Proceedings

IEEE International Conference on Service-Oriented Computing and Applications

SOCA 2007

19-20 June 2007
Newport Beach, California, USA

Sponsored by
The IEEE Computer Society Technical Committee on Electronic Commerce

With support of
Intel
University of California, Irvine

Los Alamitos, California
Washington • Tokyo
# Table of Contents

Message from the Conference Chairs ................................................................. ix
SOCA 2007 Conference Organizers .................................................................... x

## Keynote Addresses

- **Clean Slate Design of Internet for Supporting Service-Oriented Computing and Applications**
  
  David H. C. Du

  3

- **Declarative Data Services: This is Your Data on SOA**
  
  Mike Carey

  4

- **ChinaGrid: One Step Forward to Services Computing**
  
  Hai Jin

  5

## Plenary Panel

- **Panel: Service Oriented Computing: Technology Trends and Research Directions**
  
  Moderator: Ricardo Morin
  Panelists: Mariano Cilia, William Henry, Michael Rowley, and Wei-Tek Tsai

  9

## Session 1

### Web Services Technologies

- **A Model Checking Approach to Verify BPEL4WS Workflows**
  
  Domenico Bianculli, Carlo Ghezzi, and Paola Spoletini

  13

- **Structure Matching for Enhancing UDDI Queries Results**
  
  Giancarlo Tretola and Eugenio Zimeo

  21

- **On Complexity of the Tightening Problem for Web Service Discovery**
  
  Zhongnan Shen and Jianwen Su

  29
Session 2

Service Oriented Architectures

Ontology-Based Dynamic Process Collaboration in Service-Oriented Architecture .................................................. 39
W. T. Tsai, Qian Huang, Jingjing Xu, Yinong Chen, and Ray Paul

On the Emergence of an Application-Oriented Network Architecture ........................................................................ 47
Hadi Bannazadeh and Alberto Leon-Garcia

Hierarchical Management of Service Accountability in Service Oriented Architectures....................................... 55
Yue Zhang and Kwei-Jay Lin

Session 3

Web Services - Creation and Composition

Method of Creating Web Services from Web Applications ....................................................................................... 65
Yusuke Nakano, Yoji Yamato, Michiharu Takemoto, and Hiroshi Sunaga

Creating Web Services from GUI-Based Applications .......................................................................................... 72
Mark Grechanik, Kevin M. Conroy, and Kishore S. Swaminathan

Improving Transparent Adaptability in Web Service Composition ........................................................................ 80
Fernando Antonio Aires Lins, José Carlos dos Santos Júnior, and Nelson Souto Rosa

Application Development Powered by Rapid, On-Demand Service Composition ................................................. 88
Maja Vuković, Evangelos Kotsovinos, and Peter Robinson

Session 4

Service Systems Development

Scaling Down SOA to Small Businesses ..................................................................................................................... 99
Enrique Castro-Leon, Jackson He, and Mark Chang

Authoring Tool for Business Performance Monitoring and Control ....................................................................... 107
Mari Åbe, Jun-Jang Jeng, and Teruo Koyanagi

Strategies for the Run-Time Testing of Third Party Web Services ......................................................................... 114
Daniel Brenner, Colin Atkinson, Oliver Hummel, and Dietmar Stoll

Specification of Realizable Service Conversations Using Collaboration Diagrams ............................................... 122
Tevfik Bultan and Xiang Fu

Session 5

Services Performance and Operational Models

Static Analysis of Business Artifact-Centric Operational Models ............................................................................. 133
Cagdas E. Gerede, Kamal Bhattacharya, and Jianwen Su

Allocating Services to Applications Using Markov Decision Processes ................................................................. 141
Hadi Bannazadeh and Alberto Leon-Garcia
Improving Performance of Composite Web Services ................................................................. 147
  Dmytro Dyachuk and Ralph Deters

Multi-disciplinary Simulation and Analysis of Complex Product in Service
  Oriented Environment ................................................................. 155
  Hongwei Wang, Shih-wei Liao, and Heming Zhang

Session 6

Services Quality and Adaptation

More Semantics in QoS Matching......................................................................................... 163
  Ester Giallonardo and Eugenio Zimeo

Mobile Agent and Web Service Integration Security Architecture........................................... 172
  Junqi Zhang, Yan Wang, and Vijay Varadharajan

Negotiating Agreements Using Policies in Ubiquitous Computing Scenarios ......................... 180
  V. Ramakrishna, Kevin Eustice, and Peter Reiher

Session 7

Services-Oriented Application Development

A Comprehensive Approach to Service Adaptation................................................................. 191
  Soo Ho Chang, Hyun Jung La, and Soo Dong Kim

Context-Aware Process Support through Automatic Selection and Invocation
  of Semantic Web Services ..................................................................................................... 199
  Stefan Dietze, Alessio Gugliotta, and John Domingue

VIDIHIP – A Web Service Based Integration Platform for Power Plant Control Systems .......... 207
  Mark Strembeck and Otto U. Pihal

Service-Oriented Network Description and Discovery for High-Performance
  Grid Computing .......................................................................................... 215
  Qiang Duan

The Knowledge Grid Based Intelligent Electronic Commerce Recommender Systems........... 223
  Pingfeng Liu, Guihua Nie, Donglin Chen, and Zhichao Fu

Session 8

Run-Time Services and Applications

A Middleware Approach for Behavior Consistent Composition of Services in Smart Space........ 233
  Qin Yin, Hao Hu, Jun Li, and Jian Lu

A Formal Framework for Trust Management of Service-Oriented Systems.......................... 241
  Liang Zhengping, Liu Xiaoli, Wu Guoqing, Yang Min, and Zhang Fan

Implementation of Supply Chains Coordination Using Semantic Web Service Composition .... 249
  Yongjun Liu and Guihua Nie
Real-Time State Management in Mobile Peer-to-Peer File-Sharing Services ................................................. 255
  Fang Zhiyuan, Chen Xiaoyun, Tang Yong, Zhang Jingchun, and Zhou Yu

Web Service Middleware – An Infrastructure for Near Future Real Life Web Service Ecosystems ............................................................... 261
  Jan Schulz-Hofen

Industry Session N1

Business Services and Business Componentization: New Gaps between Business and IT ......................................................... 271
  Jorge L. Sanz, Valeria Becker, Juan Cappi, Ankur Chandra, Joseph Kramer,
  Kelly Lyman, Nitin Nayak, Pablo Pesce, Ignacio Terrizzano, and John Vergo

A Service-Oriented Architecture for Business Intelligence ........................................................................... 279
  Liya Wu, Gilad Barash, and Claudio Bartolini

System Dynamics Modeling for SOA Project Management ............................................................................... 286
  JJ Jeng and Lianjun An

Industry Session N2

Service-Oriented Framework for Internet Applications ............................................................................. 295
  Tony C. Shan and Winnie W. Hua

Experience Report: Use of SAP NetWeaver Technology to Realize SOA-Based BPM Tasks ......................................................... 303
  R. Hirsch

A Case Study on Community-Enabled SOA Application Development ........................................................................... 309
  Liu Ying, Feng Chenhua, Zhao Wei, Su Hui, and Liu Hehui

Author Index ............................................................................................................................................. 317
