# TABLE OF CONTENTS

## Volume 1

### SESSION 1: GASIFICATION TECHNOLOGIES: APPLICATIONS AND ECONOMICS I

- Major Factors and Trends Affecting the Growth and Development of the Gasification Industry (Manuscript not available) ................................................................. 1  
  Chuck McConnell

- 1-2 - Status of Global Coal and Petroleum Coke Gasification Projects .................................................... 20  
  Tim Cornitus

- Entrained-Flow Gasifier Fuel Blending Studies at Pilot-Scale ............................................................. 27  
  A. Cousins

- Progress Update for Commercial Plants of Air Blown IGCC (Manuscript not available) .............. 53  
  Takao Hashimoto

- Gasification Polygeneration - Valuing Optionality (Manuscript not available) ............................... 54  
  Gary Leatherman

### SESSION 2: COAL PRODUCTION AND PREPARATION – 1: DRY PROCESSING OF COAL

- Dry Coal Cleaning Using the FFX Separator .................................................................................. 55  
  Rick Q. Honaker

- Development of Coal Dry Beneficiation Technology in China ...................................................... 69  
  Jin Lei

- Development of a Process for Dry Fine Coal Processing (Manuscript not available) ............... 75  
  B.K. Parekh

- Aspects of Using the Electromagnetic Mill in Coal Energetic Technology Development ......................... 76  
  Ryszard Sosinski

- Possibilities of Dry Cleaning of Coal in the Czech Republic and Poland ........................................ 89  
  Hlavata M.

### SESSION 3: COMBUSTION TECHNOLOGIES – 1; PULVERIZED COAL PLANTS AND CO₂ CAPTURE

- Site Specific Considerations for Investments in New Coal-Fired Power Plants with CO₂ Capture .................................................. 95  
  Hannah Chalmers, Jon Gibbins

- Progressing Pulverized Coal Plants to Near-Zero Emissions Performance (Manuscript not available) ............................................. 114  
  John Wheeldon
## SESSION 1: TECHNOLOGICAL DEVELOPMENTS AND INNOVATIONS IN COAL-FOUNDED POWER PLANTS

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Technical and Economical Analysis of a Zero-Emissions Power Generation Plant Integrated With a Sub-Bituminous Coal Mine in South-West Sardinia</td>
<td>115</td>
</tr>
<tr>
<td>Developments in Post-Combustion CO₂ Capture Technology (Manuscript not available)</td>
<td>129</td>
</tr>
<tr>
<td>Advancement in Coal-Fired Power Plants: Higher Efficiency and Better Environmental Performance</td>
<td>130</td>
</tr>
</tbody>
</table>

## SESSION 4: ENVIRONMENTAL CONTROL TECHNOLOGIES I: MERCURY SPECIATION

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Theoretical Kinetics of Oxidized Hg (Manuscript not available)</td>
<td>145</td>
</tr>
<tr>
<td>Mercury Speciation and Transformation in Flue Gas of a 600MW Coal-Fired Power Plant in China</td>
<td>146</td>
</tr>
<tr>
<td>Direct Measurements of Oxidized Hg From Simulated Combustion Flue Gas (Manuscript not available)</td>
<td>156</td>
</tr>
<tr>
<td>Progressing Pulverized Coal Plants to Near-Zero Emissions Performance</td>
<td>157</td>
</tr>
</tbody>
</table>

## SESSION 5: SYNTHESIS OF LIQUID FUELS, CHEMICALS, MATERIALS & OTHER NON-FUEL USES OF COAL - 1

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Upgrading Coal Tar Pitch by Delayed Coking at Sasol</td>
<td>171</td>
</tr>
<tr>
<td>Low Grade Coals for Non-Recovery Coke Making</td>
<td>177</td>
</tr>
<tr>
<td>Effect of Maceral Properties of Coking Coal on the Quality of Metallurgical Coke (Manuscript not available)</td>
<td>190</td>
</tr>
<tr>
<td>The Effect of Ageing Coal on the Extracts as Detected by Size Exclusion Chromatography, Mass Spectrometry, UV-F and Proximate Analyses</td>
<td>191</td>
</tr>
<tr>
<td>Co-Pyrolysis of Waste Plastics and Brown Coal Upgraded Under Hydrothermal Condition</td>
<td>212</td>
</tr>
</tbody>
</table>

## SESSION 6: HYDROGEN FROM COAL – 1: PRODUCTION

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Sotacarbo Coal Gasification Pilot Plant for Hydrogen Production and CO₂ Removal</td>
<td>226</td>
</tr>
<tr>
<td>Optimising Hydrogen and Chemicals Production From the Transport Gasifier™</td>
<td>237</td>
</tr>
<tr>
<td>Catalytic Steam Gasification of HyperCoals From Lignites and Sub-Bituminous Coals at Less Than 650°C for H₂ Production</td>
<td>244</td>
</tr>
</tbody>
</table>
Membrane-Water-Gas-Shift Reactor for Hydrogen Separation From Coal-Derived Synthesis Gas (Manuscript not available) ................................................................. 252
Gokhan Alptekin

SESSION 7: GASIFICATION TECHNOLOGIES: APPLICATIONS AND ECONOMICS - 2

The Siemens Entrained Flow Gasification Process: Present Status and Future Developments ................................................................. 254
Christiane Schmid

GTI’s Flex-Fuel Test Facility - Current Capabilities and Ongoing Upgrades in Support of Advanced Gasification Technology Development ............................................. 266
Bruce Bryan

The Promotion of Gasification Technology Applied to Industrial Parks in Taiwan .......... 292
Pin-Chao Hsu

Evaluation Process for Determining Coal Feedstock Quality and Compatibility for CTL, CTG, and IGCC (Manuscript not available) ................................................................. 299
William Mark Hart

Overview of Gasification Research for the Australian Market (Manuscript not available) ................................................................................................. 300
Lila Gurba

SESSION 8: COAL PRODUCTION AND PREPARATION – 2: DEWATERING OF COAL

Determination of Reactive Effects on Dewatering of Small Sized Coals on Vibration Screen by Data Analysis ................................................................. 301
Firat Burat

The Effect of Thermal Drying on the Mechanical Strength of South African Coals .......... 312
Marco le Roux

Energy Prep: Rotating Kiln Coal Drier (Manuscript not available) ........................................ 327
Thomas Menditto

Fine Coal Dewatering Equipment Selection: A Greenfields Approach (Manuscript not available) ................................................................................................. 328
Leon van der Walt

SESSION 9: COMBUSTION TECHNOLOGIES – 2: OXY-FUEL PILOT PLANT ACTIVITIES

Oxy-Coal Technology Opportunities (Manuscript not available) ........................................ 329
Richard Victor

A Novel Process Integration Approach for Zero Emission Oxy-Fuel Power Plants Using Low Rank Coals ................................................................. 330
Murlidhar Gupta

State of the Art of Oxy-Combustion Technology for CO₂ Control From Coal-fired Boilers “Are We Ready for Commercial Installation” ................................................. 340
Pavol Pranda

Flame Aerodynamics Study on Air-Fired PF Burners Retrofitted to Oxy-Fuel on Pilot-Scale and Utility Scale Furnaces ................................................................. 361
Sameer Khare

Coal-Based Oxy-Fuel System Evaluation and Combustor Development ........................................ 386
Scott MacAdam
SESSION 10: ENVIRONMENTAL CONTROL TECHNOLOGIES – 2: MERCURY CONTROL

Emerging Control Strategies for Mercury - An International Review .................................................. 393
Lesley Sloss

Flight Sequestration of Elemental Mercury at High Temperatures by Mineral, Non-Carbon Based Sorbents .......................................................... 400
Jost O. L. Wendt

Development of Sorbents for the Removal of Elemental Mercury in the Form of Mercury Sulfide From Coal Combustion Flue Gas ........................................ 416
Azhar Uddin

The Binding of Flue Gas Pollutants on Pd, Au and Their Alloy (Manuscript not available) ........................................................................................................ 428
Erdem Sasmaz

Long-Term Demonstration of Sorbent Enhancement Additive Technology for Mercury Control .................................................................................................................. 429
Jason Laumb

SESSION 11: SYNTHESIS OF LIQUID FUELS, CHEMICALS, MATERIALS & OTHER NON-FUEL USES OF COAL -2

Coal to Liquid Development in China .................................................................................................. 438
Jerald J. Fletcher

Catalysts for Conversion of Synthesis Gas to Liquid Alcohol Fuels Prepared by Ethanol Induced Method ..................................................................................... 447
Yunlai Su

Development of Highly Reactive Nanometer Fe-Based Catalysts for Coal Liquefaction ....................................................... 450
James A. Franz

Optimization of DME Synthesis Process: Simulation Study With Various Compositions of Coal Syngas ................................................................................................. 456
Hyung-Taek Kim

Chemical Activation of Australian Coals for Advanced Energy Solutions ........................................ 467
Sushil Gupta

SESSION 12: HYDROGEN FROM COAL – 2: HYDROGEN SEPARATION AND MINIMIZING CO₂ EMISSIONS

Chemical Stability of Hydrogen Transport Membranes ........................................................................ 485
Uthamalingam (Balu) Balachandran

Dense Hydrogen Transport Membranes for CO₂ Capture in a FutureGen Plant .................................. 493
Doug Jack

Development of a Hydrogasification Process for Co-Production of Substitute Natural Gas (SNG), Biofuel and Electric From Western Coal (Manuscript not available) .......... 506
Raymond Hobbs

THERMACT – A Multifunctional Coal Additive (Manuscript not available) ........................................ 507
Swatantra Kumar

Ecological Fuels with Minimum Carbon Dioxide Emissions During the Burning Process ..... 508
Stefan Rägälie
SESSION 13: GASIFICATION TECHNOLOGIES: ADVANCED SYNTHESIS GAS CLEANUP - 1

The LINDE Rectisol® Process - Most Economic and Experienced Process for Removal of Acidgases from Coal Gasification Gas ................................................................. 512
   Johannes Kauf

Development of a Warm Syngas Clean-Up Technology Platform Beyond Desulfurization (Manuscript not available) ........................................................................... 530
   Brian Turk

Comparison of a New Warm-Gas Desulfurization Process Versus Traditional Scrubbers for a Commercial IGCC Power Plant .............................................................. 531
   Jerry Schlather

Topsøe WSA Technology for Conversion of H₂S From Coal Gasification to Sulphuric Acid ......................................................................................................................... 532
   Helge Rosenberg

Two-Step Hot Coal Gas Desulphurization Process Integrated With Direct Production of Elemental Sulfur Using Iron-Based Sorbents: A Preliminary Study ............... 544
   Jianglong Yu

SESSION 14: COAL PRODUCTION AND PREPARATION – 3: FROTH FLOTATION

Adsorption Phenomena of Different Bridging Liquids Onto a Coal Surface in the Selective Oil Agglomeration Process ................................................................. 554
   J.H.P. Van Heerden

Coal Spiral Automation for Process Improvement (Manuscript not available) ................. 569
   Manoj Mohanty

Results of Classical and Column Flotation on a Variety of Bituminous Coal Samples ....... 570
   Peter Fecko

Evaluation of the Molecular Separation Technology (MST) for Fine Coal Classification (Manuscript not available) ................................................................. 577
   Manoj Mohanty

Maceral Enrichment of South African Coal Using Froth Flotation .................................. 578
   Vanessa Claassens

SESSION 15: COMBUSTION TECHNOLOGIES – 3: OXY-FUEL LABORATORY STUDIES - 1

Study on Ni-based Oxygen Carriers for Chemical Looping Combustion by Coal Char ...... 594
   Haiibo Zhao

Volume 2

Study on Changes in Pore Structure of Pulverized Coal Combustion in O₂-CO₂ Atmosphere .................................................................................................................. 615
   Liqi Zhang

Reaction Kinetics of High-Ash Char Particles Derived From Inertinite-Rich Coal Discards (Manuscript not available) ................................................................. 621
   Raymond C. Everson

Investigations on the Fouling Behaviour of Rhenish Brown Coal .................................. 622
   Annette Schimrosczyk
SESSION 16: ENVIRONMENTAL CONTROL TECHNOLOGIES – 3: MULTIPOLLUTANT CONTROL

Multi-Pollutants Removal by AOP/SDA and Hybrid Particulate Collector .................................................. 637
  Sihyun Lee

Trace Elements in Coal: Associations With Coal and Minerals and Their Behaviour During Coal Utilisation ............................................................. 647
  Rajender Gupta

Chromium Emission During Combustion of High-Chromium Coal From Shenbei Coalfield, China ................................................................................. 668
  Junying Zhang

Antimony’s Intriguing Partitioning Behavior .................................................................................................................. 679
  Wayne Seames

Removal of CO₂ and H₂S from Various Gas Streams by a Two-stage Process with Nanoporous-material-supported Polymer Sorbents ................................................... 696
  Xiaoliang Ma

SESSION 17: SYNTHESIS OF LIQUID FUELS, CHEMICALS, MATERIALS & OTHER NON-FUEL USES OF COAL - 3

Fractionation of Brown Coal by Sequential Solvent Extractions and Characterization of the Fractions .................................................................................. 699
  Ryuichi Ashida

Transalkylation of Coal-Derived Higher Methylphenols With Phenol to Produce Cresols and Xylenols ............................................................................ 713
  Jack Fletcher

Characteristics of Semi-Coke Prepared From the Various Brown Coals and Their Use for Environmental Purpose ........................................................................ 740
  Lukas Andel

The Pyrolytic Behaviour of South African Coals at Atmospheric Pressure and 30 bar in a Wire-Mesh Reactor ............................................................................ 750
  Alan A. Herod

SESSION 18: COAL CHEMISTRY, GEOSCIENCES AND RESOURCES – 1: CLASSIFICATION AND CHARACTERIZATION OF COKE

Formation of Silicon Carbide in Heat-Treated Cokes ......................................................................................... 757
  Yusuf A. Badat

Chemical Activation of Petroleum Coke and Coke Produced From Co-Coking of Decant Oil With Different Rank Coals ........................................................................ 769
  Parvana Gafarova Aksoy

Characteristics of Ash Composition and Its Mineral Catalytic Index of Primary Coals for Cokemaking in China ......................................................................... 777
  Shizhuang Shi

An Approach to Blast Furnace Coke Quality Prediction ......................................................................................... 786
  Liang Yu
SESSION 19: GASIFICATION TECHNOLOGIES: ADVANCED SYNTHESIS GAS CLEANUP - 2

Advanced Mercury and Trace Metal Control with Monolith Traps ...................................................... 792
  Michael Swanson

Sorbents for High Temperature Removal of Trace Metal Contaminants From Coal-Derived Synthesis Gas (Manuscript not available) ................................................................. 804
  Gokhan Alptekin

Comparison of Sodium Chloride Removal Abilities of Kaolin Clay and Calcined Bauxite as Possible Alkali Sorbents for Gasification ................................................................. 805
  Marika Nel

Multicontaminant Warm Gas Cleanup ........................................................................................................ 815
  Girish Srinivas

Ash Formation and Behavior in Lignite and Subbituminous Coal-Fired Gasification Systems ................................................................. 829
  Steven Benson

SESSION 20: FISCHER-TROPSCH TECHNOLOGY – 1: CATALYSTS, PROMOTERS, SUPPORT, AND SURFACE CHEMISTRY FOR FISCHER-TROPSCH SYNTHESIS

Silica as a Chemical Promoter in Fe-Based Catalysts ............................................................................ 839
  E.I. Mabaso

Effect of Mn Addition on Ru/Al₂O₃ Catalyst for Fischer-Tropsch Synthesis ......................................... 845
  Mohammad Nurunnabi

Influence of Potassium on Silica-Supported Iron Catalysts for the Fischer-Tropsch Synthesis ................................................................................................................................. 852
  A. Blignaut

Cobalt Supported on Carbon Nanotubes: A Super Active Fischer-Tropsch Synthesis Catalyst ................................................................................................................................. 858
  Ahmad Tavasoli

Iron-Molybdenum Bifunctional Catalyst for Fischer-Tropsch Synthesis (Manuscript not available) ................................................................................................................................. 884
  Liang Bai

Evaluation of Oxygen Carriers for Chemical Looping Combustion of Coal and Solid Fuels ................................................................................................................................. 885
  Aurora Rubel

Oxy-Fuel Combustion: Effect of Recycled CO₂ on Pyrolysis Behavior and Char Reactivity ................................................................................................................................. 900
  Sarma Pisupati

Effect of CO₂ on Coal Char Combustion Rates in Oxy-Fuel Applications .............................................. 910
  Christopher Shaddix

Thermodynamic Modeling of Ash Related Problems in the OXYCOAL-AC-Process .................... 917
  Christian Weber

Oxy-Combustion of High Rank Coals ........................................................................................................ 927
  Rosa Menéndez
SESSION 22: ENVIRONMENTAL CONTROL TECHNOLOGIES – 4: EMISSIONS CONTROL FOR GASIFICATION APPLICATIONS

Modeling of Trace Element Behaviour in the SASOL-LURGI MK IV FBDB Gasifier - Part 1 (The Volatile Elements: Hg, As, Se, Cd and Pb) ................................................................. 935
  John Bunt

A Study on the Reactivity of Ce-Zr-Based Catalysts and Catalytic Reaction Mechanism for Coal Gas Desulfurization ................................................................. 951
  Si Ok Ryu

The Preparation of ZnO Nanostructures by Matrix Assisted Method and its Desulfurization Test for Cleanup of Hot Coal Gas ......................................................... 960
  Tae Jin Lee

Methods for the Sequestration of By-Product H₂S From Coal Gasification (Manuscript not available) ................................................................. 967
  Tim Rappold

SESSION 23: COAL AND SUSTAINABILITY

Current Status on Clean Coal Technology Development in NEDO, Japan ......................... 968
  Shunichi Yanai

Economics of Bulk Capture and Sequestration of Carbon Dioxide .................................... 973
  Ram G. Narula

The Use of Methanated Coal Gas for SOFC Hybrid Power Plants .................................. 985
  John Bøgild Hansen

Study of the Effect of Additives on the Sulfur-Fixing Efficiency of Shanxi Coal ................ 994
  Yang Qiaowen

SESSION 24: COAL CHEMISTRY, GEOSCIENCES AND RESOURCES – 2: CLASSIFICATION AND CHARACTERISATION OF COAL

Estimation of Coal Calorific Value With Petrography, Ultimate Analysis, Moisture, RMax and Ash Using Regression and Artificial Neural Network Methods .................. 1003
  Esmaeil Jorjani

Structural-Chemical Indices as Classification Characteristics of Fossil Fuels .................. 1016
  A.M. Gyulmaliev

Application of Automated Image Analysis by QEMSCAN in the Characterisation of Coal and Coal Utilisation By-Products .......................................................... 1018
  David French

Studies of the Relationship Between Petrography and Grindability for Kentucky Coals Using Artificial Neural Network ......................................................... 1030
  Amir-Hossein Bagherieh

SESSION 25: GASIFICATION: ADVANCED TECHNOLOGY DEVELOPMENT - 1

PWR Dry Feed System Development for Compact Gasifiers ........................................... 1047
  Kenneth M. Sprouse

ITM Oxygen: A Flexible, Low-Cost Oxygen-Supply Technology (Manuscript not available) ................................................................. 1057
  Phillip Armstrong
New Refractory Materials and Lining Systems for Coal Gasification (Manuscript not available) .............................................................. 1058
Christian His

Steam Hydrogasification of Carbonaceous Matter to Liquid Fuels .......................................................... 1079
Chan Seung Park

Heat Treatment of Medium-Temperature SASOL-LURGI Gasifier Coal-Tar Pitch for Polymerizing to Higher Value Products .......................................................... 1096
K. Mokoena, T.J. Van der Walt, T.J. Morgan, A.A Herod, R. Kandiyoti

SESSION 26: FISCHER-TROPSCH TECHNOLOGY – 2: CATALYSTS, PROMOTERS, SUPPORTS, AND SURFACE CHEMISTRY FOR FISCHER-TROPSCH SYNTHESIS

Carbon Induced FCC-Cobalt Surface Reconstruction (Manuscript not available) .............................. 1102
Ionel Ciobică

Activation Pressure Studies With an Iron-Based Catalyst for Slurry Fischer-Tropsch Synthesis (Manuscript not available) .............................................................. 1104
Qing-Lan Hao

Activity of Novel Egg-Shell Fischer-Tropsch Cobalt Catalysts .............................................................. 1105
Y.Q. Zhuang

Fischer-Tropsch Synthesis of the UCG Product Gas .............................................................................. 1117
Sanjay M. Mahajani

SESSION 27: COMBUSION TECHNOLOGIES – 5: CFB AND CO-FIRING

The CFB Users’ Experiences From Recent Polish Power Projects (Manuscript not available) .................. 1129
Robert Sekret

Combustion of Biofuels Based on Sludge and Coal .............................................................................. 1130
Pavel Kolat

Design and Performance Evaluation of an 81 MW CFBC Boiler for Assam (India) Coal .... 1141
D.N. Reddy

Design and Operation of a 28t DS/d Municipal Sewage Sludge Fluidized Bed Incinerator (Manuscript not available) .............................................................. 1152
Xiaoping Chen

Milestones for CFB And OTU Technology - The 460 MWe LAGISZA Supercritical Boiler Project Update .............................................................. 1153
Ari Kettunen

SESSION 28: ENVIRONMENTAL CONTROL TECHNOLOGIES – 5: GENERAL ENVIRONMENTAL CONTROL

Bypass Over Fire Air (BOFA) System for NOx Reduction - An Ideal System for High Ash Coals .............................................................. 1162
S. R. Kannan

Effect of Temperature on Coal Mercury Release .............................................................................. 1168
Vladimir Strezov

Coal Biotechnology: Bio-Conversion of Different Rank Indian Coals for the Extraction of Liquid Fuel and Fertilizer (Manuscript not available) .............................................................. 1175
R. Banerjee
Development of an Efficient Coal-Fueled Solid Oxide Fuel Cell Power System Concept Equipped for CO₂ Separation (Manuscript not available) ................................................................. 1176

Joseph F. Pierre

SESSION 29: GASIFICATION: FUNDAMENTALS AND SIMULATIONS

Simulation of Operating Scenarios for IGCC-Power Plants: An Approach for Optimized Plant Design and Operation for Enhanced Profitability (Manuscript not available) .......... 1177

Mathias Rieger

Thermodynamic Modelling of the BGL-Gasification Process With Particular Consideration of Alkali Metals .......................................................................................................................... 1178

Stefan Guhl

Flow Characteristics and Dynamic Behavior of Dense-Phase Pneumatic Conveying of Pulverized Coal With Variable Moisture Content at High Pressure ..................... 1192

Changsui Zhao

Experiment Study on Staged Entrained Flow Coal Gasification ........................................... 1203

Zhang Jiansheng

SESSION 30: COAL CHEMISTRY, GEOSCIENCES AND RESOURCES – 3: ANALYSIS OF COAL CHEMISTRY - 1

Effect of Various Atmospheres on Sulfur Transformation During Coal Pyrolysis by AP-TPR-MS ......................................................................................................................... 1209

Fenrong Liu

The Effect of Mineral Matter on Coal Structure and Its Pyrolysis Characteristics (Manuscript not available) .................................................................................................................. 1222

Fangui Zeng

Volume 3

Effect of CoCl₂ Catalyst on Pyrolysis of Lignite ................................................................. 1223

Xianwu Zou

Coal Lump Devolatilization and the Resulting Char Structure and Properties .................. 1238

Victor Zymla

Mechanism of the Coal Nature Prediction System and Its Application in Fengfeng Coalfield of China .......................................................................................................................... 1250

Yaqun He

SESSION 31: GASIFICATION: ADVANCED TECHNOLOGY DEVELOPMENT - 2

HydroMax – Breakthrough Molten-Metal Coal Gasification Technology ............................... 1259

Phillip Brown

Advanced Unmixed Combustion/Gasification: Potential Long Term Technology for Production of H₂ and Electricity From Coal With CO₂ Capture (Manuscript not available) .. 1266

Parag Kulkarni

Catalytic Hydrothermal Gasification of Solubilized Brown Coal at Temperature Below 350°C ................................................................................................................................. 1267

Nakorn Worasuwannarak

Soot Formation Pathways from a Coal Tar Surrogate Under Coal Gasification Conditions ................................................................................................................................. 1279

R.J. Pugmire
Kinetic Study of the Gasification of Chinchilla Coal Char in Carbon Dioxide
(Manuscript not available) ................................................................. 1280
Chetan R. Chodankar

SESSION 32: FISCHER-TROPSCH TECHNOLOGY – 3: LIQUEFACTION PROCESSES AND ECONOMICS

Life Cycle Assessment of CTL Fuel Plants in Comparison to Conventional and Heavy Oil Derived Fuels .......................................................... 1292
Robert L Freerks
RENTECH’S Coal-To-Liquid Process: An Overview ........................................... 1308
Belma Demirel
Development of Alternative Energy and Coal-To-Liquids in China ...................... 1314
Yu Zhufeng
Synthesis Gas and Liquid Fuels Production From Coal Gasification ................. 1322
Wolfgang Schellberg

SESSION 33: COMBUSTION TECHNOLOGIES – 6: CFD

Research of Alternative Sorbents for Desulphurization - From the Laboratory to the Industrial-Scale ......................................................... 1334
Pavel Kolat
Modeling and Analysis of Coal/Air Balancing by Using CFD and Condition-Based Maintenance (CBM) for Coal Handling System at North Chennai Thermal Power Stations (Manuscript not available) ........................................................................ 1347
R. Dhamodharan
The Combustion Study of SURALAYA Coal Fired Steam Power Plant (600 MW) by Using Computerized Fluid Dynamic (CFD) ......................... 1348
Tonny Sarief
Plasma Technology in Czech Power Stations .................................................. 1360
Pavel Kolat

SESSION 34: GLOBAL CLIMATE CHANGE – 1: GHG: OVERVIEW OF GHG ISSUES AND COAL PROPERTIES

Climate Change: Scientific Evidence, Potential Impacts and Responses ............ 1370
Jason S. Ogola
Effect of Coal Properties on CO₂ Sorption Capacity Under Supercritical Conditions .... 1386
Richard Sakurovs
Analysis of Gas Sorption Behavior in AKABIRA Coal by Differential Heat of Adsorption ................................................................. 1404
Sohei Shimada
Mild Gasification Process for the Production of Smokeless Coal, Coke, and Coal Liquids ............................................................... 1412
Richard Wolfe

SESSION 35: GASIFICATION: UNDERGROUND GASIFICATION

The Commercialization of ISE’s Proprietary Underground Coal Gasification Technology (Manuscript not available) .................................. 1437
Alan H. Singleton
A Novel Approach for Clean Power Generation Using Coal Liquids and the LPP Combustion Process in an Integrated Gasification Combined Cycle (IGCC)
Leo Eskin

Hai-Feng Liu

SESSION 36: COAL CHEMISTRY, GEOSCIENCES AND RESOURCES – 4: ANALYSIS OF COAL CHEMISTRY - 2

Comparison of Solvent-Soluble Fractions of a Petroleum Residue and Three Coal Tars by Size Exclusion Chromatography (Sec), UV-Fluorescence (UV-F) and Mass Spectrometry.
Alan A. Herod

Coal and Coal Extracts Compositional 13C and 1H Chemical Shifts via NMR Predictive Spectroscopy
P.P. Ndibewu, R.I. McCrindle, C.M. Nkambule, M Mujuru, B. Lefebvre

The Nature of Solvent Extracts From Vitrinite-Rich and Inertinite-Rich South African Bituminous Coals
Daniel Van Niekerk, Jonathan P. Mathews

Extraction of Coal in Various Solvents Under Microwave-Assisted Condition (Manuscript not available)
Hong Chen

Characteristic and Application of Bituminous Coal Produced by China Shenhua Energy Company Limited
Wenhui Zhang

SESSION 37: GASIFICATION FUNDAMENTAL STUDIES - 1

Gasification Kinetics: Modeling and Experimental Validation
Vladimir Zamansky

The Use of Wire Mesh Reactors to Provide an Improved Understanding of Large Scale Processes (Manuscript not available)
Rafael Kandiyoti

Slag-Refractory Interaction in Coal Gasifiers
S. K. Sundaram

Effect of Slag Tap Size on Gasification Performance and Heat Losses in a Quench-Type Coal Gasifier
Ting Wang

Effect of Cooling Rate on Coal Slag Viscosity under a Reducing Atmosphere
Myongsook Oh

SESSION 38: FISCHER-TROPSCH TECHNOLOGY – 4: LIQUEFACTION PROCESSES AND ECONOMICS

Coal Gas to Gasoline
Finn Joensen

Coal-To-SNG: The Methanation Process
Christian Wix
Progress in Synthetic Fuels From Coals (Manuscript not available) ........................................ 1561
A.S. Maloletnev

Coal-to-Fuel Plant Simulation Studies for Optimal Performance and Carbon Management .......................................................................................................................... 1562
John Baardson

Coal-To–Liquid: An Environmental Friend or Foe? ................................................................. 1582
Diane Hildebrandt

SESSION 39: MATERIALS, INSTRUMENTATION, AND CONTROLS

The Advanced Monitoring Method to Improve Boiler Availability and Performance ............ 1598
Markku Orjala

Role of Thermocompositional Investigation in Early Detection of Spontaneous Heating/Fire for Safe Mining of Coal ..................................................................................... 1611
R. V. K. Singh

Coal Powder Measurement in Power Station by Means of Electrostatic Technique .......... 1624
Shimin Wang

SESSION 40: GLOBAL CLIMATE CHANGE – 2: GHG: COAL BEHAVIOR AND GEOLOGICAL STORAGE

Investment Implications of Climate Change: The Need for Clean Coal Technologies ................................................................. 1632
Nils Mellquist

A Study of CO2 Sequestration and Methane Recovery from Australian Coal Seams .......... 1646
Abouna Saghafi

The Plains CO2 Reduction (PCOR) Partnership: Activities Shaping the Future of CO2 Management .................................................................................................................. 1660
Stephanie L. Wolfe

The Plains CO2 Reduction (PCOR) Partnership Geologic CO2 Sequestration Approach – Demonstrating the Technical and Commercial Viability of this Emerging Technology .... 1668
Edward N. Steadman

SESSION 41: COAL PRODUCTION AND PREPARATION – 4: COAL CLEANING (GENERAL) - 1

How Vibratory Machines Can Improve Coal Handling & Processing .................................. 1677
George D. Dumbaugh

Statistical Methods Usability in Make-up of Coking Charges .............................................. 1695
Miroslav Kaloc

Life Cycle Costing of Coal Pulverising Plant and the Influence of Coal Properties (Manuscript not available) ......................................................................... 1701
Edgar Bradley

Beneficiation of Coal Fines From SOMA Coal Washing Plant Tailings ................................ 1702
Güven Önal

Desulphurization of South African Coal Using Low Power Microwave Energy ................. 1707
Waseela Mohamed
### SESSION 42: COAL CHEMISTRY, GEOSCIENCES AND RESOURCES – 5: ANALYSIS OF COAL CHEMISTRY - 3

#### Fundamental Understanding of the Influence of Physical Properties on the Thermal Fragmentation of Coal

_Bafana Hlatshwayo_  .......................................................................................................................... 1715

#### Ash-Less Coal Preparation by Using Solvent Extraction

_Sihyun Lee_  ........................................................................................................................................ 1724

#### Understanding the Process of Deposition in pf Furnaces: The Fundamental Role of both Coal Mineral Matter and Deposit Mineralogy

_Robert A. Creelman_  ...................................................................................................................... 1731

#### The Characterization of Heavy Hydrocarbons by Chromatographic and Mass Spectrometric Methods: An Overview

_Alan A. Herod_  ................................................................................................................................. 1743

#### Thermally Altered and Oxidized Bituminous Coal

_Zdenek Klika_  ..................................................................................................................................... 1754

### SESSION 43: GASIFICATION FUNDAMENTAL STUDIES - 2

#### Investigation of the Influence of Mineral Composition on the Abrasiveness of Coal Gasification Ash

_Bafana Hlatshwayo_  ......................................................................................................................... 1759

#### Identification of the Reaction Zones Occurring in a Commercial-Scale SASOL-LURGI FBDB Gasifier

_John Bunt_  ........................................................................................................................................... 1771

#### Gasification of Lignite Coal Using Circulating Fluidized Bed Gasifier TIGAR

_Toshiyuki Suda_  ................................................................................................................................. 1786

#### Sulfur Behaviour in The Sasol-LURGI Fixed Bed Dry Bottom Gasification Process

_Pat Skhonde_  ........................................................................................................................................ 1797

#### A Study on the Coal Gasification With High Temperature Steam

_Seon Ah Roh_  ......................................................................................................................................... 1819

### SESSION 44: FISCHER-TROPSCH TECHNOLOGY – 5: REACTOR DESIGN AND REACTION CONDITIONS FOR FISCHER-TROPSCH SYNTHESIS

#### Tailored Fischer-Tropsch Product Distributions Using a Microstructured Reactor

_Yong Wang_  ........................................................................................................................................ 1824

#### Gas Holdup in Large-Scale Fischer-Tropsch Synthesis Reactor

_Rongle Zhang_  ...................................................................................................................................... 1833

#### The Role of a Hydrocarbons in the Feed for the Fischer-Tropsch Synthesis Under “Supercritical Conditions”

_L.D. Biquiza_  ..................................................................................................................................... 1841

#### Investigation of Increasing Out Gas Products to Feed on Fischer -Tropsch Products Selectivity Over Fe-ZSM-5 Catalyst

_Yahya Zamani_  .................................................................................................................................. 1845
SESSION 45: COAL UTILIZATION BY-PRODUCTS - 1

Interaction of Coal Ash Leachate With Rock Strata for Mine Backfill Evaluation .................. 1852
Colin Ward

Using Flue Gas Desulfurization Solids to Control Acid Mine Drainage: A Case Study ........ 1864
Jennifer B. Fulton

Hydraulic and Transport Properties of Fly Ash (Manuscript not available) ...................... 1875
Adolf G. October

An Effective and Economical Alternative for Acid Mine Drainage Treatment With Fly Ash Derived From Coal Fired Power Utilities (Manuscript not available) .................. 1876
Damini Surender

Full Scale Testing of CCP Pavement Sections Subjected to Repeated Wheel Loads (Manuscript not available) ................................................................. 1877
Tarunjit S. Butalia

SESSION 46: GLOBAL CLIMATE CHANGE – 3: GHG: CO₂ SCRUBBING PROCESS

Kinetics of the Acid Digestion of Serpentine With Simultaneous Grinding for the Purposes of CO₂ Sequestration .......................................................................................... 1878
Dirk Van Essendelft

Second Year Operation Experience With a 1 t/hr CO₂ Absorption Pilot Plant at ESBJERG Coal-Fired Power Station in Denmark ................................................................. 1889
Jacob Knudsen

Simulation of CO₂ Capture Using Ammonia Scrubbing: A Comparison With MEA Scrubbing ......................................................................................................................... 1901
Shujuan Wang

Nano-Porous CO₂ Molecular-Basket Sorbent for CO₂ Capture From Flue Gas: Influence of Moisture on CO₂ Separation by a Polyethylenimine-Modified Molecular Sieve MCM-41 ........................................................................................................ 1917
Chunshan Song

Organic-Ca Cyclic Calcination-Carbonation for CO₂ Sequestration .................................. 1920
Changsui Zhao

SESSION 47: COAL PRODUCTION AND PREPARATION – 5: COAL CLEANING (GENERAL) - 2

Spontaneous Combustion of Coal: Gases and Solids Mobilized (Manuscript not available) ................................................................. 1931
J. Denis N Pone

Evaluation of Grootegeluk Semi-Soft Coking Coal in Energy Recovery Coke Ovens ........ 1932
Zelmia Oppel

Mechanism of Increase in Cokes Strength by Blending Hypercoal ....................................... 1949
Toshimasa Takanohashi

Effect of Jharia Coal Mine Fire on Rhizosphere Soil Quality (Manuscript not available) ................................................................................................................................. 1959
V.A. Selvi

Study of Reductive Desulphurization of Coal Under the H₂ and CO Atmosphere ............... 1960
Wei Zhao
SESSION 48:  COAL CHEMISTRY, GEOSCIENCES, AND RESOURCES – 6: MACRO AND TRACE ELEMENTS IN COAL

Coal is a Complex Heterogeneous Mixture of Organic and Inorganic Constituents of Allothigenic or Authigenic Origin (Manuscript not available) ................................................... 1965

Guijian Liu

Chromium and Nickel Enrichments in Feed Coals From SEYITOMER Power Plant, KUTAHYA-Turkey (Manuscript not available) ................................................................. 1967

Ali Ihsan Karayigit

Modes of Occurrence of Selenium in Coal ................................................................. 1968

David French

Evaluation of Slurry Preparations for Multi-Element Determinations in Coal by ICP-OES ......................................................................................................................................... 1978

Munyaradzi Mujuru

Determination of Mineral Matter and Elemental Composition of Individual Macerals in Coals From HIGHVELD Mines ................................................................................. 1995

R.H. Matjie

SESSION 49:  GASIFICATION: FUNDAMENTAL STUDIES - 3

Investigation Into the Gasification Characteristics of South African Power Station Coals ............................................................................................................................................... 2009

Andre Engelbrecht

Preliminary Selection of IGCC Candidate Coals in Korea for IGCC Applications .......... 2030

Yongseung Yun

Gasification of Lignites to Produce Liquid Fuels, Hydrogen, and Power ...................... 2043

Michael Jones

Measurement of Coal Devolatization Rates in a Transport Reactor Operating on Powder River Basin Subbituminous Coal .................................................................................. 2059

Michael Swanson

Repowering Steam Plants With Mild Gasification IGCCS ................................................ 2071

Alex Wormser

SESSION 50:  FISCHER-TROPSCH TECHNOLOGY – 6: REACTION MODELS

Effective Control of Carbon Number Distribution During Fischer-Tropsch Synthesis Over Supported Cobalt Catalyst .......................................................... 2095

Kaoru Fujimoto

Optimization of the Fischer-Tropsch Process: Choice of Better Operating Regions for Reactor Design (Manuscript not available) ......................................................... 2108

Thierry Musanda Mukenz

Ordering Fischer-Tropsch Selectivity Fundamentally .................................................. 2109

Hans Schulz

Factors Influencing The WGS Reaction in Fischer-Tropsch Synthesis Over Iron-based Catalysts ................................................................................................................. 2123

Chenghua Zhang
SESSION 51: COAL UTILIZATION BY-PRODUCTS - 2

Combustion Byproducts Recycling Consortium ................................................................. 2135
Jennifer B. Fulton

Mercury Emissions From Coal Fired Power Plants, South Africa: Analytical Developments (Manuscript not available) ................................................................. 2164
Senzo Makhathini

Carbon Texture Comparison of Cokes Produced from Decant Oil and its Hydrotreated Version when Reacted with Coal ................................................................. 2165
Maria Escallon

Organic Petrology Applied to Materials and Coal By-Products Characterization .......... 2178
Rosa Menéndez

SESSION 52: GLOBAL CLIMATE CHANGE – 4: GHG: NEW PROCESSES FOR CO₂ REMOVAL

CO₂ Capture: Retrofit Issues for a Reference IGCC .......................................................... 2187
Christopher Higman

In Situ CO₂ Capture Using CA-Based Sorbent Looping in Dual Fluidized Beds .......... 2198
Dennis Lu

Carbon Dioxide Capture From Flue Gas of Coal-Fired Power Plant Using Dry Regenerable Alkali Metal Carbonate Sorbents (Manuscript not available) ................. 2215
Chong Kul Ryu

CO₂ Removal in Dry Sorbent CO₂ Capture Systems With Two Interconnected Fluidized-Bed Reactors ........................................................................................................ 2216
Chang-Keun Yi

Testing of Lithium Silicate and Hydrotalcite as Sorbents for CO₂ Removal From Coal Gasification .............................................................................................................. 2222
Michael D. Mann

SESSION 53: COAL PRODUCTION AND PREPARATION – 6: COAL PRODUCTION

Investigation of Factors Effecting in Heave And Convergence in Galleries of TABAS Coal Mine (PARVADE 5) (Manuscript not available) ....................................... 2229
K. Shahriar

Development of a Competitive Strategy for African Based Coal Junior Miners (Manuscript not available) ..................................................................................................... 2230
Mike Seeger

The Mechanism Analysis of Sand Inrush Disaster in Yu-Shen-Fu Mining Area’s Shallow Seam (Manuscript not available) ................................................................. 2231
Jie Zhang

Advances in Blockcaving Longwall Technology in Thick Coal Seam Extraction at TASHAN Coal Mine in China (Manuscript not available) .................................................. 2232
Yuzhou Liu
SESSION 54: COAL CHEMISTRY, GEOSCIENCES, AND RESOURCES – 7: ALTERNATIVES OF COAL

Synthesis of Zeolitic Material From Residue Resulting From the Neutralization of Acid Mine Drainage With Fly Ash Process and Their Potential for Toxic Element Removal (Manuscript not available) ................................................................. 2233
   Damini Surender

Influence of the Dissolved Products on Viscosity of Coal-Oil Slurry During Heating Stage (Manuscript not available) ........................................................................ 2234
   Dexiang Zhang

Study on the Emulsification Mechanism of Coal-Tar and Its Emulsion Model .................. 2235
   Shizhuang Shi

Coal as a Reductant in the Carbothermal Production of Silicon Nitride Nanostructures ...... 2250
   Anthony H Clemens

Characterization and Application of Cenospheres Generated in Pulverized Coal Fired Boilers (Manuscript not available) ................................................................. 2257
   Pradip Kumar Mandal

POSTER SESSIONS

POSTER SESSION 1: GASIFICATION TECHNOLOGIES

Combustion Analysis on the Low-Btu Synthetic Gas Fuels Derived From Coal or Biomass Gasification for Gas Engine Application .................................................. 2258
   Chan Lee

Three-Stage Air/Steam Turbine, Externally Heated Cogenerative System Fed With Coal Powder, Coupled to a High Pressure, LURGI-Type, Coal-Gas Generator ............... 2266
   Krzysztof J. Jesionek

A Phenomenological Study on Primary Atomization of Coaxial Two-Channels Air-Blast Burner in Combustion ................................................................. 2274
   Qinfeng Liang

Statistical Experimental Design and Robustness Study for Sustainable Gasifier (Manuscript not available) ........................................................................ 2280
   R.L.J. Coetzer

POSTER SESSION 2: COAL PREPARATION, CHEMISTRY, GEOSCIENCES, AND RESOURCES

Proposed Methods to Study the Influence of Trace Metals on Sintering and Agglomeration of Different Coal Feeds (Manuscript not available) ........................................ 2281
   Marika Nel

The World Coal Quality Inventory Project in Africa .......................................................... 2282
   Susan Tewalt

Metallurgical Fuel Production From Low-Metamorphism Coals After Their Chemical Treatment .................................................................................. 2291
   Artem Madatov

The Effect of Aspect Ratio on the Stability of Coal-Water Slurries .................................... 2298
   Gündüz Atesok
Potential Utilization of Fine-Grained Tailings From Hard Coal Drying

Miluše Hlavatá

Production of Activated Carbon Prepared by Pyrolysis of Waste Biomass in a Stream of Water Vapour

Pavla Holcová – Lièáková

Coal as a Base Material to Carbonaceous Membranes Preparation

Petr Ševèík

The Valorisation of Selected Industrial Waste by Co-Pyrolysis With Coals

Pavla Holcová – Lièáková

The Use of Eddy-Current Method in the Metal Separation (Manuscript not available)

Shaohua Pang

Deterministic Pore-Scale Model for Different Porous Structures

Sonia Woudberg

A Study of the Moisture Adsorption and Desorption Characteristics of South African Coal (Manuscript not available)

Quentin Campbell

Behavior of Zinc in Cokemaking Process of Coal Blends with Scrap Tires Granulates

Andrzej Koszorek

Lowering of Coals Caking Propensity (Manuscript not available)

Etienne Schuin

POSTER SESSION 3: SYNTHESIS OF LIQUID FUELS, CHEMICALS, MATERIALS & OTHER NON-FUEL USES OF COAL

Operational Experience With a New Type Additive Agent for a Combustion Gas Desulphurisation

Lubomir Chytka

Sustainability of Inland Ash Disposal Facilities as Salt Sinks (Manuscript not available)

Kelley Reynolds

Solvent Extraction of Coal Using a Low Volatile, Coal-Derived Solvent (Manuscript not available)

E. Janse van Rensburg

Non-Fuel Uses of Lignite in Its Natural State

Miloslav Pekar

Low-Pressure Methanol/Dimethyl Ether Synthesis from Syngas Over Gold-based Catalysts (Manuscript not available)

Arthur Mpela

The Influence of Scrap Tire Granulate Addition into Coal Blends on CRI and CSR of Coke Produced in Laboratory Scale

Andrzej Mianowski

Comparison of Direct and Indirect Coal Liquefaction Processes (Manuscript not available)

Jerald Fletcher

POSTER SESSION 4: OTHER TOPICS

Utilization of Chosen Carbo-Chemical Precursors to Carbonaceous Membranes Preparation

Ivan Koutník
A New Method of Production of Non-Explosive Stone Dusts ................................................ 2396
   Bronislaw Buczek

A Proposed Method to Investigate the Chemistry and Behaviour of Aluminum and
Silicon During Coal Conversion Processes (Manuscript not available) ............................. 2405
   Monica Raghoob

Systematic Hg Heterogeneous Oxidation Studies (Manuscript not available) ...................... 2406
   Takahiro Yamada

Assessment of CO₂ Reduction Processes in the Energy Industry ........................................ 2407
   Carmen Clemente

Adsorption of Carbon Dioxide by Different Coal Components ........................................... 2415
   Nikki Wagner

Natural Gas Industry in Iran ..................................................................................................... 2421
   Hedayat Omidvar

Carbon Dioxide Sorption Studies on South African Coals (Manuscript not available) ........ 2427
   Rosalind Cox

Effect of Cobalt Particle Size on the Catalytic Properties in Fischer-Tropsch Synthesis .... 2428
   Ki-Won Jun
