Proceedings

APSEC 2007

14th Asia-Pacific
Software Engineering Conference

Nagoya, Aichi, Japan
4-7 December 2007

Sponsored by

The Special Interest Group on Software Engineering,
Information Processing Society of Japan (IPSJ/SIGSE)

Los Alamitos, California
Washington • Tokyo

Conference Publishing Services
Table of Contents

14th Asia Pacific Software Engineering Conference

Message from the Conference Chairs .................................................. xii
Message from the Program Chair ...................................................... xiii
Conference Committee ..................................................................... xiv
Steering Committee ......................................................................... xv
Program Committee .......................................................................... xvi
External Reviewers ........................................................................ xviii

Keynote Speech
Specialising in Software Engineering .................................................. 3
   Prof. Michael Jackson

Tutorials
Evaluating Product Line Architectures: Methods and Techniques ...................... 13
   Prof. Muhammad Ali Babar
The Problem Frames Approach to Software Engineering .................................. 14
   Prof. Michael Jackson

Technical Papers

Session 1A: Requirements Engineering I

Aligning the Map Requirements Modelling with the B-method for Formal Software Development .................................................. 17
   Abdul Babar, Vladimir Tosic, and John Potter
A Methodological Framework for SysML: A Problem Frames-Based Approach .................................................. 25
   Pietro Colombo, Vieri Del Bianco, Luigi Lavazza, and Alberto Coen-Porisini
Session 1B: Testing and Analysis I

Using Genetic Algorithms to Aid Test-Data Generation for Data-Flow Coverage
Ahmed S. Ghiduk, Mary Jean Harrold, and Moheb R. Girgis

Finding a Test Order Using Object-Oriented Slicing Technique
Jutarat Jaroenpiboonkit and Taratip Suwannasart

Function Call Flow Based Fitness Function Design in Evolutionary Testing
Xiyang Liu, Miao Zhang, Zhiwen Bai, Lei Wang, Wen Du, and Yan Wang

Session 1C: Service-Oriented and Web-Based Software

Secure Behavior of Web Browsers to Prevent Information Leaks
Takaaki Tateishi and Naoshi Tabuchi

Realizability of Collaboration-Based Service Specifications
Humberto Nicolas Castejon, Rolv Brak, and Gregor von Bochmann

The Validation and Verification of WSCDL
Geguang Pu, Jianqi Shi, Zheng Wang, Lu Jin, Jing Liu, and Jifeng He

Session 2A: Requirements Engineering II

Figure Out the Current Software Requirements Engineering—What Practitioners Expect to Requirements Engineering?
Mayumi Itakura Kamata, Ai Yoshimoto Yoshida, Hisashi Yoshida, and Nao Aoki

A Method for Early Requirements Triage and Selection Utilizing Product Strategies
Mahvish Khurum, Khurum Aslam, and Tony Gorschek

Pseudo Software: a New Concept for Iterative Requirement Development and Validation
Jung-Sing Jwo and Yu Chin Cheng

Enterprise Assets Security Requirements Construction from ESRMG Grammar
Kawin Supaporn, Nakornthip Prompoon, and Thongchai Rojkangsadan

Session 2B: Testing and Analysis II

Construction Method of a High-Order Markov Chain Usage Model
Tomohiko Takagi and Zengo Furukawa

Static Call Graph Generator for C++ Using Debugging Information
Yui Terashima and Katsuhiro Gondow

Improving Data Integrity with a Java Mutability Analysis
Aiwu Shi and Gleb Naumovich

Field Escape Analysis for Data Confidentiality in Java Components
Aiwu Shi and Gleb Naumovich
Session 2C: Software Components and Reuse

Coordination-Policy Based Composed System Behavior Derivation
Yiming Lau, Wenyun Zhao, Xin Peng, Zhixiong Jiang, and Livwei Shen
Approximation Algorithms for Software Component Selection Problem
Nima Haghpanah, Shahrouz Moaven, Mehdii Kargar, Jafar Habibi, and Soheil Hassas Yeganeh
Towards Instant Automatic Model Refinement Based on OCL
Hui Song, Yanchun Sun, Li Zhou, and Gang Huang
Modeling and Learning Interaction-Based Accidents for Safety-Critical Software Systems
Tariq Mahmood, Edmund Kazmierczak, Tim Kelly, and Dennis Plunkett

Session 3A: Aspect-Oriented Software

Conformance Checking of Running Programs in Dynamic Aspect-Oriented Systems
Chien-Min Wang, Chi-Chang Huang, Hsi-Min Chen, and Shun-Te Wang
Toward Efficient Aspect Mining for Linux
Danfeng Zhang, Yao Guo, Yue Wang, and Xiangqun Chen
Using B to Verify the Weaving of Aspects
Truong Ninh Thuan and Nguyen Viet Ha
E-AoSAS++ and its Software Development Environment
Masami Noro, Atsushi Sawada, Yoshinari Hachisu, and Masahide Banno

Session 3B: Software Metrics and Measurement

Visualization for Software Evolution Based on Logical Coupling and Module Coupling
Noriko Hanakawa
Optimising Project Feature Weights for Analogy-Based Software Cost Estimation
Using the Mantel Correlation
Jacky W. Keung and Barbara Kitchenham
An Empirical Study of Class Sizes for Large Java Systems
Hongyu Zhang and Hee Beng Kuan Tan
Are Size Measures Better Than Expert Judgement? An Industrial Case Study on Requirements Volatility
Annabell Loconsole and Jurgen Borstler

Session 3C: Software Maintenance and Evolution

A Middleware-Based Approach to Model Refactoring at Runtime
Ling Lan, Gang Huang, Weihu Wang, and Hong Mei
Applying a Code Clone Detection Method to Domain Analysis of Device Drivers
Yu-Seung Ma and Duk-Kyyn Woo
Simultaneous Modification Support Based on Code Clone Analysis
Yoshiki Higo, Yasushi Ueda, Shinji Kusumoto, and Katsuro Inoue
Incentive Compatible Mechanisms for Group Ticket Allocation in Software Maintenance Services
Karthik Subbili, Ramakrishnan Kannan, Raghav K. Gautam, and Y. Narahari
Session 4A: Formal Methods I

Statechart-Based Verification of Object-Oriented Design Models ........................................ 278
Toshiaki Aoki and Takuya Katayama

Compositional Verification of UML Dynamic Models ............................................................. 286
Wei Dong, Ji Wang, Zhichang Qi, and Ni Rong

Requirements Engineering for Reactive Systems: Coloured Petri Nets for an Elevator Controller .......................................................... 294
Joao M. Fernandes, Jens Bak Jørgensen, and Simon Tjell

Session 4B: Software Architecture and Design

An Executable UML with OCL-Based Action Semantics Language .................................................. 302
Ke Jiang, Lei Zhang, and Shigeru Miyake

Injecting Security as Aspectable NFR into Software Architecture .............................................. 310
Hamid Bagheri and Seyed Hassan Mirian Hosseinabadi

An Investigation into Concurrency Control Mechanisms in Data Service Layers ............................... 318
Krishneel Goundar, Santokh Singh, and Xin Feng Ye

Session 4C: Embedded Systems

Enhancing the ESIM [Embedded Systems Improving Method] by Combining Information Flow Diagram with Analysis Matrix for Efficient Analysis of Unexpected Obstacles in Embedded Software ........................................... 326
Yasufumi Shinyashiki, Toshiro Mise, Masaaki Hashimoto, Keiichi Katamine, Naoyasu Ubayashi, and Takako Nakatani

Developing an Insulin Pump System Using the SOFL Method ...................................................... 334
Jichuan Wang, Shaoying Liu, Yong Qi, and Di Hou

Aspect-Oriented Modeling for Embedded Software Design ............................................................. 342
Natsuko Noda and Tomoji Kishi

Session 5A: Formal Methods II

Automatic Extraction and Verification of Page Transitions in a Web Application .......................... 350
Atsuto Kubo, Hironori Washizaki, and Yoshiaki Fukazawa

Disk Based Software Verification via Bounded Model Checking ..................................................... 358
Fernando Brizzolari, Igor Melatti, Enrico Tronci, and Giuseppe Della Penna

A Synchronization Flow Analysis of Concurrent Objects in AIBO OPEN-R Programs Based on Communicating Processes ........................................... 366
Ryo Suetsugu, Shoji Yuen, and Kiyoshi Agusa
Session 5B: Software Processes I

A Process Pattern Language for Agile Methods
Xiang-xi Meng, Ya-sha Wang, Lei Shi, and Feng-jian Wang

Deriving Software Process Simulation Model from SPEM-based Software Process Model
SeungHun Park, KeungSik Choi, KyungA Yoon, and Doo-Hwan Bae

Definition of an Executable SPEM 2.0
Reda Bendraou, Benoit Combemale, Xavier Cregut, and Marie-Pierre Gervais

Session 5C: Empirical Software Engineering

Experiment-Driven Approach to Building Support for Distributed Agile Teams
Jacek Dajda and Grzegorz Dobrowolski

An Approach to Probabilistic Effort Estimation for Military Avionics Software Maintenance
by Considering Structural Characteristics
Tae-Hoon Song, KyungA Yoon, and Doo-Hwan Bae

A Large-Scale Empirical Comparison of Object-Oriented Cohesion Metrics
Richard Barker and Ewan Tempero

Session 6A: Secure Software

An Approach for Specifying Access Control Policy in J2EE Applications
Hieu Vo and Masato Suzuki

Early Validation and Verification of a Distributed Role-Based Access Control Model
Saad Zafar, Robert Colvin, Kirsten Winter, Nisansala Yatapanage, and R.G. Dromey

Reducing Unnecessary Conservativeness in Access Rights Analysis with String Analysis
Mika Koganeyama, Naoshi Tabuchi, and Takaaki Tateishi

Session 6B: Software Processes II

A Six Sigma Framework for Software Process Improvements and its Implementation
Zhedan Pan, Hyuncheol Park, Jongmoon Baik, and Hojin Choi

Methodology Support for the Model Driven Architecture
Fatemeh Chitforoush, Maryam Yazdandoost, and Raman Ramsin

Use of Agile Methods and Practices in the Philippines
Raymund Sison and Theresa Yang

A Survey on the Business Relationship between Chinese Outsourcing Software Suppliers
and their Outsourcers
Jingyue Li, Jianqiang Ma, Reidar Conradi, Weibing Chen, Junzhong Ji, and Chunnian Liu
Session 7A: Software Product-Line

Identifying Key Requirements for a New Product Line ________________________________478
  Juha Savolainen, Marjo Kauppinen, and Tomi Mannisto
Tailoring the Domain Engineering Process of the PLUS Method __________________________486
  Tsuneo Nakanishi, Mitsunori Fujita, Susumu Yamazaki, Naohito Yamashita, and Shuichi Ashihara
Deriving Product Line Requirements: The RED-PL Guidance Approach ______________________494
  Olfa Djebbi, Camille Salinesi, and Daniel Diaz

Session 7B: Tools and Development Environments

ezContract: Using Marker Library and Bytecode Instrumentation to Support Design by Contract in Java ____________________________________________________________502
  Yu Chin Cheng, Chien-Tsun Chen, and Chin-Yun Hsieh
MKtrace: An Innovative Debugging Tool for Multi-Threaded Programs on Multiprocessor Systems ________________________________________________________________510
  Yusen Li, Feng Wang, Gang Wang, Xiaoguang Liu, and Jing Liu
Checking Distributed Programs with Partially Ordered Atoms __________________________________518
  H.F. Li and Eslam Al-Maghayreh

Session 7C: Software Quality Management

Quantitative Analysis of Value-Based Software Processes Using Decision-Based Stochastic Object Petri-Nets ____________________________________________________________526
  Reng Yin, Hao Hu, Jidong Ge, and Jian Lu
Improving Effort Estimation Accuracy by Weighted Grey Relational Analysis During Software Development ________________________________________________________________534
  Chao-Jung Hsu and Chin-Yu Huang
A Novel Approach of Prioritizing Use Case Scenarios ______________________________________542
  Debasish Kundu and Debasis Samanta

Workshops

W1: Workshop on Accountability and Traceability in Global Software Engineering [ATGSE2007] ____________________________________________________________553
  Katsuro Inoue and Mike Barker
  Muhammad Ali Babar and Makoto Nonaka
W3: 1st International Workshop on Software Patterns and Quality (SPAQu’07) ____________________________________________________________557
  Hironori Washizaki and Nobukazu Yoshioka
W4: Workshop on Service Oriented Architecture ______________________________________559
  Toshiro Takase
W5: Education Workshop: Bridging the University/Industry Gap ______________________________________560
  J. Barrie Thompson, Masami Noro, and Helen M. Edwards
W6: The First International Workshop on Software Productivity Analysis and Cost Estimation [SPACE’07] ________________________________562
  Jacky Keung
Research Posters

Robust and Flexible Software Inspection model" for Software Re-Engineering Process:
Abstraction phase
Fida Hussain and Muhammad Saeed Shehzad

Architectural Naming, A Secret of Agile Thinking
Zahra Karimi Dehkordi and Elahe Najafi

Time-Quality Metric Model for Quality Measurement of Web-Based Systems
Basem Suleiman, Eldar Aliev, and Vladimir Tosic

Analyzing the Service Level of Software Debugging System through Simulation-Based
Queuing Approach
Chu-Ti Lin and Chin-Yu Huang

Distributed Collaborative Modeling Support System for UML Diagrams
Dongmei Xu, Jun Kurogi, Yoshihide Ohgame, and Atsuo Hazeyama

The TASM Language and the Hi-Five Framework: Specification, Validation, and Verification
of Embedded Real-Time Systems
Martin Ouimet and Kristina Lundqvist

UCSI: Towards a User-Centric Service Integration Approach
Pengwei Tian, Yaoxue Zhang, Yuezhi Zhou, Ming Zhong, and Cunhao Fang

Formal Model-Driven Engineering of Distributed Simulation Systems
Based on Architecture-Centric Domain-Specific Approach
Di Wu, Jie Chen, and Flavio Oquendo

DFTL: A Description Language for Transformation of Data Formats
Meng Wang, Ping Chen, Xiyang Liu, Shengming Hu, and Miao Zhang

Email and Trouble Report Analysis for Revealing Context with the Project Replayer
Kimiharu Ohkura, Shinji Kawaguchi, Noriko Hanakawa, and Hajimu Iida

PORD: A Reversible Debugging Tool Using Dynamic Binary Translation
Xiyang Liu, Tao Liu, Zhiwen Bai, Yan Wang, Haoing Mu, and Chunxiang Li

Non-Functional Requirements Elicitation and Incorporation into Functional Models
Xiaoyu Song

Validating Software Reliability by Binary Translation
Yi Wang

Project Management Practices on Building Management Information System
in IBM Global Business Service
Yi Wang and Huihui Shi

MEtaGile: An Agile Domain-Specific Modeling Environment
Olivier Buchwalder

Analysis of the Factors of Influencing Parent’s Confidence on the Internet
by Associating Rules Mining
Sheng-Fei Hsu and Hui-Ling Yu
