Material on the CD was reproduced from original papers and/or electronic files provided by the authors. Some discrepancies are inevitable. Please advise SPE of errors so corrections can be made to the electronic versions of the article. Send corrections by e-mail to pdf@spe.org or mail to the SPE Americas Office, attention Technical Paper Administrator.
# TABLE OF CONTENTS

Drill Faster, Deeper, and Further with Ultrahigh-Torque Third-generation Double-Shoulder Connections .......................................................... 1  
*R. Brett Chandler, Andrei Muradov, Michael J. Jellison, Grant Prideco, Manuel E. Gonzalez, Jiang Wu*

New Era of Formation Evaluation While Drilling of Complex Reservoirs in Saudi Arabia .................................................................................................................. 15  
*Abdullah Al-Fawwaz, Nedhal Al-Mashrafi, Saudi Aramco, Parvez Butt, Abdul Fareed*

Kuwait Employs Underbalanced Drilling Technology To Improve Drilling Performance While Simultaneously Evaluating the Reservoir .................................................... 24  
*F. Larroque, A.M. Al-Saleh, H. Ismael, H. Qutob, J.R. Chopty, P. Vieira*

Proactive 3d Geosteering Boosts Productivity and Recovery in Complex Clastic Environment ........................................................................................................... 32  
*Salih M. Al-Dossari, Yousef Al-Shobaili, Saudi Aramco, Mohsin AlHadhrami, Raed Nasr, Oludiran Babayeu*

Innovative Horizontal Water Injector Completion Improved Wellbore Accessibility and Enhanced Well Control .......................................................... 37  
*A.A. Al-Amer, M. I. Al-Sowayigh, A.A. Al-Mumen, A.K. Al-Zain*

Integrated BHA Modeling Delivers Optimal BHA Design .......................................................................................................................... 41  
*David C.-K. Chen*

New PDC Technology Solves Hard/Abrasive-Formation Challenge Drilling Vertical/Directional/Horizontal Applications ........................................................................ 52  
*Clayton Miller, Mahdy Al-Jezany, Mahdi Balhareth, Ismail Adebiyi, Zeinoun Klink, Hoss Parham, Imran Butt, Hussain Al-Abed*

A Probabilistic Approach for Drilling Cost Engineering and Management Case Study: Hassi-Messaoud Oil Field ........................................................................ 64  
*Mohamed Saibi*

Drilling Performance Management System .......................................................................................................................... 77  
*A. Rahil*

Successful Application of Underbalanced Coiled-Tubing Drilling in Horizontal Short-Radius Re-Entry Well to Enhance Oil Production in Hassi Messaoud Field, Algeria .................................................................................................................. 88  
*Bachir Ben Amor, Ali Ferhat, Rafik Messas, Maurizio Amone, Michael Stulberg, Rashid Khan, Fritz Schoch, Charles Fordyce, Hani Qutob, James Chopty*

Dual Lateral Horizontal Well Drilled Underbalanced in a Depleted Reservoir in Libya—Case Study .............................................................................................................. 98  
*Hussein Safar, Sadek Azhary, and Ahmad Hijazi, Zueitina Oil Company, Hani Qutob, James Chopty, and Chau Pham, Weatherford International*

Initial UBD-Reservoir Candidate Screening Prevents Applying the Technology to the Wrong Reservoirs: Case Study .............................................................. 107  
*Salar Babajan, Hani Qutob*
Evaluation of Formation Damage of Turkish Southeastern Reservoirs Caused by Drilling Fluids .......................................................... 111
A. Gurkan Iscan, N.V. Turkse Perenco, Mustafa V. Kok, Heike Strauss

Using Neural Network System for Casing Collapse Occurrence and Its Depth Prediction in a Middle-Eastern Carbonate Field .......................................................... 117
S. Salehi, G. Hareland, M. Ganji, Keivan Khademi Dehkordi, M. Abdollahi

Borehole Stability (geomechanics) Modeling and Drilling Optimization Practices Improve Drilling Curves in Naturally Fractured Shale—A South Argentina Experience .................................................................................................................. 127
Horacio Fontana, Martin Paris, Seehong Ong

Geosteering in Umm Gudair Field with Simultaneous Density and Resistivity Images in Real Time (first Time in the World) .......................................................... 136
Ashis Kumar Gohain, Nayef Abdullah Al-Anzi, Ekpo Ita Archibong, Waleed Ahmed Jawad

Bit Performance Evaluation Revisited by Means of Bit Index and Formation Drillability Catalogue .................................................................................................................. 150
P. Macini, M. Magagni, G. Da Dalt, and P. Valente

Development of New Retarder Systems To Mitigate Differential Cement Setting in Long Deep Liners .................................................................................................................. 157

Mastering Real-Time Data Quality Control—How to Measure and Manage the Quality of (rig) Sensor Data .................................................................................................................. 172
W. Mathis, G. Thonhauser

Ultraslim Rotary-Steerable System Gives Greater Reservoir Access in Saudi Arabia .................................................................................................................. 182
Karam Dhaher, Christopher R. Chia, Khalifah Al-Amri, Riyadh Ahmad Bargawi

The Use of Multilateral Technology in an Environmentally Sensitive Area: The Val d’Agri Field, Italy .................................................................................................................. 187
Cristiano Caproni, John Johnstone, Giorgio Cavallaro

Solid Expandable Tubulars Expedites Access to Untapped Reserves From Existing Offshore Facilities .................................................................................................................. 203
Cameron Radtke, Mark Rivenbark

Implementation of a Shock and Vibration Mitigation Process: Achieving Real-Time Solutions and Savings .................................................................................................................. 208
Goke Akinrinraye, Amanda Weber, Hesham Elsweisy, Julio Palacio, Benny Poedjono, Roger Goobie

Attaining Performance, Deliverability and Cost-Effectiveness With Solid Expandable Tubular Systems .................................................................................................................. 225
Wael El-Mofty, Mark Rivenbark

Estimating Critical Velocity To Prevent Bed Development for Horizontal-Inclined Wellbores .................................................................................................................. 233
Evren M. Ozbayoglu, Arild Saasen, Mehmet Sorgun, Kare Svanes

Overcoming Environmental Challenges Using Innovative Approach of Dynamic Underbalance Perforating .................................................................................................................. 239
Dennis Baxter, Harold McCausland, Brian Wells, Vinay K. Mishra, Larry Behrmann

Aluminum-Based HPWBM Successfully Replaces Oil-Based Mud To Drill Exploratory Well in the Magellan Strait, Argentina .................................................................................................................. 249
Mario A. Ramirez, Saddok Benaissa, Gerald Ragnes, Angel Almaraz
Effective HSE Management and Auditing System Guarantees Results
Mamdouh Mahfouz, Abdel Razek Rashwan

Advanced Heated Annulus Drive Technology: An Emerging Technology Compatible With Directional Drilling To Improve Recovery From Tar-Sand Reservoirs
Wajid Ali

How to Evaluate the Effect of Mud Cake on Cement Bond Quality of Second Interface?
Yong Ma, Maorong Cui, Xiaoyang Guo, Qing Shi, Li Li

Sustainable Deployment of Geomechanics Technology To Reducing Well Construction Costs
Fersheed K. Mody, Uday Tare, Gary Wang

PDC Bit Designed for High Lateral and Torsional Stability Significantly Improves Rotary-Steerable Performance in the Middle East
Steve Barton, Dominic Carrington, John Clegg, Christopher Chia, Ali Garkas

Successful Application of Novel Cementing Technology in Hassi-Messaoud, Algeria
H. Bouras, E. Toukam, F.V. Martin, J.P. Bedel

A New Method of Sand Control: The Process and Its First Field Implementation
Mohamed A. Aggour, Sidqi A. Abu-Khamsin, El-Sayed A. Osman

Applied Newly Developed Technology To Overcome Deepwater Completion Difficulties
Omar Y. Mohamed, Ray Waters, Said Eid, Taher Aly, Sherif Aly Hassaballa

One-Trip Installation of 4¾-in. Expandable Screen Assembly
Omar Y Mohamed, Ray Waters, Ahmed Attia, Stefano Pierfelici, Gharib Abdelaaty Petrobel, Giuseppe Ripa

In Situ Gelled Acid as a Diverting System in Water Injection Well

Innovation, Who Pays—Making the Economic Case for Adopting New Technologies
John Kozicz

The Challenges of Deviated Wells
Christian Krüger

Borehole Shape Characterization With Azimuthal LWD Measurements: Evaluation, Applications, and Limitations
P. Butt, A. Fareed, S.M. Ma, A.A. Al-Hajari

Minimizing the Risk of Well Collisions in Land and Offshore Drilling

Modified Offshore Drilling Operation—Serban Well (Nunukan Block)
Burhanudin Ahmad, Alfian Simamora, Farid Rosyidin, Victor Siregar

Successes in Curing Massive Lost-Circulation Problems With a New, Expansive LCM
Mahmoud El-Sayed, Ahmad Ezz, Moataz Aziz, Arshad Waheed

Optimization of Deepwater Drilling With Real-Time Operations
Walid Hamed, Ahmed Bassem, Medhat Gamal, Sherif Nafie, Moustafa Oraby, Arshad Waheed
