# Table of Contents

## Innovative Architecture for Future Generation High-Performance Processors and Systems

**IWIA 2007**

### Message from the Editors

### Committees

### Parallel and Distributed Systems

- **Some Initial Explorations into the Hierarchical Multi-core Chip Design Space for HPC Systems**
  
  Peter M. Kogge

- **Impact of Predictive Switching in 2-D Torus Networks**
  
  Tsutomu Yoshinaga, Hirokazu Murakami, and Michihiro Koibuchi

- **Responsive Link for Distributed Real-Time Processing**
  
  Nobuyuki Yamasaki

### Applications, Algorithms, and Compilers

- **Accelerating Brain Circuit Simulations of Object Recognition with CELL Processors**
  
  Andrew Felch, Jayram Moorkanikara Nageswaran, Ashok Chandrashekar, Jeff Furlong, Nikil Dutt, Richard Granger, Alex Nicolau, and Alex Veidenbaum

- **Improving Search Speed on Pointer-Based Large Data Structures Using a Hierarchical Clustering Copying Algorithm**
  
  Masahiro Yasugi and Taichi Yuasa

- **Implementation and Evaluation of Parallel FFT Using SIMD Instructions on Multi-core Processors**
  
  Daisuke Takahashi

- **Design Assists for Embedded Systems in the COINS Compiler Infrastructure**
  
  Tan Watanabe, Tetsuro Fujise, Koichiro Mori, Kyoko Iwasawa, and Ikuo Nakata

### Energy and Temperature-Aware Architectures

- **Cache Memory Architecture for Leakage Energy Reduction**
  
  Kiyofumi Tanaka

- **Exploring Temperature-Aware Design of Memory Architectures in VLIW Systems**
  
  José L. Ayala, Anya Apavatmrut, David Atienza, and Marisa López-Vallejo
Processor Design

A Reconfigurable Processor PARS and its Compiler................................................................. 91
  Kazuya Tanigawa, Ryuji Hada, Tetsuo Hironaka, and Akira Kojima

An Embedded Processor: Is It Ready for High-Performance Computing? ............................ 101
  Fumio Arakawa

Outline of OROCHI: A Multiple Instruction Set Executable SMT Processor .......................... 110
  Hajime Shimada, Takashi Shimada, Takekazu Tabata, Toshiaki Kitamura, Tomoya Kojima,
  Yasuhiko Nakashima, and Kenji Kise
