International Society for Trenchless Technology

25th No-Dig International Conference and Exhibition

Roma 07: Mediterranean No-Dig 2007

September 10-12, 2007
Rome, Italy

Printed from e-media with permission by:

Curran Associates, Inc.
57 Morehouse Lane

ISBN: 978-1-60423-932-4

Some format issues inherent in the e-media version may also appear in this print version.
# TABLE OF CONTENTS

## PLENARY SESSION 1

### SUSTAINABLE DEVELOPMENT OF THE URBAN ENVIRONMENT – SOCIAL COSTS AND LEGAL ASPECTS

- **Application of Game Theory to Develop the Competition Strategy for Contractor to Bid in Pipelines Construction Market**
  
  
  
  1

- **Outlooks In France Regarding How are Taken into Account the Social Costs in the Works of Installation or Rehabilitation of Networks**
  
  Christian Legaz
  
  8

- **Inefficiency Level, an Adimensional Index in the Indirect Generalized Costs Comparisons**
  
  Dr. Renzo Chirulli
  
  13

- **The French way to Upgrade Pipe Installation Projects: Les Chartes de Qualité**
  
  René-Claude Fouilloux, J.F. Maregian
  
  14

## PLENARY SESSION 2

### TRENCHLESS TECHNOLOGY: URBAN AREAS - UNDERGROUND MAPPING, SURVEYS, AND INSPECTIONS

- **Development of Conduit Position Measurement Technology Using a Gyroscope and GPS**
  
  Hiroyuki Yamashita, Hiroshi Tanaka, Susumu Baba, Yasushi Yamazaki
  
  23

- **Cost-Benefit Criteria for Georadar Utility Mapping Methods**
  
  A. Agostini
  
  32

- **Soil Electromagnetic Mapping for Enhanced GPR Utility Location**
  
  A.M. Thomas, C.D.F. Rogers, N. Metje, D.N. Chapman
  
  44

- **Guided Waves Inspection of Pipelines: Experiences of Italian Institute of Welding**
  
  F. Bresciai, F. Peri
  
  56

- **Measures for the Prevention of Road Cave-ins: An Inspection Technique Utilizing Electromagnetic Waves to Identify External Pipe Voids Surrounding Sewer Laterals**
  
  Katsumi Sakaki
  
  68

- **Airflow-Push type Intelligent TV Camera-System for the Pipes with Several Right-Angle Bends**
  
  Masanobu Kuroiwa, Naohiro Arita
  
  74
The ORFEUS Project: A Step Change In-Ground Penetrating Radar Technology to Locate Buried Utilities
Guido Manacorda, Howard Scott, Meinolf Rameil, Rémi Courseille, Mike Farrimond, Dave Pinchbeck

The Detector Duo
Alessandro Simi, Guido Manacorda

Applying Ultrasound for In-line Inspection
M. Unterseher, M. Beller, A. Barbian

Continuous Monitoring of Railway Tracks Under the Impact of Horizontal Boring, Micro Tunnelling or Directional Drilling Works.
René Foillard, Hervé Moussard, Jack Butterworth

PLENARY SESSION 3

TRENCHLESS TECHNOLOGY: URBAN AREAS – REHABILITATION OF UNDERGROUND UTILITIES

Trenchless Sewer Pipe Renovation Using the New Tight-In-Pipe Method in the Congested Streets of the City of Dortmund, Germany
M. Rameil, M. Seck

The Development Of “Gray-Buster-Advance Lining” Method For Renovation of Gray Cast-Iron Pipes
Y. Nishimura, H. Kikuchi, S. Shimizu

Rehabilitation of Road Culverts on the Equator. Implementation of Trenchless Solutions with Jacking and Relining Techniques.
Norbert Cheminot, Jean Marie Joussin, Siegfried Mahieux

Renovation of Large Pipes with Polyethylene
Thomas Meyer

Lining Through Open Joints and Other Host Pipe Defects
Robert McKim, Lynn Osborn, Jaan Oolup

The French Recommendations for the Structural Design of Large Sewer Linings
Dr O. Thépot

Northcrest-Afton Sewer Rehabilitation Project Multiple Technologies -- Maximum Flow Reduction
James W. Shelton, Michael T. Harmer

Experimental characterization of Cured In Place Pipes (CIPP)
A.A.G. Bruzzone, P.M. Lonardo, G. Diverio

“Cured-in-place Pipe Made Of A Fiber Glass-Reinforced Lining Material and Ureic Styrene-Free Thermosetting Resin: Technological Criteria and Case History”
Philippe Begou, Federico Prodi

Structural CIPP Rehabilitation Facilitates the Renewal of the Fire Protection Water Main in the Holland Tunnel, NY/NJ
Gene Camali, Joseph Loiacono

Application of CIPP (Cured In Place Pipe) for Water Pipe Rehabilitation
Myong-jin Yu, Mi-jeong Jang, Sanghyuck Park, Byoung-kwon Park, Ja-yong Koo
PLENARY SESSION 4

PROJECT FINANCING AND THE TRENCHLESS TECHNOLOGY FOR DEVELOPMENT AND NETWORK URBAN SERVICES

Increasing Demand For Pipeline Rehabilitation In Central Eastern European Countries ................................................................. 202
Anna Wróblewska

Stakeholder Engagement to Encourage Research Funding in Trenchless Topics ................................................................. 212
J. Parker

Increasing Financial Performance of Waste Water Utilities by Cost Efficient Strategic Asset Maintenance Planning ................................................................. 220
Robert Stein, Raul Trujillo Alvarez, Adrian T. Uhlenbroch

Impact Detection Technology May Localize Third-Party Damage in Real-Time ................................................................. 221
Jens Focke

PLENARY SESSION 5

DEVELOPMENT IN TRENCHLESS TECHNOLOGY: MATERIALS AND TESTING

Behavior of Over-cutting Area Injected by Flyash Surface-active Agent Mixture Material .................................................................................................................. 226

Long Distance (Micro-) Tunneling with Polymer Concrete ............................................................................................................. 236
Gerhard Lang

Curved Jacking of Centrifugally Cast GRP Pipes .......................................................................................................................... 244
Ulrich Wallmann

Analytical Study on the Ground Movement Caused by Pipe Bursting ............................................................................................... 256
R. Yamaoka, H. Shimada, T. Sasaoka, M. Hirai

The Structural Design of Large Non-Circular GRP Prefabricated Linings .................................................................................. 268
J.M. Joussin, Dr. O. Thépot

New HDD Material – Strong On-site Coating System .................................................................................................................... 278
M. Nakanishi, S. Kazui, N. Nishikata, T. Okiyu

The Problems of Design of Resin Liners .............................................................................................................................................. 283
Prof. Andrzej Kuliczkowski, Urszula Kubicka, Anna Parka

Investigation of Lifetime Expectancy of Cured-In-Place Pipes ........................................................................................................ 295
Peter Lystbaek

Buckling Experiments on Egg-shaped PE Linings ................................................................................................................................. 302
B. Falter

Development of a New High Performance PE Pressure Pipe System, from Design Phase To Reality .................................................................................................................. 314
Guido Kania, Robin Bresser, Christophe Salles

ONEDAYDIG™ - A New Dig Philosophy ........................................................................................................................................... 324
E. Cottino, A. Leo, U. Rossi
Rehabilitation of Water Mains, Gas and Oil Pipelines with Plastic Composite Liners Reinforced with Aramid Fibers (Kevlar®): Technological Criteria and Case History in Italy

Dr. Federico Prodi, Dr. Michele Libraro

The Benefits Of Pipelines Innovation: Nation’s Benefits of Using Plastics for Water and Gas Pipelines

Alessandro Marangoni

PLENARY SESSION 6

APPLICATION OF TRENCHLESS TECHNOLOGY: MICRO TUNNELING AND PIPE JACKING

Study on Stability of Surrounding Soil Using Culvert Pipe Jacking

Characterization of Soil Conditioning for Mechanized Tunnelling

Luca Boro, Daniele Peila, Claudio Oggeri, Sebastiano Pelizza

Trenchless Installation of Steel Pipes by Pipe Ramming for the Crossing of the Main Runway and The Taxiway at the International Airport of Capodichino, Naples

A. Chianese

Collection and Analysis of Case Studies of Microtunnelling Installations

M. Barla

Applicability of Microtunnelling Technology in the Torino Subsoil

M. Camusso, M. Barla

A High-complexity Microtunnel for Crossing Monte Lussari

U. Lazzarini, A. Guerini, U. Stefanel

Simulation of Pipe-Jacking: Computer Models and 1:1 Scale Tests

Bert Bosseler, Bernhard Falter

EASY PIPE®: A New Technology to Install Pipelines

Vittorio Petrucco

PLENARY SESSION 7

APPLICATION OF TRENCHLESS TECHNOLOGY: TUNNEL DRILLING

Risks During the Pull Back Operation of Horizontal Directional Drilling

H.M.G. Kruse, H.J. Brink

Modelling of HDD Pipeline Frictional Resistance, and Extruded Microtunnelling Linings for Long-Distance ‘Cable Pipe’ Installations

A.C.D. Royal, D.V.L. Hunt, C.D.F. Rogers, D.N. Chapman, M.A. Polak

The Importance of Suspension in Drilling Fluid Design to Maximize Hole Cleaning in a Horizontal Bore

G. Matula

Ticino River Crossing: A Borderline HDD

L. Adinolfi, A. Olcese, A. Aula

HDD Helps Protect Venice From Rising Sea Levels

Nicola Massella, Feliciano Esposto, Paolo Posocco, Tobia Gavagnin
Sardinia Rock Drilling Project to Supply Water to Gonone Paradise
Nicola Massella, Feliciano Esposto, Paolo Posocco, Tobia Gavagnin

Evaluation of an Extensive Measured HDD, 4” Steel Pipeline Crossing.
H.H.J. van der Werff

The HDD Technologies Applicated to the Environmental Remediation
M.Capaccetta, L. Praticò

HDD Rock Drilling In The Alpine Mountains (Impressive Job Sites from Italy, Switzerland, Germany, Slovenia, Austria)
Dr. Hans-Joachim Bayer

Thermoconductivity Effects on Electrical Installations Using Horizontal Directional Drilling
S.T. Ariaratnam, D.H. Koo, M.L. Dyer

Large Horizontal Direction Drilled Projects
Gerard P. Hoogveld, Ernst G. Fengler

Friction Welding with Pre-Forged Steel Pipes: A New Method For The Production of Ultra-High Strength Drill Pipe Grades for Horizontal Directional Drilling
Massimo Collli, Mirko Samac

Achieving Success in HDD Large Pipeline Installations by Use of New Generation Maxi To Mega Rigs
Rob Foster, Dan Sharpe, Rob Verwilligen

PLENARY SESSION 8

SUSTAINABLE DEVELOPMENT OF THE CITIES – CONDITION OF WATER NETWORKS FOR TREATMENT STORAGE

Methods of Construction of Tunnneled Outfalls, Advantages and Application of Different Tunnel Techniques
Raphael Sistermans,

Promoting Investment and Quality in the Local Infrastructures in Italy
Andrea Catanzano, Silvio Bosetti, David Walton, Cino Serrao

Case Study – No Dig: An Indispensable Toolbox in a Complex Sewerage Project
V. J. Jensen

Case Study – Water Main Rehabilitation in Eastern Canada
Giuseppe Loiacono, Piero Salvo

No-Dig 2007 Rome: Abstract for Paper
Dr. Andy Russell

A Case Study of Groundwater Pollution by Ammoniacal Nitrogen Contaminant - Remediation Action with Integrated Use of Three Technologies: CIPP (Cured In Place Pipe), Sealing and Phytodepuration
A. Vincenzi

Author Index
