# TABLE OF CONTENTS

**VOLUME 1**

**A Case-Based Approach to Understand the Complexity of Causal Connections Related to Well Integrity Problems** ........................................................................................................ 1  

**Analysis of Casing-Shift Problems in Compacting Reservoirs** ........................................... 15  
Yasuo Jinnai, Nobuo Morita

**Geomechanics Enables the Success of Horizontal Well Drilling in Libya: A Case Study** .................................................................................................................................................. 30  
Kaibin Qiu, Julio Gonzalez Felgueroso, Gabino Lalinde, Abdulmagid Naas, Bernard Coste, John Fuller

**Connector Conductor Wells Technology in Brunei Shell Petroleum Achieve High Profitability Through Multiwell Bores and Downhole Connections** ............................................. 43  
Shaikhan Al-Khodhori, Hamoud Al-Riyami, Philip Holweg, John Wright

**Capillary-Tube Technology in Downhole Pressure Acquisition and its Application in Campos Basin, Brazil** .................................................................................................................................................. 48  
Pier Giovanni Cassarà, Juan Carlos Burgoa, Edgar Almanza, Paul Ringgenberg

**US Chemical Safety Board: Fatal Oilfield Investigation and Industry Lessons Learned** .............................................................................................................................................. 64  
Johnnie Banks

**Effects of Boundary Conditions and Friction on Static Buckling of Pipe in a Horizontal Well** .................................................................................................................................. 78  
Guohua Gao, Stefan Miska

**Deepwater Bitumen Drilling: What Happened Downhole?** ................................................. 95  
Gang Han, Keith Hunter, Jamie Ressler, Jerry Osmond

**Complex Extended-Reach Drilling to Exploit Reservoirs in Environmentally Sensitive Area, Offshore California** .................................................................................................................. 111  
Gary P. Hertfelder, Mathias Menge, Max Patel, Jon Ruszka

**A Design Strength Equation for Collapse of Expanded OCTG** ............................................. 128  
Frans J. Klever

**Development and Testing of a Rig-Based Quick Event Detection System to Mitigate Drilling Risks** .............................................................................................................................................. 150  
Walt Aldred, Remi Hutin, John C.(Chris) Luppens, Graham Ritchie

**Successful Application of Casing-While-Drilling Technology in a Canadian Arctic Permafrost Application** .................................................................................................................. 162  
H. Vrielink, J.S. Bradford, L. Basarab, C.C. Ubaru, Hughes Christensen
Remote Operations, the Future of Drilling: Directional Drilling Remote Control
Ignacio Gorgone, Juan Gomez, Gary Uddenberg

Mitigating Risks From Waste Subsurface Injection Through Accurate Downhole Pressure Measurement, Analysis, and Fracture Monitoring
T.A. Shokanov, F.E. Fragachan, S.B. Feyereisen, J.M. Greener

Experimental Study and Modeling of Yield Power-Law Fluid Flow in Annuli with Drillpipe Rotation
Ramadan Ahmed, Stefan Miska

Installing 56 Surface Casing Strings in 40 Well Slots Successfully in Bohai Bay, China
Frank Fu, Stephen C. Actis, Kevin Strachan

Remote HP/HT Wells in Egypt
Tom Bruce

Troll West Oilfield Development—How a Giant Gas Field Became the Largest Oil Field in the NCS through Innovative Field and Technology Development
Richard Dyve Jones, Erland Saeverhagen, Arve K. Thorsen, Sveinung Gard

How Effective is Current Solids Control Equipment for Drilling Fluids Weighted with Micron-Sized Weight Material?
Jarrod Massam, Shannon Stocks, Doug Oakley, Colin Bremner

Drillstring Solutions Improve the Torque-Drag Model
Robert F Mitchell

Analysis of Control Lines Strapped to Tubing
Robert F Mitchell, S.T. Ellis, G. Slappas, A. Colyer

Optimized Deepwater Cement Design for Record-Length Expandable Liner
Don Schultz, Greg Pollard, George Fuller, Joey Langlinains, Michael Serio, Jasen Bradley

Investigation of Factors for Strengthening a Wellbore by Propping Fractures
Hong (Max) Wang, Mohamed Y. Soliman, Brian F. Towler

VOLUME 2

Improving Hole Quality and Casing-Running Performance in Riserless Topholes—Deepwater Angola
T.J. Akers

Shallow Hazards Planning in Nigeria Deepwater—Erha-7 Well
E. M. Garcia, T. J. Akers, J. Holster

Successful Drilling Management of Mass Transport Complexes (MTC's) in Deepwater Angola
B.A. Elieff, C.G. Page, V. Gupta

High Speed Telemetry Drill Pipe Network Optimizes Drilling Dynamics and Wellbore Placement

Novel Automation Interface Improves Drilling Efficiency and Reliability
F. Florence, M. Guggari, W.L. Koederitz, H. Rodriguez, C. O’Kelly, D. Russell
The Use of Multilateral Well Designs for Improved Recovery in Heavy Oil Reservoirs
Steven Fipke, Adriano Celli

Application of Connection Productline Evaluation
James P. Powers, David A. Baker, Michael S. Cheif

Reexamination of PDC Bit Walk in Directional and Horizontal Wells
S. Chen, G.J. Collins, M.B. Thomas

Total BHA Reliability—An Improved Method to Measure Success
Jost Brehme, John T. Travis Jr.

A Novel Heat-Activated RSF to Treat Severe Cases of Lost Circulation: Case Histories from Mexico
Guillermo Tirado, Cesar Augusto Pliego, Ariel Rendon, Ian Fowler, Jesus Marín, Hector Benito Ramirez, Eduardo Soriano

A Systematic Approach to a Better Understanding of the Concentric Hole-Opening Process Utilizing Drilling Mechanics and Drilling Dynamics
Ian Thomson, Steven Radford, Jim Powers, Les Shale, Hughes Christensen, Mark Jenkins

Surface BOP Operations from a Multi-Service Vessel
Colin Johnston

Drilling Vibrations Modeling and Field Validation
J.R. Bailey, E.A.O. Biediger, V. Gupta, D. Ertas, W.C. Elks, F.E. Dupriest

Successful Implementation of First Closed Loop, Multiservice Control System for Automated Pressure Management in a Shallow Gas Well Offshore Myanmar
Paul Fredericks, Don Reitsma, Tom Runggai, Neil Hudson, Ralf Zaeper, Oliver Backhaus, Maximo Hernandez

Method to Eliminate Lost Returns and Build Integrity Continuously With High-Filtration-Rate Fluid
Fred E. Dupriest, Marty V. Smith, C. Sabine Zeilinger, I. Nissan Shoykhet

Use of New Hydrostatic Packer Concept to Manage Lost Returns, Well Control, and Cement Placement in Field Operations
Fred E. Dupriest

Building and Testing a Battery-Operated Subsea Shut-Off System
A.S. Bamford, C.A. Mowat, L.S. Wickramaratne, M.A. Teixeira

Present and Future Well Intervention on Subsea Wells
Siri Nordbø Jessang, Robert Friedberg, Per Buset, Bernt Gramstad

Managed Pressure Drilling Success Continues on Auger TLP
Mark J. Chustz, Larry D. Smith, Dwayne Dell

Challenges of Directional Drilling Through Salt in Deepwater Gulf of Mexico
R.R. Israel, P. D'Ambrosio, A.D. Leavitt, J.M. Shaughnessey, J. Sanclente

Concurrent Rotary-Steerable Directional Drilling and Hole Enlargement Applied Successfully: Case Studies in North Sea, Mediterranean Sea, and Nile Delta
Steve Jones, Junichi Sugiura

What Really Happens to High Strength Drillpipe When Taking a Sour-Gas Kick?
H.F. Spoerker, W. Havlik, M.J. Jellison

A New Mud Pulse Telemetry System for Enhanced MWD/LWD Applications
C. Klotz, P. Bond, I. Wasserman, S. Priegnitz
MPD Operation Solved Drilling Challenges in a Severely Depleted HP/HT Reservoir
  Knut S. Bjørkevoll, Dag Ove Molde, Rolv Rommetveit, Svein Syltøy

Evolution of Drilling Programs and Complex Well Profiles Drive Development of Fourth-Generation Hardband Technology
  Alvaro Chan, Dan Hannahs, Michael J. Jellison, Michael Breitsamer, Daniel J. Branagan, Harvey Stone, Greg Jeffers

A Step Change in Total System Approach Through Wired Drillpipe Technology
  Vebjørn Nygaard, Mohammad Jahangir, Trond Gravem, Eugene Nathan, John Evans, Mike Reeves, Henrik Wolter, Sigve Hovda

Reducing Equipment Integration Cost and Risk in New Rig Construction
  David Reid, John Hoeftich, Jeremy Ogg

Offshore Field Test of a New Integrated System for Real-Time Optimisation of the Drilling Process

Successful Field Appraisal Well Makes Single-Diameter Wellbore a Reality
  Rob McKee, Jerry Fritsch

Solid Expandable Tubular System Mitigates High-Pressure Zones with Record Length
  W. H. Bagley, Don Schultz, Joe Mueller, Marcus Vondenstein, Harsh Chowdhary

Simulations Comparing Different Initial Responses to Kicks Taken During Managed Pressure Drilling
  Asis K. Das, John Rogers Smith, Philip J.Frink

Using the Last Several Years of QHSE Data to Improve the Next Several Years of QHSE Performance
  Rick McClaine, Joe Stough

Barnett Shale Drilling and Geological Complexities—Advanced Technologies Provide the Solution
  Sandeep Janwadkar, Stephen Morris, Mark Thomas, Garrett Jackson, Geoff Roberts, David Fortenberry, Mark Kramer, Devin Dennie

Quick Intervention: Going Lighter and Running Faster With Gastight Rotary Shouldered Connection!
  R.C. Griffin, G. Plessis, D. Chin, Grant Prideco

Cementless Multi-Zone Horizontal Completion Yields Three-Fold Increase
  Brad Maddox, Molly Wharton, Ron Hinkie, Brent Balcer, Mark Farabee, John Ely

Novel Stabilizers for Casing Drilling Simplify BHA, Handling, and Cost
  David Limbert, Steve Langford, Grant Prideco, John Gammage

Offshore Underbalanced Drilling—The Challenge at Surface
  Geoff Gough, Robert Graham

Multi-Diameter String Tools Deliver Lower Cost-Per-Foot in Demanding Rotary Steerable Applications
  Steve Barton, Wayne Jones, Rick Young, Helge Rorvik

Design and Qualification of Critical Landing String Assemblies for Deepwater Wells
  Andre Cantrell, Christine Beiriger, Brad Hubbard

Surface BOP System for Subsea Development Offshore Brazil in 1,900 m of Water
