Some format issues inherent in the e-media version may also appear in this print version.
The Proceedings of the ISCA 23\textsuperscript{rd} International Conference on Computers and Their Applications, held in Cancun, Mexico, April 9-11, 2008.

SPONSOR

The International Society for Computers and Their Applications - ISCA

INTERNATIONAL PROGRAM COMMITTEE

Conference Chair
Narayan Debnath
Winona State University

Program Chair
Thomas Philip
Mississippi State University

Sultan Aljahdali, Taif U., Saudi Arabia  
Hisham Al-Mubaid, U. of Houston, USA  
Adnan Anbuky, AUT U., New Zealand  
Behnam Arad, California St. U., Sacramento, USA  
Kamel Barkaoui, CNAM, France  
Mark Burgin, UCLA, USA  
Suresh Chandra, NC A&T State U., USA  
Fouad B. Chedid, Notre Dame University, France  
Xiao Chen, Texas State U., USA  
Andy Connor, AUT U., New Zealand  
Walter Dosch, U. of Lübeck, Germany  
Marc Garbey, U. of Houston, USA  
James Graham, U. of Louisville, USA  
Bidyut Gupta, Southern Illinois U., USA  
Yaakov HaCohen-Kerner, Jerusalem College of Technology, Israel  
Fred Harris, Jr., U. of Nevada, Reno, USA  
Victoria Hilford, U. of Houston, USA  
Gongzhu Hu, Central Michigan U., USA  
Donna L. Hudson, UCSF, USA  
David Jeff Jackson, U. of Alabama, USA  
Haesun Lee, U. Texas of the Permian Basin, USA  
Chung-Hong Lee, NKUAS, Taiwan  
Wei Li, Nova Southern U., USA  
Sin Ming Loo, Boise St. U., USA  
Wenbin Luo, St. Mary's University, USA  
Prabhat Mahanti, U. of New Brunswick, Canada  
William Perrizo, North Dakota St. U., USA  
David C. Pheanis, Arizona St. U., USA  
Kenneth Ricks, U. of Alabama, USA  
Ahmed Salem, Calif. State U., Sacramento, USA  
Ahmed H. Salem, Hood College, USA  
John Weiss, S. Dakota School of M&T, USA

* All published papers have been peer reviewed.  
** This publication is abstracted and indexed in INSPEC and DBLP.
# TECHNICAL PAPER INDEX

## INTELLIGENT SYSTEMS

- **Incremental Learning Using Partly Labeled Data**  
  Wael Emara and Mehmed Kantardzic (University of Louisville, USA) ................................................................. 1

- **Supporting Knowledge Management Within Process and Group Settings Using Visual Topic Maps**  
  Les Miller, Sree Nilakanta, and Meghana Rao (Iowa State University, USA) .......................................................... 9

- **Silicon Prediction Models for Blast Furnace**  
  Ritu Singh and Toma Hentea (Purdue University Calumet, USA) .............................................................. 15

- **Intelligent Computer-Aided Control in Flexible Manufacturing System**  
  Joze Balič, Franci Čuš (University of Maribor, Slovenia), and Janez Kopač (University of Ljubljana, Slovenia) ................................................................. 21

- **Usage of the HMM-Based Speech Synthesis for Intelligent Arabic Voice**  
  Tamer S. Fares (Modern Academy in Maadi, Egypt), Awad H. Khalil (The American University in Cairo, Egypt), and Abd El-Fatah A. Hegazy (Arab Academy for Science, Egypt) .................................................... 27

- **Implementation of a Pairwise Sequence Alignment Algorithm on a Distributed Java Environment**  
  Haklin Kimm and Glenn Miller (East Stroudsburg U. of Penn, USA), and Haesun K. Lee (University of Texas, USA) ........................................................................... 33

- **Using Formal Concept Analysis for Flexible Querying Optimization**  
  Amel Grissa Touzi, Minyar Sassi and Habib Ounelli (ENIT, Tunisia) ................................................................. 39

## NEURAL NETWORKS

- **A Practical Method to Implement Asynchronous Iterative Algorithms on MPI and a Case Study for Asynchronous Self-Organizing Maps**  
  Jie Hu and Bishow Paudel (St Cloud State University, USA) ................................................................................. 47

- **Optimal Statistical Artificial Neural Networks for Arabic Character Recognition**  
  Ahmad M. Sarhan (New York Institute of Technology, UAE) ................................................................................. 53

- **On the Selection of the Fitness Function Heuristics and Prediction Parameters for an Adaptive Neural Network Fuzzy Inference Controller**  
  Gordon K. Lee (San Diego State University, USA) and Tang Ping (Guangdong University of Technology, China) ................................................................................. 59
COMPUTERS IN HEALTH

Investigation of Random Forest Performance with Cancer Microarray Data  
Myungsook Klassen, Matt Cummings, Griselda Saldana (California Lutheran University, USA) .............................................. 64

Toward an Intelligent Data and Visualization Desk for Endovascular Surgery  
M. Garbey, C. Picard, V. Hilford, and S. Vadakuttu (University of Houston, USA) ................................................................. 70

Intelligent Model for Avian Influenza Virus Spreading  
Honoriu Vălean, Adina Pop, and Camelia Avram (Trecnical University of Cluj – Napoca, Romania) ................................. 77

VIDEO PROCESSING

Motion Vector Search Modified to Reduce Encoding Time in H.264 and VC-1  
Mohamed El-Sharkawy (Purdue School of Engineering and Technology, USA) ................................................................. 83

Radio Spectrum Management - An International Perspective  
S. Srinivasan (University of Louisville, USA) ...................................................................................................................... 90

Fast H.264 Video Codec Standard  
Mohamed El-Sharkawy (Purdue School of Engineering and Technology, USA) ................................................................. 95

SIGNAL PROCESSING

Architecture-specific Implementation of Haar-based MAD Denoising  
S. Ibrahim, R. Ammar, I. Greenshields, and H. Sholl (University of Connecticut, USA) ...................................................... 102

A Data Stream Clustering Algorithm Using Discrete Cosine Transform  
Damalie Oyana (Southern Illinois University Carbondale, USA), Cheng Luo (Coppin State University, USA), Wen-Chi Hou, Zhewei Jiang and Dunren Che (Southern Illinois University Carbondale, USA) ........................................ 107

Time/Performance Tradeoffs in Hard Real-Time Denoising of US Signals  
S. Ibrahim, R. Ammar, I. Greenshields, and H. Sholl (University of Connecticut, USA) ...................................................... 113

EDUCATION

A Graph-Based Course Recommender System  
Alexey Kalinin and Perry Fizzano (Western Washington University, USA) ................................................................. 118

A Novel Platform of Text Relatedness Evaluation for Plagiarism Detection  
Chung-Hong Lee (National Kaohsiung University of Applied Sciences, Taiwan) and Hsin-Chang Yang (National University of Kaohsiung, Taiwan) ................................................................. 124

Fast Implementation of VC-1 Video Codec Standard  
Mohamed El-Sharkawy (Purdue School of Engineering and Technology, USA) ................................................................. 130

MULTIPROCESSING

Formal Automated Transformation of SDL Specifications to Estelle Specifications  
Hazem El-Gendy (Ministry of Endowments, Egypt), Nabil El Kadhi (EpiTech, France), and Narayan Debnath (Winona State University, USA) ................................................................. 136

Reliability of Computer Communication Networks Using Binary Decision Diagrams  
Harpreet Singh, Adam Mustapha, Vijay Sharma, Mark Hua (Wayne State University, USA), and Grant R. Gerhart (U. S. Army Tank Automotive Research, USA) .................................................. 142
Architecture-based Performance and Reliability Analysis of Concurrent Applications with Hyperexponential Component Execution Times
Rehab A. El Kharboutly, Reda Ammar and Swapna S. Gokhale (University of Connecticut, USA) ............ 148

Low FM: A Robust Non-Blocking Low Frequency Messaging Checkpoint for Parallel/Grid Applications
Gamal El-Sayed and Ian Greenshields (University of Connecticut, USA) ........................................ 154

INFORMATION SIFTING

Hierarchical Template Matching For Real-Time Symbol Detection
John M. Weiss (South Dakota School of Mines and Technology, USA) .................................................. 159

Distributed Localization in Sensor Networks Using Self-Organizing Maps
Jie Hu (St Cloud State University, USA) ........................................................................................................ 165

Modified DTTL for 16QAM Symbol Recovery of DOCSIS 2.0 Standards
Amir Ibrahim, Dan Chappell, Mohammed El Sharkawy, Kim Dongsoo and Maher Rizkalla (Purdue School of Engineering and Technology, USA) ............................................................... 169

A Text Processing System for Mining Association Rules
Pengwei Yang and Gongzhu Hu (Central Michigan University, USA) ...................................................... 175

SPECIAL SESSION on SOFTWARE SYSTEMS AND APPLICATIONS

Transformational Design of a Fault Tolerant Sequential Memory Component
Walter Dosch (University of Lubeck, Germany) ............................................................................................ 181

A Synchronous/Asynchronous Multi-Master Replication Method
Amer Chahine and Ramzi A. Haraty (Lebanese American University, Lebanon) ........................................ 189

Improving the Accuracy of Support Vector Machines
E. A. Zanaty and Sultan Aljahdali (Taif University, Saudi Arabia) ............................................................... 196

Testing: Organization and Evaluation
M. Burgin (University of California, Los Angeles, USA) and N. Debnath (Winona State University, USA) ........................................................................................................................................... 203

SOFTWARE

The Value of Material-Orientation in the Separation of Concerns
Jody L. Sharpe and Mansour K. Zand (University of Nebraska-Omaha, USA) ........................................... 209

Factors Affecting the Quality of Software Development Process
Khalid A. Buragga (King Faisal University, Saudi Arabia) and Ayad Y. Aldaijy (Royal Saudi Air Force, Saudi Arabia) .............................................................................................................................. 215

A Perspective on Security Risk Management of SCADA Control Systems
Mariana Hentea (Excelsior College, USA) ...................................................................................................... 222

Anatomy and a Framework of Mobile Games
Chong-wei Xu (Kennesaw State University, USA) ......................................................................................... 228
SPECIAL SESSION on
SOFTWARE ENGINEERING AND INFORMATION TECHNOLOGY

MVC-Based Requirements-Aware Design for Web Applications
Marcel Karam (American University of Beirut, Lebanon) and Jad Kawtharani (Arab Open University, Lebanon) ................................................................. 233

Online Recruitment - An Intelligent Approach
Samah Rifai and Ramzi A. Haraty (Lebanese American University, Lebanon) ........................................ 240

Collaboration of Software Engineering Courses to Enhance Students’ Learning Experience
Thomas Philip (Mississippi State University, USA) ................................................................. 246

An Agent Based Framework for Peer to Peer Distributed Computing
Subhrabrata Choudhury, Devlina Mukherjee and Paramita Chakraborty (National Institute of Technology-Durgapur, India), Narayan Debnath (Winona State University, USA), and Ilhyun Lee (University of Texas - Permian Basin, USA) ........................................ 252

COMPUTER SECURITY

Graph Coloring for Enforcing Password Identification against Brute Force Attacks
Juan M. Gutiérrez Cárdenas, Wilfredo Bardales Roncalla, and Lenin Orihuela Ordóñez (Universidad Católica de San Pablo, Perú) ................................................................. 258

An Ontological Model for Assessing Security Risk Impact in SCADA Systems
Jian Guan, James H. Graham, Thomas A. Harris, and Patricia A. Ralston (University of Louisville, USA) ................................................................. 264

A Method for Detecting Windows Rootkits
Douglas R. Wampler (Indiana Department of Correction, USA) and James H. Graham (University of Louisville, USA) ................................................................. 270

COMPUTER APPLICATIONS

A Behavioral Simulator for PCI-Express Transaction Layer
Behnam S. Arad and Hong Chang (California State University, Sacramento, USA) ........................................ 275

An Interactive Computer Design in Multisim
Hassan Farhat (University of Nebraska at Omaha, USA) ........................................................................ 281

Interaction-Based Mechanisms to Model Hierarchical Architectures
Abdelkrim Amirat and Mourad Oussalah (University of Nantes, France) ........................................ 287

Automated Calibration of Automotive Test Instrumentation
David C. Pheanis (Arizona State University, USA) and Scott M. Creasman (Western Microsystems, USA) ................................................................. 293

An Advanced Fault Data/Information Presentation in Power Systems
Mladen Kezunovic, Biljana Matic Cuka, Ozgur Gonen, and Noah Badayos (Texas A&M University, USA) ................................................................. 299
