AGILE 2007

13-17 August 2007 • Washington, DC

Conference presented by
Agile Alliance

Event Sponsors
Title Sponsors
Rally Software, Valtech

Additional Sponsors
Object Mentor, Luxoft, Command Information, Sapient, Thoughtworks Studios, Net Objectives, Microsoft, Version One, Exigen Services, ProjectCards, Objectbay, Green Pepper Software, Scrum Alliance, Siemens, Agile Logic, CC Pace, Solutions IQ, Pillar Technology, Addison Wesley and Prentice Hall, Industrial Logic, Number Six, Ternary Software, Agitar, Agile Infusion, Ajilus, Google

Media Sponsors
Methods and Tools, IEEE Software, Cutter Consortium, Better Software, Projects@Work, Software Business

In cooperation with
DSDM Consortium
Agile Project Leadership Network

Los Alamitos, California
Washington • Tokyo
# AGILE 2007

## Table of Contents

**Message from the Program Chairs** ............................................................................................. xi
**Organizing Committee** .................................................................................................................. xii

---

### RESEARCH PAPERS

**Introduction: Agile 2007 Research Papers** .................................................................................. 2
   *Grigori Melnik and Philippe Kruchten*

**Empirical Evaluation of TDD**

On the Sustained Use of a Test-Driven Development Practice at IBM ........................................ 5
   *Julio Cesar Sanchez, Laurie Williams, and E. Michael Maximilien*

Automated Recognition of Test-Driven Development with Zorro .................................................. 15
   *Philip M. Johnson and Hongbing Kou*

**Social Aspects of Agile Teams**

The Social Nature of Agile Teams ..................................................................................................... 26
   *Elizabeth Whitworth and Robert Biddle*

Does the XP Environment Meet the Motivational Needs of the Software Developer?
An Empirical Study .............................................................................................................................. 37
   *Sarah Beecham, Helen Sharp, Nathan Baddoo, Tracy Hall, and Hugh Robinson*
Agile Usability

Agile Development Iterations and UI Design ................................................................. 50
   Jennifer Ferreira, James Noble, and Robert Biddle

Towards Extreme(ly) Usable Software: Exploring Tensions between Usability and Agile Software Development ................................................................. 59
   Jason Chong Lee and D. Scott McCrickard

Impact of Agile Practices

The Relationship between Customer Collaboration and Software Project Overruns .......... 72
   Kjetil Molokken-Østvold and Kristian Marius Furulund

“Talking the Talk”: Is Intermediate-Level Conversation the Key to the Pair Programming Success Story? ................................................................. 84
   S. Freudenberg, P. Romero, and B. du Boulay

The Role of Incremental Change in Agile Software Processes ....................................... 92
   Neal Febbraro and Václav Rajlich

EDUCATORS SYMPOSIUM PAPERS

Introduction: Welcome to the Agile 2007 Educators Symposium ..................................... 104
   Gary Pollice and Brian Hanks

Teaching Agile Methods in the Classroom

Experiences Using Automated Tests and Test Driven Development in Computer Science I ................................................................. 106
   Carol A. Wellington, Thomas H. Briggs, and C. Dudley Girard

The Value of Agile in Experiential Learning of Software Development ......................... 113
   Cyril M. Coupal and Kelvin Boechler

Becoming Agile Using Service Learning in the Software Engineering Course ................ 121
   Brian Hanks

EXPERIENCE REPORTS

Introduction: Experience Reports .................................................................................... 128
   Rachel Davies and Angela Martin

Adoption Stories - Part 1

Consciously Evolving an Agile Team ............................................................................... 130
   Aaron Ruhnow
Large Scale Agile Transformation in an On-Demand World .......................................................... 136  
Chris Fry and Steve Greene

Agile ERP: “You Don’t Know What You’ve Got ’Till It’s Gone!” ......................................................... 143  
Gerard Meszaros and Janice Aston

**Agile Architecture Challenges**

Evolving into Embedded Development .......................................................................................... 150  
Matt Fletcher, William Bereza, Mike Karlesky, and Greg Williams

Traveling the Open Road: Using Open Source Practices to Transform Our Organization ................. 156  
Phillip Smith and Chris Garber-Brown

Agile Architecture—Changing Application Servers ........................................................................ 162  
Veljko Krunic

**Building Trust with Collaboration**

Overcoming Fear with Trust ........................................................................................................... 169  
Brian Button

Scrum at a Fortune 500 Manufacturing Company ........................................................................... 175  
Richard Moore, Kelly Reff, James Graham, and Brian Hackerson

Greater Successes by Using Agile Techniques Closer to the Light Bulb Moment ............................... 181  
Alan Armitage, Peter Wisniewski, and Alan de-Ste-Croix

**Agile PMO**

Establishing the Agile PMO: Managing Variability across Projects and Portfolios ......................... 188  
Ash Tengshe and Scott Noble

Agile Program Management: Lessons Learned from the VeriSign Managed Security Services Team ................................................................. 194  
Peter Hodgkins and Luke Hohmann

Enabling Agile in a Large Organization—Our Journey Down the Yellow Brick Road ....................... 200  
Thomas R. Seffernick

**Open Workspaces**

Common Areas at the Heart ........................................................................................................... 207  
George Dinwiddie

On Rabbits, Space and Cards: Moving Towards an Informative Workspace ...................................... 212  
Johanna Hunt, Tom Hume, and Devi Lozdan

Death of the Cubicle; the Open Office Experiment ....................................................................... 218  
Matt Plante
Growing People and Teams

The Growth of an Agile Coach Community at a Fortune 200 Company ......................................................... 225
Kara Silva and Chris Doss

The Rollercoaster of Required Agile Transition ................................................................................................. 229
Rich Jochems and Shane Rodgers

XP and Junior Developers: 7 Mistakes (and How to Avoid Them) ................................................................. 234
Richard Lawrence

Adoption Stories - Part 2

Get Your Agile Freak On! Agile Adoption at Yahoo! Music ................................................................................... 240
Gordon Cloke

Agile: Adopting a New Methodology at Harvard Business School ................................................................. 249
Susan Borges, Jennifer Gilmore, and Sarah Edrie Oliveira

Successful Integration of Agile Development Techniques within DISA ........................................................... 255
Sean Cohan

Process Improvement

ISO 9001 and Agile Development ....................................................................................................................... 262
Bill McMichael and Marc Lombardi

The Agile Maturity Map: A Goal Oriented Approach to Agile Improvement .................................................. 266
Jay Packlick

Scrum and CMMI Level 5: The Magic Potion for Code Warriors ................................................................. 272
Jeff Sutherland, Carsten Ruseng Jakobsen, and Kent Johnson

Supporting the Product Owner

A Strategy for Balancing Business Value and Story Size .................................................................................. 279
Hai Ton

The UCD Perspective: Before and After Agile .................................................................................................... 285
Heather Williams and Andrew Ferguson

From Waterfall to Agile—How Does a QA Team Transition? ....................................................................... 291
Megan Sumrell

Scaling Up

Managing a Large “Agile” Software Engineering Organization .................................................................... 296
Paul A. Beavers

Agility and the Inconceivably Large .................................................................................................................... 304
Ade Miller and Eric Carter
Scaling Agile Methodologies for Developing a Production Accounting System for the Oil and Gas Industry ........................................................................................................309
  Harprit Grewal and Frank Maurer

Product Ownership

Ript™: Innovation and Collective Product Ownership ........................................................................................................316
  Ken H. Judy and Ilio Krumins-Beens

Less, Never More: Launching a Product with Critical Features and Nothing More................................................324
  Scott A. Gatz and Gabrielle Benefield

Scaling Product Ownership ..................................................................................................................................................328
  Mike Lowery and Marcus Evans

Business and Technical People Working Together

How We Made Onsite Customer Work—An Extreme Success Story..................................................................................334
  Michelle Williams, Jay Packlick, Rajeev Bellubbi, and Scott Coburn

A Technical Story ................................................................................................................................................................339
  Nick Robinson

Octopus: Agile Software Development Facing Our Imperfect World.................................................................................344
  Eric Groise and Nicolas Mangin

Technical Stories

Performance Testing on an Agile Project ................................................................................................................................351
  Jamie Dobson

Large Build Teams: Help or Hindrance? ...............................................................................................................................359
  Julian Simpson and Shane Duan

Push to Pull: How Lean Concepts Improve a Data Migration ..............................................................................................365
  Rand Bradley

Distributed Agile

Implementing Scrum in a Distributed Software Development Organization .....................................................................371
  Hubert Smits and Guy Pshigoda

Offshore XP for PDA Development ................................................................................................................................376
  Sergei Andrzeevski

Back to Basics: The Role of Agile Principles in Success with a Distributed Scrum Team .........................................................382
  Steve Berczuk
Release Management

Over the Waterfall in a Barrel—MSIT Adventures in Scrum ................................................................. 389
   Jeanne Lewis and Kevin Neher

Transforming a Six Month Release Cycle to Continuous Flow ............................................................ 395
   Matthias Marschall

Growing a Build Management System from Seed .................................................................................. 401
   Narti Kitiyakara and Joseph Graves

Team Dynamics

Forming to Performing: The Evolution of an Agile Team ........................................................................ 408
   Darren Rowley and Manfred Lange

Leadership

Agile Principles as a Leadership Value System: How Agile Memes Survive
and Thrive in a Corporate IT Culture ........................................................................................................ 415
   Steven W. Baker and Joseph C. Thomas

Author Index ............................................................................................................................................ 421
