American Concrete Institute

Self-Consolidating Concrete for Precast Prestressed Applications 2007

at the ACI Fall 2007 Convention

ACI Special Publications Series SP-247

October 14 – 18, 2007
Fajardo, Puerto Rico

Printed from e-media with permission by:
Curran Associates, Inc.
57 Morehouse Lane
Red Hook, NY 12571
www.proceedings.com

Some format issues inherent in the e-media version may also appear in this print version.
DISCUSSION of individual papers in this symposium may be submitted in accordance with general requirements of the ACI Publication Policy to ACI headquarters at the address given below. The closing date for submission of a discussion is March 2008. All discussions approved by the Technical Activities Committee along with closing remarks by the authors will be published in the July/August 2008 issue of either the ACI Structural Journal or the ACI Materials Journal, depending on the subject emphasis of the individual paper.

The Institute is not responsible for the statements or opinions expressed in its publications. Institute publications are not able to, nor intended to, supplant individual training, responsibility, or judgment of the user, or the supplier, of the information presented.

The papers in this volume have been reviewed under Institute publication procedures by individuals expert in the subject areas of the papers.
# TABLE OF CONTENTS

**SP-247—1**
Development of Self-Consolidating Concrete for Prestressed Bridge Beams ................................................................. 1
by E.P. Koehler and D.W. Fowler

**SP-247—2**
Applicability of Standard Equations for Predicting Mechanical Properties of SCC ......................................................... 17
by H.N. Atahan, D. Trejo, and M.D. Hueste

**SP-247—3**
Effect of Admixture Combination on Top-Bar Effect of Highly Flowable and Self-Consolidating Concrete Mixtures ................................................................. 33
by K.H. Khayat, E.K. Attiqbe, and H.T. See

**SP-247—4**
Improving Precast Operations in Sweden Through the Application of Self-Consolidating Concrete ........................................ 45
by R.C. Lewis and J. Larson

**SP-247—5**
Shear Characteristics of Self-Consolidating Concrete for Precast Prestressed Concrete Members ............................................. 53
by Y.H. Kim, D. Trejo, and M.D. Hueste

**SP-247—6**
Structural Behavior and Field-Monitoring of SCC Prestressed Box Beams for Demonstration Bridge ................................ 67
by R. Burgueño and D.A. Bendert

**SP-247—7**
Experimental Study of Prestress Land and Camber in High-Strength SCC Beams ................................................................. 77
by S.P. Gross, J.R. Yost, and E. Gaynor

**SP-247—8**
Prestress Losses in Beams Cast with Self-Consolidating Concrete ......................................................................................... 93
by E.D. Ruiz, B.W. Staton, N.H. Do, and W. Micah Hale

**SP-247—9**
Effect of SCC Mixture Proportioning on Transfer and Development Length of Prestressing Strand .................................. 105
by R. Burgueño and M. Haq

**SP-247—10**
Evaluation of Bond Properties in Self-Consolidating Prestressed Beams ........................................................................ 117
by E. Salcedo Rueda and A.J. Schokker

**SP-247—11**
Bond Strength and Shear Capacity of Prestressed Beams Made of SCC ........................................................................ 123
by J. Hegger, N. Will, and S. Bülte

**SP-247—12**
Time-Dependent Behavior of Full-Scale Self-Consolidating Concrete Precast Prestressed Girders .................................. 139
by B. Erkmen, C.K. Shield, and C.E. French
