ISBN: 978-1-60560-068-0

Some format issues inherent in the e-media version may also appear in this print version.
## TABLE OF CONTENTS

### Airline Planning and Operations
- M. Clarke

### Multi-objective Approaches to Investigate Airline Schedule Robustness
- G. De Maere

### Optimized Control of the Number and Scale of Group Passengers (Paper)
- Q. Gao, J. Zhu, L. Ni

### Optimized Control of the Number and Scale of Group Passengers (Presentation)
- Q. Gao, J. Zhu, L. Ni

### The New Air Malta
- R. Gusman

### Automated Crew Assignment with Optimization
- No Author Given

### An Overview of Incorporating Revenue Management Effects into Near-term Fleet Assignment
- T. Jacobs, B. Smith, E. Johnson

### Role of Enterprise Analytics at United Airlines
- K. Saranathan

### A Column Generation Algorithm for Choice-based Network Revenue Management
- J. Miranda-Bront, I.I Méndez-Díaz, G. Vulcano

### Strategies for Accurate Passenger Volume Forecasting
- S. Mukherjee

### Schedule Design and Fleet Assignment with Demand Supply Interaction
- M. Pal

### State of the Airline Industry - Economic Forecast
- C. Ronchetto

### FFP: Frequent Forwarder Program - The Case for Cargo Loyalty Management
- R. Pilon

### Reinforcement Learning in Irregular Flight Operation
- O. Plernprapaporn, P. PPunyabugana, M. Lohatepanon

### Using Simulation to Appreciate Customer Experience at Dubai Airport
- J. Reavy

### AGIFORS Airline Operations 2004 Enabling the Airline Recovery Process
- No Author Given
OR Managers Meeting .................................................................................................................... 430

AGIFORS Revenue Management 2007 .......................................................................................... 437

Scheduling and Strategic Planning Conference ........................................................................... 450

Robust Operational Aircraft Routing (ROAR) ............................................................................. 472

Beyond Operations Research - Continuous Improvement at United Airlines ......................... 525

Economic Analysis of Spider Web Airline Networks ................................................................... 560

Applying Multi Objective Micro Genetic Algorithm in Irregular Airline Operation to Solve Combine and Reroute Problem ....................................................................................... 599

Research on the Optimization Control Method of the Quantity of Aperiodic Ticket (Paper) ................................................................................................................................. 619

Research on the Optimization Control Method of the Quantity of Aperiodic Ticket (Presentation) .............................................................................................................................. 629
