Applications ........................................................................................................................................

The Transit Time Difference Ultrasonic Gas Meter - A Reassessment ..................................................... 144
Klaus J. Zanker, Tom Mooney, Daniel Industries, USA

Research Developments In Wet Gas Metering with V-Cone Meters ....................................................... 159
Richard Steven and, Phillip A. Lawrence, McCrometer, USA

Ageing Effects on Orifice Metering ......................................................................................................... 180
Michael Reader-Harris, NEL, UK

Latest advances in Ultrasonic Flow Measurement of Natural Gas using Externally Mounted, Non-intrusive Sensors ..................................................................................... 193
Peter G. Espina, Douglas Baumoel, Controlotron Corporation, USA

GE-Panametrics Clamp-on Flow Meter, Results in Industrial Gas Applications ...................................... 206
Shirley Ao, R&D, and Jacob Freeke, GE-Panametrics, USA Steven Milford, GE-Panametrics, UK
Experience in Flow Metering

Experiences with a Fiscal Metering System using Coriolis Meters

Frank Svendsen, VTM AS, Norway

Long Term Operational Experience of Turbine Meters

József Balla and F. Takáras, MOL Rt, Hungary

Operating Experience with two Ultrasonic Gas Meters in Series

Trond Folkestad, Dag Flålo, Hallvard Tunheim and Øyvind Nesse, Norsk Hydro ASA, Norway

Krohne Altosonic-V, with Master Meter Approach - Rough Road to Success with Oil Ultrasonic Fiscal Meter at Snorre B

M. J. Dalström, Statoil ASA, Norway

Metering - the Challenges of Satellite Developments

Rosalind Rowe, Mike Carnegie, Shell U.K. Exploration and Production

Standards and Regulations

The Harmonized high-pressure Natural Gas cubic meter of Germany and The Netherlands

Gerg Project: Wide-Range Reference Equation of State for Natural Gases

M. Jaeschke, Ruhrgas AG, Germany, A. Benito, Enegas, Spain, A. Fredheim, Statoil ASA, Norway, J.-M. Henault, Gaz de France, P. v. Wesenbeec, Gastransport Services, the Netherlands, B. Viglette, Snam Rete Gas, Italy, R. Klimeck / O. Kunz / W. Wagner, Ruhr Universität Bochum, Germany

API Draft Standard - Measurement of Liquid Hydrocarbons by Ultrasonic Flow Meters using Transit Time Technology

Andre de Boer, Krohne, The Netherlands

Multiphase

Operation and Evaluation of a Roxar Multiphase Meter in Sour Field Environment

Joe J. S. Shen, Chevron Texaco Exploration & Production Technology Co, USA S. J. Vierkandt and K. A. Ogden, Tengizchevroil, Kazakhstan

Flow Measurement in Sub Sea Installations

Martin Svenungsen, Svein Petter Hansrud, Ole Vidar Jonsjord, Arne Daae Hagen

Phase Watcher VX Multiphase Flowmeter Heidrun Experience and Analysis

Dr. Paul Ove Moksnes, Framo Engineering, Norway, Knut Skaardalsmo, Statoil ASA, Norway

Downhole Fiber Optic 3-phase Flow Meter Field Test at BP Mungo

Espen S. Johansen, Weatherford, USA

Measurement Methods and Equipment

Flare Meter Monitoring Method, and Flare Meter High Velocity Extender

Maron J. Dahlström, Statoil ASA, Norway

Multibeam Ultrasonic Liquid Flow Meter for Fiscal Metering and Custody Transfer Applications

Jean Luc Guizot, Faure Herman Intertechnique, France
