2007 International Symposium on Information Technology Convergence

ISITC 2007

23-24 November 2007

Sori Art Center
Jeonju, Korea

Organized by
Chonbuk National University

Los Alamitos, California
Washington • Tokyo
Table of Contents

Message from the General Chairs .................................................................xii
Executive Committees ..................................................................................xiii
Keynotes .......................................................................................................xv
Tutorials ......................................................................................................xvii

Track 1. Intelligent Systems

Round Trip Time Prediction Using the Symbolic Function Network Approach ........................................3
George S. Eskander, Amir Atiya, Kil To Chong, Hyongsuk Kim, and Sung Goo Yoo

Extended Mean Field Annealing for Clustering Incomplete Data .........................................................8
Jun Wu, Chi-Hwa Song, Jung Min Kong, and Won Don Lee

A Generalized Regression Neural Network Based on Fuzzy Means Clustering and Its Application in System Identification .................................................................13
Shi-jun Zhao, Jin-lei Zhang, Xun Li, and Wei Song

Artificial Neural Network for Document Classification Using Latent Semantic Indexing .......................17
Cheng Hua Li and Soon Cheol Park

Classification of Symbolic Objects Using Adaptive Auto-Configuring RBF Neural Networks ..................22
T. N. Nagabhushan, Hanseok Ko, junhum Park, S. K. Padma, and Y. S. Nijagunarya

Selection of Cluster Hierarchy Depth in Hierarchical Clustering Using K-Means Algorithm ...................27
Shinwon Lee, Wonhee Lee, Sungjong Chung, Dongun An, Ingeun Bok, and Hongjin Ryu
A More Optimizer-Friendly Treatment of XQuery Store in the Presence of Side-Effects ................................................................................................................... 32
Soichiro Hidaka, Hiroyuki Kato, and Masatoshi Yoshikawa

Extraction of Car License Plate Regions Using Line Grouping and Edge Density Methods ........................................................................................................... 37
Gisu Heo, Minwoo Kim, Insook Jung, Duk-Ryong Lee, and Il-Seok Oh

Fast and Efficient Speech Signal Classification with a Novel Nonlinear Transform ............................................................................................................... 43
Radu Dogaru

Representing Fuzzy Information in Ontology Language ................................................................................................................................................... 48
Jinlin Wang, Dexin Zhao, and Qing Yu

Mobile Robot Navigation Using RFID and Vision Sensor ................................................................................................................... 52
Heesung Chae and Sangik Na

Combining SAX and Piecewise Linear Approximation to Improve Similarity Search on Financial Time Series ..................................................................................................... 58
Nguyen Quoc Viet Hung and Duong Tuan Anh

Road Boundary Detection Based on the Dynamic Programming and the Randomized Hough Transform ................................................................................................................... 63
Haiping Lin, Hyongsuk Kim, Chun-shin Lin, and Leon O. Chua

Track 2. Computer Networks

A New Packet Marking Scheme for Fairness Improvement of AF Services in DiffServ Network ........................................................................................................... 71
Myeong-Soo Cheong, Byun-Gon Kim, Ce Pan, Kyung-Taek Chung, Ki-Hyun Pyun, Sang-Tae Lee, and Byoung-Sil Chon

New Range and k-NN Query Processing Algorithms Using Materialization Technique on Spatial Network ......................................................................................................... 76
Jung-Ho Um, Nihad Karim Chowdhury, and Jae-Woo Chang

Design the Time-Interval Based Fairness Partitioning Method in DVE ................................................................................................................... 81
Dongkee Won, Beobkyun Kim, Seungjong Chung, and Dongun An

The Jini-Based Broadband Power Line Communication (BPLC) Home Control System ........................................................................................................... 86
Hee-Sun Kim, Sang-Seok Han, and Chang-Goo Lee

DEVS Peer-to-Peer Protocol for Distributed and Parallel Simulation of Hierarchical and Decomposable DEVS Models .................................................................................................. 91
Sunwoo Park, Sean H. J. Kim, C. Anthony Hunt, and Dongsun Park

An Energy-Efficient Clustering Algorithm for Wireless Sensor Networks ................................................................................................................... 96
Yu Mi Kim, Myung Ho Yeo, and Jae Soo Yoo

Converting Sensor Data into Ontology Using DOM Model in Home Network ........................................................................................................... 101
Wontaek Lim, Tam Van Nguyen, Myonghwan Yu, and Deokjai Choi

</table>
A Novel Motion Compensated Frame Interpolation Method for Improving Side Information in Distributed Video Coding
Toan Nguyen Dinh, GueeSang Lee, June-Young Chang, and Han-Jin Cho

Improved Fast Mode Decision Algorithm for Variable Macro Block Motion Compensation in H.264
Dae-gon Kim, Cheol-jung Yoo, Ok-bae Chang, Eun-mi Kim, and Jong-Ryeol Choi

Vibration Signal Analysis for Electrical Fault Detection of Induction Machine Using Neural Networks
Hua Su, Wang Xi, and Kil To Chong

Automobile Advance Alarm System Based on Monocular Vision Processing
Sang-hoon Yang, Yong-eun Kim, In-gul Jang, and Jin-gyun Chung

Design of 2-D FIR Half-Band Filters Using Genetic Algorithm
Felicia Wysocka-Schillak

Effects of Time and Frequency Resolution on Nonnegative Matrix Factorization
Seng Sophea and Somnuk Phon-Amnuaisuk

Improved Construction of Low-Density Parity-Check Codes Based on Lattices
Xiongfei Tao, Jong-man Kim, Weizhong Liu, and Li Kong

Enhanced Renormalization Algorithm in MQ-Coder of JPEG2000
Byungjun Min, Sook Yoon, Jungjin Ra, and Dong Sun Park

System on Chip Design of Embedded Controller for Car Black Box
Se Myoung Jung and Myoung Seob Lim

Object Representation Using Geodesic Levels
Marek Goździk and Krzysztof Slot

A Novel Copyright Protection for Digital Images Using the Gradient of Image Intensity
Jin-Wook Shin, Sook Yoon, Byoung-Jun Min, and Dong-Sun Park

**Track 4. Health and Bio Information**

A Collaborative Software Tool for the Evaluation of MRI Brain Segmentation Methods
Vincent Barra and Arvid Lundervold

A New Approach on Heart Murmurs Classification with SVM Technique
Zhongwei Jiang, Samjin Choi, and Haibin Wang

MaZda—A Software for Texture Analysis
Piotr M. Szczypinski, Michal Strzelecki, and Andrzej Materka

Estimation of Central Blood Pressure Using Radial Pulse Waveform
Ran Wei, Jae Joong Im, Sung Ha Park, and Nam Sik Jung
Automatic Detection of Pancreatic Islets in Magnetic Resonance Rat Liver Images................................................................................................................... 254
  Michal Strzelecki, Daniej Jirak, Milan Hajek, Jan Kriz, Hyoungsuk Kim, and Haiping Lin

Segmentation of 3D MR Liver Images Using Synchronised Oscillators Network................................................................. 259
  Michal Strzelecki, Jacques de Certaines, and Suhong Ko

Segmentation of Medical Image Using a Statistical Technique and Its 3D Visualization...................................................... 264

Portable Urodynamics Monitoring System Using a Personal Digital Assistance.......................................................... 269
  K. S. Kim, Y. S. An, and C. G. Song

An Enhancement on the Detection of Skin Cancer Based on Band Approach of Confocal Raman Spectra........................................................... 273
  Aaron Park, In-Wook Jung, Seong-Jo Jo Baek, Jin Young Kim, and Daejung Shin

Robust Epiphyseal Extraction Method Based on Horizontal Profile Analysis of Finger Images........................................ 278
  Ki-Hong Park, Jong-Min Lee, and Whoi-Yul Kim

An Intelligent Type 2 Diabetic Patient Management System Using Evolutionary Computation and FCM Algorithm....................................................... 283
  Eungyeong Kim, Malrey Lee, Hyogun Yoon, and Thomas M. Gatton

**Track 5. Human-Computer Interaction**

Converging Cellular Automata Techniques with Web Search Methods to Offer a New Way to Rank Hyper-linked Web-Pages........................................................... 291
  Anirban Kundu, Ruma Dutta, and Debajyoti Mukhopadhyay

A Virtual Keypad Based on Alternate Half-Field Stimulated Visual Evoked Potentials ...................................................... 296
  Andrzej Materka, Marcin Byczuk, and Pawel Poryzala

Goal Management for a Multisession Dialogue ...................................................................................................................... 301
  Hoá Nguyen

Detecting Informative Web Page Blocks for Efficient Information Extraction Using Visual Block Segmentation........................................................................................................... 306
  Jinbeom Kang and Joongmin Choi

A Study on Antecedent Decision Rules for Natural Language Requirements Document in Korean........................................................................................................................................... 311
  Ki-Seon Park, Moon-Kun Lee, Dong-Un An, and Yong-Seok Lee

A Resolving of Word Sense Ambiguity Using Two-level Document Ranking Method in Information Retrieval .............................................................................................................. 315
  Hyun-Kyu Kang, Heung Seok Jeon, Myeong-Cheol Ko, Jin Soo Kim, and Kiduk Yang

Improving the Performance of Web Search Using Users’ Bookmarks ...................................................................................... 320
  KyungSeok Jeong, HyukRo Park, and SeokYoung Kim
Emotional Evaluation of Color Patterns Based on Rough Sets
Joonwhoan Lee, Young-Min Cheon, Soon-Young Kim, and Eun-Jong Park

Track 6. Convergence Applications

Jacket Matrix Construction Using M-Sequences
Yuri Borissov, Moon Ho Lee, and S. P. Balakannan

Heuristic Road Extraction
Yun-Woong Choi, Young Woon Jang, Hyo Jong Lee, and Gi-Sung Cho

Manufacturing Test Data Analysis—On Comparing Different Classification Algorithms
Jia Keat Lee, Somnuk Phon-Amnuaisuk, Huat Chin Chew, and Chin Kuan Ho

Second Order Hold Based Discretization Method of Input Time-Delay Systems
Zheng Zhang and Kil To Chong

A Novel Algorithm towards Designing the Protocol for Generation of Secret-Key with Authentication in Collaboration (PGSAC)
Shyamasree Mukherjee, Sankhayan Choudhury, Nabendu Chaki, and Debajyoti Mukhopadhyay

Improved VoIP Design for the Advertisement Service
Se-Young Jang, Seung-Sun Yoo, and Hoon-Sung Kwak

ITU-R Standardization of Digital Performance for Fixed Satellite Services
Sooyoung Kim, Sungmoon Yeo, and Sastri Kota

Computer Simulation Performance of Iterative Water-Filling Algorithm for ADSL2+ and VDSL Mixed System
Jian Xu, Jong-Soo Seo, Lu Xue, and Sang Seob Song

A New Algorithm for Depth Perception in 3D Screen and Its Implementation
Woonchul Ham and Seunghwan Kim

Isochronous MAC Protocol for Real-Time Service Support in MANET
Ung Heo and Jaeho Choi

Computer Simulation Results for a W-CDMA Frequency Synthesizer
Jae Hwan Lee and Hang Geun Jeong

The Application of Levenberg-Marquardt Algorithm in On-Line Monitoring for XLPE Cables
Jiantao Sun and Xishan Wen

A Modified CMOS Frequency Doubler Considering Delay Time Matching Condition
Sujin Seo, Yongchae Jeong, and J. Stevenson Kenney

Reducing Migration Latency for Distributed Virtual Environments by Mediation
Beob Kyun Kim, Dong Ki Won, Dong Un An, and Seung Jong Chung
An Integrated Simulation Environment Which Automatically Generates and Edits Source Code for Geant4: Geant4Editor ..........................................................401
   Sungsik Shin, Ami Kim, Seungwan Kim, Juwhan Song, and Oubong Gwun

Reference Clockless 3.2Gb/s Clock and Data Recovery Circuit for Data Interface Applications ..........................................................406
   Kang Jik Kim, Ki Sang Jeong, and Seong Ik Cho

Birefrigence Optimization Algorithm of the Polarimetric CT System ..........................................................410
   Hyoung Jun Park, Hyun Jin Kim, and Minho Song

Author Index ...............................................................................................................................................415
