Proceedings of 2007 International Workshop on Signal Design and Its Applications in Communications

IWSNDA'07

September 23 - 27, 2007
Chengdu, China
# Table of Contents

**Preface**

**Conference Organization**

**I. Plenary Speeches**

1.1 New Direction of Wireless Technology.................................................1  
   Fumiyuki Adachi

1.2 On Almost Perfect Nonlinear Functions..............................................2  
   Claude Carlet

1.3 New Criteria and Related Techniques for 4G Wireless Systems..................3  
   Wei Chen

**II. New Concepts in Signal Design**

2.1 The Synthesis Methodology of Periodic Discretely Coded Sequences Formed Basing on Cyclotomic Classes with Basic Parameters Constraints.................................................4  
   Gantmakher Vladimir, Edemskiy Vladimir

2.2 Synthesis Results of the Periodic Discretely Coded Sequences with the Parameters Constraints Defined on the Basis of Cyclotomic Classes.................................................9  
   Gantmakher Vladimir, Edemskiy Vladimir

2.3 AOA Estimation Based on MP Algorithm in Beam-Space Using Rotational Invariance Technique........13  
   Yu Yang, Wang Jiang-ying, Yin Zhong-ke

2.4 Wideband Signal DOA Estimation Based on MP Decomposition..................18  
   Jianying Wang, Feng Wang, Zhongke Yin

2.5 Sphere-Decoding of OvTDM..................................................................22  
   Dongfeng Zhao, Daoben Li, Xin Jin

2.6 New Binary ZCZ Sequence Sets with Mismatched Filtering......................26  
   Evgeny I. Krengel

2.7 On a Convoluted-Time and Code Division Multiple Access Communication System Using Complete Complementary Codes..............................................................30  
   Tetsuya Kojima, Masahiro Aono

2.8 Construction and Application of OVSF-ZCZ Originated from LS and GO Sequences........34  
   Chao Zhang, Xiaoming Tao, Jianhua Lu

2.9 Chaotic Time Series Gray Correlation Local Forecasting Method Based on Fractal Theory..........39  
   Min Zhao, Yin-hai Fan, Jin Lv

2.10 Diversity-Based Sampling Rate Reduction for Digital UWB Communications...........44  
    Alex Cartagena Gordillo, Ryuji Kohno
2.11 Joint Multiple Watermarking and Non-Expansion Visual Cryptography------------------------48
    Hao Luo, Zhenfei Zhao, Jeng-Shyang Pan, Zhe-Ming Lu

2.12 On the Spreading Sequences with Perfect Periodic Crosscorrelation Properties------------------------53
    Lifang Feng, Pingzhi Fan, Li Hao

2.13 Two Classes of Large Families of Sequences with Low Correlation------------------------56
    Fanxin Zeng

2.14 Sequence Sets with Zero Correlation Zones Using Mismatched Filtering------------------------61
    Quang Khai Trinh, Pingzhi Fan and Xiaohu Tang

2.15 Designing of Fountain Codes with Short Code-Length------------------------65
    Hongjie ZHU, Chao Zhang, Jianhua Lu

III. Sequences and Cryptography
    3.1 A Criterion for Determining the Crosscorrelation of Binary Sequences from GMW Constructions--------69
        Shenghua Li, Lei Hu, Xiangyong Zeng

    3.2 A Secure Authenticated Encryption Scheme and Its Extension------------------------74
        Jianhong Zhang, Ji Cheng

    3.3 A New Prime-Phase Sequence Family with Low Correlation and Large Size------------------------79
        Nigang Sun, Lei Hu, Li Lu, Xuyun Nie

    3.4 A New Class of Binary Sequence Family with Low Correlation and Large Linear Complexity------------------------84
        Jin-Song Wang, Wen-Feng Qi

    3.5 High Security Frequency/Time Hopping Sequence Generators------------------------89
        Yun-Pyo Hong, Seok-Yong JIN, Hong-Yeop Song

    3.6 A Nonlinear Boolean Function with Good Algebraic Immunity------------------------94
        Ju Young Kim, Hong-Yeop Song

    3.7 New Constructions of ZCZ Sequence Set with Large Family Size------------------------99
        Xin Tong, Qiaoyan Wen

    3.8 An Algorithm for the $k$-error Linear Complexity of a Sequence with Period $2p^r$ over $GF(q)$------------------------104
        Jianqin Zhou

    3.9 A Security Video Watermarking Scheme for Broadcast Monitoring------------------------109
        Li Liu, Daiyuan Peng, and Xiaoju Li

IV. Sequences and Error Control
    4.1 On Shift Bound for Cyclic Codes by DFT with Unknown Elements------------------------114
        Junru Zheng, Takayasu KAIDA

    4.2 Consideration of Fast Simulation Technique of LDPC Code------------------------118
        Toshiyuki Shohon, Yaunori Hori, Haruo Ogiwara

    4.3 On the Existence of Multilevel Hadamard Matrices with Odd Order------------------------123
        Quang Khai Trinh, Pingzhi Fan, Ernst M Gabidulin, R.N.Mohan

    4.4 Quotient Subcode Set and Inverse Relative Dimension/Length Profile------------------------128
        Peisheng WANG, Yuan Luo, A. J. Han Vinck

    4.5 An Improved Genetic Algorithm for QOS Multicast Routing------------------------133
        Fan Yining, Yu Jianjun, Fang Zhimin
V. Miscellaneous Signal Designs

5.1 Partial Correlations of Galois Ring Sequences
Serdar Boztas, Parampalli Udaya

5.2 Autocorrelation of Some Quaternary Cyclotomic Sequences of Length 2p
Young-Joon Kim, Yun-Pyo Hong, Hong-Yeop Song

5.3 Expanded LS Code in MC-DC-CDMA System
Jie Shen, De-san Miao, Wei Jiang

5.4 Poly Phase Zero-Correlation Zone Sequences Based on Complete Complementary Codes and DFT Matrix
Chenggao Han, Takeshi Hashimoto, Naoki Suehiro

5.5 Finite-Length Sequence Pairs with Impulsive Convolution and Their Application to Asymmetric-Key Spread Spectrum Communication System
Yoshihiro Tanada

5.6 Properties of Even-Shift Orthogonal Sequences
Shinya Matsufuji, Takahiro Matsumoto, Kouki Funakoshi

5.7 The Construction of ZCZ Arrays Set Based on Interleaved Technique
Junping Gao, Qi Li, Jufeng Dai

5.8 Recursion Subspace-based Method for Bearing Estimation
Lei Huang, Xia LI, Liangwei Cai, Shunjun Wu

5.9 A New Family of Optimal Zero Correlation Zone Sequences from Perfect Sequences Based on Interleaved Technique
Zhengchun Zhou, Zhen Pan, Xiaohu Tang

5.10 Zero Correlation Distribution of ZCZ Sequences Obtained from a Perfect Sequence and a Unitary Matrix
Satoshi Uehara, Shuichi Jono

5.11 Generalized M-ary Related-Prime Sequences with Low Correlation
Yun Kyoung Han, Kyeongcheol Yang

5.12 Remote Sensing Image Compression Based on the Improvement of SPECK Algorithm
Kan Hong, Yulun An, Sheng Hong, Qing Chang, Qian Hong

5.13 Double Periodic Arrays with Good Correlation for Applications in Watermarking
Oscar Moreno, Jos’e Ortiz-Ubarri
VI. Spread-Spectrum and CDMA Applications

6.1 Digital Down Converter Based on Walsh Transform for Digital Receiver
   Bai Liyun, Wen Biyang
   219

6.2 ASIC Implementation of Low Power Decimation Filter for UMTS and GSM Sigma-Delta A/D
   Converter
   Chi Zhang, Erwin Ofner
   224

6.3 Code Generator Implementation on FPGA for an Optical ZCZ Code Using a Sylvester Type Hadamard
   Matrix
   Takahiro Matsumoto, Shinya Matsufuji
   228

6.4 Performance Analysis of Overlapped Multiplexing Techniques
   Hui Jiang, Daoben Li, Weidong Li
   233

6.5 Single-Carrier Time-Domain Overlapping Multiplexing for Uplink Wireless Communications
   Jing Wang, Daoben Li
   238

6.6 An Area Optimized Direct Digital Frequency Synthesizer Based on Improved Hybrid CORDIC
   Algorithm
   Ru Xin, Xiaotong Zhang, Han Li Qin Wang, Zhancai Li
   243

6.7 Triple-branch MRC Diversity in Weibull Fading Channels
   Zafiro G. Papadimitriou, Petros S. Bikfas, P. Takis Mathiopoulos, Nikos C. Sagias, Lazaros Merakos
   247

6.8 Coded N-ary PPM UWB Impulse Radio with Chaotic Time Hopping and Polarity Randomization
   Yun-Pyo Hong, Seok-Yong Jin, Hong-Yeop Song
   252

6.9 Multiple Access Performance of Ultra-Wideband Systems Based on GO Sequences
   Lin Wen, Li Hao, Moi Feng
   257

6.10 Adaptive MIMO Successive Interference Cancellation Decision Feedback Equalization RLS Algorithm
    for V-BLAST
   Yun Wang, Jinkuan Wang, Zhibin Xie
   261

6.11 Anti-impact and Over-loading Projectile Conformal Antennas for GPS
   Sun Lei, Zhu Jihong, Zhang He, Peng Xuelian
   266

6.12 A New Multiple Access Protocol Based on the Active State of Neighboring Nodes for Mobile Ad Hoc
    Networks
   Junhuan Feng, Liu Yang and Pingzhi Fan
   270

6.13 A Simple Scheme Based on TR-STBC over Multipath Fading Channels in MIMO System
   Jianglin Zhang, Jingfang Sun and Ping Yang
   275

6.14 Analysis of Multicarrier CDMA System with Adaptive Subcarrier and Power Allocation
   Jianli Xie, Cuiran Li, Chengshu Li
   279

6.15 An SI Transmission and the Optimal Detection/Decoding of the Coded ISI System
   Xilin Zhang, Wei Jiang, Daoben Li
   283

6.16 The Application of the ZCZ Sequence Pairs Set in QS-CDMA System
   Qi Li, Junping Gao, Xiaojun Zhao
   288

6.17 Receiver Design For OSDM Communication System
   Rongzhen Jin, Naoki Suehiro, Chenggao Han
   292

6.18 Increasing of Wireless Frequency Usage Efficiency Using Orthogonal Signal Division Multiplexing with
    Multiple Antennas
   Naoki Suehiro, Rongzhen Jin, Tadashi Ebihara, Chenggao Han
   295
## VII. Channel Estimation and Other Applications

1. **Blind Channel Estimation of MIMO-OFDM by Virtual Carriers**
   Lei Yu, Shenyuan Yang
   - p.299

2. **Performance Comparison between Two Pilot Symbol-aided Channel Estimation Schemes for OFDM**
   Mingqi Li, Yulin Liu, Qicong Peng
   - p.303

3. **Optimal Pilot Design for MIMO-OFDM System Channel Estimation in Time Domain**
   Han Wang, Jin Kuan Wang
   - p.307

4. **A Simple Channel Estimate Method of AS-TR-STBC System over Multipath Fading Channels**
   Jianglin Zhang, Jingfang Sun and Ping Yang
   - p.313

5. **An Improved PTA Method to Estimate the Residual Carrier Frequency Offset in Wireless OFDM Systems**
   Guangliang Ren, Jiangtao Xing, and Huiming Zhang
   - p.318

6. **Optimal Algorithm for “Out-Of-Sequence” Estimates with Arbitrary Communication Delays**
   Chenglin Wen, Quanbo Ge
   - p.323

7. **Preamble Design in Ultra Mobile Broadband Communication Systems**
   Michael Wang, Aamod Khandekar, Alex Gorokhov, Sandip Sarkar, Bhushan Naga, Ravi Palanki, Avneesh Agrawal,
   - p.328

8. **Fast Transform and Quantization Architecture with All-Zero Detection and Bit Estimation for H.264/AVC**
   Hiroki Kuniyasu, Tomoyuki Kashida, Tian Song, Takashi Shimamoto
   - p.334

9. **Virtually Bounded DSA Scheme and Its Analysis**
   Muhammad Qadeer Sharif, Said Boussakta
   - p.339

10. **An Internally Adaptive LDPC Coded Ultra Wideband-Impulse Radio System**
    Jianhua Yang, Dunfeng Zhao, Chunhui Zhao, Rui Xue
    - p.344

11. **Comparative Analysis of Covertness in UWB Systems**
    Zhang Zhuo, Xing Lei, Yin Hao, Yu Quan
    - p.349

12. **A Robust Speech Enhancement Scheme on the Basis of Bone-conductive Microphones**
    Mingzhe Zhu, Hongbing Ji, Falong Luo, Wei Chen
    - p.353

13. **Application of Generalized Predictive Control Algorithm on Fin Stabilizer at Zero Speed**
    Jin Hongzhang, Zhang Xiaofei, Luo Yanni
    - p.356

14. **The Prefix Design and Performance Analysis of the DFT-based Overlapped Frequency Division Multiplexing (OvFDM) System**
    Wang Jian, Yang Xun, Zhang Xilin, and Daoben Li
    - p.361

15. **Underwater Acoustic Feature Extraction Based on Bidimensional Empirical Mode Decomposition in Shadow Field**
    Ge Guangtao, Sang Enfeng, Liu Zhenfu, Zhu Beibi
    - p.365

16. **The Recursive Fusion Algorithm with Out-of-Sequence Measurements for Sensor Networks**
    Chenglin Wen, Xianfeng Tang, Quanbo Ge
    - p.368

17. **An Improved a Priori MMSE Spectral Subtraction Method for Speech Enhancement**
    Ning Cheng, Wen-Ju Liu, Bo Xu
    - p.373
