TABLE OF CONTENTS

SESSIONS

SESSION 1: MODERN DEVELOPMENT OF MACHINE DESIGN

Guided Boring Trenchless Installations in Complicated Conditions ............................................ 1
L. Lianggang, T. Fenlin, M. Baosong

Microtunneling - Criteria of Application of EPB and Slurry-Shields for Pipe-Jacking in Mixed European Ground Conditions................................................................. 16
W. Suhm

Driving Short Microtunnels Economically in Hard Rock .......................................................... 26
J. Roby, T. Fuerst

SESSION 2: ACCURACY OF CURVED PIPING

Curved Pipe-Jacking - State of the Art and Usability .................................................................. 39
G. Kiesselbach

Mathematical Simulation of Pipe Stresses for Difficult Jackings............................................. 51
D. Beckmann, R. Stein

Survey Aspects Before and During Pipe-Jacking Operations ................................................... 63
F. Schwarzer

SESSION 3: GEOTECHNICAL CONSIDERATIONS FOR PIPE-JACKING

The Transfer of Tangential Stresses at the Circumference of Pipes Which Have Been Laid by Pipe Jacking in Non-cohesive soil ................................................................. 76
B. Schosser

SESSION 4: LARGE DIAMETER CONSTRUCTION

Relief Sewer for the Vienna Collecting Mains .............................................................................. 89
A. Ilmer

The Emscher Sewer - Development of an Automated Inspection System for Underground Concrete Pipes ................................................................. 101
N. Elkmann, H. Althoff

Fujisawa Sewage Project - One of the Largest Diameter Cases of Slurry Pipe-Jacking Method ................................................................. 116
J. Yotsumoto, T. Kawai, H. Shimada, S. Khazaeei, K. Matsui
SESSION 5: GEOTECHNICAL CONSIDERATIONS FOR DRILLING PROJECTS
Theoretical Problems of PE Pipes Laid by Means of HDD Technology ........................................ 128
J. Raclavsky, F. Klepsatel
Sewage Pipeline System in Hamburg-Ochsenwerder - Erection of a Culvert
Underneath the River Dove-Elbe by Using Horizontal Directional Drilling ........................................ 137
H. Lubbers
Large HDD Projects ........................................................................................................................ 154
G. Hoogveld

SESSION 6: CASE STUDIES
Analysis of Jacking Forces During Microtunneling in Limestone .................................................. 159
M. Barla, M. Camusso, S. Aiassa
Safety in Utility Corridors .................................................................................................................. 171
K. Reim

SESSION 7: REHABILITATION STRATEGY
Strategic Rehabilitation of Water Distribution and Wastewater Collection Systems .................. 175
P. Hlavinek, W. Schilling, J. Torterotot
STATUS Sewer - A Holistic Model for Efficient Net Management Based on Section
Specific Aging Prognoses .................................................................................................................. 181
R. Stein, R. Alvarez, A. Lipkow
Sewer Rehabilitation Master Plan for the R1 Highway Around Antwerp ........................................ 196
J. Cobbaert, K. Sympher

SESSION 8: HOUSE CONNECTIONS
The Development of the Cured-In-Place Method for Extra-Small Diameter Pipes
without Excavation for Service Lines .................................................................................................. 204
K. Miura, K. Tashiro, S. Akiyama
Survey of CIPP-(Cured-In-Place-Pipe)-Systems for Lateral Pipes - Materials,
Quality Requirements, Use, Tendencies in the German Speaking Area ........................................ 216
R. Dilg
Capping Infiltration at Source - Lateral Looking to Meet Sewer Infiltration
Reduction Targets & Lowering Operating Costs .................................................................................. 225
I. Ramsay

SESSION 9: RENOVATION
Woodburn Conduit Refurbishment - Slip Lining a Large Diameter Potable Water
Pipeline ........................................................................................................................................... 235
A. McCann, W. Patterson
Spiral Wound Liners - Latest Developments for Structural Lining of Large Diameter Sewers .............................................................. 244
J. Monro
Rehabilitation of a Drinking Water Main Supply Line using the Swagelining Technique in Leipzig .......................................................... 252
A. Philipp, T. Meyer

SESSION 10: PROBLEMS OF RENOVATION

Trenchless Technology Application Failures - Causes, Remedial Measures and Avoidance ............................................................................................................................................... 259
J. Larsen, C. Garcia-Marquez, T. Iseley

Driving Improvements and Innovation in Pipe Rehabilitation Using Performance Specifications .................................................................................................................................. 267
L. Horlyck

WORKSHOPS

WORKSHOP 1: TRACTO-TECHNIK

Trenchless Replacement of Pipes .............................................................................................................................................................. 274
M. Rameil

Lateral Connections in Slope Areas, Soil and Rocky Ground .................................................................................................................. 280
H. Bayer

New Georadar EU-Development GIGA ....................................................................................................................................................... 287
G. Manacorda, H. Scott, D. Pinchbeck, J. Capdevielle, M. Rameil

The ESWRAC Initiative ........................................................................................................................................................................ 300
M. Farrimond

WORKSHOP 2: WHERE IS THE ROAD TAKING US?

Neue Wege und Abschlüsse in der Bauingenieurausbildung in Deutschland ............................................................................................. 310
K. Habermehl

WORKSHOP 3: EU RESEARCH PROJECTS

Computer Aided Rehabilitation of Water and Wastewater Networks (CARE-W and CARE-S) ........................................................................................................................................... 317
S. Saegrov, W. Schilling

Testing of CARE-W in Brno Water Distribution Network ......................................................................................................................... 334
L. Tuhovcak, J. Rucka, P. Vrbkova, P. Viscor

Long Term Strategies for Network Rehabilitation and their Implementation into Annual Plans ................................................................................................................................. 342
R. Baur

WORKSHOP 4: NATIONAL WORKSHOP GERMANY

Cement - mortar Linings for Drinking Water Pipelines, Coatings for Sewage and Process Water Pipelines, as well as novel Developments for Gas, District Heating and Oil Pipelines .................................................................................................................. 352
W. Berger, R. Bussing
WORKSHOP 5: NATIONAL WORKSHOP ITALY
The Integrated Environmental Restoration Project of the Orbetello Lagoon
Rehabilitation of the Sewer Network of Monte Argentario and Orbetello with the
Scope of Curbing the Entrance of Saline in the Network .................................................. 365
  P. Ulivieri

WORKSHOP 6: NATIONAL WORKSHOP SWITZERLAND
Pipe Inspection – Is Necessity the Mother of Invention? ....................................................... 386
  T. Sangster

New and Effective Technology for Condition Assessment of Pipelines & other
Engineering Assets .............................................................................................................. 390
  M. Roubal

Using Inspection Data as Information for Decision Making ............................................. 404
  B. Schmuck

The Reason for Microtunneling Applications - Experience from Castelnuovo
(Italy) .................................................................................................................................. 415
  F. Zanetti

Requirements for Components in Trenchless Construction of Drains and Sewers ........... 418
  K. Flick

WORKSHOP 7: STONEWARE ASSOCIATION
Jacking Pipes and Pressure Exchange – Results from Science and Practice .................. 423
  M. Peters

WORKSHOP 9: ISTT WORKSHOP
The Rehabilitation of Pressure Pipelines - Key Issues in the Design and Selection
of Renovation Technologies .............................................................................................. 432
  J. Gumbel, W. Elzink, J. Heavens

WORKSHOP 10: NATIONAL WORKSHOP FRANCE
Use of Trenchless Technologies for Railway Crossings ................................................... 441
  P. Hamet

WORKSHOP 12: GRADUATE AND POSTGRADUATE THESIS WORKSHOP
Multicriteria Optimisation for the Selection of the Rehabilitation Technology for
the Reconstruction of Particular Pipe Sections of Water Distribution Networks ............ 448
  T. Kucera, L. Tuhovcak

Sheeting Structure Technologies in the Czech Republic ................................................... 456
  M. Donek

Assessment of Multicriterial Sewer Network Reliability for Risk Analysis .................... 463
  J. Mertova

Flood Control from the Geotechnical Point of View .......................................................... 468
  P. Kunimska, V. Lecova, L. Mica
Tunnel Shield Machines – Parametric Comparison of Three- and Multi-segment Tunnel Linings
M. Vicher, J. Vychodil

WORKSHOP 13: NATIONAL WORKSHOP JAPAN

Situation of Optical Fiber Cable Laying in Japan and Development of the "Tension Guide Method"
I. Seto, I. Yagi, F. Tsuchiya

Experimental Study on Effect of Subsidence in Tunnel Excavation by Slurry Pipe-Jacking
E. Sakai, T. Morita, H. Shimada, T. Sasaoka, K. Matsui

Fundamental Study on an Application of a Pipe Jacking System on the Pipe Roof Method
H. Shimada, S. Khazae, G. Jan, K. Matsui, T. Morita, F. Matsumoto, E. Sakai

Microtunneling Technology that Contributes to the Construction of Social Infrastructure by Driving Over Long Distances and Multi-Curved Routes
S. Sumio, M. Kunihiro, T. Teruhisa

Non-Soil Discharge Press-Insertion Method "Future ACEMOLE" System
Minimizing the Effect on the Surrounding Ground
T. Takanashi, K. Miyazaki, Y. Iriyama, S. Yamaguchi

Development of the Intelligent Horizontal Directional Drilling Systems
T. Nakauchi, H. Nakajima, K. Iizuka, T. Watanabe, T. Arai

Structural Calculation of Pipes Installed by Means of the Pipe Bursting Process
C. Falk, J. Strozyk

WORKSHOP 14: NATIONAL WORKSHOP UK

Guidelines on the Use of Pipe Bursting
N. Gardener, M. Rameil

WORKSHOP 15: GRADUATE AND POSTGRADUATE THESIS WORKSHOP

State-of the-Art of Water Supply Network Rehabilitation in the Czech Republic
S. Malanik

Optimisation of the Method and Link Choice for Sewer Network Rehabilitation
R. Nosek, J. Micin, J. Raclavsky

Leak Testing on Domestic Sewage System
K. Harting

WORKSHOP 16: EXPERIENCES FROM GERMANY

Root Penetration in Sewers: Causes, Tests and Prevention
B. Bosseler, T. Stutzel, C. Bennerscheidt

Pilot Drillings in Non-Displaceable Ground
G. Nieder
WORKSHOP 17: NATIONAL WORKSHOP INDIA

Indian Trenchless Opportunities - an Unexplored Horizon ....................................................... 621
C. Verma

POSTER PRESENTATIONS

Fuzzy Logic Based Intelligent Tunneling Algorithm for the Microtunneling System ............ 713
J. Nam, T. Park, J. Han, J. Do, Z. Bien

Method of Changing Damaged Pipes in Curve Area of Pipe-Jacking Application in a Slurry Pipe-Jacking Project in Tokyo .......................................................... 720
S. Khazaei, H. Shimada, K. Matsui, K. Kagawa, T. Kawai, J. Yotsumoto

Evaluation and Prediction of the Long-Term Deformation Behaviour of Plastic Jacking Pipes ....................................................................................................................... 730
C. Hsieh, J. Wang, Y. Jen

A New Methacrylate Resin for Spot Repair in Non-Man-Entry Sewage Pipes ..................... 740
M. Olbrich

Author Index
