</tbody>
</table>

#### 1.2 FAN NOISE

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Modeling of Adaptively Tunable Flow Driven Resonators for Axial Fan Blade Tone Noise Attenuation</td>
<td>37</td>
</tr>
<tr>
<td>L. Gorny, G. Koopmann, W. Neise, O. Lemke</td>
<td></td>
</tr>
<tr>
<td>Fan Selection and Installation Issues Related to Spaceflight Hardware</td>
<td>49</td>
</tr>
<tr>
<td>D. Nelson</td>
<td></td>
</tr>
<tr>
<td>Prediction of Diesel Engine Cooling Fan Noise</td>
<td>56</td>
</tr>
<tr>
<td>G. Kim, G. Lauchle, T. Brungart</td>
<td></td>
</tr>
<tr>
<td>Measurement and Evaluation of Blade Passage Frequency Fluctuations</td>
<td>64</td>
</tr>
<tr>
<td>C. Duke, S. Sommerfeldt, K. Gee, C. Duke</td>
<td></td>
</tr>
</tbody>
</table>

#### 1.4 MODELING OF EMISSIONS AND IMISSIONS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Evaluation of Time-Varying Loudness for Quantifying Perception of Nonlinearly Propagated Noise</td>
<td>70</td>
</tr>
<tr>
<td>S. Swift, K. Gee</td>
<td></td>
</tr>
<tr>
<td>Development of an Advanced Acoustic Model for Military Aircraft Noise</td>
<td>78</td>
</tr>
<tr>
<td>K. Plotkin, T. Schultz</td>
<td></td>
</tr>
<tr>
<td>Assessing Human Response to Infrequent Blast Noise Events</td>
<td>85</td>
</tr>
<tr>
<td>L. Pater, E. Nykaza, K. Hodgdon, A. Atchley, R. Baumgartner, P. Rathbun, G. Luz</td>
<td></td>
</tr>
</tbody>
</table>

#### 1.5 IMPULSIVE SOUND PROPAGATION

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use of Correlation Between Received Impulsive Noise Event Times</td>
<td>92</td>
</tr>
<tr>
<td>E. Nykaza, N. Donaldson</td>
<td></td>
</tr>
</tbody>
</table>
Microphysical Influences on Sound Wave and Laser Light Propagation in Forested Areas
A. Tunick, M. Swearingen

Effect of Finite Atmospheric Sampling on Predictive Skill for Broadband Sound-Exposure Levels
D. Wilson, M. Lewis

Mitigation of Gun Blast Noise by Surface Impedance Design
M. Tong, W. Chew, M. White

Airborne Weaponry Noise Measurements
M. Downing, M. James, B. Ikelheimer, C. Hobbs, S. McInerny

Airborne Weaponry Noise Prediction Models
B. Ikelheimer, M. Downing, M. James, S. McInerny

Nonlinear Effects in the Propagation and Measurement of Blast Noise
V. Sparrow, L. Pater, T. Gabrielson

Artificial Neural Network Based Temporal Processing of Waveforms to Detect Military Impulse Noise
B. Bucci, J. Vipperman

2.1 VENDOR PRODUCTS: NOISE CONTROL

Floor and Ceilings and Noise Control
J. Keene

Flow Resistivity Effect on Sound Absorption and Sound Transmission Loss of Film-Faced Foam
J. Kim

Case Studies Illustrating the Importance of De-Coupling the Mass Layers of Demising Walls in Multi-Family Luxury Condominiums and Townhomes
R. Lilkendey, G. Siebein

Proven Engineered Acoustical Plumbing Solutions
C. O'Neil

Effect of Lagging Material on Duct Breakout Noise
M. Golden, T. Paige

Acoustical Banners and Practical Applications
C. Splain

2.2 VIBRATION DAMPING FOR NOISE CONTROL

Damping Characteristics of Honeycomb Sandwich Panels Filled with Loose Particulate Materials
S. Liguore

Vibration Damper on Engine Cover Noise Control
P. Liang

Vibration Transmission and Damping at Railway Lines and Noise Emission
P. Beke

Viscoelastic Damping for Noise Control in an Armored Military Vehicle
R. Glaese, R. Baumgartner, R. Sievers
Loss Factors of Honeycomb Sandwich Structures: An Experimental Approach ................................................. 249
P. Peters, S. Nutt, M. Sneddon

Passive Control of Sound Transmission Through a Double Panel Using Heterogeneous (HG) Blankets, Part II: HG Parametric Studies ................................................................. 258
K. Idrisi, M. Johnson, J. Carneal, M. Kidner

Noise Mitigation Using Passive Vibroacoustic Attenuation Devices ......................................................... 270
S. Griffin, S. Lane

3.1 ACTIVE CONTROL

Active Steering Control System of a Rail Vehicle Based on the Analysis of the Sound Radiation
M. Spiryagin, K. Lee, H. Yoo, V. Spiryagin, Y. Vivdenko .............................................................. 278

Active Structural Acoustic Control for a Truck Oil Pan: Actuator Placement and Efficiency Estimation
O. Heintze .................................................................................................................................................. 288

Optimization of Control Source Location in a Free-Field Active Noise Control Application Using a Genetic Algorithm ........................................................................................................... 300
C. Duke, S. Sommerfeldt, K. Gee, C. Duke

Optimal Near-Field Error Sensor Locations for Active Control of Fan Noise Using Multipole Expansions .................................................................................................................................. 308
B. Shafer, K. Gee, S. Sommerfeldt

Eigenvalue Equalization Applied to the Active Minimization of Engine Noise in a Mock Cabin
J. Thomas, S. Lovstedt, J. Blotter, S. Sommerfeldt ............................................................................ 316

4.1 SOUND QUALITY

ANIMATED Auditory Demonstrations II: A NASA Educational Resource for Demonstrating Acoustical Parameters by Coupling Auditory Experiences with Sequences of Visual Cues .......................................................................................................................... 324
B. Cooper

An Examination of the Influence of Roughness on Ratings of Aircraft Noise ...................................... 337
S. More, P. Davies

Measurement and Sound Quality Issues Concerning Low-Frequency Noise .......................................... 344
W. Bray

Speech Intelligibility Improvements of a Small Performing Arts Theater Using Absorptive Panels ................................................................................................................................. 358
J. Van Karsen, J. Dreyer, M. Rao

5.3 EXPERIMENTAL TECHNIQUES AND INSTRUMENTATION IN NOISE AND VIBRATION

Factors Influencing Sound Power Measurement Reproducibility ............................................................ 371
J. Marque, O. Ashour

Statistical Analysis of the Humidity and Temperature Effects in a Large Reverberation Room ................................................................................................................................. 379
P. Liang
Tram Wheel Vibrations Dependence on the Rail Surface Geometry in Weld Zone ............... 385
S. Lakusic, M. Bogut

Random Incidence Sound Absorption Coefficient of Micro-Perforated Absorbers ............ 397
N. Londhe, J. Bolton, T. Yoo, J. Alexander, D. Slama

An Improved Model for Microperforated Absorbers ....................................................... 408
T. Yoo, J. Bolton, D. Slama, J. Alexander

6.1 TIRE/PAVEMENT INTERACTION NOISE – OBSI

Investigating the Implementation of Pavement Effects Via OBSI Data in the FHWA Traffic Noise Model (FHWA TNM) .......................................................................................................................... 416
J. Rochat, A. Hastings, M. Ferroni

On-Board Sound Intensity Testing of PFC Pavements in Texas ......................................... 423
M. Trevino, T. Dossey

Evaluation of Close-Proximity Methods for Tire/Pavement Noise Measurements ............... 435
R. Ruhala

Using On-Board Sound Intensity within the Concrete Pavement Surface Characteristics Program .......................................................................................................................... 442
R. Rasmussen, E. Mun, D. Turner, R. Whirledge, T. Ferragut, P. Wiegand

Evaluation of OBSI for Measuring Tire-Pavement Noise .................................................. 454
A. Smit, B. Waller

The Application of Sound Intensity to the Evaluation of Pavement for Tire/Road Noise Performance - The OBSI Approach ............................................................................................. 466
P. Donavan, B. Rymer

Considerations in the Standardization of On-Board Sound Intensity (OBSI) for Highway Pavement Evaluation ............................................................................................................. 477
P. Donavan, D. Lodico, B. Rymer

6.2 TIRE/PAVEMENT INTERACTION NOISE – GENERAL

Tire-Pavement and Traffic Noise Research in the State of Colorado ..................................... 488
R. Rasmussen, E. Mun, R. DeDios

Reduction of Traffic and Tire/Pavement Noise: 3rd Year Results of the Arizona Quiet Pavement Program - Site III ............................................................... 500
J. Reyff

REMEL Database Developed for Different PCC Pavement Surfaces ................................ 507
J. Reyff

Truck Tires and Quieter Pavement Contribution to Roadside Noise Levels ...................... 518
B. Rymer, P. Donavan

Effects of Diamond Grinding and Grooving on Tire/Pavement Noise ................................ 530
T. Dare, R. Bernhard, W. Thornton

Theoretical and Impedance Tube Estimates of Acoustical Absorption of Pavement Cores ......................................................................................................................... 539
J. Nelson, E. Kohler, A. Ongel, B. Rymer
6.3 NOISE FROM TRANSIT SYSTEMS

Analysis and Control of Automated People Mover Vibration in Buildings ........................................ 551
   J. Phillips

Strategies for Reducing Grade Crossing Noise ....................................................................................... 562
   H. Saurenman, Z. Dennis, C. Jaworski

A Comparison of Green and Conventional Diesel Bus Noise Levels ....................................................... 569
   J. Ross, M. Staiano

New Federal Policy on Rail Quiet Zones: Pathway or Roadblock to Quieter Grade Crossings? .................. 577
   P. Burge, L. Meister

6.5 AIRCRAFT INTERIOR NOISE

Two Stage Isolation System for High-Frequency Vibration Attenuation .............................................. 586
   M. Downing

Headsets in the Light Aircraft Cockpit: Speech Intelligibility, PELs, and Flight Performance .................. 595
   J. Casali, J. Lancaster, R. Valimont, D. Gauger

Experimental Study and Model Verification of Noise Control With Gas Layers ........................................ 608
   C. Naify, C. Huang, S. Rajaram, M. Sneddon, S. Nutt

Passive Control of Sound Transmission Through a Double Panel using Heterogeneous (HG) Blankets, Part III: HG Design Strategies ................................................................. 615
   K. Idrisi, M. Johnson, J. Carneal

Reconstruction of In-Flight Interior Acoustic Field of a Business Jet Using Hels Method ....................... 627
   W. de Lima, M. Moondra, S. Wu

6.7 AUTOMOTIVE NOISE

Road, Chassis, Powertrain and Wind Contributions to In-Vehicle Vibration .............................................. 637
   S. Sorenson, A. Lock

Roughness Tactile Vibration and Drone Noise Caused by Driveline ....................................................... 649
   J. Woo, P. Davis

Improved Gear Whine Model with Focus on Friction-induced Structure-borne Noise ............................. 655
   S. He, R. Singh, G. Pavic

Case Study of Industrial Vehicle Noise Control by Discrete Source Identification and Analysis ............. 667
   D. Hamilton

6.10 SPACE SYSTEM AERO AND VIBRO-ACOUSTICS

Estimation of Upper Bounds to Stresses Induced by Sound ................................................................. 677
   E. Ungar

Sound Quality Investigation of Notebook Inlet Grilles ......................................................... 1221
J. Gullbrand, M. Beltman, M. MacDonald, J. Cordova

9.2 MEASUREMENT, CONTROL, AND ACCEPTABILITY
OF PRODUCT NOISE EMISSIONS

Conformal Mapping Techniques for Consumer Products .................................................. 1233
R. Upton, K. Haddad, J. Sorensen

Source Design Considerations for Qualifying Hemi-Anechoic Chambers in
Compliance with ISO 3745 ................................................................................................. 1242
D. Winker, A. Chadha, E. Ristroph

Effect of Source Directionality on Deviations from Inverse Square Law in a Hemi-
Anechoic Chamber Typically Used for Product Noise Emission Testing ............................ 1253
A. Chadha, E. Ristroph, D. Winker
Elevated Sources Under Hemispherical Arrays for Product Noise Testing in Hemi-Anechoic Chambers .............................................................. 1264
   E. Ristroph, A. Chadha, D. Winker

Determining Spatial Variation of Prominent Discrete Tones .................................................... 1273
   M. Rafaelof, R. Sesselmann

Product Sound Quality and Sleep Disturbance ........................................................................... 1280
   G. Jay, E. Frank, E. Frenz

A Story of Acceptability of User Triggered Noise in Small Electroacoustical Devices ................ 1288
   M. Green, T. Burns, D. Tourtelotte

Experimental Determination of Far Field Sound Power Due to Panel and Vent Radiation of a Portable Diesel Generator ........................................... 1298
   J. Sagers, J. Blotter, S. Sommerfeldt

Techniques and Confidence Estimates for Uncertainty Analysis of Measuring Sound Power of Power Tools .................................................................. 1305
   E. Zechmann, C. Hayden

Measurement of Sound Power Level Using the Parallelepiped Surface: Investigation of the Cost Error ....................................................................... 1317
   S. Bard, M. Nobile

An Engineering Approach to Noise Abatement in Washing Machines ........................................ 1329
   D. Barpanda, J. Tudor, S. Siavoshani

10.1 NUMERICAL METHODS IN STRUCTURAL ACOUSTICS

Transmission Loss of Different Configurations of a Refrigerant Muffler Using FEM Approach .................................................................................. 1346
   P. Mathuria, M. Mezache

Application of the Fast Multipole Method (FMM) for Acoustic Analysis .................................. 1352
   R. Gunda, S. Vijayakar

Passive Control of Sound Transmission Through a Double Panel Using Heterogeneous (HG) Blankets, Part I: Modeling and Verification ...................... 1362
   K. Idrisi, M. Johnson, J. Carneal

Noise Emissions from Excited Jets ............................................................................................ 1374
   O. Marzouk

A New Indirect Formulation to Address the Non-Uniqueness Problem in Acoustic BEM ................................................................. 1386
   V. Ambarisha, R. Gunda, S. Vijayakar

10.2 STATISTICAL ENERGY ANALYSIS AND ENERGY METHODS

Interior Noise Study of an Aluminum Fuselage Aircraft Using Statistical Energy Analysis .......... 1396
   I. Dandaroy, M. Bhuiyan

A General Periodic Subsystem for SEA .................................................................................. 1407
   V. Cotoni, B. Gardner, P. Shorter, R. Langley

Modeling Methods for Vibro-Acoustic Analysis of Commercial Aircrafts .................................. 1419
   V. Cotoni, B. Gardner, J. Carneal, C. Fuller
A New Energy Approach to the Analysis of Complex and Uncertain System
F. Magionesi, A. Carcaterra

11.2 MULTI-FAMILY AND MULTI-USE BUILDING SOUND INSULATION

Impact Sound Transmission Through Floor/Ceiling Assemblies in Lightweight Wood Framed Construction
J. Hesedahl, D. Bruck

A Study of Impact Insulation Characteristics in One "Adaptive Reuse" Condominium Project
J. Wiebusch, E. Bogomolov

Is the CEN-Calculation Model Suitable for North American Building Structures?
H. Metzen, N. Shade

Designed Silence with Sylomer/Sylodyn - Polyurethan-Materials
A. Stofleth

11.3 NOISE CONTROL FOR SCHOOLS: UPDATE ON ANSI S12.60

A Comparison of the Acoustic Requirements in LEED for Schools and ANSI 12.60
R. Muehleisen

Green Noise Reduction: Sustainable Sound Control
J. Clunan

Challenges for Diagnostic Measurement of Acoustical Environments in Quiet Modular Classrooms
L. Sutherland, D. Lubman

The Greening of Sound: Recent Inclusion of Acoustics in Sustainable Building Certification
M. Kachur

11.5 NOISE CONTROL FOR HOSPITALS

Burn Acute Care Unit Acoustical Design for Enhanced Patient Comfort
H. Pelton

Noise Control for Neonatal ICU for Demolition and Construction within Hospital Facilities
J. Evans

Soundscape Evaluations in Adult Intensive Care Units
E. Ryherd, K. Waye

48-Hour Patient Room Noise Level Survey at Regional Medical Center
N. Sevener

Designing a Simulation Center to Test Acoustical Criteria for Healthcare Facilities
A. Carballeira, J. Solet, O. Buxton, D. Sykes

Recommended Standards for the Acoustic Environment of the Newborn ICU
K. Philbin, R. White

Noise Reduction in Hospitals: A Case Study
J. West, I. Busch-Vishniac, J. Dunn, M. MacLeod, A. Johnson
11.6 PLUMBING, ELEVATOR, AND BUILDING SYSTEM NOISE

What a Dreadful Noise of Water in Mine Ears ......................................................... 1569
  E. Wetherill

Plumbing Noise: Sound Pressure Levels and Human Perception in a Luxury
  Condominium ........................................................................................................ 1578
  D. Watry

Generator Set Tones in Offices: A Tale of Two Buildings ........................................... 1584
  D. Kato, S. Seidlitz

Effect of Structural Loss Factor on the Calculation of Pipe Wall Transmission
  Loss ....................................................................................................................... 1592
  D. Eilers, F. Catron

Plumbing Noise Reduction ....................................................................................... 1600
  C. O’Neil

12.1 ENGINEERING NOISE CONTROLS IN THE MINING INDUSTRY:
  REGULATORY INCENTIVES AND NOISE CONTROL SOLUTIONS TO REDUCE
  MINE WORKER NOISE EXPOSURES

Technologically Achievable Engineering and Administrative Noise Controls for
  the Mining Industry ............................................................................................... 1611
  J. Seiler, M. Pon

A Dual Sprocket Chain as a Noise Control for a Continuous Mining Machine .............. 1617
  P. Kovalchik, A. Smith, R. Matetic, L. Alcorn

Application of a Microphone Phased Array to Identify Noise Sources on a Roof
  Bolting Machine .................................................................................................... 1626
  D. Yantek, J. Peterson, A. Smith

Results of Noise Measurements from Underground Testing of a Roof Bolting
  Machine Duty Cycle ............................................................................................. 1638
  J. Peterson, L. Alcorn

Composite Saw Blade Technology ............................................................................. 1648
  J. Homer, L. Marraccini

Determining Underground Roof Bolting Machine Operators Noise Exposure
  Using Laboratory Results ....................................................................................... 1660
  R. Matetic, P. Kovalchik, G. Cole, J. Peterson, S. Peng

Low Cost Operator Installed Engineering Noise Controls on Surface Coal Augers ........ 1670
  L. Bowers

Cooperative Noise Control Demonstration for a Slot Drill in the Dimension Stone
  Industry ............................................................................................................... 1682
  A. Argirakis

Calibration of a Microphone Phased-Array for Amplitude in the Virginia Tech
  Anechoic Wind Tunnel ........................................................................................... 1692
  M. Remillieux, H. Camargo, R. Burdisso

13.1 GENERAL STRUCTURAL ACOUSTICS

Comparison of Various Techniques for Computing Modal Mass ................................ 1704
  A. Goss, S. Hambric, J. Fahnline
Noise Reduction Study of Sandwich Plates Using the State Space Method ........................................ 1713
  C. Huang, S. Nutt

A Fourier Method for the Vibration Analysis of Colinearly Coupled Beams Systems ................................................................. 1722
  W. Li, H. Xu

Narrowband Sound Power Measurement Using Supersonic Intensity in Underwater Reverberant Environments ............................................................ 1732
  A. Barnard, S. Hambrick, S. Conlon, D. Capone

Panel Contribution Study of a Commercial Excavator Cab Using Sound Intensity Measurements ................................................................................ 1744

Practical Consideration in Application of the Nearfield Acoustic Holography for the Heavy Duty Diesel Engine .......................................................... 1752
  S. Suh, G. Dirks
