American Water Resources Association

Summer Specialty Conference
of the American Water Resources Association
2005

“Institutions for Sustainable Watershed Management:
Reconciling Physical and Political Ecology
in the Asia-Pacific”

June 27-29, 2005
Honolulu, Hawaii, USA

Printed from e-media with permission by:
Curran Associates, Inc.

ISBN: 978-1-60560-998-0

Some format issues inherent in the e-media version may also appear in this print version.
### TABLE OF CONTENTS

#### SESSION 1: SUSTAINABLE DEVELOPMENT STRATEGIES

**Fresh Water Resource Distribution of Lower Mekong Region: Distributed Hydrological Modeling Approach (Abstract)** .......................................................... 1
  *NMNS Bandara Nawarathna, Kaoru Takara, Yasuto Tachikawa*

**An Integrated Perspective on Water Allocation Policies in the Dong Nai Basin of Vietnam (Paper)** ................................................................................................................................ 2
  *Claudia Ringler, Nguyen Vu Huy, Siwa Msangi*

**Water Supply Strategies to Reduce Wastewater Discharges of Chloride to the Santa Clara River (Abstract)** ................................................................. 8
  *Rajagopalan Ganesh, Lawrence Y.C. Leong, Lynn Takaichi*

**Storm Water Master Planning in Coastal Regions: An Example From Immokalee, Florida, USA (Paper)** ............................................................................................................................. 9
  *Ronald S. Kaufmann, Fernando R. Miralles-Wilhelm, Robert J. Ross, Max Guerra*

#### SESSION 2: SUSTAINABLE DEVELOPMENT OF GROUNDWATER: PART 1

**Simple Analytical Groundwater Modeling for Sustainable Yield Estimates (Paper)** ............ 15
  *Clark C. K. Liu, John F. Mink, John Jun Dai*

**Estimating Hydraulic Properties from Aquifer Tests and Tidal Responses for Central Maui, Hawaii (Abstract)** ............................................................. 21
  *Kolja Rotzoll, Stephen B. Gingerich, Aly I. El-Kadi*

**Determining Island Fresh Water Availability with Deep Monitor Wells Penetrating into Salt Water (Paper)** .................................................................................................................... 22
  *Chester Lao*

#### SESSION 3: FLOOD AND STORM DRAINAGE

**Flood Hydrograph Analysis for Manoa Watershed, Oahu, Hawaii (Paper)** .......................... 30
  *Krispin Fernandes, Clark C. K. Liu*

**Fitting Flood Peak and Volume with Two-dimensional Copulas (Paper)** ................................. 36
  *Hsin-Yi Wang, Jenq-Tzong Shiau, Chang-Tai Tsai*

**Modeling Tsunami Waves and Ocean Storm Surges with FLO-2D (Paper)** ............................ 42
  *J.S. O’Brien*
SESSION 4: QUANTIFYING EFFECTS OF LAND USE CHANGES ON WATERSHED HYDROLOGY: PART 1

Evaluation of the Effect of Alien Plant Species, Groundwater Extraction and Long-Term Weather Patterns on the Makaha Stream Flow (Abstract) ................................................................. 48
  Ali Fares, Alan Mair, Aly I. El-Kadi

Groundwater Levels Response to Pumping, Land Cover Changes and Historical Weather Patterns in the Makaha Valley (Abstract) ............................................................... 49
  Alan Mair, Ali Fares Aly I. El-Kadi

Integrated Modeling of Vadose Zone Flow and Transport Processes (Abstract) ...................... 50
  Martinus van Genuchten, Jirka Simunek

Multi-Component Geochemical Transport Modeling Using the HYDRUS-1D Computer Software Package (Paper) .................................................................................................................. 51

SESSION 5: SUSTAINABLE DEVELOPMENT OF GROUNDWATER: PART II

Sustaining Groundwater Investment, Economic Organization, and Public Participation (Paper) ................................................................................................................................. 58
  Edna Loehman, Nir Becker

Assessing the Impact of Changing Irrigation Methods on a High Desert River Valley (Abstract) ....................................................................................................................... 67
  Robert Whittier, Aly El-Kadi

SESSION 6: ECOLOGICAL ENGINEERING/DEVELOPMENT: PART I

Ecological Engineering Development in Taiwan (Paper) ............................................................ 68
  Walter Chen, Jen-Yang Lin

Growing Terrestrial Plants in Seawater on Floating Platforms for In Situ Phytoremediation (Abstract) ................................................................................................................. 74
  Wenhao Sun, Matthew J. Vierra, Chung-Shih Tang

Biofiltration of Stormwater Runoff (Abstract) ........................................................................... 75
  Marisa Toma, Charles Kinoshita, Traci Sylva

Decision Support Framework for Stormwater Management in Urban Watersheds (Paper) ... 76
  Fu-hsiung (Dennis) Lai, Leslie Shoemaker, John Riverson

SESSION 7: QUANTIFYING EFFECTS OF LAND USE CHANGES ON WATERSHED HYDROLOGY PART II

Real-time Soil Water Monitoring for Optimum Water Management (Paper) ............................... 82
  Hamdhani Hamdhani, Ali Fares, Victor Polyakov, Hector Valenzuela

Challenges in Using AnnAGNPS for an Island Watershed (Paper) ........................................... 89
  Dudley Kubo, Katina Henderson

Measured and Simulated Runoff and Sediment Yield From a Tropical Watershed (Abstract) ................................................................................................................................. 93
  Viktor Polyakov, Ali Fares, Dudly Kubo
### SESSION 8: ANTHROPOGENIC ACTIVITIES AND WATERSHED HYDROLOGY

**Effects of Reduction and Cessation of Sugarcane Irrigation on Groundwater Recharge in the Lihue Basin, Kauai, Hawaii (Abstract)** ................................................................. 95  
Scot K. Izuka, Delwyn S. Oki, Chien-Hwa Chen

Shahram Khosrowpanah, Mark Lander, Leroy Heitz

**Aquifer Test Analysis Under Unsaturated Flow Condition (Abstract)** ........................................ 103  
Aly El-Kadi

**Rainwater Catchment Systems: Its Momentum (Paper)** .......................................................... 104  
Yu-Si Fok

### SESSION 9: ECOLOGICAL ENGINEERING/DEVELOPMENT: PART II

**The Impact of Soil Disturbance During Construction on Bulk Density and Infiltration in Ocean County, NJ (Abstract)** ................................................................. 110  
David Friedman

**A Multiple-Objective, Step-Wise, Automated Calibration Approach Applied to a Hydrologic Model (Abstract)** ................................................................. 111  
Lauren Hay, George H. Leavesley, Martyn P. Clark, Steve L. Markstrom, Roland J. Viger, Makiko Umemoto

**Surface Geophysical Applications to Geotechnical Studies, Water Supply Development and Ecosystem Enhancements in BWI (Abstract)** ............................................. 112  
Sandy Nettles

### SESSION 10: WATER RIGHTS

**Where the Rubber Meets the Road: How Water Policies Are Interpreted and Enforced by the Court System (Abstract)** ................................................................. 113  
Mary Flynn

**Mother Nature at the Water Resource Bar: Sustainability Re-Defined (Paper)** ......................... 114  
Roger W. Sims

**Guidance from Down Under: The Murray-Darling Basin Agreement as a Prototype Federal- Interstate Water Compact (Abstract)** ......................................................... 120  
George Sherk

### SESSION 11: CHANGING LAND USE

**Downstream Impacts of Urbanization in Small Watersheds (Paper)** ........................................ 121  

**Analysis of Changes in Vegetation on a Sand Bar with Flooding (Paper)** ............................. 127  
Satoru Sugio, Kunitoshi Watanabe
Impact of Landscape Activities Within Watersheds on Water Pollution and Hypoxia (Paper) ................................................................. 133
Rameshwar Kanwar

Upton Hatch, Gandhi Bhattarai Diane Hite, Luke Marzen

SESSION 12: ECONOMICS OF WATER: PART I

Valuing Ecosystem Services in Portland, Oregon: A Case Study (Abstract) .................................................. 141
Ed Whitelaw, Daniel D. Heagerty, Ed MacMullan, Kevin R. O'Hara, Gillian C. Ockner

Simulating Economic Impacts of Water Reallocation in the Waiahole Irrigation System (Paper) ...................................................... 142
Manoj Potapohn, Carol A. Ferguson, Richard L. Bowen, James E. T. Moncur

The WROS Management Tool (Abstract) ................................................................................................................. 148
Glenn Haas, Vernon Lovejoy

Sequencing Watershed Conservation and Groundwater Management Reforms (Paper) .... 149
Basharat Pitafi, James A. Roumasset

SESSION 13: WATERSHED MANAGEMENT: PART I

Environmental Sustainability through Watershed Management: The Kentucky Experience (Abstract) ........................................................................... 155
Lindell Ormsbee

Evaluating the Impact of Upstream Watershed Activities on Downstream Streamflow (Abstract) .............................................................. 156
Yusuf Mohamoud

Cooperation Between Israelis and Palestinians in Water Resource Management (Paper) ... 157
Michael Davidson

Barind: Changes of Hydrological Conditions with Improved Water Resource Management (Paper) .................................................................................................. 165
Asad uz Zaman

SESSION 14: STREAM ECOLOGY: PART I – HABITAT CHANGE

Riparian Buffer and Stream Bank Restoration: Designs that Work (Abstract) .................................................. 172
Michael Marcus

Seasonal Relationships Between Dissolved Nitrogen, Landuse/Landcover and Poorly Drained Soils at Multiple Spatial Scales in the Calapooia River Watershed, Oregon, USA (Abstract) .......................................................................................................................... 173
William Floyd, Stephen H. Schoenholtz, Stephen M. Griffith, Parker J. Wigington, Jr., Jeffrey J. Steiner

Hydraulic and Geomorphic Analyses of Restoration Alternatives – Big Quilcene River (Paper) ................................................................................................. 174
Jay Smith, Susan Perkins, Jean E. Caldwell
SESSION 15: ECONOMICS OF WATER: PART II

Valuing Watershed Conservation for Groundwater and Nearshore Ecology (Paper) .......... 181
Brooks A. Kaiser, James A. Roumasset

Instituting Politically Feasible Pricing for Efficient Groundwater Management
Over Space and Time (Abstract) ......................................................................................... 188
Basharat Pitafi, James A. Roumasset

SESSION 16: WATERSHED MANAGEMENT: PART II

Influence of Forest Decline by Forest Fire and Pine Wilt Disease on Discharge
and Discharge Duration Curve- In Case of Tatsunokuchi-yama Experimental Forest, Japan (Abstract) ................................................................. 189
Koji Tamai

Kentucky PRIDE: A Model for Environmental Sustainability in Appalachia (Abstract) .... 190
Lindell Ormsbee

Nutrient Balance of Wetland and Riverine Environments in Sustainable Watershed Management (Paper) ................................................................. 191
Ronald S. Kaufmann, Fernando R. Miralles-Wilhelm, Robert J. Ross

Environmental Restoration and Flood Control Alternatives in the Ala Wai Watershed (Abstract) ......................................................................................... 197
Robert Bourke

SESSION 17: STREAM ECOLOGY – PART II: POLLUTION

Effect of pH on the Removal of Hexavalent Chromium by Iron Sulfide (FeS) (Paper) ........ 198
Jae-Woo Park, Sei Jo

Monitoring Riparian Ecosystems of Waipå Watershed on the Hawaiian Island of Kaua´i to Decrease Microbial Contamination to the Stream and Coastal Zone (Abstract) .............. 204
Guy Ragosta, Carl Evensen, Ali Fares, Tamara Ticktin, Roger Fujioka, Adam Asquith

Optimizing Irrigation Scheduling to Minimize Leaching Losses by Using Capacitance Probes (Abstract) ......................................................................................... 205
Ashok Alva

SESSION 18: GIS FOR WATER RESOURCES MANAGEMENT

The Contribution of New Information Technologies to Water Management in France (Paper) ................................................................................................. 206
Nedjai Rachid

The GIS Weasel - An Interface for the Development of Spatial Parameters for Physical Process Modeling (Abstract) ........................................................................ 212
Roland Viger, S. M. Markstrom, G.H. Leavesley

Enterprise Web-Based GIS at the Honolulu Board of Water Supply (Paper) ............... 213
Lyann L. M. Okada
SESSION 19: INSTITUTIONAL ENTROPY AND INNOVATION - INSIGHTS FROM THE AMERICAN WEST

Chennat Gopalakrishnan

Evaluations of Water Policies and Institutions: Where Have We Been and Where Are We Going? (Abstract) ................................................................................................. 219
Jeffrey Peterson

The Importance of Institutional Structure in Controlling Agricultural Runoff (Abstract) ........................................................................................................... 220
Eric Schuck, W. Marshall Frasier, Gareth P. Green, Lindsey Ellingson, Janet Clements

Evolving Water Management Institutions in the Red River Basin (Paper) .................................................................................................................. 221
Robert R. Hearne

SESSION 20: WATERSHED PRESERVATION AND WASTE LOAD REDUCTION

Determining the Optimal Waste Loads Allocation in Total Maximum Daily Loads (Paper) ............................................................................................................. 227
Chi-Feng Chen, Hwong-Wen Ma

Gandhi Bhattarai, Diane Hite, Upton Hatch, Luke Marzen

Development of a Distributed Watershed Water Quality Model (Paper) .................................................................................................................. 234
Billy E. Johnson, Terry K. Gerald

Wastewater Chemicals Found in Colorado's Streams and Ground Water (Abstract) ............... 242
William Battaglin, Lori A. Sprague

SESSION 21: DECISION-MAKING MODELS – PART I: CULTURAL PRACTICES, AHUPUA'S MODEL, TECHNICAL INFORMATION AND STAKEHOLDER DECISION SUPPORT

Protecting Coastal Resources through Hawaiian Ahupua'a Management (Paper) ............... 243
Mark Mazzola

Considering Coral Reefs in the NRCS Watershed Program (Paper) ........................................ 247
Katina D. Henderson, Christopher W. Smith

Planning for Increasing Irrigation Efficiency in Mexico (Paper) ............................................... 252
Ignacio Sanchez Cohen, Hilario Macias Rodriguez, Philip Heilman, Roy Mann

Maximizing Return on Investment in Environmental Restoration Projects – Integrated Environmental and Economic Decision Support (Paper) ......................... 257
Ridge Robinson, Merri Martz

SESSION 22: WATER RESOURCES MANAGEMENT UNDER UNCERTAINTY

Computer Support for Water Resources Reallocation in Hawaii (Paper) ................................ 265
Jason Levy, Keith W. Hipel, Kevin W. Li, Ali Asgary

Water Resource Management of Taiwan Hot Springs, The Case of Water Rights (Paper) .................................................................................................................................................. 272 Ling-hwei Kuo, Jeng-Yang Lin, Yi-Hsuan Chiu

Living with a Climate in Transition: Pacific Island Experience (Abstract) .............................................................. 277 Eileen L. Shea

SESSION 23: COLLABORATIVE WATERSHED PLANNING PROCESS

Watershed Analysis: A Holistic Approach (Abstract) ................................................................................................. 278 Bruce Tsuchida, Sherri Hiraoka

Coastal Erosion and Community Relocation for Alaska Native Villages (Paper) .................................................. 279 David Broadfoot, Ike Pace, Ridge Robinson

Erosion Prevention and Sediment Control Education Programs (Abstract) .............................................................. 285 Calvin Sawyer

Lessons of the Past and Present to Sustain the Future (Abstract) .............................................................................. 286 Peter E. Black

SESSION 24: DECISION-MAKING MODELS PART II: DECISION SUPPORT AND SCIENCE IN LAY DECISION MAKING

Development of a Simplified Urban Detention System (SUDS) (Paper) ................................................................. 287 Billy J. Barfield, John C. Hayes, Sam L. Harp

Decision Support Tools for Nutrient Pollution Risk Assessment in Hawaii (Paper) ........................................... 293 Hudson Minshew, Katina Henderson, Hu Li, James Lum, Michael Robotham, Larry Shinshiro, Chris Smith

Field Scale Water Quality Management in the US: State of the Art 2005 (Abstract) ............................................. 297 Philip Heilman, Liwang Ma, Rob Malone

Author Index
